PREFACE

PURPOSE

This document sets out the client messages specifications for Optiq OEG using the SBE format. More specifically, it describes the contents of administrative and application messages and provides detailed field descriptions.

TARGET AUDIENCE

This document should be read by Euronext’s clients developing a Front-End Trading Access.

SCOPE

The single set of messages used for Optiq in SBE protocol is provided in the document. Harmonization between Cash and Derivatives messages is completed.

The scope of this document is listed below¹ (✓ In scope, ✗ Out of scope):

| Optiq Segment | Segment Value | In/Out of Scope | SBE Versions* |
|--|---------------|-----------------|---------------|
| Euronext Cash Market | | | |
| Equities EQ | 1 | ✓ | 116 – 352 |
| Funds FND | 2 | ✓ | 116 – 352 |
| Fixed Income FXI | 3 | ✓ | 116 – 352 |
| Structured Products SP | 4 | ✓ | 116 – 352 |
| Block BLK | 14 | ✓ | 110 – 352 |
| Irish Bonds and Funds IBF | 16 | ✗ | - |
| Euronext Derivatives Market | | | |
| Commodity Derivatives CMO | 8 | ✓ | 216 – 352 |
| Index Derivatives IDD | 11 | ✓ | 216 – 352 |
| Equity Derivatives EQD | 12 | ✓ | 216 – 352 |
| Euronext Indices | | | |

¹ How to read the “SBE versions” information provided in the table:

- • When two version numbers are provided with “-” between them, it means that any version between those two versions can be used to access the Optiq segment (SBE forward/backward compatibility).
- • When two version numbers are provided with “/” between them, it means that members must use the last version to access the Optiq segment because the SBE compatibility is broken between them.
- • When only one version is provided, it means that this version only can be used to access the Optiq segment.

| Optiq Segment | Segment Value | In/Out of Scope | SBE Versions* |
|---|---------------|-----------------|---------------|
| Indices Indices | 9 | ✘ | - |
| Euronext Approved Publication Arrangement (APA) Facility | | | |
| Trade Reporting and Publication TRP | 10 | ✘ | - |
| Other Markets | | | |
| Luxembourg Stock Exchange BDL | 5 | ✔ | 116 – 352 |

| 6. FIELD DESCRIPTION..... | 155 |

1. INTRODUCTION

The Euronext Optiq Order Entry Gateway (OEG) provides high-speed and real-time connection to the Euronext markets.

The system has the following high-level features:

- **Predictability**
- **Ultra-low latency**
- **MiFID II compliance**
- **Cash & Derivatives message harmonization**
- **High availability**
- **Reliable network solution**
- **High level of scalability**
- **Access to every Euronext Market**

This document provides detailed information about the features of the system to support the development of client applications.

1.1 MIFID II RELATED FIELDS AND VALUES

The following sections describe (i) the fields available in the messages, (ii) system functionalities based on the MiFID II requirements and (iii) related services provided by Euronext to its clients.

In this document term 'MIFID II' includes MIFID (2014/65/EU), MIFIR EU (600/2014) as well as the texts of level 2 and 3.

1.1.1 Maintenance of Relevant Data relating to Orders in Financial Instruments

The delegated act "supplementing Regulation (EU) No 600/2014 of the European Parliament and of the Council with regard to regulatory technical standards for the maintenance of relevant data relating to orders in financial instruments" issued by ESMA within the MiFID II requires trading venues to be able to supply to the regulators a wide range of order related data.

In order to fulfil this requirement, members are requested to provide data in the fields available in the Optiq messages, e.g. **NewOrder** (01) message. The sub-set of fields present in different messages for compliance with the acts are listed in the table below. These fields are also included in the description of each individual message:

| FIELD IN THE ACT | OPTIQ FIELDS (SBE & FIX) | USED IN |
|----------------------------|-------------------------------|--|
| Client identification code | ClientIdentificationShortCode | New Order (01) Ack (3) Fill (04) Kill (05) Cancel Replace (06) Reject (07) Quotes (08) Quote Request (10) Cancel Request (12) Mass Cancel (13) Mass Cancel Ack (14) Open Order Request (15) Ownership Request (18) Price Input (28) |

| | | |
|---------------------------------|----------------------------------|---|
| | | Liquidity Provider Command (32) User Notification (39) MM Sign-In (47) MM Protection Request (62) New Wholesale Order (64) Request For Implied Execution (66) Cross Order (67) |
| Investment decision within firm | InvestmentDecisionWFirmShortCode | New Order (01) Quotes (08) New Wholesale Order (64) Cross Order (67) |
| Execution within firm | ExecutionWithinFirmShortCode | New Order (01) Cancel Replace (06) Quotes (08) Quote Request (10) Cancel Request (12) Mass Cancel (13) Open Order Request (15) Ownership Request (18) Price Input (28) Liquidity Provider Command (32) User Notification (39) New Wholesale Order (64) Request For Implied Execution (66) Cross Order (67) |
| Non-executing broker | NonExecutingBrokerShortCode | New Order (01) Quotes (08) New Wholesale Order (64) Cross Order (67) |
| MiFID Indicators | MiFIDIndicators | New Order (01) Cancel Replace (06) Quotes (08) New Wholesale Order (64) Request For Implied Execution (66) Cross Order (67) |
| Trading Capacity | Trading Capacity | New Order (01) Quotes (08) New Wholesale Order (64) Cross Order (67) |

To reduce latency impacts associated to the use of these fields and to avoid sensitive information from being routed over the non-encrypted order interface, the optimized representation of this data is transmitted to Euronext via short codes. Mapping of short codes to required data for reporting may be provided by clients by end of business on the trading day when trade has occurred using the process described below:

- Clients have access to the Customer Web portal where they are able to input the MiFID II compliant data for each required field. This data could be associated to the short codes, which may also be provided by the clients via the Customer Web Portal. For Example:
 - ◆ To identify a non-DEA client on behalf of which an order was entered in the system, members are requested to enter their MiFID II Client identification code (as described in the associated act): Where the client is a legal entity, the LEI code of the client shall be used. Where the client is not a legal entity, the National ID shall be used.

- When this code is entered, the clients is able to assign a short code to it in the Customer Web Portal. This short code may be used in the **NewOrder** (01) message in the field *ClientIdentificationShortCode*.
- For clients using algorithms in their trading, guidelines for the way they should generate and populate the short codes associated to the executing (*ExecutionWithinFirmShortCode*) and investment decision making (*InvestmentDecisionWFirmShortCode*) should be set based on the setting of the Algo Indicator in the order messages:
 - If the Indicator is set to “0: No algorithm involved” then all positive values (from 0 to $2^{31}-1$) would represent a human trader,
 - If the indicator is set to “1: Algorithm involved” clients are requested to populate this field with the ranges of values identified below. No technical checks would be performed to validate correctness of the ranges used by the system:
 - In-house algorithms: with positive range of values between 0 to $2^{31}-1$
 - ISV algorithms: negative range of values between $-2^{31}+1$ to -1

Clients should take the following into consideration for population of short codes in inbound messages:

- *ExecutionWithinFirmShortCode* is mandatory to be provided in all inbound application messages.
- *InvestmentDecisionWFirmShortCode* is mandatory to be provided in when the order is flagged as Liquidity Provider, Related Party or House. It does not apply if an order is flagged as DEA. It is optional in other cases.
- *ClientIdentificationShortCode* is mandatory when an order is flagged as Client, RO or DEA. It is optional in other cases.
- *NonExecutingBrokerShortCode* is optional in all cases.

In the order messages short codes are used for regulatory reporting. In most other messages these codes, if identified, are to be used for purposes of identifying individual market makers and Kill command.

1.1.2 Reporting to Competent Authorities

MiFID II requires market participants to report additional transaction information to the regulators. The requirements for this reporting are summed up in the delegated act “supplementing Regulation (EU) No 600/2014 of the European Parliament and of the Council with regard to regulatory technical standards for the reporting of transactions to competent authorities” issued by ESMA within the MiFID II Regulatory Technical Standards. Euronext provides an Approved Reporting Mechanism (ARM) service to its clients, which allows them to comply with these requirements in a stream-lined manner.

Clients established within the European Union, are able to subscribe to this optional supplementary service. For clients established outside of the European Union the reporting is done by the exchange on a compulsory basis, with client participation in the service and provision of data required by this act being mandatory.

1.2 FUTURE USE

In preparation for various functionalities expected to be implemented in the future on Optiq a number of messages and fields were added and flagged “For Future Use”.

Details of functionalities flagged in the specifications as for ‘Future Use’ are provided for information purposes only, and may change significantly until such time as the finalised specifications for the relevant service are communicated to clients.

The associated messages and effective use of fields will not be technically supported until the announced date for implementation of these functionalities. Submission of inbound messages that are flagged as ‘Future Use’ will be rejected by the system. Such fields or values, if provided in supported inbound messages, will be ignored by the system.

This behaviour applies to:

- **Messages** flagged as ‘For Future Use’;
- **Fields** flagged as ‘For Future Use’, ‘Pending Regulatory Approval’ and when Used For is set to ‘Derivatives’.

Note: Fields and Values for future in the messages structures are represented in *italic and in grey*.

1.3 GLOSSARY

This section provides some high-level definitions of commonly used terms in this document. Please note that some of these terms are described in more details in the dedicated sections within this document.

- **Optiq:** is Euronext’s multi-market full trading chain technology platform.
- **Order Entry Gateway (OEG):** is the software that manages the access for exchanges’ clients, and acts as the private interface between the clients and the Optiq matching engine.
- **Market Data Gateway (MDG):** is the software that provides high-speed, real-time market data (public messages) for the Euronext markets.
- **Matching Engine:** is the software that manages the trading services for the Euronext markets.
- **Optiq Segment:** defines a universe of instruments habitually sharing common trading properties. An OPTIQ Segment can contain one or several asset classes. An OPTIQ Segment access is setup through a Logical Access.
- **Partition:** is a technical subdivision of an Optiq Segment. An Optiq Segment may be comprised of at least one or several partitions, physically independent one from one another, but connected to each other within the context of the Optiq Segment. Instruments may move from one partition to another within an OPTIQ segment.
- **Logical Access:** is an OEG (Order Entry Gateway) entry point, setup for clients to connect to a single OPTIQ Segment, containing the technical configuration for the client’s connectivity. Multiple logical accesses can share the same SFTI line.
- **OE Session:** the individual physical connection, to a single Partition. A single Logical access may have as many OE sessions as there are partitions in the Optiq segment.
- **Simple Binary Encoding (SBE):** is the open source binary protocol used as the solution for market data and order entry messaging in Optiq. SBE was designed within the FIX Protocol Limited organization, with a focus on low-bandwidth utilization and the goal of producing a binary encoding solution for low-latency financial trading.
- **Symbol Index:** is a unique system-wide identifier (in private and public messages) assigned to a trading instrument and Contracts in Optiq. Note that an instrument here represents either a single tradeable instrument, an index or a strategy. Except for strategies, it represents the combination of the following instrument characteristics: ISIN, MIC, Currency and when required the MIC of the Market of Reference. SymbolIndex will not change over the lifetime of the instrument, but can take a different value for the same instrument, depending on the environment (Prod or Test).
- **Message:** is a discrete unit of communication, provided in pre-defined format, which depends on the chosen protocol and the target functionality it relates to, containing information exchanged between Euronext and its clients, to enable trading on its systems.
 - **Administration message** is an electronic instruction from client or response from the OEG used to exchange technical, non-trade related information, most notably used to setup and maintain connectivity between a client and an OEG.
 - **Application message** is an electronic instrument from a client or a response from the OEG, used to exchange order and trade related information, including requests and events that impact orders and trades, but do not directly represent them.
 - **Order:** An order is an electronic instruction from a firm to buy or sell an instrument via Optiq. Firms can send many types of buy, sell and cross orders that are matched upon arrival or placed in the order book to await a match.
 - **Trade:** A trade is an electronic agreement between the client(s) that submitted the order(s) to exchange for a certain quantity of one or more instruments, for one of the various forms of reimbursements (payment, exchange of goods, services, etc.).
- **Standing Data:** provides referential data characteristics of all trading instruments available on Euronext markets. The data is provided via files and messages.
 - **Standing data files** contain referential data characteristics of the contracts, trading instruments including outrights, and strategies that may be required, or provided as value-added information. These files are provided on a daily basis and can be obtained from a separate HTTPS service.
 - **Standing data messages** contain the basic information of each instrument and strategy, and are disseminated via MDG at the start of each trading session and intra-day on creation of Derivative instruments.
 - Clients should refer to the **MDG documentation** for the full details about these services.

- **Self-Trade Prevention (STP):** Service provided by Euronext on its trading platform, to allow trading clients to avoid unintentional trading with themselves, that results from the matching of two opposite orders of the same client. This service is made available to clients performing specific types of activities (e.g. Liquidity Providers) setup depending on the rules defined per Optiq Segment.
- **Firm:** A firm is an investment firm or financial institution that deals, advises, and/or acts on behalf of its clients and possibly itself on the Euronext markets.
- **A Firm Access:** An entity allowing the Firm to access the Trading Platform. The two Firm Access types, which can both be used by a given Firm, are **Regular Access** and **Service Bureau Access**, as described below:
 - **Regular Access:** when a firm contracts its own and exclusive order entry access means directly with Euronext, the Firm Trading Solution type is Regular Access (or sometimes Direct Access).
 - **Service Bureau Access:** when a third-party customer, which may, among others, refer to a Service Bureau, contracts order entry access means with Euronext to act as an order carrier on behalf of several firms, the Firm Trading Solution type is Service Bureau Access.

1.4 ERROR CODES

When the Matching Engine receives an incoming message, it performs several checks on this message, and may reject it. When this occurs, the error is identified in the outgoing message sent back by the responding system as an error code. In Optiq the response messages contain only the error codes.

The list of errors that can be issued by the Optiq Matching Engine (ME) & Order Entry Gateway (OEG) upon reception of incoming private messages is provided in a dedicated file: [Error Code List](#), which may be downloaded from the Euronext website. This list includes errors that may occur due to issue encountered within messages sent by customers to or exchange business continuity conditions, as well as the errors that are issued by the Trade Confirmation System (TCS).

The Error Codes are classified by Rejection Type. The rejection types are defined in the following table and the first digit in the Error code is set to represent the type of rejection:

| REJECTION TYPE | TECHNICAL / FUNCTIONAL | DESCRIPTION |
|------------------|------------------------|---|
| 0 – TCS | TCS | Errors specific to messages sent to the Trade Confirmation System (TCS) |
| 1 – Inconsistent | Functional | The specified value is functionally invalid (e.g., Expire time < actual time); OR Fields/characteristics are provided in the message but are irrelevant (e.g., a Stop Price filled for a Limit Order) |
| 2 – Forbidden | Functional | Request is forbidden due to Exchange's Functional rules described in the associated Rules & Regulations documents (e.g. Trading Manual identifies that during the current phase, or due the member's authorizations a specific type of activity is forbidden) |
| 3 – Invalid | Technical | The specified value is technically invalid (e.g., MsgSeqNum n < MsgSeqNum n-1); OR The format is not the expected format for free fields (String instead of Integer); OR The specified value is not one of the enumerated values listed for the field |
| 4 – Missing | Technical | Necessary field is missing |
| 5 – Failure | Technical | Failure in the exchange system |

Notes:

- Fields, presence of which is "Mandatory" or "Conditional", can lead to an order rejection (Rejection type 4 - Missing) if not provided
- Fields, format of which is "Enumerated", can lead to an order rejection (Rejection Type 3 - Invalid) if the value provided is not among the authorized values

- All Fields can lead to an order rejection (Rejection Type 3 - Invalid) if the format is different from the format required
- Fields with null value are considered as not provided

2. ORDER ENTRY MAIN PRINCIPLES

2.1 NEW INSTRUMENT SEGREGATION - OPTIQ SEGMENT

High reliability, significantly increased throughput and latency performance with minimal standard deviation, improved flexibility in delivery of new functionalities and products, shorter time to market as well as the improved resiliency will be ensured within Optiq in part by introduction of the new instrument segmentation through Optiq Segments.

2.1.1 Optiq Segments

An Optiq Segment defines a universe of instruments sharing common trading and financial properties, it allows Euronext to segregate instruments among hermetic universes to facilitate clients' organisation toward Euronext financial markets.

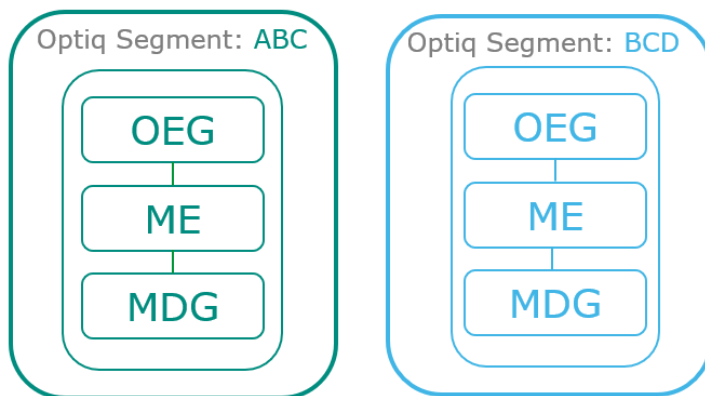

For the implementation of Optiq Segments the instrument universe is rationalized and reorganized to fit the new structure.

A segment can contain one or several asset classes. Information of the Optiq Segment to which an instrument belongs to / hosted on is communicated to clients within the Standing Data files and messages².

Clients must be aware of the different existing Optiq segments and the instruments they host in order to identify which segment(s) they would connect to.

- Segmentation provides:
 - Improvement in resiliency - failure of a single Optiq segment should have limited direct technical impact on other Optiq segments;
 - Increased flexibility – possibility of independent software and operational lifecycle.

Illustration of two different segments:

2.1.2 Partitions

An Optiq Segment may be comprised of one or more physical partitions.

A partition is composed of an Order Entry Gateway (OEG), a Matching Engine (ME) and a Market Data Gateway (MDG).

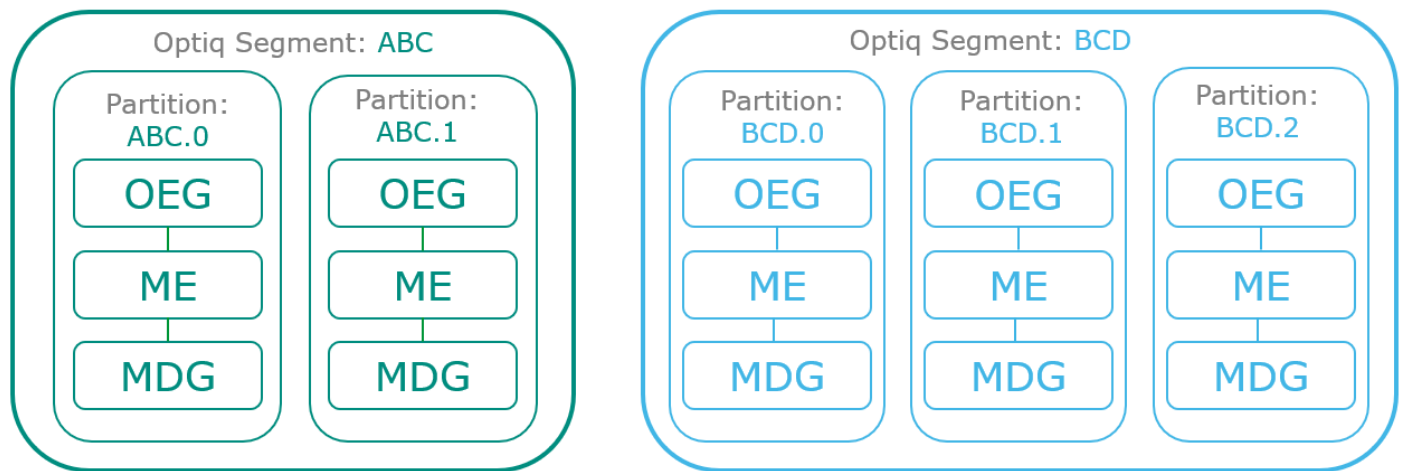

Instruments have the flexibility to be moved from one partition to another within an Optiq segment.

- Partitioning provides the following benefits:
 - Improved resiliency - failures on one partition impact only a fraction of the market / clients;

² Standing data files and messages refer to the data provided for Cash and Derivatives, instruments, contracts, outright and strategies.

- Improved scalability: simple and seamless scalability model based on horizontal scalability principles;
- Ensured stable latency and high performance.

Illustration of segments divided into partitions:

2.1.3 Logical Access and OE Sessions

Access to an Optiq Segment requires a dedicated Logical Access:

- A Logical Access is a point of entry configuration for connectivity to a specific Optiq Segment and allows the client to technically reach all the instruments belonging to the particular segment for which an access is setup.
 - A Logical Access is dedicated to an Optiq Segment, i.e. a single Logical Access cannot connect to two different Optiq Segments;
 - Clients may have several Logical Accesses per Optiq Segment;
 - It allows the client to connect to all partitions belonging to the segment either directly or indirectly;
 - The physical connection is managed at the OE Session level and there is at least one per Logical Access.
- An OE session corresponds to the actual physical connection of the client to a partition:
 - OE Sessions are automatically created by the Exchange upon creation of a Logical Access;
 - OE Session is the login identifier for each physical connection represented by the combination of the *Logical Access ID* and the *OE Partition ID*. These two fields represent an ID which is unique across the whole system and across the various Optiq Segments;
 - One OE Session always belongs to one Logical Access, but a Logical Access can have multiple OE Sessions. There can be as many OE Sessions as there are partitions in the Segment;
 - An OE session inherits the majority of characteristics setup for the Logical Access;
 - By default, OE Sessions hold the ownership of the orders entered through it.

2.1.4 Full mesh OEG-ME Connection

If a segment has multiple partitions, for the best possible response times, clients should initiate an OE session for each available partition and send messages through it only for the instruments hosted on this partition. However, a client may use a single OE Session to access all the instruments of an Optiq Segment, no matter how many partitions compose the segment. This is made possible by the full mesh OEG-ME connectivity provided by Optiq as represented in the diagram below. Such cross-partition access will incur additional response times (i.e. increased latency).

Quotes and other Market Making messages cannot be sent across partitions, and must be sent only to the partition where the Instrument or Contract is hosted.

By default, the responses to the private response messages sent through a different partition will return to the OE session holding the ownership of the order (from which it was sent). However, the corresponding MDG messages is issued by the partition on which the instrument is hosted.

As it relates to the OEG and private messaging, Order ownership is the technical belonging of the order to the physical connection that submitted the order, or to the physical connection that took ownership of the order.

Outbound messages are sent to the OE Session that owns the corresponding order. Functionally the orders belong to the Firm (designated by its Firm ID), and for the scope of change of ownership; modification can only be done by the requestor with the same Firm ID, and between physical connections or Logical Accesses that are set with the same Firm ID.

