# Redistribution Of Original Created Works

## Redistribution Of Original Created Works Fees: Index Creation

The Redistribution of Original Created Works: Index Creation Fee is charged for the Redistribution of Original Created Works which were created using Real-Time Data Information Products and in case of Euronext Milan Delayed Data and After Midnight Data Information Products, in whole or in part, for the calculation of one or more indices that will be Redistributed. Where such index is calculated on behalf of a third party and some or all of the intellectual property rights of whatsoever nature in that index will vest in that third party or its licensors (i.e., an Index Provider Service), the Supplemental Fees will apply in addition to the Redistribution of Original Created Works: Index Creation Fee.

The Redistribution of Original Created Works Fee: Index Creation is based on the number of Users that Use, via the Contracting Party, its Affiliates and/or one or more third parties, indices that are calculated by the Contracting Party and/or its Affiliates using the Information. This number should include Devices, where a Device cannot be allocated to a natural person. Where this number fluctuates, the number should be used that predominates throughout the year. If this number cannot be established, the highest tier applies.

In the event that the indices, calculated by the Contracting Party and/or its Affiliates using Information, are solely Publicly Displayed (i.e., if such indices are solely Redistributed without the

requirement of registration of access IDs to access and/or view such indices and no charges are applicable to access and/or view such indices), the tier of 1-10 Users shall apply.

The Use of Real-Time Data in the calculation of the net asset value (or “**NAV**”) and indicative net asset value (or “**INAV**”) is not Index Creation. Such Use falls under Category 4 Non-Display Use if it is for Internal Use only, and the Redistribution of Original Created Works: Other if it is on behalf of third parties.