Illustration of segments, partitions and connectivity:

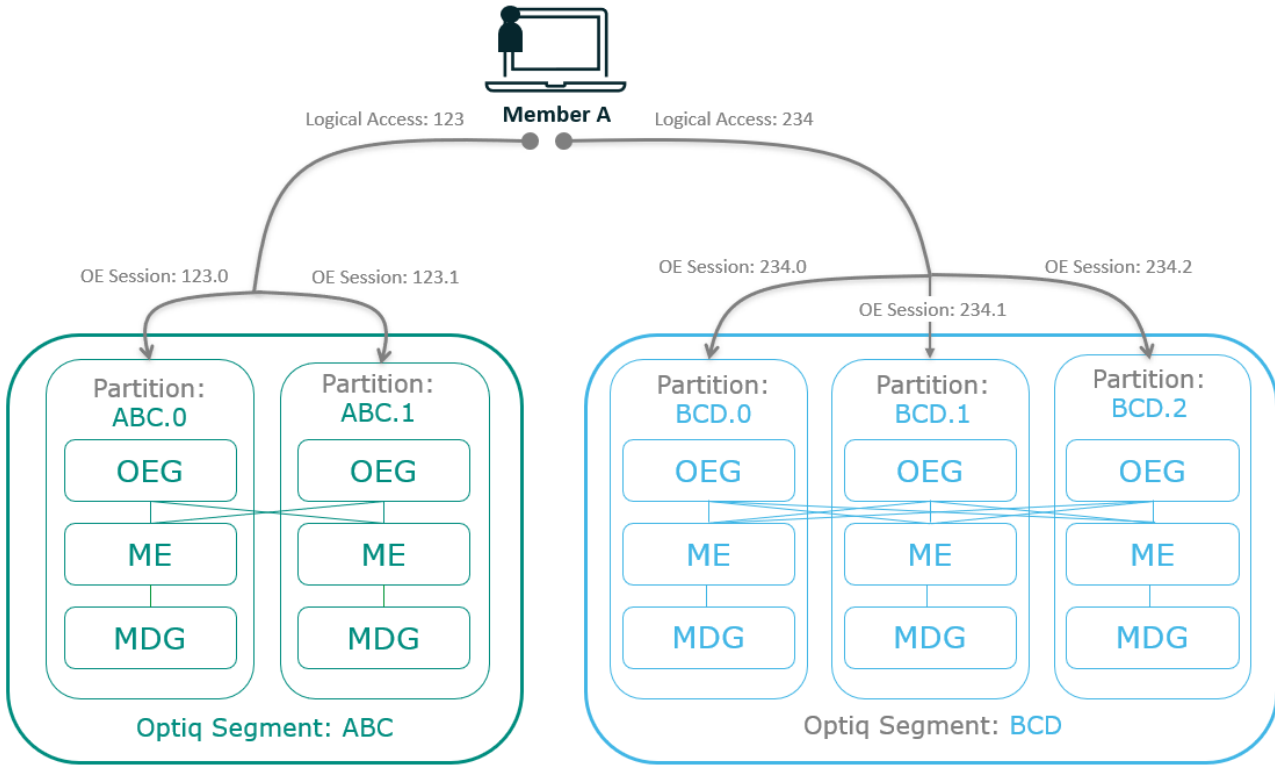

Illustration of the full mesh connectivity:

2.1.5 Determine the “shorter path”

In order to benefit from the best response times, the clients should send messages directly to the partition on which the instrument is located. To identify on which partition each instrument is located, clients must use, and update on a daily basis, their referential data by downloading the Standing Data files or using the **StandingData** market data messages, where details of the *Partition ID* assigned to each instrument are provided³.

2.1.6 Setting Up Connectivity

Euronext provides connectivity information within a dedicated document, the Connectivity Detail specifications, covering all required technical details. Ranges of IPs / Ports and Multi-cast channels are identified for each Optiq segment for Order Entry and Market Data gateways.

To take full advantage of the scalability of Optiq, and ensure continuity of service, clients are strongly encouraged to setup connectivity to the full range specified per segment for OEG and MDG. Individual partitions will be assigned a sub-set of values identified within the specified ranges.

In addition, the relevant details for OEG and MDG connectivity per instrument will be communicated in the referential standing data files provided on a daily basis. For the details of the format in which this data is provided please refer to the *Euronext Market – Optiq File Specifications* document.

2.1.7 Overnight instrument migration between partitions

In order to improve latencies and predictability, an overnight load balancing mechanism is introduced by the new Optiq system. This new technical mechanism implies that every day all instruments belonging to an Optiq Segment may potentially be relocated across the partitions belonging to this Optiq Segment.

Please note that this migration between partitions will not cause instruments to migrate from one Optiq Segment to another Optiq Segment.

Every instrument can migrate overnight from one partition to another. It means that connectivity information associated to an instrument can change every day, which is why it is crucial for clients to daily update their referential data by downloading the standing data files provided on the Euronext server.

Please refer to the *Euronext Markets – Optiq MDG Client Specifications* document for further details on standing data files.

Note: While migration of instruments between Optiq Segments is not expected to be a regularly occurring event, it may happen, and will be done with prior notification to clients.

2.1.8 Added / Removed Partition

The partitioning of the Optiq Segments, and full-mesh connectivity, allows Euronext to add or remove a partition without impacting the clients' connectivity. Adding or removing a partition will not impact connectivity to other existing partitions or OE sessions.

In case of introduction of new partitions. Until clients are able to connect to the new partition they will still be able to use individual order messages to access all the instruments belonging to an Optiq Segment by connecting to the already existing partition(s).

In case of removal of a partition, Clients will still be able to connect to existing partitions, and access instruments that were hosted on these partitions before the change, as well as any instruments that had to be moved to the existing partitions from the one being removed.

Partition on which the contract or instrument is hosted is identified in the Standing data that is provided on a daily basis.

³ For the Cash markets. Standing data file is: CashStandingDataFile (9007); Real time MDG Standing data messages: Standing Data (1007) | For the Derivatives markets. Standing data file is: DerivativesStandingDataFile (9013); Real time MDG Standing data messages: Contract Standing Data (1013)

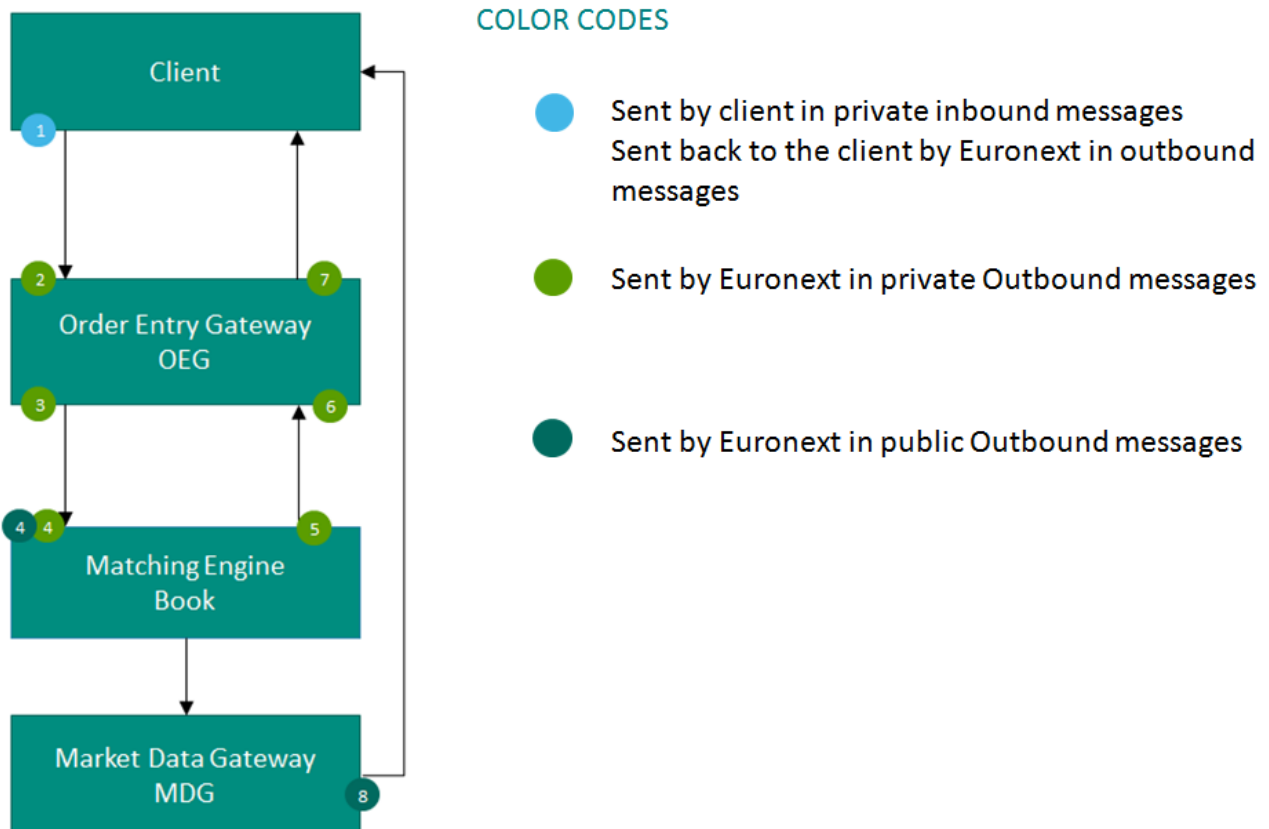

In all cases clients will always be provided prior notice before such changes are performed.

2.2 TECHNICAL FEATURES

2.2.1 Latency Monitoring and Timestamps

Outbound messages provide several internal timestamps to allow the clients to monitor the processing time of the system at different levels.

- The following diagram represents the different timestamps provided in the outbound messages:

| # | FIELD NAME | DESCRIPTION OF DATA PROVIDED |
|---|-----------------------------|---|
| 1 | <i>Message Sending Time</i> | is assigned by the Client in his inbound message |
| 2 | <i>OEG IN From Member</i> | is assigned by the OEG after decoding the inbound message |
| 3 | <i>OEG Out to ME</i> | is assigned by the OEG when sending the inbound message to the matching engine, and is later on provided in the Outbound messages |
| 4 | <i>Book IN Time</i> | is assigned by the ME when receiving the inbound message from the OEG |
| 5 | <i>Book OUT Time</i> | is assigned by the ME when sending the outbound message to the OEG |
| 6 | <i>OEG IN From ME</i> | is assigned by the OEG when receiving the outbound message from the ME |
| 7 | <i>OEG OUT To Member</i> | is assigned by the OEG when sending the outbound message to the client |
| 8 | <i>Packet Time</i> | is assigned by the MDG when sending the message to the market |

2.2.2 Drop Copy

Drop Copy is a service, providing near real-time copies of trade reports & order messages, usually used for risk management and for compliance needs.

Clients require a dedicated connection to receive Drop Copy messages, which can be setup with configuration that fits their needs.

The service is available in FIX protocol only; further details are provided in a dedicated document.

2.3 CLIENT ORDER ID MANAGEMENT

2.3.1 Client Order ID Overview

Clients must provide a *Client Order ID* in every inbound application message, otherwise the message will be immediately rejected by the OEG.

Clients may provide any value that respects the *Client Order ID* format, which is an 8-byte signed integer, and the ranges as defined below. The Exchange recommends setting a unique ID per order, Firm and Symbol Index.

For order entry, the *Client Order ID* value is not checked by the Exchange⁴, it is simply returned in the corresponding outbound message to allow clients to reconcile the response message with their original inbound request.

For modification and cancellation using the *Original Client Order ID* as unique identifier⁵, the value is checked by the Exchange for possible duplicates, that would represent different live orders originally submitted with the same *Client Order ID*. In case of duplicates, the inbound request is rejected with the associated error code.

2.3.2 Client Order ID Usages for Order Management

Clients can submit modification and cancellation requests by using the *Original Client Order ID* as unique identifier, i.e. the value of the *Client Order ID* as submitted previously with the original order.

This allows clients to use the *Client Order ID* as unique identifier to modify or cancel their orders per Symbol Index and Firm, in addition of the *Order ID*. It does not restrict clients to use the *Order ID* to manage their orders.

Please note that *Client Order ID* provided for the modification requests will not be updated in the live order itself; order will keep its original *Client Order ID*.

To properly perform the inbound request, the system checks that the value exists on the corresponding Symbol Index among live orders belonging to the requesting Firm. If no order is found the request is rejected, or if more than one order is found the request is also rejected. In this case clients must use the *Order ID* to reach their orders.

As the uniqueness of the *Client Order ID* is not checked by the Exchange for order entry but only in case of modification and cancellation requests, clients who want to use the *Original Client Order ID* as unique identifier for these requests must ensure on their own the unicity of the Client Order ID per Symbol Index and Firm for orders they submit.

However, after an order, with a specific *CIOrdID* participates in a trade, it can no more be re-used to submit orders. This is not allowed in order to make sure that in case of trade investigation, only one single instance of order linked to the trade is available. The same behaviour is applied for "Cancellation of RFC submission" using the *CIOrdID*.

As requests using the *Original Client Order ID* require additional checks to be performed by the system, clients may observe a slight increase of the response time for these requests. Hence to ensure the best possible response times clients are encouraged to use *Order ID* as the reference for their orders.

⁴ With the exception of the Service Bureau accesses for which a check is always performed.

⁵ If both *Original Client Order ID* and *Order ID* are provided in a modification or cancellation request, the *Original Client Order ID* is totally ignored and the request is performed on *Order ID* only.

2.3.3 Client Order ID Ranges

Depending on the nature of the client access, the *Client Order ID* must respect some constraints as described below.

Moreover, it is recommended that clients implement their own configurable prefix in order to allow firms to integrate several application instances easily and ensure *Client Order ID* uniqueness across all the firm orders.

2.3.3.1 For Regular “In House” Accesses

The guideline for the range to use for the Regular In-House accesses (i.e. non via ISV nor using Service Bureau):

- clients should use the positive number range only;
- numerically it means that clients are restricted to values from 0 to $2^{63} - 1$.

There is no other constraint than positive values for the non-Service Bureau accesses.

The correct use of the client order id range is checked by the exchange during the conformance test, however afterwards the OEG will not perform any checks of the correct assignment of the range in the inbound application message.

2.3.3.2 For Regular Accesses via ISV

The guideline for the range to use for the Regular access via ISV, without use of Service Bureau:

- clients should use the negative number range only;
- clients should insert at the beginning of the field the unique ISV ID, which will be provided by the Exchange.
 - the ISV ID is composed of three digits
- numerically it means that clients are restricted to a range from $-XXX0000000000000000$ to $-XXX9999999999999999$, where XXX is their ISV ID.

The use of the ISV ID is optional and the OEG will not perform any checks of the correct assignment of the ID or range in the inbound application message.

2.3.3.3 For Service Bureau Accesses

For Service Bureau accesses:

- clients must use the negative number range only;
- clients must insert at the beginning of the field the unique Service Bureau ID, as provided by the Exchange.
 - the Service Bureau ID is composed of three digits
- numerically it means that clients are restricted to a range from $-XXX0000000000000000$ to $-XXX9999999999999999$, where XXX is their Service Bureau ID.

The Service Bureau ID is provided by the Exchange and is checked during the conformance test and is also checked and enforced at the OEG level for each inbound application message.

2.4 ORDER ID

The *Order ID* used in the messages for trading purposes is a numerical order identifier assigned by the matching engine, unique per instrument over the entire lifetime of the order, which means that this value remains unchanged, even upon submission of the modifications of the order using **CancelReplace** (06) message.

For reconciliation purposes with Euronext’s clearing & settlement partners clients may obtain the Order Number and the Order Entry Date from the *Order ID* field, which is composed of three parts, as depicted below:

- the least-significant 2-bytes include the relative calendar days number since 1-jan-1970 at 0:00 UTC (EPOCH) (Please note, currently the clearing partners may use the date corresponding to this value in ASCII format);
- Then 1-byte includes the EMM;

- The remaining most-significant 5-bytes contain the Order Number which is a sequence number restarted at 1 at each start of day.

graphical representation of the OrderID

3. ORDER ENTRY GATEWAY SPECIFICS

3.1 SESSION MANAGEMENT

3.1.1 Logon Overview

Clients initiate a TCP/IP session to the Order Entry Gateway, and then initiate a logon by sending the **Logon (100)** message. Session Logon is always initiated by the client. The **Logon (100)** message must be the first message sent by the client otherwise the OEG will drop the connection, and needs to be sent individually to each partition to which physical connection will be established. Please refer to the description of use for the individual messages and Kinematics document to see the various cases and the associated expected exchange of messages.

After the logon is successful application messages may be exchanged between the client and server. A client has n seconds after they connect to send a logon request, otherwise the server drops the connection.

The value of the time delay n is provided for each Optiq Segment in the *Euronext Markets – Optiq OEG Connectivity Specifications* document.

3.1.2 Heartbeats and TestRequests

The OEG uses the **Heartbeat** and **TestRequest** messages to ensure the connection between the client and the Exchange is up and functioning properly. During periods of inactivity the mechanism used by the OEG functions as described below.

OEG sends a:

- **Heartbeat (106) message** after the given delay of inactivity on its side, i.e. the OEG sends a **Heartbeat** message after it hasn't sent out any messages within n second(s). In case no other application messages, the clients will receive at least one **Heartbeat** (106) message every n second(s) when they are logged on. This ensures the client that OEG is up and functions properly.
- **TestRequest (107) message** after the given delay of inactivity on the client side, i.e. when the client has not sent any message in the last n second(s).
 - The client has another, equivalent time delay to answer the **TestRequest** (107) message by sending back to the OEG either a **Heartbeat** (106) message, or any other application message.
 - Otherwise if the client does not issue any message within the given delay, the OEG closes the connection. (Note that this disconnection triggers the Cancel on Disconnect mechanism for any messages in scope)

The **TestRequest** (107) message can also be sent by the client to the OEG at any moment and the OEG will answer with a **Heartbeat** (106) message.

The parameter n has a specific value for each Optiq Segment that is specified in the *Euronext Markets – Optiq OEG Connectivity Specifications* document.

3.1.3 Logout

Logout (103) message is used to improve session management processes. This message identifies to the exchange if the client has disconnected on purpose or because of technical issue.

3.1.4 Message Sequence Usage

Optiq uses sequence numbers to ensure no loss of messages. Clients assign sequence numbers to the messages they send to the exchange and the Optiq tracks these numbers for the incoming (sent by client) messages. Similarly, Optiq assigns its own sequence numbers to the outgoing messages (sent by Optiq) that it sends to the client.

The first sequence values provided in the initial Logon messages of the day are set to zero (0) [or 1 for FIX]. When clients log on after a disconnection, the Logon message allows the client and Optiq to exchange the sequence

numbers of the last messages that they processed from each other. Each side can then start sending the next message that has not been processed by the other side, or otherwise follow the business continuity and recovery processes.

Please note that message sequence numbers are assigned only to application messages and not to administration messages.

3.2 CANCEL ON DISCONNECT MECHANISM

Cancel on Disconnect is a mechanism which triggers an automatic cancellation of all non-persisted orders upon disconnection of the client whether voluntary or due to an issue.

In typical day-to-day operations the Cancel On Disconnect applies at the OE Session level, which means that it is triggered per OE Session (physical connection) and it does not affect other OE Sessions that belong to the same Logical Access.

By default, the Cancel On Disconnect is enabled for all clients and for all their Logical Accesses / OE Sessions. It means that every single order is checked for Cancel On Disconnect.

The Cancel On Disconnect mechanism is triggered when the connection between a client and the OEG is dropped. If the client application is disconnected from the OEG, then all live quotes and non-persisted orders submitted during current day's trading sessions, and belonging to the corresponding OE Session are cancelled for their remaining quantity, regardless of order type and validity type.

When the mechanism kicks in, a **Kill** (05) messages are sent to the OE Session for which the mechanism has been triggered, for each instrument in scope and each killed order. If the client has not yet reconnected the messages will be queued until he returns.

Clients can indicate on each order if they want it to be persistent, i.e. not included in the scope of the Cancel On Disconnect mechanism. If the *Disabled Cancel On Disconnect Indicator* (see field *Execution Instruction*) is set to "True" for an order, this order will not be cancelled even if the Cancel On Disconnect kicks in for the OE Session it belongs to.

Please refer to the "Cancel on Disconnect for OEG" section of the *Euronext Cash and Derivatives Markets – Optiq OEG Connectivity Aruba DataCentre - Technical Specification* document for further details.

4. FORMATTING

4.1 SBE MESSAGE STRUCTURE

Private inbound and outbound messages are composed of the following parts displayed from left to right in the table below:

| SBE STRUCTURE | | | | | | | | | | | | | |
|---------------|------------|---------|--------------------------|----------------------|----------------------|-----|----------------------|-----|--------------------------|----------------------|----------------------|-----|----------------------|
| Frame | SBE Header | Block | Repeating Section 1 | | | | | ... | Repeating Section N | | | | |
| | | | Repeating Section Header | Rep. Sec. 1.a | Rep. Sec. 1.b | ... | Rep. Sec. 1.n | ... | Repeating Section Header | Rep. Sec. N.a | Rep. Sec. N.a | ... | Rep. Sec. N.a |
| 2 bytes | 8 bytes | n bytes | 2 bytes | x ₁ bytes | x ₁ bytes | ... | x ₁ bytes | ... | 2 bytes | x _N bytes | x _N bytes | ... | x _N bytes |

Each message is enriched with a "Frame" field followed by the SBE header. The "Frame" field contains the length of the message including the length of the "Frame" and "SBE header" fields.

Please note that even if the Frame must be present on the wire for every message, for readability purpose it is not represented in the message structures of this document.

4.1.1 SBE Header

The SBE Header is composed of the following fields:

| FIELD | DESCRIPTION | LENGTH | VALUES |
|----------------|--|---------|------------------------------|
| Block Length | Length of the block. The Block is the message without the repeating section headers and the repeating sections. This is especially useful of new versions of messages in case Euronext adds fields at the end of the block. Clients will remain able to process the block fields and know where the repeating sections starts. | 2 bytes | From 0 to 2 ¹⁶ -1 |
| Template ID | Identifier of the message template. This is the message type of the messages (e.g. NewOrder (01), Ack (03)...). | 2 bytes | From 0 to 2 ¹⁶ -1 |
| Schema ID | Identifier of the message schema that contains the template. | 2 bytes | From 0 to 2 ¹⁶ -1 |
| Schema version | Version of the message schema in which the message is defined. Used to add messages and/or modify some others. | 2 bytes | From 0 to 2 ¹⁶ -1 |

A Schema is the file describing a group of messages (Private inbound and outbound, Market Data, etc.) used by the Exchange. The group of messages is identified by the *Schema ID*. The schema contains the templates that represent the structure of messages supported by the Exchange, each message being identified by its *Template ID* (message type). A given schema may have several *Schema Version* values, which specify the message structure used by the sender.

Hence the OEG SBE template file (or the *OEG_SBE_Input_Schema*) contains all the Templates for the private inbound and outbound messages. The Schema Version defines the version of this *OEG_SBE_Input_Schema* and the structure to be used by the sender. For more information for the SBE template please review the *Euronext Cash and Derivatives Markets – Optiq Files - Interface Specification* document.

Please note that the SBE Header must be present on the wire for every message, but for readability purpose it is not represented in the message structures of this document.

4.1.2 SBE Repeating Section Header

The SBE Repeating Section Header is composed of the following fields:

| FIELD | DESCRIPTION | LENGTH | VALUES |
|--------------|---|---------|---------------|
| Block Length | Defines the length in bytes of a repeating section (without the length of the header). | 1 bytes | From 0 to 255 |
| Num In Group | Defines how many times the repeating section is repeated. It is set to "0" if there is no occurrence of this repeating section. | 1 bytes | From 0 to 255 |

This header must be present at the beginning of each repeating section group.

Please note – the messages structures contain the actual names of the repeating groups that are used in the SBE template.

In the message structures (section 5), repeating section headers are represented as follows:

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE | PAGE |
|--------------------------------------|---|--------|-----|--------|-----------|------|
| Block Length for repeating section 1 | Defines the length in bytes of the repeating section 1. | Header | 1 | 18 | Mandatory | 24 |
| Num In Group for repeating section 1 | Defines how many times the repeating section 1 is repeated. | Header | 1 | 0 to n | Mandatory | 24 |

Some empty repeating sections have been introduced for future use purpose at the end of some messages. But due to technical constraints, headers of these repeating sections must be present at the end of the messages; they are represented in message structures as follows:

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE | PAGE |
|--------------------------------------|---|--------|-----|--------|-----------|------|
| Block Length for repeating section 1 | Defines the length in bytes of the repeating section 1. | Header | 1 | 0 | Mandatory | 24 |
| Num In Group for repeating section 1 | Defines how many times the repeating section 1 is repeated. | Header | 1 | 0 | Mandatory | 24 |

For these empty repeating sections, clients must set the two fields of the header to zero "0".

4.1.3 SBE Usage

Euronext provides SBE Template XML files that contain all message types supported by the system. Client systems can decode and encode SBE message using the schema and the template files as below:

SBE offers the possibility to have backward and forward compatibility. It means that clients are not required to be on the last version of Schema Version (message structure version) to be able to read the message. This is only possible if changes between versions occurred at the end of:

- The block
- The repeating section.

Using message length, SBE is able to know the difference between the block length or the repeating section length managed by a given client and the received message. As such, fields that do not match a client's version of the messages will be skipped.

However, it is crucial to note that the list of available values in any given field can be updated and the length can be changed. In this case, the update must be taken into account.

Hence if a field required by the regulator becomes mandatory in a message, each client using this message will need to update its Schema for the latest version, otherwise this message will be rejected by the Order Entry Gateway. A change of length of any field will also lead client to update their Schema if they want to use a message containing this field.

Please refer to the *Euronext - SBE Technical Note* for further details on the SBE Encoder / Decoder.

Note: Changes of SBE template are communicated to clients in advance.

4.1.4 SBE Optional Fields and Null Value

Optional and conditional fields can be provided as null value, as defined by the SBE standard and further indicated in the SBE XML templates.

Please note that the Null Value means that the field is not applicable, not provided or not used and cannot be used in a mandatory field. This is different from the value of zero (0), which may have its own meaning depending on the field.

For unused Bitmap fields all the bits must be set to '0'.

4.2 TECHNICAL FORMAT FIELDS

The format of the fields contained in the messages will follow these rules:

- All integers are numeric (signed/ unsigned specified in each field format description) using two's complement method.
- Binary data are in Intel byte order (Little-Endian).
- Unless otherwise specified (i.e. Counterpart Firm ID), all "Alphanumerical ID" and "Text" fields are alphanumeric based on UTF-8, left aligned and null padded.
- SBE allows optional fields with a null value. The applicable NULL value is defined by SBE interface.
- Only field values will appear in the published messages (no name or 'tag' will appear in the messages).
- The field names that appear in this document are for reference purposes only.
- All the fields are contiguous.
- All field sizes are fixed and constant.
- Even if it is not always mandatory to be able to process last message version (Schema Version), it is mandatory for clients to check for each update if it contains important or regulatory updates.

| FORMAT FIELDS | DESCRIPTION |
|---------------------------|---|
| Alphanumerical ID | String type identifying an element. |
| Amount | Signed numerical field representing an amount. |
| Bitmap | Array of bits, each bit specifying whether an optional value is present (set to "1") or not (set to "0") (in Little-Endian). e.g. For the field Execution Instruction a Bitmap field allows indicating in different positions of the field, for the same order message, in position zero (0) with the bit set to one (1) STP type of Resting, as well as in position four (4) with the bit set to one (1) as well, indicate that this order should be persisted and should be excluded from the scope of CoD |
| Boolean | Indicator having two possible values, either 'true - 1' or 'false - 0'. This value is set on the first bit of the byte (in Little-Endian). |
| Date | Date of an event (in number of days since 01/01/1970 UTC - 01/01/1970 is the day "0"). |
| Enumerated | Information having a delimited set of possible values. |
| Numerical | Generic numerical field. |
| Numerical ID | Numerical field identifying an element. |
| Price | Numerical field representing a price (either signed or not signed). See the description in Price, Quantity, Ratio and Amounts Formats |
| Quantity | Unsigned numerical field representing a quantity of elements (for example a number of shares). |
| Sequence | See the description in Sequence Numbers |
| Text | Text in UTF-8, left aligned and completed with null padding. |
| Epoch Time in Nanoseconds | Time in number of nanoseconds since 01/01/1970 UTC. |

4.3 DATE AND TIME CONVENTIONS

Date and Time provided in this document refer to the following names, and are provided in the following format:

Timestamps:

They are expressed in UTC (Universal Time, Coordinated) and are synchronised using Precision Time Protocol (PTP). Their format is defined in number of nanoseconds since 01/01/1970 UTC, and is populated as 8-byte unsigned integers.

Date:

-
- **For Cash and Derivatives Markets:**

- Dates are defined in number of days since 01/01/1970 UTC (01/01/1970 is the day “0”) and are populated as 2-byte unsigned integers.

Note: Expiry Date and Time provided for Good Till Time (GTT) and Good Till Date (GTD) orders follow their own rules, please refer to the field description for further details.

- **For TCS Reporting:**

Dates and Times formatted for ESMA reporting (MiFID II) are defined with a 27-byte character string following ISO 8601:

| |
|------------------------------|
| YYYY-MM-DDThh:mm:ss.ddddddZ. |
|------------------------------|

where:

- “YYYY” is the year.
- “MM” is the month.
- “DD” is the day.
- “T” is a constant letter used as a separator between “YYYY-MM-DD” and “hh:mm:ss.ddddddZ”.
- “hh” is the hour.
- “mm” is the minute.
- “ss.dddddd” is the second and its fraction of a second.
- “Z” is a constant letter used for UTC time.

4.4 SEQUENCE NUMBERS

The Order Entry Gateway manages two sequence numbers:

- **Message Sequence Number:** this sequence number is incremented one by one by the OEG and per OE Session (physical connection). It is provided in every application outbound message.
- **Client Message Sequence Number:** this sequence number must be managed by the client’s workstation and is mandatory for each application inbound message. It is recommended to increment this number one by one per OE Session (physical connection), starting from 1. Please note that this sequence is not checked by the OEG but will be useful for some specific recovery cases.

4.5 PRICE, QUANTITY, RATIO AND AMOUNT FORMATS

If a price is needed in the messages, it is expressed in currency or in percentages (generally for bonds).

The volume of the order is a number of Securities or an amount expressed in currency.

All prices are processed using two values:

- the price value (Signed/Unsigned Integer);
- the scale code (*Price/Index Level Decimals*).

Clients have to link each instrument to the associated “*Price/Index Level Decimals*” from the Standing Data message or file.

The prices must be calculated according to the following formula:

$$\text{Price} = \frac{\text{Integer}}{10^{\text{“Price/Index Level Decimals”}}}$$

For example, a price of 27.56 is sent in messages in the Price field as an Integer of 275600, if the “*Price / Index Level Decimals*” from the Standing Data is equal to 4.

Whether the price is expressed in currency or in basis points, the format of providing the price is the same.

- The same mechanism is used for:
 - All quantities with “*Quantity Decimals*”
 - All ratios and percentages with “*Ratio / Multiplier Decimals*”
 - All amounts with “*Amount Decimals*”

4.6 INSTRUMENT IDENTIFIERS AND EMM

4.6.1 Symbol Index

An instrument is identified by its Symbol Index.

The standard security identifier (for example ISIN), mnemonic, tick size, instrument name and other instrument characteristics are carried only in the following Market Data messages: **StandingData** (1007), **OutrightStandingData** (1014), **StrategyStandingData** (1012), **ContractStandingData** (1013) and in the Standing Data files available on the HTTPS server. As such, the client applications must link the Symbol Index which is used in all messages, with other instrument characteristics present in the Standing Data messages or files.

The Symbol Index is assigned by Euronext and will not change over the lifetime of the instrument.

In some extraordinary cases an instrument can move from one Optiq segment to another keeping its Symbol Index. Clients will always be notified in advance before such changes.

Any Corporate Action leading to a change of ISIN will lead to change of *SymbolIndex*. These Corporate Actions are generally part of the mandatory reorganisation events; the most frequent ones being stock split, reverse stock split, change of name / denomination. However the ISIN change is not systematic and will be in any case communicated upfront through the Euronext Corporate Action notices.

For further details on the Standing Data messages and files please refer to the *Euronext Cash and Derivatives Markets – Optiq MDG Messages - Interface Specification* document.

4.6.2 Order Priority

The *Order Priority* is provided in private **Ack** (03) messages for every individual order.

Value in the field *Order Priority* is based on the time of the entry of the order into the book, or the cases of its modification that impact priority.

According to the rules of the market modification of price and volume of an order in most cases have a negative impact on the priority, with exception of modification that is reducing the volume, in which case order maintains its priority. In case of loss of priority, the *Order Priority* is reset to the time of the modification.

For **Quotes** (08) messages priority is not assigned, as an individual Market Maker may be present only once at single price level.

For Cash Markets Only

For the Cash Markets, the *Order Priority* may be used to allow clients to reconcile with the Market Data feed as the *Order Priority* is also provided in the **OrderUpdate** (1002) message.

For further details please refer to the description of the **Ack** (03) message and to the Cash Market Kinematics document in Section 1.2.5.1 *Private and Public feed reconciliation*.

For the Dark functionality, Dark Sweep orders *Order Priority* will be provided in the private **Ack** (03) message. This order priority indicates the rank of the Dark Sweep order on its arrival.

When Dark Sweep orders are swept, a new **Ack** (03) message is issued, with the field *Ack Type* properly populated, they will be assigned a new order priority that indicates their priority vs. the rest of the order book.

For both Cash and Derivatives Markets

For Stop orders *Order Priority* will be provided in the private **Ack** (03) message. This order priority indicates the rank of the stop order on its arrival. If multiple stop orders exist with the same price conditions, they would be triggered in the order of the priority assigned to the stop order upon entry.

When Stop orders are triggered, a new **Ack** (03) message is issued, with the field *Ack Type* set to "Stop Triggered Ack", they will be assigned a new order priority that indicates their priority vs. the rest of the order book.

4.6.3 EMM

The *Exchange Market Mechanism* represents the platform to which the order sent by the client must be routed. It must be specified by clients each time a *Symbol Index* is specified as it is used to route the order to the right platform.

5. MESSAGES

5.1 IMPORTANT NOTES

5.1.1 Scope of Messages and Functionalities

While attempts are made to provide as comprehensive an overview of functionalities as possible please note that:

- Some of the functionalities and messages in the document are applicable only when enabled for the specific scope of instruments;
- The functionalities follow the rules set out in the Euronext Trading manual and Rule books.

The following table describe each Optiq Segment tag. Each tag will be then used for each message to specify on which Optiq Segment this message applies on.

| OPTIQ SEGMENT | TAG |
|---------------------------|-----|
| Equities | EQ |
| Funds | FND |
| Fixed Income | FXI |
| Warrants and Certificates | SP |
| Equity Derivatives | EQD |
| Index Derivatives | IDD |
| Commodities | CMO |
| Block | BLK |

5.1.2 Conditional Values in Outbound Messages

Please note that for the outbound messages (Client ← OEG) the “presence” of the fields in the block of the message is often set to “Conditional”, which means that those fields might be populated with Null Value, when not required. As a single outbound message may cover several trading cases, it contains fields needed in all of these cases, which may be populated or not.

5.2 MESSAGES FORMATTING

5.2.1 Introduction to Message Representation

To help reading the message structure in this document the following introductory explanation is provided.

- In all the structures of messages of this document (the tables representing the messages only):
 - All the lengths identified are in bytes.
 - Short descriptions of individual fields within the structures might not be exhaustive, please refer to [Section 6 Field Description](#) where further details are provided for each individual field.
 - Where a list of specific allowed values is provided, if client provides data that is outside of this range of values, the message will be rejected
 - In the fields description the following pictograms represent:
 - ◆ [C] means that the value is for Cash only;
 - ◆ [D] means that the value is for Derivatives only;
 - ◆ [i] means that special conditions apply to the displayed value. These conditions are detailed in the “conditions” in the description of the corresponding field.
 - The display of message sections is formatted as described below:
 - ◆ **Block section**: The block is for all the non-repeated fields. They must be present on the wire for each message, even if they are optional or conditional. The length of the section is defined in each individual message template (in bytes).

| | | | | | | |
|--------------------------------|---|---------------------------|---|--|-----------|-----|
| Client Message Sequence Number | The Client Message Sequence Number is mandatory for all inbound messages, but the consistency of the sequence is not checked by the Exchange. | Sequence | 4 | From 0 to 2 ³² -2 | Mandatory | 96 |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric ID | 8 | (See field description) | Mandatory | 104 |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | From 0 to 2 ⁶⁴ -2 | Mandatory | 111 |
| Client Order ID | An identifier of a message assigned by the Client when submitting an order to the Exchange. | Numerical ID | 8 | From -2 ⁶³ +1 to 2 ⁶³ -1 | Mandatory | 96 |
| Symbol Index | Exchange identification code of the instrument. | Numerical ID | 4 | From 0 to 2 ³² -2 | Mandatory | 125 |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory | 100 |

- ◆ **Green Repeating section**: All the fields that are repeated. All these fields are in bold and [green](#) table borders, it might be [0 to n occurrence\(s\)](#) for this repeating section. (the maximum value of *n* is defined in the *Template*)

| | | | | | | |
|-----------------------|---|-----------------|----------|---|-----------------|------------|
| Bid Quantity | Quote bid quantity, (To be calculated with Quantity Decimals). | Quantity | 8 | From 0 to 2⁶⁴-1 | Optional | 93 |
| Bid Price | Quote bid price, (To be calculated with Price/Index Level Decimals). | Price | 8 | From -2⁶³ to 2⁶³-1 | Optional | 93 |
| Offer Quantity | Quote offer quantity, (To be calculated with Quantity Decimals). | Quantity | 8 | From 0 to 2⁶⁴-1 | Optional | 116 |
| Offer Price | Quote offer price, (To be calculated with Price/Index Level Decimals). | Price | 8 | From -2⁶³ to 2⁶³-1 | Optional | 116 |
| Symbol Index | Exchange identification code of the instrument. | Numerical ID | 4 | From 0 to 2 ³² -2 | Mandatory | 125 |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory | 100 |

- ◆ **Light Blue Repeating section**: All these fields are in bold and [light blue](#) table borders, it might be [0 to 2 occurrence\(s\)](#) for this repeating section. This is mainly used to manage optional fields.

| | | | | | | |
|------------------|---|-------------|-----------|--------------------------------|-----------------|------------|
| Free Text | Free Text is manually entered by the trader issuing the order. This field is part of the clearing aggregate. | Text | 18 | (See field description) | Optional | 105 |
|------------------|---|-------------|-----------|--------------------------------|-----------------|------------|

- ◆ **Blue Repeating section**: All these fields are in bold and [blue](#) table borders, it might be [0 to 1 occurrence](#) for this repeating section. This is mainly used to manage optional fields.

| | | | | | | |
|------------------------------|---|-------------------|----------|---|--------------------|-----------|
| Collar Rejection Type | Hit collar type (high or low) in case of order rejection due to collar breach. | Enumerated | 1 | 1 = Low dynamic collar 2 = High dynamic collar | Conditional | 98 |
| Breached Collar Price | Breached collar price in case of collar rejection. | Price | 8 | From -2⁶³ to 2⁶³-1 | Conditional | 94 |

- ◆ SBE message structures are organized as below:

| SBE SECTION | DESCRIPTION | LENGTH |
|---------------------|---|--|
| Block | The block is for all the non-repeated fields. They must be present on the wire for each message, even if they are optional. | As defined by the individual message template (in bytes) |
| Repeating section 1 | All the fields that are repeated. All these fields are in bold and are outlined by <u>green</u> table borders; there may be <u>0 to n</u> occurrences of this repeating section. (the maximum value of <i>n</i> is defined in the <i>Template</i>) | As defined by the template (in bytes) |
| Repeating section 2 | All these fields are in bold and are outlined by <u>light blue</u> table borders; there may be <u>0 to 2</u> occurrences of this repeating section. This it is mainly used to manage optional fields. | As defined by the template (in bytes) |
| Repeating section 3 | All these fields are in bold and are outlined by <u>blue</u> table borders; there may be <u>0 to 1</u> occurrence of this repeating section. This it is mainly used to manage optional fields. | As defined by the template (in bytes) |

- ◆ In this explanatory example, the Frame, SBE Header and SBE Repeating Section Header are represented in the structure. There are in a grey background and will not be provided in the rest of this document.
- ◆ Please note not all messages use repeating sections. In those cases, repeating sections are not identified in the structure of the message.

- For example: the following combination of blocks could be present in a Message Structure

| SBE SECTION | DESCRIPTION | LENGTH |
|----------------------------|--|---|
| Frame | The “Frame” field contains the length of the message including the length of the “Frame” and “SBE header” fields. | 2 bytes |
| SBE Header | SBE header is composed of 4 fields, as previously defined. | 8 bytes |
| Block | The block is for all the non-repeated fields. They must be present on the wire for each message, even if they are optional. | As defined by the template (in bytes) |
| Repeating section 1 header | This is how many times the repeating section is repeated and the length of the repeating section. It will not be displayed in any below message. <i>Num In Group</i> is at 0 if there is no repeating section. | 2 bytes (1byte for the length 1byte for the count) |
| Repeating section 1.a | First occurrence of the repeating section 1. | As defined by the template (in bytes) |
| Repeating section 1.n | Occurrence N of the repeating section 1. | As defined by the template (in bytes) |
| Repeating section 2 header | This is how many times the repeating section is repeated and the length of the repeating section. It will not be displayed in any below message. <i>Num In Group</i> is at 0 if there is no repeating section. | 2 bytes (1byte for the length 1byte for the count) |
| Repeating section 2.a | All these fields are in bold and <u>blue</u> table borders, it might be <u>0 to 1</u> occurrence for this repeating section. This it is used to manage optional fields. | As defined by the template (in bytes) |

5.2.2 Example: NewOrder (01) message

- Below is an example representing the sections using the **NewOrder** (01) message (Frame and headers provided):

| SBE SECTION | DESCRIPTION | LENGTH |
|--|---|---|
| Frame | The "Frame" field contains the length of the message including the length of the "Frame" and "SBE header" fields. | 2 bytes |
| SBE Header | SBE header is composed of 4 fields, as previously defined. | 8 bytes |
| Block | Includes all the mandatory fields for the NewOrder (01) message. | As defined by the template (in bytes) |
| FreeTextSection header | This is how many times the repeating section 1 is repeated and the length of a repeating section 1. It will not be displayed in any below message. It is at 0 if there is no repeating section. | 2 bytes (1byte for the length 1byte for the count) |
| FreeTextSection Repeating section | This repeating section contains only the <i>FreeText</i> and can be populated 0, 1 or 2 times (2 times for Cross Orders only). | As defined by the template (in bytes) |
| MiFIDShortcodes Repeating section header | This is how many times the repeating section 2 is repeated and the length of a repeating section 2. It will not be displayed in any below message. It is at 0 if there is no repeating section. | 2 bytes (1byte for the length 1byte for the count) |
| MiFIDShortcodes Repeating section | This repeating section contains MiFID II short codes and can be populated 0, 1 or 2 times (2 times for Cross Orders only). | As defined by the template (in bytes) |
| OptionalFields Repeating section header | This is how many times the repeating section 3 is repeated and the length of a repeating section 3. It will not be displayed in any below message. It is at 0 if there is no repeating section. | 2 bytes (1byte for the length 1byte for the count) |
| OptionalFields Repeating section | This repeating section contains additional order characteristics and can be populated 0 or 1 time. | As defined by the template (in bytes) |
| ClearingFields Repeating section header | This is how many times the repeating section 4 is repeated and the length of a repeating section 4. It will not be displayed in any below message. It is at 0 if there is no repeating section. | 2 bytes (1byte for the length 1byte for the count) |
| ClearingFields Repeating section | This repeating section contains the clearing data and can be populated 0, 1 or 2 times (2 times for Cross Orders only). | As defined by the template (in bytes) |
| NotUsedGroup1 Repeating section header | Header of an empty repeating section; both fields of this header must be set to "0". | 2 bytes (1byte for the length 1byte for the count) |
| NotUsedGroup2 Repeating section header | Header of an empty repeating section; both fields of this header must be set to "0". | 2 bytes (1byte for the length 1byte for the count) |

It means that a message that contains at least one repeating section has a variable length, depending of the number of times each repeating section is populated.

- As an example, below is a representation of the fields that may be sent in the structure of [NewOrder \(01\)](#) message, that represent some of the sections listed above.
 - The following sections are populated in this example: the Frame, SBE Header, Block, **MiFIDShortcodes Repeating Section** populated once, **OptionalFields Repeating Section** populated once.
 - The following sections are not populated in this example: **FreeTextSection Repeating Section**, **ClearingFields Repeating Section**.

Please note that the values provided in this example are purely indicative and do not represent any specific trading case. Moreover, the values are here provided in a "human readable format" when in reality they will be sent on the wire in a binary format.

| FIELD | SHORT DESCRIPTION | VALUES | PRESENCE |
|--------------------------------|---|---|-------------|
| Frame | The "Frame" field contains the length of the message including the length of the "Frame" and "SBE header" fields. | 152 | Mandatory |
| Block Length | Length of the block. The Block is the message without the repeating sections. | 72 | Mandatory |
| Template ID | Identifier of the message template. This is the message type of the message | 01 | Mandatory |
| Schema ID | Identifier of the message schema that contains the template. | 2 | Mandatory |
| Schema version | Version of the message schema in which the message is defined. | 1 | Mandatory |
| Client Message Sequence Number | The Client Message Sequence Number is mandatory for all inbound messages, but the consistency of the sequence is not checked by the Exchange. | 5 | Mandatory |
| Firm ID | Firm ID. | 00010258 | Mandatory |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | 26th October 2016 @ 12:16:46-015-255-248 | Mandatory |
| Client Order ID | Client order ID. | 1 | Mandatory |
| Symbol Index | Exchange identification code of the instrument. | 46489 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | 1 COB | Mandatory |
| Order Side | Indicates the side of the order. | 2 Sell | Mandatory |
| Order Type | Type of Order. | 2 Limit | Mandatory |
| Time In Force | Specifies the maximum validity of an order. | 0 Day | Mandatory |
| Order Price | Instrument price per quantity unit. | 150000000 | Conditional |
| Order Quantity | Total order quantity, per quantity unit. | 200000000 | Mandatory |

| FIELD | SHORT DESCRIPTION | VALUES | PRESENCE |
|--|--|------------|-------------|
| ExecutionWithinFirmShortCode | MiFID II short code, Execution within firm, identifier of the trader or algorithm responsible for the execution making. | 54687785 | Mandatory |
| Trading Capacity | MiFID II field that indicates whether the order submission results from trading as matched principal, on own account or as any other capacity. | 1 | Mandatory |
| Account Type | Indicates the account type for which the order is entered. | 4 RO | Mandatory |
| LP Role | Liquidity Provider Role identifies the type of the Liquidity Provider. | Null Value | Conditional |
| Execution Instruction | Field used as instruction for order handling. | 00000000 | Mandatory |
| Dark Execution Instruction | Field used as instruction for dark order handling. | 00000000 | Mandatory |
| MiFID Indicators | Field used as instruction for order handling. | 00000000 | Mandatory |
| STP ID | Indicates STP ID to which the order belongs to. Identifier of a group of Users or Traders sharing the same business activity at the same Firm. | Null Value | Optional |
| Non Executing Client ID | This field will be used as unique client Key. | Null Value | Optional |
| Block Length for FreeTextSection repeating section | Defines the length in bytes of the repeating section 1. | 18 | Mandatory |
| Num In Group for FreeTextSection repeating section | Defines how many times the repeating section 1 is repeated. | 0 | Mandatory |
| Block Length for MiFIDShortcodes repeating section | Defines the length in bytes of the repeating section 2. | 12 | Mandatory |
| Num In Group for MiFIDShortcodes repeating section | Defines how many times the repeating section 2 is repeated. | 1 | Mandatory |
| InvestmentDecisionWFirmShortCode | MiFID II short code, Investment decision within firm, identifier of the trader or algorithm responsible for the investment decision. | Null Value | Conditional |
| NonExecutingBrokerShortCode | MiFID II short code, Non-executing broker, identifier of the non-executing broker. | 432108435 | Optional |
| ClientIdentificationShortCode | MiFID II short code, Client identification code. Short Code used to identify the entity executing the transaction. In case there is DEA, the code of the DEA user shall be used. | 525896547 | Conditional |

| FIELD | SHORT DESCRIPTION | VALUES | PRESENCE |
|---|--|------------|-------------|
| Block Length for OptionalFields repeating section | Defines the length in bytes of the repeating section 3. | 50 | Mandatory |
| Num In Group for OptionalFields repeating section | Defines how many times the repeating section 3 is repeated. | 1 | Mandatory |
| Stop Trigger Price | Stop Trigger Price is mandatory for stop orders. | Null Value | Conditional |
| Undisclosed Price | Optional price a client can give to the hidden part of an Iceberg order. | Null Value | Conditional |
| Disclosed Quantity | Maximum number of quantity units to be shown to market participants (Iceberg Order). (To be calculated with Quantity Level Decimals) | Null Value | Conditional |
| Minimum Order Quantity | Minimum quantity to be executed upon order entry (else the order is rejected), (To be calculated with Quantity Level Decimals). | 50000000 | Optional |
| QuoteReqID | Numerical RFQ identifier assigned by the matching engine, unique per instrument and EMM. | Null Value | Optional |
| Order Expiration Time | Field used as time of order expiration for GTT orders. | Null Value | Conditional |
| Order Expiration Date | Field used as date of order expiration for GTD orders. | Null Value | Conditional |
| Peg Offset | Tick offset for a pegged order. | Null Value | Conditional |
| Trading Session Validity | Trading Session Validity. | Null Value | Optional |
| Undisclosed Iceberg Type | Order handling related to the undisclosed part of an Iceberg order eligible to a matching in the Dark pool of liquidity. | Null Value | Optional |
| Triggered Stop Time In Force | Specifies the maximum validity of an triggered stop order. | Null Value | Conditional |
| Block Length for ClearingFields repeating section | Defines the length in bytes of the repeating section 4. | 34 | Mandatory |
| Num In Group for ClearingFields repeating section | Defines how many times the repeating section 4 is repeated. | 0 | Mandatory |
| Block Length for NotUsedGroup1 repeating section | Defines the length in bytes of the repeating section 5. | 0 | Mandatory |
| Num In Group for NotUsedGroup1 repeating section | Defines how many times the repeating section 5 is repeated. | 0 | Mandatory |
| Block Length for NotUsedGroup2 repeating section | Defines the length in bytes of the repeating section 6. | 0 | Mandatory |

| FIELD | SHORT DESCRIPTION | VALUES | PRESENCE |
|--|---|--------|-----------|
| Num In Group for NotUsedGroup2 repeating section | Defines how many times the repeating section 6 is repeated. | 0 | Mandatory |

- Below is another example of the fields that may be sent in the structure of [NewOrder \(01\)](#) message, but this time the repeating section containing the clearing data is repeated twice:
 - The following sections are populated in this example: the Frame, SBE Header, Block, **ClearingFields Repeating Section** populated twice.
 - The following sections are not populated in this example: **FreeTextSection Repeating Section**, **MiFIDShortcodes Repeating Section** and **OptionalFields Repeating Section**.

Please note that the values provided in this example are purely indicative and do not represent any specific trading case. Moreover, the values are here provided in a "human readable format" when in reality they will be sent on the wire in a binary format.

| FIELD | SHORT DESCRIPTION | VALUES | PRESENCE |
|--------------------------------|---|---|-----------|
| Frame | The "Frame" field contains the length of the message including the length of the "Frame" and "SBE header" fields. | 154 | Mandatory |
| Block Length | Length of the block. The Block is the message without the repeating sections. | 72 | Mandatory |
| Template ID | Identifier of the message template. This is the message type of the message | 01 | Mandatory |
| Schema ID | Identifier of the message schema that contains the template. | 2 | Mandatory |
| Schema version | Version of the message schema in which the message is defined. | 1 | Mandatory |
| Client Message Sequence Number | The Client Message Sequence Number is mandatory for all inbound messages, but the consistency of the sequence is not checked by the Exchange. | 7 | Mandatory |
| Firm ID | Firm ID. | 00010258 | Mandatory |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | 26th October 2016 @ 14:07:22-785-123-591 | Mandatory |
| Client Order ID | Client order ID. | 2 | Mandatory |
| Symbol Index | Exchange identification code of the instrument. | 77997 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | 1 COB | Mandatory |
| Order Side | Indicates the side of the order. | 3 Cross | Mandatory |
| Order Type | Type of Order. | 2 Limit | Mandatory |
| Time In Force | Specifies the maximum validity of an order. | 0 Day | Mandatory |

| FIELD | SHORT DESCRIPTION | VALUES | PRESENCE |
|--|--|------------|-------------|
| Order Price | Instrument price per quantity unit. | 273000000 | Conditional |
| Order Quantity | Total order quantity, per quantity unit. | 1000000000 | Mandatory |
| ExecutionWithinFirmShortCode | MiFID II short code, Execution within firm, identifier of the trader or algorithm responsible for the execution making. | 2132156 | Mandatory |
| Trading Capacity | MiFID II field that indicates whether the order submission results from trading as matched principal, on own account or as any other capacity. | 1 | Mandatory |
| Account Type | Indicates the account type for which the order is entered. | 1 Client | Mandatory |
| LP Role | Liquidity Provider Role identifies the type of the Liquidity Provider. | Null Value | Conditional |
| Execution Instruction | Field used as instruction for order handling. | 00000000 | Mandatory |
| Dark Execution Instruction | Field used as instruction for dark order handling. | 00000000 | Mandatory |
| MiFID Indicators | Field used as instruction for order handling. | 00000000 | Mandatory |
| STP ID | For Future Use. | Null Value | Optional |
| Non Executing Client ID | This field will be used as unique client Key. | Null Value | Optional |
| Block Length for FreeTextSection repeating section | Defines the length in bytes of the repeating section 1. | 18 | Mandatory |
| Num In Group for FreeTextSection repeating section | Defines how many times the repeating section 1 is repeated. | 0 | Mandatory |
| Block Length for MiFIDShortcodes repeating section | Defines the length in bytes of the repeating section 2. | 12 | Mandatory |
| Num In Group for MiFIDShortcodes repeating section | Defines how many times the repeating section 2 is repeated. | 0 | Mandatory |
| Block Length for OptionalFields repeating section | Defines the length in bytes of the repeating section 3. | 50 | Mandatory |
| Num In Group for OptionalFields repeating section | Defines how many times the repeating section 3 is repeated. | 0 | Mandatory |
| Block Length for ClearingFields repeating section | Defines the length in bytes of the repeating section 4. | 34 | Mandatory |
| Num In Group for ClearingFields repeating section | Defines how many times the repeating section 4 is repeated. | 2 | Mandatory |
| Clearing Firm ID | Clearing firm ID. | Null Value | Optional |

| FIELD | SHORT DESCRIPTION | VALUES | PRESENCE |
|--|---|---------------|-----------|
| Client ID | Field used to identify the client (investor). | Null Value | Optional |
| Account Number | Account Number | JFG147G22G14 | Optional |
| Technical Origin | Indicates the nature of the order issuer | Null Value | Optional |
| Open Close | Open Close Indicator, Posting action. | Null Value | Optional |
| Clearing Instruction | Clearing Instruction. | Null Value | Optional |
| Account Type Cross | Indicates the account type for which the sell side of a cross order is entered. | Null Value | Optional |
| Clearing Firm ID | Clearing firm ID. | Null Value | Optional |
| Client ID | Field used to identify the client (investor). | Null Value | Optional |
| Account Number | Account Number | DHCVIE14987G | Optional |
| Technical Origin | Indicates the nature of the order issuer | Null Value | Optional |
| Open Close | Open Close Indicator, Posting action. | Null Value | Optional |
| Clearing Instruction | Clearing Instruction. | 8 Manual Mode | Optional |
| Account Type Cross | Indicates the account type for which the sell side of a cross order is entered. | 1 Client | Optional |
| Block Length for NotUsedGroup1 repeating section | Defines the length in bytes of the repeating section 5. | 0 | Mandatory |
| Num In Group for NotUsedGroup1 repeating section | Defines how many times the repeating section 5 is repeated. | 0 | Mandatory |
| Block Length for NotUsedGroup2 repeating section | Defines the length in bytes of the repeating section 6. | 0 | Mandatory |
| Num In Group for NotUsedGroup2 repeating section | Defines how many times the repeating section 6 is repeated. | 0 | Mandatory |

5.3 ADMINISTRATION MESSAGES

All administrative messages are available on the following Optiq Segments:

EQ FND FXI SP EQD IDD CMO BLK

5.3.1 Logon (100)

Client ► OEG

5.3.1.1 Message Description

The **Logon** (100) message is used by the clients to establish a connection with the Exchange and identify the last response message they have processed. It must be the first message sent by the client otherwise the OEG will drop the connection.

The **Logon** (100) message contains the following fields:

- *Logical Access ID*: it must be populated by the client according to the Logical Access used.
- *OE Partition ID*: it must be populated according to the partition the client connects to.
- *Last Message Sequence Number*: it is the sequence number of the last message received by the client from the Exchange on a specific OE Session.
- *Software Provider*: it is an optional field that should be populated for client using software provider services.
- *Queueing Indicator*: defines whether the orders are rejected or queued in case of throttling.

If the logon is successful, the OEG sends back a **LogonAck** (101) message providing the exchange identifier (*Exchange ID*) and the sequence number of the last message received from the client. Otherwise the OEG sends back a **LogonReject** (102) message providing the reason of the rejection (*Logon Reject Code*) and closes the connection.

Use of the Last Message Sequence Number

At the first logon of the trading day the client must set the field *Last Message Sequence Number* to 0, as no message can be received before a successful logon.

In case of an unintentional disconnection the client must use the field *Last Message Sequence Number* to indicate to the Exchange the sequence number of the last message he has received. If some messages have been lost during the disconnection the OEG will resend them to the client.

The clients must not skip sequence numbers; can however pass the Null Value as *Last Message Sequence Number* to notify the server not to validate the next sequence number. The server will accept the next sequence from the client and then send what it thinks is the next outbound sequence.

If the *Last Message Sequence Number* provided in the Logon message exceeds the sequence number of the last message sent by the Exchange, the OEG will reject the logon (**LogonReject** (102)) and will drop the connection, (this behaviour may differ for specific recovery cases).

5.3.1.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|------------------------------|--|--------------|-----|-----------------------|-------------|
| Logical Access ID | Identifier of the Logical Access. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |
| OE Partition ID | Identifies uniquely an OE Optiq partition by which the engine is reached. | Numerical ID | 2 | 0..2 ¹⁶ -2 | Mandatory |
| Last Message Sequence Number | Indicates the sequence number of the last message received by the Client from the Exchange on the OE Session. | Sequence | 4 | 0..2 ³² -2 | Conditional |
| Software Provider | Free text field entered by the client in the Logon (100) message, identifying the provider of the software used for exchange of messages for trading purposes. | Text | 8 | (Free Text) | Optional |
| Queueing Indicator | Indicates whether the client requests its orders to be queued or rejected in case of throttling. (0: False - Reject ; 1: True - Queue). | Boolean | 1 | 0 = False 1 = True | Mandatory |

5.3.2 Logon Ack (101)

Client ◀ OEG

5.3.2.1 Message Description

The **LogonAck** (101) message is sent by the OEG as a response to a successful logon of a client. The message provides the Exchange identifier (*Exchange ID*) along with the sequence number of the last client message processed by the system.

The sequence number may be used to identify gap in the messages sent or received. If the client realizes that some messages have been dropped, he can decide whether to resend or not to the messages that have not been processed by the Exchange.

Please note that rejected messages are considered as processed messages.

5.3.2.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------------------|---|----------|-----|-------------------------|-----------|
| Exchange ID | Identifies the exchange in the Logon process | Text | 8 | (See field description) | Mandatory |
| Last Client Message Sequence Number | Indicates the sequence number of the last message received by the Exchange from the Client on the OE Session. | Sequence | 4 | 0..2 ³² -2 | Mandatory |

5.3.3 Logon Reject (102)

Client ◀ OEG

5.3.3.1 Message Description

The **LogonReject** (102) message is sent by the OEG as a response to an unsuccessful logon of a client. The message provides the Exchange identifier (*Exchange ID*) along with the reason of the rejection (*Logon Reject Code*).

The *Last Client Message Sequence Number* indicates the sequence number of the last client message processed by the system and *Last Message Sequence Number* indicates the sequence number of the last message sent by the Exchange.

A logon rejection will automatically lead OEG to drop the connection.

If the logon fails because the OEG does not recognize the **Logon** (100) message at all (because of a structural error, when a message is improperly formatted according to these specifications, for example), then no connection is established and OEG does NOT send a **LogonReject** (102) message. In this circumstance, the client does not receive any response at all to the **Logon** (100) message.

5.3.3.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------|--|------------|-----|-------------------------|-----------|
| Exchange ID | Identifies the exchange in the Logon process | Text | 8 | (See field description) | Mandatory |
| Logon Reject Code | Provides the logon rejection reason. | Enumerated | 1 | (See field description) | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------------------|---|----------|-----|-----------------------|-----------|
| Last Client Message Sequence Number | Indicates the sequence number of the last message received by the Exchange from the Client on the OE Session. | Sequence | 4 | 0..2 ³² -2 | Mandatory |
| Last Message Sequence Number | Indicates the sequence number of the last message received by the Client from the Exchange on the OE Session. | Sequence | 4 | 0..2 ³² -2 | Mandatory |

5.3.4 Logout (103)

Client ◀▶ OEG

5.3.4.1 Message Description

The **Logout (103)** message with *Log Out Reason Code* = 0 is sent by the client in order to close the connection with the Exchange. In regular cases, at the end of day the Exchange sends a **Logout (103)** message with *Log Out Reason Code* = 1 to the clients before dropping the connection.

Please note that in both cases it will trigger the Cancel On Disconnect mechanism if it is enabled.

5.3.4.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|---------------------|--|------------|-----|-------------------------|-----------|
| Log Out Reason Code | Log Out Reason Code. Value 0 is provide by the client, all other possible values are provided by the Exchange. | Enumerated | 1 | (See field description) | Mandatory |

5.3.5 Heartbeat (106)

Client ◀▶ OEG

5.3.5.1 Message Description

The **Heartbeat (106)** message is used during periods of inactivity, (i.e. when there is no exchange of application messages), either by the OEG or the clients to notify each other that this inactivity is not due to a technical issue.

The message is only composed of an SBE Header. Please refer to [Section 4.1.1 SBE Header](#).

It is sent by:

- The OEG after *n* second(s) of inactivity to notify the client that the connection functions properly, or as a response to a client's **TestRequest (107)**.
- The client as a response to a **TestRequest (107)** message to notify the OEG that his system functions properly. (Please note that any application message is also a proper response to the **TestRequest (107)** message.)

The parameter *n* has a specific value defined for each Optiq Segment. Please refer to the *Euronext Cash and Derivatives Markets – Optiq OEG Connectivity Aruba Datacentre - Technical Specification* document for the values of the parameter *n*.

5.3.6 TestRequest (107)

Client ◀▶ OEG

5.3.6.1 Message Description

The **TestRequest** (107) message is used by the OEG to check if the network and the client's system function properly.

The message is only composed of an SBE Header. Please refer to [Section 4.1.1 Header](#).

It is sent by the OEG after n second(s) of inactivity on the client side. Then:

- The client has n second(s) delay to answer the **TestRequest** (107) message by sending a **Heartbeat** (106) message, or any other application message.
- Otherwise if the client does not issue any message within the given delay, the OEG closes the connection. (Note that it triggers the Cancel on Disconnect mechanism if it is enabled)

It can also be sent by the clients to the OEG at any moment and the OEG will answer with a **Heartbeat** (106) message.

The parameter n has a specific value defined for each Optiq Segment.

Please refer to the *Euronext Cash and Derivatives Markets – Optiq OEG Connectivity Aruba Datacentre – Technical Specification* document for the values of the parameter n .

5.3.7 Technical Reject (108)

Client ◀ OEG

5.3.7.1 Message Description

The **TechnicalReject** (108) message is sent by the order entry gateway to notify the request issuer that their requests are not processed. It is used to reject application and unknown messages sent by the client.

The **TechnicalReject** (108) message is sent by the order entry gateway for the following reasons:

- Throttling
- Unknown message

The *Rejected Client Message Sequence Number* provided in the **TechnicalReject** (108) message identifies the request which is rejected: it is the *Client Message Sequence Number* of the corresponding inbound message sent by the client.

Note: in case of a rejection of an unknown message the *Rejected Client Message Sequence Number* may not be provided.

The reason of the rejection is provided by the Error Code, and a text message explaining the error is provided in the Error Code list file (.csv).

Please refer to the *Euronext Cash and Derivatives Markets – Optiq OEG Connectivity Aruba Datacentre – Technical Specification* and *Euronext Cash Markets – Throttling Description* documents for further details.

5.3.7.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|---|---|---------------------------|-----|-----------------------|-------------|
| OEG OUT To Member | Order Entry Gateway OUT time to member (in ns), measured when outbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Conditional |
| Rejected Client Message Sequence Number | Indicates the Client Message Sequence Number of the rejected message. | Sequence | 4 | 0..2 ³² -2 | Conditional |

| FIELD | SHORT DESCRIPTION | FORMAT | LE N | VALUES | PRESENC E |
|--------------------------------|---|--------------|---------|-----------|-----------------|
| <i>Rejected Message</i> | [N/A] Deprecated field | Numerical ID | 1 | 0..2^8-1 | Condition al |
| Error Code | Error code in case of rejection. | Numerical ID | 2 | 0..2^16-2 | Mandator y |
| Rejected Message ID | Provides the ID (Template ID) of the rejected message. | Numerical ID | 2 | 0..2^16-1 | Condition al |

5.4 APPLICATION MESSAGES

5.4.1 New Order (01)

Client ► OEG

Available for: EQ FND FXI SP EQD IDD CMO BLK

5.4.1.1 Message Description

The **NewOrder** (01) message is used by the clients to create a new order.

All the fields in the block of the message must be populated for each **NewOrder** (01) otherwise the message will be immediately rejected by the Order Entry Gateway (OEG).

Optional fields clients do not want to populate must still be present in the block and set to the null value by the client application. For example, for Market, Stop-Market and Market To Limit orders, the *Order Price* is useless but the field must be present and set to the null value.

The **NewOrder** (01) message can be used by the Liquidity Providers to answer a specific **QuoteRequest** (10) message and by the RFQ issuer to confirm the RFQ (*OrderPrice* field is mandatory).

On Block Segment, the **NewOrder** (01) message might be sent as an answer to an indication of interest and, in that case:

- IOI ID must be set to the value of the Exchange IOI ID provided by the Exchange in the Wave For Liquidity Notification (74) sent to acknowledge the Wave For Liquidity (73). In case the value provided doesn't match an existing indication of interest the order is rejected;

On Derivatives segments, Market Makers using Logical Accesses setup as 'Market Making', may use the **NewOrder** (01) message with Account type of Market Maker, while also using the **Quotes** (08) messages.

The field *Long Client ID* is used as following:

- For the Derivatives market, in place of the Client ID field - used for Cash markets only;
 - If the field *Client ID* is provided for Derivatives markets the message is rejected;
- For Cash markets, must be provided in case of IPO market model where the allocation algorithm is tax id, to provide the tax code information. For all other cases is ignored;

The field *Minimum Order Quantity* is conditional as the client must enter a quantity when the field Dark Execution Instruction, bit in position 5 from the left (corresponding to Minimum Quantity Type) is equal to 1 (MES); else the order could never be executed during the RFQ matching mechanism.

Repeating Section Usage

The message contains **seven optional repeating sections**:

- **FreeText repeating section:** the first repeating section contains only the field *FreeText*. It can be populated once for Buy and Sell orders and twice for Cross orders, respectively for the buy side and the sell side. Please note that the *FreeText* is part of the Clearing Data repeating section, which aggregates the clearing-related data (clearing aggregate) but it is set in a dedicated repeating section for performance purpose. Possible number of repeating groups: 0, 1, 2.
- **MiFID Shortcodes repeating section:** the second repeating section contains the MiFID shortcodes and can be populated once for Buy and Sell orders. It can be repeated twice for Cross orders, respectively for the buy side and the sell side. Possible number of repeating groups: 0, 1, 2.
- **Additional Order Characteristics repeating section:** the third repeating section can be populated only once and contains optional order characteristics along with conditionally required fields. For the specific conditions on the conditionally required fields please refer to section *Order Characteristics*. Possible number of repeating groups: 0, 1.

- **Clearing Data repeating section:** the fourth repeating section contains the clearing fields. Possible number of repeating groups: 0, 1, 2.
 - For standard Buy and Sell orders the first occurrence is optional and contains all the clearing data of the order. Please note that in that case, the field *Account Type Cross* is always ignored by the system as the Account Type value of the standard order is specified in the block of the message.
 - For Cross orders, two occurrences are mandatory; the first one for the buy side and the second one for the sell side.
 - ◆ Account Type for Cross orders is filled by Members as follows:
 - The Account Type value of the buy side is specified in the *Account Type* field in the block of the message and the Account Type value of the sell side is specified in the *Account Type Cross* field of the second occurrence (the sell side occurrence). As a consequence, the *Account Type Cross* field of the first occurrence is never used and is thus ignored by the OEG.
 - ◆ Trading Capacity for Cross orders is filled by Members as follows:
 - Either in the block of the message via the field *Trading Capacity* when the value of the Trading Capacity on the Buy side is equal to the value of the Trading Capacity on the Sell side.
 - OR in the block of the message via the field *Trading Capacity* for the Buy Side and via the field *Trading Capacity Cross* in the second occurrence (the sell side occurrence) when the value of the Trading Capacity on the Buy side is different from the value of the Trading Capacity on the Sell side . As a consequence, the *Trading Capacity Cross* field of the first occurrence is never used and is thus ignored (or rejected in case content is invalid) by the OEG.

Note: The following combinations of Trading Capacity and Trading Capacity Cross values are rejected for Cross orders:

- ◆ DEAL vs. DEAL
 - ◆ DEAL vs. MTCH
 - ◆ MTCH vs. DEAL
 - ◆ MTCH vs. MTCH
- **NotUsedGroup1 Repeating Section:** this repeating section is for future use and must not be used for now; the two fields of the header must be set to zero "0".
 - **NotUsedGroup2 Repeating Section:** this repeating section is for future use and must not be used for now; the two fields of the header must be set to zero "0".
 - **AdditionalInfos:** This repeating section contains only the "Long Client ID" field. Possible number of repeating groups: 0, 1.

5.4.1.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------------------------|---|---------------------------|-----|---|-----------|
| Client Message Sequence Number | The Client Message Sequence Number is mandatory for all inbound messages, but the consistency of the sequence is not checked by the Exchange. | Sequence | 4 | 0..2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric I ID | 8 | (See field description) | Mandatory |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| Client Order ID | An identifier of a message assigned by the Client when submitting an order to the Exchange. | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|------------------------------|--|--------------|-----|--|-------------|
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |
| Order Side | Indicates the side of the order. | Enumerated | 1 | 1 = Buy 2 = Sell 3 = Cross [i] | Mandatory |
| Order Type | Type of Order. | Enumerated | 1 | (See field description) | Mandatory |
| Time In Force | Specifies the maximum validity of an order. | Enumerated | 1 | (See field description) | Mandatory |
| Order Price | Instrument price per quantity unit (To be calculated with Price/Index Level Decimals). | Price | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Conditional |
| Order Quantity | Total order quantity, per quantity unit. (To be calculated with Quantity Decimals). | Quantity | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| ExecutionWithinFirmShortCode | MiFID II short code, Execution within firm, identifier of the trader or algorithm responsible for the execution making. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Mandatory |
| Trading Capacity | Indicates whether the order submission results from trading as matched principal, on own account or as any other capacity. | Enumerated | 1 | 1 = Dealing on own account (DEAL) 2 = Matched principal (MTCH) 3 = Any other capacity (AOTC) | Mandatory |
| Account Type | Indicates the account type for which the order is entered. For example, an order can be entered for a client account, a house account or a liquidity provider account. | Enumerated | 1 | (See field description) | Mandatory |
| LP Role | Liquidity Provider Role identifies the type of the Liquidity Provider when Account Type is equal to "Liquidity Provider". | Enumerated | 1 | 1 = Liquidity Provider or Market Maker 3 = Retail Liquidity Provider 12 = RFQ Liquidity Provider | Conditional |
| Execution Instruction | Field used as instruction for order handling. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | (See field description) | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-----------------------------------|---|--------------|-----|---|-------------|
| Dark Execution Instruction | Field used as instruction for dark order handling. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | 0 = Dark Indicator 1 = Deferred Trade Indicator 2 = Displayed Order Interaction 3 = Sweep Order Indicator 4 = Minimum Quantity Type | Mandatory |
| MiFID Indicators | Field used as instruction for order handling. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | (See field description) | Mandatory |
| STP ID | Identifier of a group of Users or Traders sharing the same business activity at the same Firm. | Numerical ID | 2 | 0..2 ¹⁶ -1 | Optional |
| Non Executing Client ID | This field will be used as unique client Key. Field indicating the client ID of the participant in a commercial package. | Numerical ID | 2 | 0..2 ¹⁶ -1 | Optional |
| IOI ID | Unique identifier of IOI message. | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Optional |
| FreeTextSection length | | Numerical | 1 | 18 | Mandatory |
| FreeTextSection occurrences | | Numerical | 1 | 0..2 | Mandatory |
| Free Text | Free Text is manually entered by the trader issuing the order. This field is part of the clearing aggregate. | Text | 18 | (Free Text) | Optional |
| MiFIDShortcodes length | | Numerical | 1 | 12 | Mandatory |
| MiFIDShortcodes occurrences | | Numerical | 1 | 0..2 | Mandatory |
| InvestmentDecisionWFFirmShortCode | MiFID II short code, Investment decision within firm, identifier of the trader or algorithm responsible for the investment decision. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Conditional |
| NonExecutingBrokerShortCode | MiFID II short code, Non-executing broker, identifier of the non-executing broker. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Optional |
| ClientIdentificationShortCode | MiFID II short code, Client identification code. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Conditional |
| OptionalFields length | | Numerical | 1 | 50 | Mandatory |
| OptionalFields occurrences | | Numerical | 1 | 0 .. 1 | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|------------------------------|--|-------------------|-----|--|-------------|
| Stop Trigger Price | Stop Trigger Price is mandatory for stop orders. | Price | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Conditional |
| Undisclosed Price | [N/A] Optional price for the hidden part of an Iceberg order. | Price | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Optional |
| Disclosed Quantity | Maximum number of quantity units to be shown to market participants (Iceberg Order). (To be calculated with Quantity Decimals) | Quantity | 8 | 0..2 ⁶⁴ -1 | Conditional |
| Minimum Order Quantity | Minimum quantity to be executed upon order entry (else the order is rejected), (To be calculated with Quantity Decimals). | Quantity | 8 | 0..2 ⁶⁴ -1 | Conditional |
| QuoteReqID | Numerical RFQ identifier assigned by the matching engine, unique per instrument and EMM. | Numerical ID | 8 | 0..2 ⁶⁴ -1 | Conditional |
| Order Expiration Time | [N/A] Field used as time of order expiration for GTT orders. | Numerical ID | 4 | 0..2 ³² -1 | Conditional |
| Order Expiration Date | Field used as date of order expiration for GTD orders. | Date | 2 | 0..2 ¹⁶ -1 | Conditional |
| Peg Offset | Tick offset for a pegged order. | Numerical ID | 1 | -128 .. 127 | Conditional |
| Trading Session Validity | Trading Session Validity. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | Bit 0 = Session 1 Bit 1 = Session 2 Bit 2 = Session 3 Bit 3 = Session 4 | Conditional |
| Undisclosed Iceberg Type | [N/A] Order handling related to the undisclosed part of an Iceberg order eligible to a matching in the Dark pool of liquidity. | Enumerated | 1 | 1 = Limit 2 = Peg Mid-Point 3 = Peg Primary 4 = Peg Market | Optional |
| Triggered Stop Time In Force | Specifies the maximum validity of an triggered stop order. | Enumerated | 1 | 0 = Day 1 = Good Till Cancel 3 = Immediate or Cancel 6 = Good till Date | Conditional |
| ClearingFields length | | Numerical | 1 | 35 | Mandatory |
| ClearingFields occurrences | | Numerical | 1 | 0..2 | Mandatory |
| Clearing Firm ID | Clearing firm ID. | Alphanumeric I ID | 8 | (See field description) | Optional |
| Client ID | Field used to identify the client (investor). This field is part of the clearing aggregate | Alphanumeric I ID | 8 | (See field description) | Optional |
| Account Number | Account Number. Client's position account ID, identifying the investor's account. This field is part of the clearing aggregate. | Alphanumeric I ID | 12 | (See field description) | Optional |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-----------------------------|--|-------------------|-----|--|-----------|
| Technical Origin | Indicates the origin of the order; for example, manual entry, or an order coming from a Program Trading system. This field is part of the clearing aggregate. | Enumerated | 1 | 1 = Index trading arbitrage 2 = Portfolio strategy 3 = Unwind order 4 = Other orders (default) 5 = Cross margining | Optional |
| Open Close | Open Close Indicator, Posting action. This field is part of the clearing aggregate. | Bitmap | 2 | (See field description) | Optional |
| Clearing Instruction | Clearing Instruction. | Enumerated | 2 | (See field description) | Optional |
| Account Type Cross | Indicates the account type for which the sell side of a cross order is entered. | Enumerated | 1 | (See field description) | Optional |
| Trading Capacity Cross | Indicates for the sell side of a cross order whether the order submission results from trading as matched principal, on own account or as any other capacity. | Enumerated | 1 | 1 = Dealing on own account (DEAL) 2 = Matched principal (MTCH) 3 = Any other capacity (AOTC) | Optional |
| NotUsedGroup1 length | | Numerical | 1 | 0 | Mandatory |
| NotUsedGroup1 occurrences | | Numerical | 1 | 0 | Mandatory |
| NotUsedGroup2 length | | Numerical | 1 | 0 | Mandatory |
| NotUsedGroup2 occurrences | | Numerical | 1 | 0 | Mandatory |
| AdditionalInfos length | | Numerical | 1 | 16 | Mandatory |
| AdditionalInfos occurrences | | Numerical | 1 | 0..1 | Mandatory |
| Long Client ID | Field used to identify the Client (investor), or trader's reference / posting order number for a pre-posting, entered as a free text used for clearing purposes. This field is part of the clearing aggregate for Derivatives. For Cash Markets this field is ignored except for IPO where this field is used to provide the information of the tax code. | Alphanumeric I ID | 16 | (See field description) | Optional |

5.4.2 Ack (03)

Client ◀ OEG

Available for: EQ FND FXI SP EOD IDD CMO BLK

5.4.2.1 Message Description

The acknowledgment message is sent by the matching engine to confirm that the corresponding request has been taken into account by the matching engine. Moreover, it usually allows the client to reconcile the *Client Order ID* he has given to its request with the *Order ID* assigned by the matching engine.

Note: *Original Client Order ID* is only provided in the **Ack** (03) as response to a **CancelReplace** (06) message if originally used in the corresponding request.

The acknowledgment message is sent by the matching engine in the following situations:

- Responses to **NewOrder** (01) requests in case of acceptance;
- Responses to **CancelReplace** (06) requests in case of acceptance;
- Responses to **PriceInput** (28) requests in case of acceptance; *used on the Cash markets only*
- Responses to **LiquidityProviderCommand** (32) requests in case of acceptance; *used on the Cash markets only*
- Responses to **QuoteRequest** (10) requests, in case of acceptance;
- Responses to **NewOrder** (01) or **CancelReplace** (06) for an Iceberg Transformed to Limit due to Minimum size;
- Responses to **RequestForImpliedExecution** (66) requests, in case of acceptance; *used on Derivatives markets only*
- Responses to **Cross Order** (67) requests, in case of acceptance; *used on Derivatives markets only*
- Notifications of triggered Stop-Market/Stop-Limit orders;
- Notifications of triggered Valid For Uncrossing and Valid For Closing Uncrossing orders;
- Notifications of refilled Iceberg orders;
- Notifications of MTL orders transformed into Limit at the end of an Uncrossing trading phase;
- Notifications of order creations by Market Operations.
- Notifications of Dark Sweep orders being swept from Dark Order Book to COB

As a response to a NewOrder (01) request, *Ack Type*=New Order Ack.

It confirms the creation of the new order and specifies the *Order ID*, *Order Side*, *Order Price* (if any), *Order Quantity* for which the system has processed the order.

As a response to a CancelReplace (06) request, *Ack Type*=Replace Ack.

It confirms the modification of the order identified by the *Order ID* and specifies the *Order Side*, *Order Price* (if any), *Order Quantity* for which the system has processed the modified order. The *Original Client Order ID* will also be provided if it was provided in the original corresponding request. Note that the *Order Quantity* is the total order quantity originally submitted or newly modified by the client and not the leaves quantity.

As a response to a PriceInput (20) request, *Ack Type*=Price Input Ack.

It confirms that the matching engine has accepted the submitted reference price. It specifies the accepted price in the field *Order Price*, the fields *Order Side* and *Order Quantity* are irrelevant and then set to the null value.

As a response to a LiquidityProviderCommand (32) request, *Ack Type*=KIBI/KOBI/PAKO/Bid Only/Offer Only Ack.

It confirms that the matching engine has accepted the submitted action. The action is specified in the *Ack Type* (KIBI/KOBI/PAKO/Bid Only/Offer Only).

As a response to a QuoteRequest (10) message, *Ack Type*=RFQ Ack.

For the Funds segment - It confirms the creation of the new RFQ.

For the Derivatives segments – It confirms acceptance of the message for publication of the request for liquidity to the Market.

In both cases the *Ack* message specifies the *QuoteReqID* of this request, which is provided to the client in the *OrderID* field of the **Ack** (03) message.

As a response to a NewOrder (01) for an Iceberg Transformed to Limit due to Minimum size, *Ack Type*=Iceberg Transformed to Limit due to Minimum size.

It confirms the creation of the new order but it notifies the client that his iceberg order has been transformed into a limit order because any Iceberg order that is entered into the book below the minimum iceberg amount (as defined by MiFID II), or has its total amount updated to be below this amount, is automatically converted to a Limit order.

As a response to a RequestForImpliedExecution (66) message, *Ack Type*=RFIE Ack.

It confirms that the matching engine has accepted the submitted request for Implieds generation in the targeted strategy book.

As a response to a Cross Order (67) message, Used for the Derivatives Markets, *Ack Type*=Cross Order Ack. It confirms the acceptance of a cross order and specifies the *Order ID*, *Order Side*, *Order Price*, *Order Quantity* for which the system has processed the order. One Ack message is sent for each submitted side (i.e. two for the initiator).

As a notification of a triggered Stop-Market/Stop-Limit order, *Ack Type*=Stop Triggered Ack. It is an unsolicited message which notifies the client that its stop order previously submitted (identified by the *Order ID*) has been triggered and it specifies the *Order Side*, *Order Price* (if any), *Order Quantity* and *Order Priority* for which the system has processed the order.

As a notification of a triggered Valid For Uncrossing and Valid For Closing Uncrossing orders, *Ack Type*=VFU/VFC Triggered Ack.

It is an unsolicited message which notifies the client that its VFU/VFC order previously submitted (identified by the *Order ID*) has been triggered and it specifies the *Order Side*, *Order Price* (if any), *Order Quantity* and *Order Priority* for which the system has processed the order.

As a notification of a refilled Iceberg order, *Ack Type*=Refilled Iceberg Ack.

It is an unsolicited message which notifies the client that its Iceberg order has been refilled and it specifies the *Order Side*, *Order Price*, *Order Quantity* and *Order Priority* for which the system has processed the refilled order. Note that the *Order Quantity* is the total order quantity originally submitted by the client and not the quantity shown to the market nor the leaves quantity.

As a notification of a resting MTL order transformed into Limit order during uncrossing, *Ack Type*=MTL Second Ack.

It is an unsolicited message which notifies the client that its MTL has been transformed into a Limit order. It specifies the *Order Side*, *Order Price*, *Order Quantity* for which the system has processed the order. The *Order Price* is the price of the transformed Limit order and the *Order Quantity* is the total order quantity submitted by the client and not the leaves quantity.

It occurs if at the end of an Uncrossing trading phase:

- the instrument switches to a Continuous trading phase, all MTL orders (partially or not executed) always become Limit orders at the Uncrossing price for their remaining quantity;
- the instrument switches to a Call trading phase, all MTL orders partially executed become Limit orders at the Uncrossing price for their remaining quantity.

Notification using Ack Type= Order Creation By Market Operations is for Future use only. Currently not supported

As a notification of a Dark Sweep Order being swept from Dark Order Book to COB:

- *Ack Type*=Move Dark to COB as Limit -> It is an unsolicited message which notifies the client that its Dark Sweep Order, submitted to the Dark Order Book, failed to find a counterpart in that Book and was swept to the Central Order Book where it became a regular Limit Order
- *Ack Type*= Move Dark to COB as Market -> It is an unsolicited message which notifies the client that its Dark Sweep Order, submitted to the Dark Order Book, failed to find a counterpart in that Book and was swept to the Central Order Book where it became a regular Market Order

Short Codes in Outbound messages

The **Ack** (03) message echoes back to clients the following MIFID Short code fields

- ClientIdentificationShortCode
- ExecutionWithinFirmShortCode
- MiFIDIndicators

The values provided in these fields are populated with the originally submitted information in the **New Order** (01) message. If a modification of these fields is submitted, it is ignored by the system, and the **Ack** (03) message will still reply only the originally submitted values.

The **MiFIDFields** repeating section should be used for Optiq Derivatives while it is not used for Optiq Cash.

Private & Public by order feed reconciliation (when applicable)

For the Cash Markets the **Ack** (03) message allows the clients to reconcile their orders with the Market Data feed by using the field *Order Priority*.

This mechanism is explained in the Cash Market Kinematics document in Section 1.2.5.1 *Private and Public feed reconciliation*.

This allows the clients to identify their orders in public feed as the *Order Priority* is also provided in the public **OrderUpdate** (1002) message. The *Order Priority* is thus used as an order identifier.

Please note that the field *Order Priority* is provided in private message for all orders on the market. List below identifies the cases in which it is provided:

- In the **Ack** (03) message as a response to a **NewOrder** (01) (*including Stop-market/Stop-limit orders*);
- In the **Ack** (03) message for a triggered Stop-market/Stop-limit and VFU/VFC orders;
- In the **Ack** (03) message for a refilled Iceberg Order.

Modifications of non-triggered stop orders should not result in modification of their priority.

For the Derivatives Markets the **Ack** (03) message provides the *Order Priority*. It is provided to indicate the *Order Priority*, as indicated in the section [2.4 Order ID](#).

5.4.2.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------|---|---------------------------|-----|-------------------------|-------------|
| Message Sequence Number | Indicates the Message Sequence Number per OE Session. (for messages sent by the Exchange) | Sequence | 4 | 0..2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric I ID | 8 | (See field description) | Mandatory |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| OEG IN From Member | Order Entry Gateway IN time from member (in ns), measured when inbound message enters the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| OEG OUT To ME | Gateway OUT time to ME (in ns), measured when inbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| Book IN Time | Matching Engine IN time (in ns), time at which the corresponding inbound message entered the Matching Engine. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Mandatory |
| Book OUT Time | Matching Engine OUT time (in ns), when message leaves the Matching Engine (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------------------|---|---------------------------|-----|---|-------------|
| OEG IN From ME | Gateway IN time from ME (in ns), measured when outbound message enters the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| OEG OUT To Member | Order Entry Gateway OUT time to member (in ns), measured when outbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| Client Order ID | An identifier of a message assigned by the Client when submitting an order to the Exchange. | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Conditional |
| Original Client Order ID | Client order ID of the original order. | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Conditional |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |
| Order Side | Indicates the side of the order. | Enumerated | 1 | 1 = Buy 2 = Sell | Conditional |
| Ack Type | Indicates the type of the Ack message | Enumerated | 1 | (See field description) | Mandatory |
| Ack Phase | Indicates the trading phase during which the Matching Engine has processed the event that has triggered this Ack (03) message. | Enumerated | 1 | (See field description) | Conditional |
| Order ID | Numerical order identifier assigned by the matching engine, unique per instrument and EMM. | Numerical ID | 8 | 0..2 ⁶⁴ -1 | Conditional |
| Order Priority | Rank giving the priority of the order. The order with the lowest value of Order Priority has the highest priority. | Numerical ID | 8 | 0..2 ⁶⁴ -2 | Conditional |
| Order Price | Instrument price per quantity unit (To be calculated with Price/Index Level Decimals). | Price | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Conditional |
| Order Quantity | Total order quantity, per quantity unit. (To be calculated with Quantity Decimals). | Quantity | 8 | 0..2 ⁶⁴ -1 | Conditional |
| Ack Qualifiers | Field used to provide additional information on the corresponding order. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | (See field description) | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------------|--|--------------|-----|-------------------------|-------------|
| Order Tolerable Price | Allows the RFC Initiator to provide an improving tolerable price on the non-client side of the cross. This tolerable price is intended to anticipate possible price improvements, generated by RFC Reactors. In case RFC Initiator does not want to match RFC Reactors improved prices, this field must be provided with the Null value. (to be calculated with Price/Index Level Decimals). | Price | 8 | $-2^{63}+1..2^{63}-1$ | Optional |
| MiFIDFields length | | Numerical | 1 | 9 | Mandatory |
| MiFIDFields occurrences | | Numerical | 1 | 1 | Mandatory |
| ExecutionWithinFirmShortCode | MiFID II short code, Execution within firm, identifier of the trader or algorithm responsible for the execution making. | Numerical ID | 4 | $-2^{31}+1..2^{31}-1$ | Conditional |
| ClientIdentificationShortCode | MiFID II short code, Client identification code. | Numerical ID | 4 | $-2^{31}+1..2^{31}-1$ | Conditional |
| MiFID Indicators | Field used as instruction for order handling. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | (See field description) | Conditional |

5.4.3 Fill (04)

Client ◀ OEG

Available for: EQ FND FXI SP EQD IDD CMO BLK

5.4.3.1 Message Description

The **Fill (04)** message is an unsolicited message sent by the matching engine and is used to relay order execution reports. It notifies the issuers of orders that their orders have been partially or completely filled.

The order that has matched is identified by its *Order ID*; in case of Quotes the *Order ID* field is used for the *Bid Order ID* and *Offer Order ID*, the side is identified by the *Order Side*.

The message specifies the price (*Last Traded Price*), the quantity (*Last Traded Quantity*), the execution type (*Trade Type*) and the time (*Trade Time*) of the execution along with the *Execution ID* assigned by the matching engine. It also provides the remaining quantity of the order (*Leaves Quantity*).

For TRF and MOC contracts, the field Evaluated Price can contain either the Temporary Price or the Final Price. To identify which type of trade message is sent, customers may rely on the value in the field Trade Type.

If field Trade Type is equal to one of the provisional price values (100, 101 or 102) then the message is providing a Temporary Price.

If field Trade Type is equal to one of the conventional trade values (1, 2 or 4) then the message is providing the Final Price.

Trading Venue Transaction Identification Code (TVTIC)

The Trading Venue Transaction Identification Code (TVTIC) is the unique identifier of a trade in the EU and UK MiFID II framework. Each individual trade has a corresponding TVTIC. As a reminder, MiFID II reporting is at leg level.

The different ways to get a trade TVTIC are:

For Cash / Outright trades:

- ◆ Using the public Market Data feed, getting the *Trade Unique Identifier* in the **Full Trade Information** (1004) message;
- ◆ Using the private Order Entry feed:
 - In SBE **Fill** (04) or SBE **Declaration Notice** (42): getting the *Trade Unique Identifier*;
 - In FIX **ExecutionReport** (8) or FIX **TradeCaptureReportAck** (AR) : getting the *Regulatory Trade ID* with *Regulatory Trade ID Type* equals 5 (TVTIC);
- ◆ Retrieving the TVTIC field from the EOD Day Trade file (**FTRRM**).

For Strategies:

- ◆ Using the private Order Entry feed:
 - In SBE **Fill** (04): getting the *Trade Unique Identifier* in Strategy fields section to get the “Leg” Trade Unique Identifier;
 - In FIX **ExecutionReport** (8): getting the *Regulatory Trade ID* with *Regulatory Trade ID Type* equals 5 (TVTIC) where *RegulatoryLegRefID* equals the corresponding *Leg ID* in NoLegs section.

For APA Trades:

- ◆ Using the public Market Data feed, getting the *Trade Unique Identifier* in the **APA Full Trade Information** (1028) message.

Executions Wholesales and Strategies (for the Derivatives markets)

The executions for wholesale transactions done on strategies send individual **Fill** (04) messages for each leg of the strategy. This mean that for Delta-Neutral with a Cash underlying, submitted as a wholesale transaction clients receive a private message for the Cash instrument that is part of the Delta-neutral strategy.

Repeating Section Usage

The message may contain **four repeating sections**:

- **Additional Execution Data repeating section:** the first repeating section can be populated only once and contains only one field used by the Cash matching engine: *Counterpart Firm ID*. Possible number of repeating groups: 0, 1.
- **Strategy Execution Data repeating section:** the second repeating section is only used by the Derivatives matching engine.
- **MiFID Shortcodes repeating section:** the third repeating section contains the MiFID shortcodes. Possible number of repeating groups: 0,1. This repeating section should be used for Optiq Derivatives while it is not used for Optiq Cash.
- **Optional Derivatives fields repeating section:** the fourth repeating section contains optional data for Derivatives. Possible number of repeating groups: 0,1.

5.4.3.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------|---|-------------------|-----|-------------------------|-----------|
| Message Sequence Number | Indicates the Message Sequence Number per OE Session. (for messages sent by the Exchange) | Sequence | 4 | 0..2^32-2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric I ID | 8 | (See field description) | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|----------------------|---|---------------------------|-----|---|-------------|
| Trade Time | Time of the trade. | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| Book OUT Time | Matching Engine OUT time (in ns), when message leaves the Matching Engine (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| OEG IN From ME | Gateway IN time from ME (in ns), measured when outbound message enters the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| OEG OUT To Member | Order Entry Gateway OUT time to member (in ns), measured when outbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| Client Order ID | An identifier of a message assigned by the Client when submitting an order to the Exchange. | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Conditional |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |
| Order Side | Indicates the side of the order. | Enumerated | 1 | 1 = Buy 2 = Sell | Mandatory |
| Trade Type | Type of trade. | Enumerated | 1 | (See field description) | Mandatory |
| Trade Qualifier | Trade Qualifier. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | (See field description) | Mandatory |
| Order ID | Numerical order identifier assigned by the matching engine, unique per instrument and EMM. | Numerical ID | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| Last Traded Price | The Last Traded Price indicates the price of last fill on an instrument (to be calculated with the Price/Index Decimals). | Price | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Mandatory |
| Last Traded Quantity | The Last Traded Quantity indicates the quantity of last fill on an instrument (to be calculated with the Quantity Decimals). | Quantity | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| Leaves Quantity | Indicates the remaining quantity of an order, i.e. the quantity open for further execution. | Quantity | 8 | 0..2 ⁶⁴ -2 | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------------------------|--|-------------------|-----|--|-------------|
| Execution ID | The Execution ID is unique per instrument and per day. It is the unique identifier of a trade per instrument. This field is provided in case of fill, partial fill or trade cancellation. | Numerical ID | 4 | 0..2^32-2 | Mandatory |
| Execution Phase | Indicates the trading phase during which the trade has occurred. | Enumerated | 1 | 1 = Continuous Trading Phase 2 = Uncrossing Phase 3 = Trading At Last Phase 4 = Continuous Uncrossing Phase | Mandatory |
| LIS Transaction ID | ID that can be used to associated Executions belonging to the same LIS Transaction | Numerical ID | 4 | 0..2^32-2 | Conditional |
| ESCBMembership | Indicates if the trade is submitted by a member of the European System of Central Bank (ESCB) in performance of monetary, foreign exchange and financial stability policy. | Boolean | 1 | 0 = False 1 = True | Optional |
| Trade Unique Identifier | Alphanumeric code unique, consistent and persistent per ISO10383 segment MIC and per trading day assigned by the trading venue to a transaction. Trade Unique Identifier (TUI) is a field aimed at identifying an individual transaction and used as Trading Venue Transaction Identification Code (TVTIC). This is a unique transaction identification code generated by trading venues and disseminated to both the buying and the selling parties, in accordance with Article 12 of the Commission Delegated Regulation (EU) 2017/580 Regulatory Technical Standards (RTS). | Alphanumeric I ID | 16 | (see field description) | Mandatory |
| OptionalFieldsFill length | | Numerical | 1 | 32 | Mandatory |
| OptionalFieldsFill occurrences | | Numerical | 1 | 0 .. 1 | Mandatory |
| Counterpart Firm ID | ID of the clearing house in case of a CCP clearable transaction – also in the specific case of Internal Matching Service (IMS) with clearing: | Alphanumeric I ID | 8 | (See field description) | Conditional |
| Underlying Last Traded Price | Deprecated | Price | 8 | Deprecated | Conditional |
| Package ID | Deprecated | Alphanumeric I ID | 12 | Deprecated | Conditional |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|---------------------------------|--|-----------------|-----|---|-------------|
| <i>Underlying Instrument ID</i> | Deprecated | Numerical ID | 4 | Deprecated | Conditional |
| StrategyFields length | | Numerical | 1 | 41 | Mandatory |
| StrategyFields occurrences | | Numerical | 1 | 0..254 | Mandatory |
| Leg Last Traded Price | Leg Last Traded Price | Price | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Conditional |
| Leg Last Traded Quantity | Leg Last Traded Quantity | Quantity | 8 | 0..2 ⁶⁴ -1 | Conditional |
| Leg Instrument ID | Numerical leg instrument identifier (SymbolIndex) valid for the life of the instrument. | Numerical ID | 4 | 0..2 ³² -1 | Conditional |
| Leg Side | Indicates the side of the trade leg. | Enumerated | 1 | 1 = Buy 2 = Sell | Conditional |
| Execution ID | The Execution ID is unique per instrument and per day. It is the unique identifier of a trade per instrument. This field is provided in case of fill, partial fill or trade cancellation. | Numerical ID | 4 | 0..2 ³² -1 | Conditional |
| Trade Unique Identifier | Alphanumeric code unique, consistent and persistent per ISO10383 segment MIC and per trading day assigned by the trading venue to a transaction. Trade Unique Identifier (TUI) is a field aimed at identifying an individual transaction and used as Trading Venue Transaction Identification Code (TVTIC). This is a unique transaction identification code generated by trading venues and disseminated to both the buying and the selling parties, in accordance with Article 12 of the Commission Delegated Regulation (EU) 2017/580 Regulatory Technical Standards (RTS). | Alphanumeric ID | 16 | (see field description) | Conditional |
| MiFIDFields length | | Numerical | 1 | 9 | Mandatory |
| MiFIDFields occurrences | | Numerical | 1 | 0..1 | Mandatory |
| ExecutionWithinFirmShortCode | MiFID II short code, Execution within firm, identifier of the trader or algorithm responsible for the execution making. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Conditional |
| ClientIdentificationShortCode | MiFID II short code, Client identification code. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Conditional |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|---------------------------------------|---|--------------|-----|---|-------------|
| MiFID Indicators | Field used as instruction for order handling. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | (See field description) | Conditional |
| OptionalFieldsDerivatives length | | Numerical | 1 | 17 | Mandatory |
| OptionalFieldsDerivatives occurrences | | Numerical | 1 | 1 | Mandatory |
| Evaluated Price | This field is used for Total Return Future and Market On Close Future trading. The Price is calculated by ME in index point notation. It can contain the provisional price calculated in intra-day or the final price calculated at the end of the day. The Trade Type value will enable user to know if the field contains provisional price or final price. | Price | 8 | From $-2^{63}-1$ to $2^{63}-1$ | Conditional |
| Message Price Notation | This field provides the type of price notation used per message. For TRF and MOC products the value "Price" is used for TAM trading mode, the values "Spread in basis points" and "Spread" are used for TAIC trading mode. | Enumerated | 1 | 1 = Price 2 = Spread in basis points 3 = Spread | Conditional |
| Final Symbol Index | This field is used for the Market On Close (MOC) contracts to provide the symbol index of the final future instrument. | Numerical ID | 4 | $0..2^{32}-1$ | Conditional |
| Final Execution ID | This field is used for the Market On Close (MOC) contracts to provide the exec ID of the original trade on the final future instrument. | Numerical ID | 4 | $0..2^{32}-1$ | Conditional |

5.4.4 Kill (05)

Client ◀ OEG

Available for: EQ FND FXI SP EQD IDD CMO BLK

5.4.4.1 Message Description

The **Kill** (05) message is a message sent by the matching engine to notify the order issuer that his or her order is no longer active.

The **Kill** (05) message is sent by the matching engine in the following situations:

- Responses to **CancelRequest** (12) requests in case of acceptance;

- Responses to **MassCancel** (13) requests for each order successfully cancelled;
- Notifications of the cancellation of the remaining quantity of IOC orders;
- Notifications of the cancellation of the remaining quantity of RFC orders;
- Notification of orders cancelled by STP;
- Notifications of expired orders;
- Notifications of killed orders due to the Cancel On Disconnect mechanism;
- Notifications of killed orders due to a Kill command;
- Notifications of killed orders due cancellations triggered by Risk Guard commands;
- Notifications of killed orders due to Order Price Control Collar breach;
- Notifications of orders eliminated due to Corporate Events;
- Notifications of orders cancelled by Market Operations;
- Notifications of MTL orders cancelled at the end of an Uncrossing trading phase when switching to a Continuous trading phase if the order book on the opposite side is empty;
- Notifications of cancelled orders when an instrument is moving into Payment After Knock-Out (PAKO) period;
- Notifications of cancelled quotes when an instrument is Knock-Out;
- On ETF Access platform, notifications of cancellation of orders sent as 'RFQ Answer' (field *Execution Instruction*) in case the RFQ is cancelled by the issuer, expired or matched with other counterparts;
- On Euronext Block platform, notifications of conditional orders cancelled due to potential matching; this should be interpreted as a Firm-Up request;
- For Derivatives markets notifications of the cancellation of the unexecuted FOK orders;
- For Derivatives markets notifications of the cancellation of the Market orders that are not immediately executed on entry.
- The **MiFIDFields** repeating section should be used for Optiq Derivatives while it is not used for Optiq Cash.

In the block of the message the field *Client Order ID* identifies the request originally sent by the client that triggered the **Kill** (05) message, thus it is filled only if the **Kill** (05) message was solicited (e.g. as a response to a **CancelRequest** (06) message). It represents the data provided by the client and does not identify the id used by the system to kill the order, for these purposes the system uses the Order ID.

The killed order is identified by its *Order ID* and a *Kill Reason* is always provided for each killed order.

Handling of cancellation messages in case of different events and ownership or order messages:

- For an individual order cancellation message sent by the same Logical access and OE session that sent the order, a Kill (05) message is sent to that Logical Access and OE session.
Example: LA1 / OE1 sends the order, then LA1 / OE1 sends a cancellation. Kill message is sent to the LA1 / OE1
- For an individual order cancellation message sent by a different Logical access or OE session than the one that sent the original order, a Kill (05) message is sent to the Logical Access or OE session that submitted the cancellation
Example: LA1 / OE1 sends the order, then LA2 / OE2 sends a cancellation. Kill message is sent to the LA2 / OE2
- For a Mass cancel command (with granularity of a firm) while the Mass Cancel Ack message is sent to the Logical Access and/or OE session that submitted it, the Kill (05) messages for individual impacted orders are sent to the Logical Accesses and OE sessions that originally submitted the orders.
Example: LA1 / OE1 sends order1, LA3 / OE3 sends order2. Then LA2 / OE2 sends a Mass Cancel request. Mass Cancel Ack is sent to LA2 / OE2
- Cancellation of Orders at the Close of Business:
The dissemination of messages indicating automatic cancellation of orders by the system that have reached end of their validity at the end of the trading session only cover the orders with Day validity. For orders with validities of (1) Good Till Cancelled (GTC) and cancelled on the current date and (2) Good Till Date (GTD) with expiration date set to the current date, as well as cancellation of orders triggered by corporate actions (for Cash markets), elimination messages is disseminated at the start of the session on the next business day.

The messages for expired Day orders is disseminated at the beginning of the last Closed (Closing) phase at the end of the trading session without any expected additional delay. These messages are not re-disseminated at the start of the next trading session.

5.4.4.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------------------|---|---------------------------|-----|---|-------------|
| Message Sequence Number | Indicates the Message Sequence Number per OE Session. (for messages sent by the Exchange) | Sequence | 4 | 0..2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric I ID | 8 | (See field description) | Mandatory |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| OEG IN From Member | Order Entry Gateway IN time from member (in ns), measured when inbound message enters the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| OEG OUT To ME | Gateway OUT time to ME (in ns), measured when inbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| Book IN Time | Matching Engine IN time (in ns), time at which the corresponding inbound message entered the Matching Engine. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| Book OUT Time | Matching Engine OUT time (in ns), when message leaves the Matching Engine (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| OEG IN From ME | Gateway IN time from ME (in ns), measured when outbound message enters the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| OEG OUT To Member | Order Entry Gateway OUT time to member (in ns), measured when outbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| Client Order ID | An identifier of a message assigned by the Client when submitting an order to the Exchange. | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Conditional |
| Original Client Order ID | Client order ID of the original order. | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Conditional |
| Order ID | Numerical order identifier assigned by the matching engine, unique per instrument and EMM. | Numerical ID | 8 | 0..2 ⁶⁴ -2 | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------------|---|--------------|-----|---|-------------|
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |
| Kill Reason | Order Kill Reason | Enumerated | 2 | (See field description) | Mandatory |
| Ack Qualifiers | Field used to provide additional information on the corresponding order. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | (See field description) | Optional |
| MiFIDFields length | | Numerical | 1 | 9 | Mandatory |
| MiFIDFields occurrences | | Numerical | 1 | 1 | Mandatory |
| ExecutionWithinFirmShortCode | MiFID II short code, Execution within firm, identifier of the trader or algorithm responsible for the execution making. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Conditional |
| ClientIdentificationShortCode | MiFID II short code, Client identification code. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Conditional |
| MiFID Indicators | Field used as instruction for order handling. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | (See field description) | Conditional |

5.4.5 Cancel Replace (06)

Client ► OEG

Available for: EQ FND FXI SP EOD IDD CMO BLK

5.4.5.1 Message Description

The **CancelReplace** (06) message is used to modify **active orders in the order book**, note that only the originating Firm (regardless of the Logical Access) is authorized to modify its orders.

All the **fields in the block of the message must be populated** for each **CancelReplace** (06) otherwise the message will be immediately rejected by the Order Entry Gateway (OEG).

The MiFID short codes included in this message concern the **CancelReplace** (06) itself; it will not lead to any modification on the MiFID short codes previously submitted and associated to the live order to be modified.

Please note that the field *Client Order ID* is an identifier of the **CancelReplace** (06) request, and may not be equal to the value of the Client Order ID submitted in the original order message.

Important Note: An active order can be modified by specifying the *Order ID* of the original order or the *Original Client Order ID*:

- If the **CancelRequest** (12) message contains both *Order ID* and *Original Client Order ID*, the matching engine uses the *Order ID* to cancel the order. If the *Order ID* specified in the message is not found in the active orders list, the order modification is rejected. If the *Order ID* specified in the message is found the matching engine does not check that the Client Order ID of the order found ("modified" order) matches with the *Original Client Order ID* contained in the **CancelRequest** (12) message.

Handling of fields not available for modification

- *Account Type*, *LP Role* and *Dark Execution Instruction* fields present in this message will always be ignored by the system, which means that clients are not able to modify *Account Type/ LP Role/ Dark Execution Instruction* of their live orders. If modification is required clients must cancel their existing order and submit a new one with a **NewOrder** (01) message.
- *Order Side* and *Order Type* fields present in this message are not available for modification, but the values provided must match the values originally set on submission of the order. In the case where the values in the **CancelReplace** (06) message do not match with the *Order Side* and *Order Type* of the targeted order it will lead to the rejection of the request with the error code 2101 "Unknown Order". (For triggered Stop orders, the value in field *Order Type* must be equal to Limit (2), for Stop-limit, or Market (1) for Stop-market order, corresponding to the type of stop order originally submitted.)
- Modification of Time In Force
 - For the Cash Markets - modification of *Time In Force* results in rejection of the request in case orders are modified from a validity that is against market rules or cannot be executed. Such cases include modification of 'Valid for Closing Uncrossing' (7) or 'Valid for Uncrossing' (2) to any other validity.
 - For the Derivatives Markets – modification of *Time In Force* is not permitted. If **CancelReplace** (06) message is submitted with a different value for *Time In Force* then the original order, the modification request will be rejected.
- For *Cash*, in the context of the Tax ID functionality (part of the IPO market model), *Long Client ID* field present in this message will always be ignored by the system. If modification is required clients must cancel their existing order and submit a new one with a **NewOrder** (01) message.

Repeating Section Usage: the message contains **five optional repeating sections**:

- **FreeText repeating section:** the first repeating section contains only the field *FreeText*. It can be populated only once and will override the previously submitted value if populated, if not populated the previously submitted value will be deleted. Possible number of repeating groups: 0, 1.
- **Additional Order Characteristics repeating section:** the second repeating can be populated only once and contains optional order characteristics. If some optional fields are populated those values will override the previously submitted values, otherwise if not populated the previously submitted value will be deleted. Possible number of repeating groups: 0, 1.
- **Clearing Data repeating section:** the third repeating section contains the clearing fields. If some values are populated, they will override the previously submitted values, otherwise if not populated the previously submitted value will be deleted. Possible number of repeating groups: 0, 1.
- **NotUsedGroup1 Repeating Section:** this repeating section is for future use and must not be used for now; the two fields of the header must be set to zero "0".
- **NotUsedGroup2 Repeating Section:** this repeating section is for future use and must not be used for now; the two fields of the header must be set to zero "0".

5.4.5.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------------------------|---|------------------|-----|-------------------------|-----------|
| Client Message Sequence Number | The Client Message Sequence Number is mandatory for all inbound messages, but the consistency of the sequence is not checked by the Exchange. | Sequence | 4 | 0..2^32-2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric IID | 8 | (See field description) | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------------|--|---------------------------|-----|--|-------------|
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| ExecutionWithinFirmShortCode | MiFID II short code, Execution within firm, identifier of the trader or algorithm responsible for the execution making. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Mandatory |
| ClientIdentificationShortCode | MiFID II short code, Client identification code. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Conditional |
| Client Order ID | An identifier of a message assigned by the Client when submitting an order to the Exchange. | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Mandatory |
| Order ID | Numerical order identifier assigned by the matching engine, unique per instrument and EMM. | Numerical ID | 8 | 0..2 ⁶⁴ -2 | Conditional |
| Original Client Order ID | Client order ID of the original order. | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Conditional |
| Order Price | Instrument price per quantity unit (To be calculated with Price/Index Level Decimals). | Price | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Conditional |
| Order Quantity | Total order quantity, per quantity unit. (To be calculated with Quantity Decimals). | Quantity | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |
| Order Side | Indicates the side of the order. | Enumerated | 1 | 1 = Buy 2 = Sell | Mandatory |
| Order Type | Type of Order. | Enumerated | 1 | (See field description) | Mandatory |
| Time In Force | Specifies the maximum validity of an order. | Enumerated | 1 | (See field description) | Mandatory |
| Account Type | [N/A] Indicates the account type for which the order is entered. For example, an order can be entered for a client account, a house account or a liquidity provider account. | Enumerated | 1 | (See field description) | Optional |
| LP Role | [N/A] Liquidity Provider Role identifies the type of the Liquidity Provider when Account Type is equal to "Liquidity Provider". | Enumerated | 1 | 1 = Liquidity Provider or Market Maker 3 = Retail Liquidity Provider 12 = RFQ Liquidity Provider | Optional |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-----------------------------|---|--------------|-----|---|-------------|
| Execution Instruction | Field used as instruction for order handling. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | (See field description) | Mandatory |
| Dark Execution Instruction | Field used as instruction for dark order handling. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | 0 = Dark Indicator 1 = Deferred Trade Indicator 2 = Displayed Order Interaction 3 = Sweep Order Indicator 4 = Minimum Quantity Type | Mandatory |
| MiFID Indicators | Field used as instruction for order handling. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | (See field description) | Mandatory |
| STP ID | Identifier of a group of Users or Traders sharing the same business activity at the same Firm. | Numerical ID | 2 | 0..2 ¹⁶ -1 | Optional |
| FreeTextSection length | | Numerical | 1 | 18 | Mandatory |
| FreeTextSection occurrences | | Numerical | 1 | 0..1 | Mandatory |
| Free Text | Free Text is manually entered by the trader issuing the order. This field is part of the clearing aggregate. | Text | 18 | (Free Text) | Optional |
| OptionalFields length | | Numerical | 1 | 34 | Mandatory |
| OptionalFields occurrences | | Numerical | 1 | 0..1 | Mandatory |
| Stop Trigger Price | Stop Trigger Price is mandatory for stop orders. | Price | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Conditional |
| Peg Offset | Tick offset for a pegged order. | Numerical ID | 1 | -128 .. 127 | Conditional |
| Undisclosed Price | [N/A] Optional price for the hidden part of an Iceberg order. | Price | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Optional |
| Disclosed Quantity | Maximum number of quantity units to be shown to market participants (Iceberg Order). (To be calculated with Quantity Decimals) | Quantity | 8 | 0..2 ⁶⁴ -2 | Conditional |
| Order Expiration Time | [N/A] Field used as time of order expiration for GTT orders. | Numerical ID | 4 | 0..2 ³² -2 | Conditional |
| Order Expiration Date | Field used as date of order expiration for GTD orders. | Date | 2 | 0..2 ¹⁶ -2 | Conditional |

| AdditionalInfos occurrences | | Numerical | 1 | 0..1 | Mandatory |
| Long Client ID | Field used to identify the Client (investor), or trader's reference / posting order number for a pre-posting, entered as a free text used for clearing purposes. This field is part of the clearing aggregate for Derivatives. For Cash Markets this field is ignored except for IPO where this field is used to provide the information of the tax code. | Alphanumeric IID | 16 | (See field description) | Optional |

5.4.6 Reject (07)

Client ◀ OEG

Available for: EQ FND FXI SP EOD IDD CMO BLK

5.4.6.1 Message Description

The **Reject** (07) message is a message sent by the matching engine to notify the request issuer that his or her request is not processed by the matching engine. It is a possible response to every application message sent by the client.

The **Reject** (07) message is sent by the matching engine in the following situations:

- **For technical reasons:** Symbol Index is unknown, message is wrongly formatted, unknown value, client not authorized to send messages, etc.
- **For functional reasons:** type of order forbidden for this trading phase, type of order not authorized for the client, quantity to modify no longer available, last traded price better than the stop trigger price, collars breached, invalid strategy definition code, type of strategy not authorized for the contract, etc.

Please refer to the Error Code list for an exhaustive list of those cases.

The *Client Order ID* provided in the Reject message identifies the request which is rejected; it does not refer to an order of the order book. Hence in case of a rejection of a **CancelReplace** (06) message, the *Client Order ID* field will refer to the *Client Order ID* provided in the rejected **CancelReplace** (06) request, not to the targeted order.

In case of a functional rejection of a **NewOrder** (01) the matching engine will assign an *Order ID* to the rejected order.

If a client sends an Invalid value in an enumerated field, then in place of this value the Reject messages will contain a Null value (note: the *Firm ID* behaves as an enumerated field).

The reason of the rejection is provided by the Error Code, and a text message explaining the error is provided in the Error Code list file (.csv).

All application messages are rejected by the **Reject** (07) message, unless for very specific cases (please refer to **Quotes** (08) and **TechnicalReject** (108) messages).

Rejection Behaviour

In Optiq orders are identified by multiple characteristics as follows: *Order ID / Original Client Order ID*, *Order Side*, *Order Type* and *Firm ID*. If any of the characteristics are not met, the order is considered "Unknown".

In case an attempt is made to modify or cancel an order that results in a rejection, whether this order is considered to be "Known" or "Unknown", in such rejection message the same *Order ID* is echoed back, as the one provided by the client in the inbound message, in all cases.

In cases where the inbound message receives a rejection with functional or technical error code client should review the error code to identify what needs to be fixed in the submitted message.

In some cases, an “Unknown” order will not receive an error code identifying the issue, but rather code 2101 (Unknown order). In this case client should review the fields identified as mandatory order characteristics before resubmitting the request.

Repeating Section Usage

In this message there are two repeating sections CollarFields and MiFIDFields. They are populated only once.

CollarFields is used for Derivatives only and is populated only in the case of a rejection due to a breached collar. It provides the details related to the breached collar (high or low) and its price. Possible number of repeating groups: 0, 1.

MiFIDFields is provided when MIFID II short code information can be decoded. Possible number of repeating groups: 0, 1. This repeating section should be used for Optiq Derivatives while it is not used for Optiq Cash.

ClientIdentificationShortCode Usage

ClientIdentificationShortCode MiFIDField is not populated for Cross Orders.

5.4.6.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------|---|---------------------------|-----|-------------------------|-------------|
| Message Sequence Number | Indicates the Message Sequence Number per OE Session. (for messages sent by the Exchange) | Sequence | 4 | 0..2^32-2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric IID | 8 | (See field description) | Conditional |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2^64-2 | Conditional |
| OEG IN From Member | Order Entry Gateway IN time from member (in ns), measured when inbound message enters the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2^64-2 | Conditional |
| OEG OUT To ME | Gateway OUT time to ME (in ns), measured when inbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2^64-2 | Conditional |
| Book IN Time | Matching Engine IN time (in ns), time at which the corresponding inbound message entered the Matching Engine. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2^64-2 | Conditional |
| Book OUT Time | Matching Engine OUT time (in ns), when message leaves the Matching Engine (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2^64-2 | Conditional |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------------------|---|---------------------------|-----|---|-------------|
| OEG IN From ME | Gateway IN time from ME (in ns), measured when outbound message enters the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Conditional |
| OEG OUT To Member | Order Entry Gateway OUT time to member (in ns), measured when outbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Conditional |
| Client Order ID | An identifier of a message assigned by the Client when submitting an order to the Exchange. | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Conditional |
| Order ID | Numerical order identifier assigned by the matching engine, unique per instrument and EMM. | Numerical ID | 8 | 0..2 ⁶⁴ -2 | Conditional |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2 ³² -1 | Conditional |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Conditional |
| <i>Rejected Message</i> | [N/A] Deprecated Field. | Numerical ID | 1 | 0..2 ⁸ -1 | Conditional |
| Error Code | Error code in case of rejection. | Numerical ID | 2 | 0..2 ¹⁶ -2 | Mandatory |
| Rejected Message ID | Provides the ID (Template ID) of the rejected message. | Numerical ID | 2 | 0..2 ¹⁶ -1 | Conditional |
| Ack Qualifiers | Field used to provide additional information on the corresponding order. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | (See field description) | Optional |
| CollarFields length | | Numerical | 1 | 9 | Mandatory |
| CollarFields occurrences | | Numerical | 1 | 0..1 | Mandatory |
| Collar Rejection Type | Hit collar type (high or low) in case of order rejection due to collar breach. | Enumerated | 1 | 1 = Low dynamic collar 2 = High dynamic collar | Conditional |
| Breached Collar Price | Breached collar price in case of collar rejection. | Price | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Conditional |
| MiFIDFields length | | Numerical | 1 | 9 | Mandatory |
| MiFIDFields occurrences | | Numerical | 1 | 1 | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------------|--|--------------|-----|-------------------------|-------------|
| ExecutionWithinFirmShortCode | MiFID II short code, Execution within firm, identifier of the trader or algorithm responsible for the execution making. | Numerical ID | 4 | $-2^{31}+1..2^{31}-1$ | Conditional |
| ClientIdentificationShortCode | MiFID II short code, Client identification code. | Numerical ID | 4 | $-2^{31}+1..2^{31}-1$ | Conditional |
| MiFID Indicators | Field used as instruction for order handling. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | (See field description) | Conditional |

5.4.7 Quotes (08)

Client ► OEG

Available for: SP EQD IDD CMO

5.4.7.1 Message Description

This message is used by Liquidity Providers (LP) / Market Makers (MM) to send several quotes (bid and ask orders) on different instruments in one unique message.

- For the Warrants & Certificates segment (SP), a LP / MM is represented by the Firm ID.
- For the Derivatives segments (EQD, IDD, FID, CMO), a LP / MM is represented by the combination of Firm ID and short code.

A given LP / MM using Quotes messages is permitted to have only one bid quote and one ask quote on a given instrument at a given time to be present in the market. Consequently, any quotes received after the first one from the same LP for a single instrument cancel and replace the previous ones.

During all trading phases, quotes are considered as normal orders, managed as Limit orders with a side (Buy or Sell), a price, a quantity and a Day validity.

- For the Warrants & Certificates segment (SP), A **Quotes** (08) message can include from 1 to 150 double-sided quotes (300 individual quotes).
- For the Derivatives segments (EQD, IDD, FID, CMO), A **Quotes** (08) message can include from 1 to 30 double-sided quotes (60 individual quotes).

As a consequence, the **Quotes** (08) message has a variable size. Each quote occurrence includes the *Symbol Index* and the *EMM*, a *Bid Price* and *Bid Quantity* or an *Offer Price* and *Offer Quantity* or both.

- For the Warrants & Certificates segment (SP) – In a single **Quotes** (08) message, clients must only use instruments belonging to the same Partition as the one to which they sent the message.
- For the Derivatives segments (EQD, IDD, FID, CMO) – In a single **Quotes** (08) message, **clients must only use instruments belonging to the same Contract**.

Quotes that are sent for instruments that either do not belong to the current Partition or Contract, depending on the segment, will be individually rejected by the matching engine with the applicable error code.

Quantities must be a multiple of the instrument's lot size, prices must be populated and have to be a multiple of the instrument's tick size⁶. For a given instrument the bid price must be strictly less than the ask price.

The Quote message may also be used to modify or cancel quotes:

⁶ For Derivatives, while trading may occur sub-tick, on order entry prices must be multiples of the instrument tick size

- ◆ A valid quote submitted in an instrument that already has a quote from the same liquidity provider in the order book is considered as a modification. Quote modifications lead to the same loss of priority rules as order modifications.
- ◆ A valid quote with a quantity set to zero (0) is considered as a cancellation. Hence when a quantity equal to zero (0) is sent, the price field is not checked.
- ◆ To modify/create only one side of a Quote, the Price and Quantity of the side to be ignored have to be set to the Null Value. Null Value will **not be** considered as a cancellation.

RFE Answer

- For the Warrants & Certificates segment (SP), In the block of the message the *RFE Answer* specifies whether the double sided quote is a direct response to a **RequestForExecution** (34) message or not. This way if a Liquidity provider submits a **Quotes** (08) message with the *RFE Answer* set to "Yes" after a **RequestForExecution** (34), it will immediately trigger executions in the associated instrument. The immediate execution applies only to the quotes that are possible matches to the client's orders. In case where the quotes are not a possible match the RFE confirmation is ignored and the quote is processed normally. If the *RFE Answer* is set to "No" in the **Quotes** (08) message - it will not immediately trigger the executions.
- For the Derivatives segments (EQD, IDD, CMO), In the block of the message the *RFE Answer* field is always ignored by Optiq..

Responses to Quotes, Rejection & Errors

When the message is technically valid, the matching engine responds to the request with the **QuoteAck** (09) message.

When the message is technically invalid, or has any technical or functional issues, the rejections and error messages are provided as following based on the applicable case:

- When a technical error is detected in any field, including those in a repeated field, the matching engine responds with the **Reject** (07) message, and rejects the entire content of the **Quotes** (08) message.
- In the following cases the matching engine responds with the **QuoteAck** (09) message, and rejects only the invalid quotes (see message usage in **QuotesAck** (09)):
 - ◆ When a functional error is detected that impacts all repeating groups (e.g. Firm is not authorized to trade on the instrument or contract, Firm is not an LP / MM for the instrument or contract, or the identified Account Type is set to a value other than Liquidity Provider).
 - ◆ When functional errors are detected in one or several repeated fields,
 - ◆ When a given Symbol Index quote is duplicated in a **Quotes** (08) message, only the last occurrence of the quote containing the instrument is taken into account. The earlier occurrences are ignored by the engine, and get an individual error code.
 - ◆ If the field *Execution Instruction* is populated with value 1 for any positions other than those for STP service, the message will be fully rejected

Repeating Section Usage

The message contains **three repeating sections**:

- ◆ **MiFID Shortcodes repeating section:** the first repeating section contains the MiFID short codes. Possible number of repeating groups: 0, 1.
- ◆ **Clearing Data repeating section:** the second repeating section contains the clearing fields. Possible number of repeating groups: 0, 1.
- ◆ **Quotes repeating section:** the third repeating section is used to submit quotes.
 - For the Warrants & Certificates segment (SP): Possible number of repeating groups: from 1 to 150.
 - For the Derivatives segments (EQD, IDD, CMO): Possible number of repeating groups: from 1 to 30.

Clearing Data and Short Codes management

- For the Warrants & Certificates segment (SP) - The Clearing Data and MiFID Short Codes associated to the Quotes are submitted once per message, and are assigned and managed for each instrument within the message as follow:

- ◆ When the first quote(s) of the day is submitted for an instrument, the clearing data and short codes set in the message containing these quotes will be stored and be associated to this instrument.
 - If clearing data and/or short codes are not provided or provided set with the Null Value, the clearing data and/or short codes associated to this instrument will be set to blank.
- ◆ After the submission of the first quote(s) for an instrument, all following quote(s) modifications and updates for this instrument will not lead to any modifications of clearing data and short codes previously associated to the instrument (even if they were set to blank). Clearing data and short codes contained in the messages used for updates and modifications will be ignored for instruments as it is already set based on the original quote messages.
 - Even after quotes are fully matched, submission of quotes will not lead to an update of the clearing data and short codes associated to the instrument to be updated.
- ◆ In order to reset the clearing data and short codes associated to an instrument, the liquidity provider must fully cancel the previously sent quote by submitting a **Quotes** (08) message with **both Bid Quantity and Offer Quantity** set to zero (0). As identified above, this behaviour equally applies when the quote has been totally matched.

Please note that **MassCancel** (13), Cancel on Disconnect mechanism, PAKO / KO and beginning of a One Side only (Bid Only and Offer Only) period also lead to a reset of the clearing data and short codes associated to an instrument.
- ◆ After the quote is fully cancelled, submitting a new quote for this instrument will result in the newly provided clearing data and short codes being set for the instrument; as it is done for the first quote(s) of the day.
 - A successful reset of the clearing data and short codes associated to an instrument leads to new order IDs assigned to the next submitted quotes.
- For the Derivatives segments (EQD, IDD, CMO)
 - ◆ Clearing data for the Quotes on the Derivatives segments is managed within the **MM Sign-in** (47) message.

If the clearing data repeating group is submitted in the **Quotes** (08) message on the Derivatives segments, such message, and all its component individual quotes, will be rejected using **Reject** (07) message. Nonetheless, according to the SBE standards the header of this repeating group must still be provided.
 - ◆ MIFID Short codes data follows the same rules as those described above for the Warrants & Certificates segment, with the single repeating group provided per message, and applied to each instrument identified in the message.

5.4.7.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------------------------|---|---------------------------|-----|---|-----------|
| Client Message Sequence Number | The Client Message Sequence Number is mandatory for all inbound messages, but the consistency of the sequence is not checked by the Exchange. | Sequence | 4 | 0..2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric I ID | 8 | (See field description) | Mandatory |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| Client Order ID | An identifier of a message assigned by the Client when submitting an order to the Exchange. | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-----------------------------------|--|--------------|-----|--|-------------|
| ExecutionWithinFirmShortCode | MiFID II short code, Execution within firm, identifier of the trader or algorithm responsible for the execution making. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Mandatory |
| Trading Capacity | Indicates whether the order submission results from trading as matched principal, on own account or as any other capacity. | Enumerated | 1 | 1 = Dealing on own account (DEAL) 2 = Matched principal (MTCH) 3 = Any other capacity (AOTC) | Mandatory |
| Account Type | Indicates the account type for which the order is entered. For example, an order can be entered for a client account, a house account or a liquidity provider account. | Enumerated | 1 | (See field description) | Mandatory |
| LP Role | Liquidity Provider Role identifies the type of the Liquidity Provider when Account Type is equal to "Liquidity Provider". | Enumerated | 1 | 1 = Liquidity Provider or Market Maker 3 = Retail Liquidity Provider 12 = RFQ Liquidity Provider | Mandatory |
| MiFID Indicators | Field used as instruction for order handling. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | (See field description) | Mandatory |
| RFE Answer | Indicate whether the Quotes message is an answer to a RequestForExecution (34) message or not. (0: No [False] ; 1: Yes [True]) | Boolean | 1 | 0 = False 1 = True | Mandatory |
| Execution Instruction | Field used as instruction for order handling. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | (See field description) | Optional |
| STP ID | Identifier of a group of Users or Traders sharing the same business activity at the same Firm. | Numerical ID | 2 | 0..2 ¹⁶ -1 | Optional |
| MiFIDShortcodes length | | Numerical | 1 | 12 | Mandatory |
| MiFIDShortcodes occurrences | | Numerical | 1 | 0..1 | Mandatory |
| InvestmentDecisionWFFirmShortCode | MiFID II short code, Investment decision within firm, identifier of the trader or algorithm responsible for the investment decision. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Conditional |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------------|---|----------------------|-----|--|-------------|

| ClientIdentificationShortCode | MiFID II short code, Client identification code. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Conditional |
| ClearingDataset length | | Numerical | 1 | 51 | Mandatory |
| ClearingDataset occurrences | | Numerical | 1 | 0..1 | Mandatory |
| Clearing Firm ID | Clearing firm ID. | Alphanumeric I ID | 8 | (See field description) | Optional |
| Client ID | Field used to identify the client (investor). This field is part of the clearing aggregate | Alphanumeric I ID | 8 | (See field description) | Optional |
| Account Number | Account Number. Client's position account ID, identifying the investor's account. This field is part of the clearing aggregate. | Alphanumeric I ID | 12 | (See field description) | Optional |
| Technical Origin | Indicates the origin of the order; for example, manual entry, or an order coming from a Program Trading system. This field is part of the clearing aggregate. | Enumerated | 1 | 1 = Index trading arbitrage 2 = Portfolio strategy 3 = Unwind order 4 = Other orders (default) 5 = Cross margining | Optional |
| Open Close | Open Close Indicator, Posting action. This field is part of the clearing aggregate. | Bitmap | 2 | (See field description) | Optional |
| Clearing Instruction | Clearing Instruction. | Enumerated | 2 | (See field description) | Optional |
| Free Text | Free Text is manually entered by the trader issuing the order. This field is part of the clearing aggregate. | Text | 18 | (Free Text) | Optional |
| QuotesRep length | | Numerical | 1 | 37 | Mandatory |
| QuotesRep occurrences | | Numerical | 1 | 1..30 or 1..150 | Mandatory |
| Bid Quantity | Quote bid quantity, (To be calculated with Quantity Decimals). | Quantity | 8 | 0..2 ⁶⁴ -1 | Optional |
| Bid Price | Quote bid price, (To be calculated with Price/Index Level Decimals). | Price | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Optional |
| Offer Quantity | Quote offer quantity, (To be calculated with Quantity Decimals). | Quantity | 8 | 0..2 ⁶⁴ -1 | Optional |
| Offer Price | Quote offer price, (To be calculated with Price/Index Level Decimals). | Price | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Optional |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------|---|------------|-----|-------------------------|-----------|
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |

5.4.8 Quote Ack (09)

Client ◀ OEG

Available for: SP EQD IDD CMO

5.4.8.1 Message Description

This message is used by the matching engine to respond to a **Quotes** (08) message sent by Liquidity Providers (LP) / Market Makers (MM) when no error is detected in any non-repeated field of the Quotes request. In case of error in any non-repeated field in the Quotes request, the matching engine rejects the Quotes request with a **Reject** (07) message.

For each occurrence of the Quotes aggregate provided in the request (from 1 to 30 occurrences), a related occurrence of the **QuotesAck** (09) aggregate per *Symbol Index* and *EMM* may be found in the **QuotesAck** (09) message. As a result, the **QuotesAck** (09) message has a variable size.

If there are some duplicates of *Symbol Index* and *EMM* provided in the inbound **Quotes** (08) message, only the last occurrence of this *Symbol Index* and *EMM* is taken into account by the system, and then the earlier ones are provided in the **QuotesAck** (09) message with error code 1066 "The same Symbol Index is repeated more than once in the repeating sections for Quotes. Earlier duplicates are ignored".

The **QuotesAck** (09) aggregate includes the *Symbol Index* and the *EMM*, a *Bid Error Code* and an *Offer Error Code* along with a Buy and Sell Order IDs and Revision Indicators. The matching engine populates the error codes as follows:

- If an error has been detected in the *Symbol Index* of the input Quotes aggregate, both the *Bid Error Code* and *Offer Error Code* are provided in the associated **QuotesAck** (09) aggregate.
- If an error is detected in the *Bid Quantity* or *Bid Price* field, the error code is provided in the *Bid Error Code* field.
- If an error is detected in *Offer Quantity* or *Offer Price* field, the error code is provided in the *Offer Error Code* field.
- When no error is detected in these fields, *Bid Error Code* and *Offer Error Code* are provided with the null value.

In the QuotesAck (09) message the field **ExecutionWithinFirmShortCode** should be used for Optiq Derivatives while it is not used for Optiq Cash.

Repeating Section Usage

The message contains **one repeating section**.

Quotes repeating section: this repeating section provides the result of the previously submitted quotes

- For the Warrants & Certificates segment (SP): Possible number of repeating groups: from 1 to 150.
- For the Derivatives segments (EQD, IDD, FID, CMO): Possible number of repeating groups: from 1 to 30.

5.4.8.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------|---|-------------------|-----|-------------------------|-----------|
| Message Sequence Number | Indicates the Message Sequence Number per OE Session. (for messages sent by the Exchange) | Sequence | 4 | 0..2^32-2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric I ID | 8 | (See field description) | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|----------------------|--|---------------------------|-----|--|-------------|
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| OEG IN From Member | Order Entry Gateway IN time from member (in ns), measured when inbound message enters the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| OEG OUT To ME | Gateway OUT time to ME (in ns), measured when inbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| Book IN Time | Matching Engine IN time (in ns), time at which the corresponding inbound message entered the Matching Engine. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| Book OUT Time | Matching Engine OUT time (in ns), when message leaves the Matching Engine (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| OEG IN From ME | Gateway IN time from ME (in ns), measured when outbound message enters the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| OEG OUT To Member | Order Entry Gateway OUT time to member (in ns), measured when outbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| Client Order ID | An identifier of a message assigned by the Client when submitting an order to the Exchange. | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Mandatory |
| Account Type | Indicates the account type for which the order is entered. For example, an order can be entered for a client account, a house account or a liquidity provider account. | Enumerated | 1 | (See field description) | Mandatory |
| LP Role | Liquidity Provider Role identifies the type of the Liquidity Provider when Account Type is equal to "Liquidity Provider". | Enumerated | 1 | 1 = Liquidity Provider or Market Maker 3 = Retail Liquidity Provider 12 = RFQ Liquidity Provider | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|------------------------------|---|--------------|-----|--|-------------|
| ExecutionWithinFirmShortCode | MiFID II short code, Execution within firm, identifier of the trader or algorithm responsible for the execution making. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Optional |
| Ack Qualifiers | Field used to provide additional information on the corresponding order. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | (See field description) | Optional |
| QuoteAcks length | | Numerical | 1 | 27 | Mandatory |
| QuoteAcks occurrences | | Numerical | 1 | 1..30 or 1..150 | Mandatory |
| Bid Order ID | Numerical order identifier assigned by the matching engine, unique per instrument and EMM. | Numerical ID | 8 | 0..2 ⁶⁴ -1 | Conditional |
| Offer Order ID | Numerical order identifier assigned by the matching engine, unique per instrument and EMM. | Numerical ID | 8 | 0..2 ⁶⁴ -1 | Conditional |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |
| Buy Revision Indicator | Indicates whether the bid quote is a new quote, a replacement of a previous quote or a cancellation. | Enumerated | 1 | 0 = New 1 = Replacement 2 = Cancellation | Conditional |
| Sell Revision Indicator | Indicates whether the offer quote is a new quote, a replacement of a previous quote or a cancellation. | Enumerated | 1 | 0 = New 1 = Replacement 2 = Cancellation | Conditional |
| Bid Error Code | Error code returned when quote contains an invalid bid. | Numerical ID | 2 | 0..2 ¹⁶ -1 | Conditional |
| Offer Error Code | Error code returned when a quote contains an invalid offer. See Error List for details of error codes. | Numerical ID | 2 | 0..2 ¹⁶ -1 | Conditional |

5.4.9 Quote Request (10)

Client ► OEG

Available for: FND EQD IDD CMO

5.4.9.1 Message Description

The **Quote Request** (10) message is used by the clients to indicate that they have interest in the specified instrument.

For the Cash Markets, this message is sent to the Liquidity Providers registered for the specified instrument and will not lead to a publication in the market data.

For the Derivatives Markets this message is used to request quotes / liquidity for a specific instrument. Submission of this message for the Derivatives segments results in dissemination of a private **Ack** (03) in case of acceptance and a public message via MDG from a trading perspective. Upon reception of this Market Data message, registered Responsive Market Makers, if there any for the contract, are expected to provide liquidity. Ack (03) is sent only as acknowledgement of receipt of the message by OEG for dissemination to MDG, no other processing of the Quote Request is done.

For ETF Access platform ,this message submission can be performed either by Euronext members or by Non Euronext buy-side RFQ (Request for Quote) trading issuers.

For more details on behaviour and handling on the Cash and Derivatives markets clients should review the Kinematics documents associated to the individual markets.

Field *Order Side* is optional as the client may specify, or not, those parameters depending of the nature of the request.

For the Derivatives Markets :

- if the client does not wish to indicate quantity, the field *Order Quantity* should be filled with zero (0) and will be ignored, and
- the field *Dark Execution Instruction* should be filled with all positions set to zero (0).

The field *Minimum Order Quantity* is conditional as the client must enter a quantity when the field *Dark Execution Instruction*, bit in position 5 from the left (corresponding to Minimum Quantity Type) is equal to 1 (MES); else the quote request could never be executed during the RFQ matching mechanism.

5.4.9.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------------------------|---|---------------------------|-----|---|-------------|
| Client Message Sequence Number | The Client Message Sequence Number is mandatory for all inbound messages, but the consistency of the sequence is not checked by the Exchange. | Sequence | 4 | 0..2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric I ID | 8 | (See field description) | Mandatory |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| ExecutionWithinFirmShortCode | MiFID II short code, Execution within firm, identifier of the trader or algorithm responsible for the execution making. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Mandatory |
| ClientIdentificationShortCode | MiFID II short code, Client identification code. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Conditional |
| Client Order ID | An identifier of a message assigned by the Client when submitting an order to the Exchange. | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Mandatory |
| Order Quantity | Total order quantity, per quantity unit. (To be calculated with Quantity Decimals). | Quantity | 8 | 0..2 ⁶⁴ -2 | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|----------------------------|---|--------------------|-----|---|-------------|
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |
| Order Side | Indicates the side of the order. | Enumerated | 1 | 1 = Buy 2 = Sell | Optional |
| Firm ID Publication | [N/A] Indicates whether the client accept or not to provide its Firm ID to the RFQ recipients. (0:No ; 1:Yes) | Boolean | 1 | 0 = False 1 = True | Optional |
| End Client | [N/A] Optional field the client may use to provide the BIC of the End Client of the RFQ. | Alphanumeric ID | 11 | (See field description) | Optional |
| Dark Execution Instruction | Field used as instruction for dark order handling. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | 0 = Dark Indicator 1 = Deferred Trade Indicator 2 = Displayed Order Interaction 3 = Sweep Order Indicator 4 = Minimum Quantity Type | Mandatory |
| Minimum Order Quantity | Minimum quantity to be executed upon order entry (else the order is rejected), (To be calculated with Quantity Decimals). | Quantity | 8 | 0..2 ⁶⁴ -2 | Conditional |
| Account Type | Indicates the account type for which the order is entered. For example, an order can be entered for a client account, a house account or a liquidity provider account. | Enumerated | 1 | (See field description) | Conditional |

5.4.10 Cancel Request (12)

Client ► OEG

Available for: EQ FND FXI SP EQD IDD CMO BLK

5.4.10.1 Message Description

The **CancelRequest** (12) message is used to request the cancellation of the entire remaining quantity of **an active order in the order book**, note that only the originating Firm is authorized to cancel its own orders.

An order cancellation only applies to the remaining quantity of an order in the book. If the order to be cancelled was partially filled, the cancellation has no effect on the previous trades (or any previously executed quantity).

On ETF Access platform, the **CancelRequest (12)** message can be used to request the cancellation of an active RFQ previously created with the **QuoteRequest (10)** message. In this situation, the *Order ID* should contain the *QuoteReqID* and *Order Category* must be set to 'Quote Request'. It can also be used to request the cancellation of an LP Answer, in this situation the *Order ID* along with *Order Category* set to 'RFQ LP Answer' must be specified in the request. It can be submitted either by Euronext members or by Non Euronext buy-side RFQ (Request for Quote) trading issuers.

An active order can be cancelled by specifying the *Client Order ID* of the original order:

- If the **CancelRequest** (12) message contains both *Order ID* and *Original Client Order ID*, the matching engine uses the *Order ID* to cancel the order. If the *Order ID* specified in the message is not found in the active orders list, the order modification is rejected. If the *Order ID* specified in the message is found the matching engine does not check that the Client Order ID of the order found ("cancelled" order) matches with the *Original Client Order ID* contained in the **CancelRequest** (12) message.

In the case where the values of the *Order Side* and/or *Order Type* provided in the **CancelRequest** (12) message do not match with the *Order Side* and *Order Type* of the targeted order it will lead to the rejection of the request with the error code 2101 "Unknown Order". (For triggered Stop orders, the value in field *Order Type* must be equal to Limit (2), for Stop-limit, or Market (1) for Stop-market order, corresponding to the type of stop order originally submitted.)

Repeating Section Usage:

The message contains **two optional repeating sections**:

- **NotUsedGroup1 Repeating Section:** this repeating section is for future use and must not be used for now; the two fields of the header must be set to zero "0".
- **NotUsedGroup2 Repeating Section:** this repeating section is for future use and must not be used for now; the two fields of the header must be set to zero "0".

Note regarding Dark Orders:

- For Dark (Not Sweep) Orders, the field "Order Category" of an CancelRequest (12) is mandatory and must be set to '2' (LIS Order) to properly identify a Dark Not Sweep Order.
- For Dark (Sweep) Orders, the field "Order Category" of an CancelRequest (12) is not mandatory (LIT Order) to properly identify a Dark Sweep Order (set to Null or to '1') – as they can only be cancelled once they've swept to COB

5.4.10.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------------------------|---|---------------------------|-----|---|-------------|
| Client Message Sequence Number | The Client Message Sequence Number is mandatory for all inbound messages, but the consistency of the sequence is not checked by the Exchange. | Sequence | 4 | 0..2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric I ID | 8 | (See field description) | Mandatory |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| ExecutionWithinFirmShortCode | MiFID II short code, Execution within firm, identifier of the trader or algorithm responsible for the execution making. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Mandatory |
| ClientIdentificationShortCode | MiFID II short code, Client identification code. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Conditional |

| NotUsedGroup2 occurrences | | Numerical | 1 | 0 | Mandatory |

5.4.11 Mass Cancel (13)

Client ► OEG

Available for: EQ FND FXI SP EQD IDD CMO BLK

5.4.11.1 Message Description

The **MassCancel** (13) message is used to request the cancellation of the entire remaining quantity of **all active orders** matching the specified criteria(s), note that only the originating Firm is authorized to cancel its own orders.

An order cancellation only applies to the remaining quantity of an order in the book. If the order to be cancelled was partially filled, the cancellation has no effect on the previous trades (or any previously executed quantity).

The scope of the mass cancellation request is defined by the value populated in one of the two fields: *Symbol Index* (instrument on cash markets, instrument or contract on derivatives markets) or *Instrument Group Code* (cash markets only). If one of these fields is not populated, the Mass Cancel message will be rejected.

- To cancel orders assigned to an instrument or Contract the *Symbol Index* field must be populated with the symbol index of the instrument concerned.
- (Cash only) To cancel orders assigned to instruments attached to a given trading group the *Instrument Group Code* field must be populated with the code of the trading group concerned.

Optional additional criteria can be specified: *EMM*, *Order Side*, *Logical Access ID*, *TargetExecutionWithinFirmShortCode* and *OE Partition ID*, and be used as filters for the Mass Cancel processing. If provided, those filters are used to restrict the scope of the Mass Cancel request. (Please note that *OE Partition ID* is not taken into account if *Logical Access ID* is not populated).

In the field *TargetExecutionWithinFirmShortCode* clients may specify the value of *ExecutionWithinFirmShortCode* with which orders were originally submitted, and if provided would cover the scope of the orders and quotes submitted by the Firm and specified Short code. Value provided in this field may differ from the value specified in the field *ExecutionWithinFirmShortCode* within the **MassCancel** (13) message.

For ETF Access platform, this message submission can be performed either by Euronext members or by Non Euronext buy-side RFQ (Request for Quote) trading issuers.

Repeating Section Usage

The message contains **two optional repeating sections**:

- **NotUsedGroup1 Repeating Section:** this repeating section is for future use and must not be used for now; the two fields of the header must be set to zero "0".
- **NotUsedGroup2 Repeating Section:** this repeating section is for future use and must not be used for now; the two fields of the header must be set to zero "0".

Mass Cancellation Processing

From the *Matching Engine perspective*, the MassCancel (13) request is processed differently:

- On Cash segments, the inbound message queues are handled at the instrument book level; if the request concerns a trading group or an instrument, it is pushed asynchronously to the inbound queue of each book of the specified instrument or instruments belonging to the specified group.
As a consequence, a counterpart order can be sent to one of these books *after* the mass cancel request at group level but *before* the cancellation request is queued for the book; in this situation, it is possible for an order to be cancelled to match against the entering counterpart order *before* being actually cancelled.
- On Derivative segments, the inbound message queues are handled at the contract level; whether the request concerns a contract or an instrument, the request is queued directly into the contract's inbound queue.
As a consequence, it is not possible for a counterpart order sent on an instrument belonging to the contract *after* the mass cancellation request to match an order to be cancelled, as the counterpart order is queued and processed *after* the mass cancellation request completion.

From the *Client perspective*, the OEG introduces a mechanism that makes mass cancellation requests to be processed synchronously on both the Cash and Derivatives markets. This means that any request sent by an OE session having started a MassCancel (13) request processing will be processed *after* the completion of the mass cancellation processing, whatever the segment considered.

If needed, an OEG session dedicated to mass cancellations may be used to avoid blocking any other operations during the processing of such mass cancellations.

5.4.11.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------------------------|---|---------------------------|-----|---|-----------|
| Client Message Sequence Number | The Client Message Sequence Number is mandatory for all inbound messages, but the consistency of the sequence is not checked by the Exchange. | Sequence | 4 | 0..2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric I ID | 8 | (See field description) | Mandatory |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| ExecutionWithinFirmShortCode | MiFID II short code, Execution within firm, identifier of the trader or algorithm responsible for the execution making. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|------------------------------------|--|-------------------|-----|--|-------------|
| ClientIdentificationShortCode | MiFID II short code, Client identification code. | Numerical ID | 4 | -2^31+1..2^31-1 | Conditional |
| Client Order ID | An identifier of a message assigned by the Client when submitting an order to the Exchange. | Numerical ID | 8 | -2^63+1..2^63-1 | Mandatory |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2^32-1 | Conditional |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Optional |
| Instrument Group Code | Instrument Group / Class Identifier. | Alphanumeric I ID | 2 | (See field description) | Conditional |
| Order Side | Indicates the side of the order. | Enumerated | 1 | 1 = Buy 2 = Sell | Optional |
| Logical Access ID | Identifier of the Logical Access. | Numerical ID | 4 | 0..2^32-1 | Optional |
| OE Partition ID | Identifies uniquely an OE Optiq partition by which the engine is reached. | Numerical ID | 2 | 0..2^16-1 | Optional |
| Contract ID | Deprecated | Alphanumeric I ID | 4 | Deprecated | Conditional |
| Maturity | [N/A] Scope of active orders to be cancelled according the selected maturity, expressed in YYYYMMDD format. (Future Use) | Alphanumeric I ID | 8 | (See field description) | Optional |
| Account Type | Indicates the account type for which the order is entered. For example, an order can be entered for a client account, a house account or a liquidity provider account. | Enumerated | 1 | (See field description) | Optional |
| Option Type | [N/A] Type of the option. (Future Use) | Enumerated | 1 | 1 = Call 2 = Put 3 = Other | Optional |
| Order Category | Field used as instruction for order handling. When not provided or provided at the Null Value, it is assumed to be set at value 1 "Lit Order". | Enumerated | 1 | 1 = Lit Order 2 = LIS Order 3 = Quote Request 4 = RFQ LP Answer | Optional |
| TargetExecutionWithinFirmShortCode | Value of the target Execution Within Firm Short Code used as a filter to reduce scope of the Mass Cancel request | Numerical ID | 4 | 0..2^32-1 | Optional |
| NotUsedGroup1 length | | Numerical | 1 | 0 | Mandatory |
| NotUsedGroup1 occurrences | | Numerical | 1 | 0 | Mandatory |
| NotUsedGroup2 length | | Numerical | 1 | 0 | Mandatory |
| NotUsedGroup2 occurrences | | Numerical | 1 | 0 | Mandatory |

5.4.12 Mass Cancel Ack (14)

Client ◀ OEG

Available for: EQ FND FXI SP EQD IDD CMO BLK

5.4.12.1 Message Description

The **MassCancelAck** (14) message is sent twice by the matching engine to confirm that the **MassCancel** request has been taken into account. The first **MassCancelAck** (14) message has *Total Affected Orders* set to -1, and repeats all the fields as they were submitted in the **MassCancel** (13) request.

The client will receive a **Kill** (05) message per successfully cancelled order (if any). Please note that **Kill** (05) messages are sent to the OE Session that owns the cancelled order.

When the mass cancel request is completely processed the client will receive a last **MassCancelAck** (14) message to notify them of the *Total Affected Orders*. The number provided by *Total Affected Orders* field could be different than the number of killed order notifications received by the issuer of the Mass Cancel request if some killed orders belonged to other OE Sessions. (Please refer to the Kinematics for further details).

In this message, the **MiFIDFields** repeating section should be used for Optiq Derivatives while it is not used for Optiq Cash.

5.4.12.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------|---|---------------------------|-----|-------------------------|-------------|
| Message Sequence Number | Indicates the Message Sequence Number per OE Session. (for messages sent by the Exchange) | Sequence | 4 | 0..2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric ID | 8 | (See field description) | Mandatory |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| OEG IN From Member | Order Entry Gateway IN time from member (in ns), measured when inbound message enters the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| OEG OUT To ME | Gateway OUT time to ME (in ns), measured when inbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| Book IN Time | Matching Engine IN time (in ns), time at which the corresponding inbound message entered the Matching Engine. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| Book OUT Time | Matching Engine OUT time (in ns), when message leaves the Matching Engine (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-----------------------|--|---------------------------|-----|--|-------------|
| OEG IN From ME | Gateway IN time from ME (in ns), measured when outbound message enters the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| OEG OUT To Member | Order Entry Gateway OUT time to member (in ns), measured when outbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| Client Order ID | An identifier of a message assigned by the Client when submitting an order to the Exchange. | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Mandatory |
| Total Affected Orders | Number of orders affected following a global request. It is set to -1 to indicate that the request is processed. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Mandatory |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2 ³² -1 | Conditional |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Conditional |

| Contract ID | Deprecated | Alphanumeric I ID | 4 | Deprecated | Conditional |
| Maturity | [N/A] Scope of active orders to be cancelled according the selected maturity, expressed in YYYYMMDD format. (For Future Use) | Alphanumeric I ID | 8 | (See field description) | Conditional |
| Account Type | Indicates the account type for which the order is entered. For example, an order can be entered for a client account, a house account or a liquidity provider account. | Enumerated | 1 | (See field description) | Conditional |
| Option Type | [N/A] Type of the option. (For Future Use) | Enumerated | 1 | 1 = Call 2 = Put | Conditional |
| Order Category | Field used as instruction for order handling. When not provided or provided at the Null Value, it is assumed to be set at value 1 "Lit Order". | Enumerated | 1 | 1 = Lit Order 2 = LIS Order 3 = Quote Request 4 = RFQ LP Answer | Optional |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|------------------------------------|---|--------------|-----|---|-------------|
| Ack Qualifiers | Field used to provide additional information on the corresponding order. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | (See field description) | Optional |
| TargetExecutionWithinFirmShortCode | Value of the target ExecutionWithinFirmShortCode used as a filter to reduce scope of the Mass Cancel request | Numerical ID | 4 | 0..2 ³² -1 | Optional |
| MiFIDFields length | | Numerical | 1 | 9 | Mandatory |
| MiFIDFields occurrences | | Numerical | 1 | 1 | Mandatory |
| ExecutionWithinFirmShortCode | MiFID II short code, Execution within firm, identifier of the trader or algorithm responsible for the execution making. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Conditional |
| ClientIdentificationShortCode | MiFID II short code, Client identification code. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Conditional |
| MiFID Indicators | Field used as instruction for order handling. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | (See field description) | Conditional |

5.4.13 Open Order Request (15)

Client ► OEG

Available for: EQ FND FXI SP EQD IDD CMO BLK

5.4.13.1 Message Description

The **OpenOrderRequest** (15) message is used by the clients to request the status of the target order (*Order ID* or *Original Client Order ID*):

- If there is a corresponding live order in the Order Book, the system will acknowledge the request with an **Ack** (03) message (*Ack Type* = 17);
- If there is no corresponding order in the Order Book, the system will reject the request with a **Reject** (07) message (*Error Code* = 2101 'Unknown Order').

Note regarding Dark Orders:

- For Dark (Not Sweep) Orders, the field "Order Category" of an OpenOrderRequest (15) is mandatory and must be set to '2' (LIS Order) to properly identify a Dark Not Sweep Order.
- For Dark (Sweep) Orders, the field "Order Category" of an OpenOrderRequest (15) is not mandatory (LIT Order) to properly identify a Dark Sweep Order (set to Null or to '1').

5.4.13.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------------------------|---|---------------------------|-----|--|-------------|
| Client Message Sequence Number | The Client Message Sequence Number is mandatory for all inbound messages, but the consistency of the sequence is not checked by the Exchange. | Sequence | 4 | 0..2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric I ID | 8 | (See field description) | Mandatory |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| ExecutionWithinFirmShortCode | MiFID II short code, Execution within firm, identifier of the trader or algorithm responsible for the execution making. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Mandatory |
| ClientIdentificationShortCode | MiFID II short code, Client identification code. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Conditional |
| Client Order ID | An identifier of a message assigned by the Client when submitting an order to the Exchange. | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Mandatory |
| Order ID | Numerical order identifier assigned by the matching engine, unique per instrument and EMM. | Numerical ID | 8 | 0..2 ⁶⁴ -1 | Conditional |
| Original Client Order ID | Client order ID of the original order. | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Conditional |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |
| Order Category | Field used as instruction for order handling. When not provided or provided at the Null Value, it is assumed to be set at value 1 "Lit Order". | Enumerated | 1 | 1 = Lit Order 2 = LIS Order 3 = Quote Request 4 = RFQ LP Answer | Optional |

5.4.14 Ownership Request (18)

Client ► OEG

Available for: EQ FND FXI SP EOD IDD CMO BLK

5.4.14.1 Message Description

The **OwnershipRequest** (18) message is used by the clients to change the ownership of an active order from one OE Session to another OE Session belonging to the same Firm. Ownership migration is used to define the OE Session that will receive all outbound messages associated to the targeted order.

Please note that modifying an order (**CancelReplace** (06)) by a different OE session also leads to an ownership migration.

The scope of the ownership can be a single order by specifying the *Order ID* and *Symbol Index* of the targeted order. It could also be all orders of the specified *Symbol Index* belonging to the targeted Logical Access (*Logical Access ID*).

The **OwnershipRequest** (18) is acknowledged by the **OwnershipRequestAck** (17), and by **Ack** (03) message(s) which provides the affected order(s).

Note regarding Dark Orders:

- For Dark (Not Sweep) Orders, the field "Order Category" of an OwnershipRequest [U18] is mandatory and must be set to '2' (LIS Order) to properly identify a Dark Not Sweep Order.
- For Dark (Sweep) Orders, the field "Order Category" of an OwnershipRequest [U18] is not mandatory (LIT Order) to properly identify a Dark Sweep Order (set to Null or to '1').

5.4.14.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |

| Client Message Sequence Number | The Client Message Sequence Number is mandatory for all inbound messages, but the consistency of the sequence is not checked by the Exchange. | Sequence | 4 | 0..2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric I ID | 8 | (See field description) | Mandatory |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| ExecutionWithinFirmShortCode | MiFID II short code, Execution within firm, identifier of the trader or algorithm responsible for the execution making. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Mandatory |
| ClientIdentificationShortCode | MiFID II short code, Client identification code. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Conditional |
| Client Order ID | An identifier of a message assigned by the Client when submitting an order to the Exchange. | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Mandatory |
| Order ID | Numerical order identifier assigned by the matching engine, unique per instrument and EMM. | Numerical ID | 8 | 0..2 ⁶⁴ -1 | Conditional |
| Original Client Order ID | Client order ID of the original order. | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Conditional |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |
| Logical Access ID | Identifier of the Logical Access. | Numerical ID | 4 | 0..2 ³² -1 | Conditional |
| OE Partition ID | Identifies uniquely an OE Optiq partition by which the engine is reached. | Numerical ID | 2 | 0..2 ¹⁶ -1 | Optional |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|----------------|--|------------|-----|--|----------|
| Order Category | Field used as instruction for order handling. When not provided or provided at the Null Value, it is assumed to be set at value 1 "Lit Order". | Enumerated | 1 | 1 = Lit Order 2 = LIS Order 3 = Quote Request 4 = RFQ LP Answer | Optional |

5.4.15 Ownership Request Ack (17)

Client ◀ OEG

Available for: EQ FND FXI SP EOD IDD CMO BLK

5.4.15.1 Message Description

The **OwnershipRequestAck** (17) message is sent twice by the matching engine to confirm that the **OwnershipRequest** (18) has been taken into account. The first **OwnershipRequestAck** (17) message has *Total Affected Orders* set to -1, and repeats all the fields as they were submitted in the **OwnershipRequest** (18).

Subsequently the client will receive an **Ack** (03) message per order affected by the command.

When the Ownership request is totally processed the client will receive a last **OwnershipRequestAck** (17) message to notify the client of the *Total Affected Orders*.

5.4.15.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------|--|-------------------|-----|--|-------------|
| Message Sequence Number | Indicates the Message Sequence Number per OE Session. (for messages sent by the Exchange) | Sequence | 4 | 0..2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric I ID | 8 | (See field description) | Mandatory |
| Client Order ID | An identifier of a message assigned by the Client when submitting an order to the Exchange. | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Mandatory |
| Order ID | Numerical order identifier assigned by the matching engine, unique per instrument and EMM. | Numerical ID | 8 | 0..2 ⁶⁴ -2 | Conditional |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |
| Logical Access ID | Identifier of the Logical Access. | Numerical ID | 4 | 0..2 ³² -1 | Conditional |
| OE Partition ID | Identifies uniquely an OE Optiq partition by which the engine is reached. | Numerical ID | 2 | 0..2 ¹⁶ -1 | Conditional |
| Total Affected Orders | Number of orders affected following a global request. It is set to -1 to indicate that the request is processed. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Mandatory |
| Order Category | Field used as instruction for order handling. When not provided or provided at the Null Value, it is assumed to be set at value 1 "Lit Order". | Enumerated | 1 | 1 = Lit Order 2 = LIS Order 3 = Quote Request 4 = RFQ LP Answer | Optional |

5.4.16 Trade Bust Notification (19)

Client ◀ OEG

Available for: EQ FND FXI SP EQD IDD CMO BLK

5.4.16.1 Message Description

This message is sent to both counterparts of a trade if Market Operations busts a trade.

Please note that *Last Traded Price* and *Last Traded Quantity* refer to Price and Quantity of the cancelled trade.

For the Derivatives Markets

For Strategy trades the **Trade Bust Notification** (19) message is sent for each individual leg of the strategy. In such cases, fields *Parent Execution ID* and *Parent Trade Unique Identifier* identify respectively the *Execution ID* and the *Trade Unique Identifier* provided in the block of the **Fill** (04) message for the original trade. This allows to map all cancellations of individual legs to the original **Fill** (04) message sent for the strategy trade. The individual *Execution ID / Trade Unique Identifier* in such **Trade Bust Notification** (19) messages is the 'leg' *Execution ID / Trade Unique Identifier* of each individual leg provided in the repeating group of the **Fill** (04) message.

For cancellation of a LIS wholesale trade the bust messages include the *LIS Transaction ID* to help map the individual cancellation to the overall wholesale transaction.

Note: Trade Unique Identifier aims to replace the Execution ID. It is strongly recommended to reconcile using the Trade Unique Identifier instead of the Execution ID.

5.4.16.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------|--|---------------------------|-----|-------------------------|-------------|
| Message Sequence Number | Indicates the Message Sequence Number per OE Session. (for messages sent by the Exchange) | Sequence | 4 | 0..2^32-2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric I ID | 8 | (See field description) | Mandatory |
| Book IN Time | Matching Engine IN time (in ns), time at which the corresponding inbound message entered the Matching Engine. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2^64-2 | Mandatory |
| Book OUT Time | Matching Engine OUT time (in ns), when message leaves the Matching Engine (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2^64-1 | Conditional |
| OEG IN From ME | Gateway IN time from ME (in ns), measured when outbound message enters the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2^64-1 | Conditional |
| OEG OUT To Member | Order Entry Gateway OUT time to member (in ns), measured when outbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2^64-1 | Conditional |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2^32-2 | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------------------------|--|-------------------|-----|---|-------------|
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |
| Execution ID | The Execution ID is unique per instrument and per day. It is the unique identifier of a trade per instrument. This field is provided in case of fill, partial fill or trade cancellation. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |
| Last Traded Price | The Last Traded Price indicates the price of last fill on an instrument (to be calculated with the Price/Index Decimals). | Price | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Mandatory |
| Last Traded Quantity | The Last Traded Quantity indicates the quantity of last fill on an instrument (to be calculated with the Quantity Decimals). | Quantity | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| LIS Transaction ID | ID that can be used to associated Executions belonging to the same LIS Transaction | Numerical ID | 4 | 0..2 ³² -2 | Optional |
| Parent Execution ID | Unique identifier of a parent trade executed on the strategy | Numerical ID | 4 | 0..2 ³² -2 | Optional |
| Parent Symbol Index | Exchange identification code used to point to the strategy in the leg specific messages | Numerical ID | 4 | 0..2 ³² -2 | Optional |
| Trade Unique Identifier | Alphanumerical code unique, consistent and persistent per ISO10383 segment MIC and per trading day assigned by the trading venue to a transaction. Trade Unique Identifier (TUI) is a field aimed at identifying an individual transaction and used as Trading Venue Transaction Identification Code (TVTIC). This is a unique transaction identification code generated by trading venues and disseminated to both the buying and the selling parties, in accordance with Article 12 of the Commission Delegated Regulation (EU) 2017/580 Regulatory Technical Standards (RTS). | Alphanumerical ID | 16 | (see field description) | Mandatory |
| Parent Trade Unique Identifier | The Parent Trade Unique Identifier is the Trade Unique Identifier of the strategy trade. | Alphanumerical ID | 16 | (see field description) | Conditional |

5.4.17 Price Input (28)

Client ► OEG

Available for: EQ FND FXI SP

5.4.17.1 Message Description

The **PriceInput** (28) message is used by the clients to inject prices into the matching engine, disseminate price in Market Data and update the reference price of an instrument.

The type of price is specified in the *Input Price Type* field:

- 1 – Valuation Price: for this type the *Price must not* be provided. If the message is accepted by the matching engine a public **PriceUpdate** (1003) message will be disseminated to the market for one lot size at the reference price with Market Data Price Type equals to '23' Valuation Price.
- 2 – Alternative Indicative Price: for this type the Price must be provided. If the message is accepted by the matching engine a PriceUpdate (1003) message will be disseminated to the market participants at the price provided by the client and it will accordingly update the instrument's reference price. The Dynamic Collars are updated around the price specified in the **PriceInput** (28) message and a public **MarketUpdate** (1001) message is sent to the market to disseminate the new collars.

For specific use and authorizations per Instrument Group (Class) please refer to the Trading Manual.

5.4.17.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------------------------|---|---------------------------|-----|---|-------------|
| Client Message Sequence Number | The Client Message Sequence Number is mandatory for all inbound messages, but the consistency of the sequence is not checked by the Exchange. | Sequence | 4 | 0..2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric I ID | 8 | (See field description) | Mandatory |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| ExecutionWithinFirmShortCode | MiFID II short code, Execution within firm, identifier of the trader or algorithm responsible for the execution making. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Mandatory |
| ClientIdentificationShortCode | MiFID II short code, Client identification code. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Conditional |
| Client Order ID | An identifier of a message assigned by the Client when submitting an order to the Exchange. | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Mandatory |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |
| Input Price Type | Type of input price. | Enumerated | 1 | 1 = Valuation Price 2 = Alternative Indicative Price (AIP) | Mandatory |
| Price | Price per unit of quantity (to be calculated with the Price/Index Level Decimals). | Price | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Conditional |

5.4.18 Liquidity Provider Command (32)

Client ► OEG

Available for: SP

5.4.18.1 Message Description

This message is used by a Liquidity Provider to:

- Activate a Warrant instrument upon its creation. It removes the need for further validation by Issuers of Knock-Ins (KI) in the trading system, and streamlines the overall KI process. (Knock In By Issuer functionality "KIBI").
- Trigger a Knock-Out (KO) of an instrument independently from, and in place of, the KO system managed by Euronext. Reason for suspension (KO or not) is published in the market data and if the reason is KO, origin (KOB I or not) is provided. (Knock Out By Issuer KOB I-functionality).
- Trigger a Payment After Knock Out (PAKO) phase after a Knock-Out has been triggered, this phase enables clients to redeem leveraged Knock-Outs. (Payment After Knock Out PAKO-functionality). After PAKO is triggered the instrument is forced into a Bid Only state, even if no additional message is sent to indicate this, and remains in this state for the duration of this phase.
- Trigger a Bid Only or Offer Only period. These action codes are not accepted during PAKO phase.

The Matching Engine acknowledges the request by sending back an **Ack** (03) message.

5.4.18.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------------------------|---|---------------------------|-----|---|-------------|
| Client Message Sequence Number | The Client Message Sequence Number is mandatory for all inbound messages, but the consistency of the sequence is not checked by the Exchange. | Sequence | 4 | 0..2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric I ID | 8 | (See field description) | Mandatory |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| ExecutionWithinFirmShortCode | MiFID II short code, Execution within firm, identifier of the trader or algorithm responsible for the execution making. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Mandatory |
| ClientIdentificationShortCode | MiFID II short code, Client identification code. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Conditional |
| Client Order ID | An identifier of a message assigned by the Client when submitting an order to the Exchange. | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Mandatory |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|----------------|---|------------|-----|--|-----------|
| LP Action Code | Action the LP wants to apply on the specified instrument of warrant type. | Enumerated | 1 | 1 = Knock-In By Issuer (KIBI) 2 = Knock-Out By Issuer (KOB I) 3 = Payment After Knock-Out (PAKO) 4 = Bid Only 5 = Offer Only | Mandatory |

5.4.19 Ask For Quote (33)

Client ◀ OEG

Available for: SP

5.4.19.1 Message Description

This message is used only for the Warrants on the New Market Model and sent by the matching engine to the Liquidity Provider when a quote of the latter is required. *AFQ Reason* identifies the case that triggers this request.

5.4.19.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------|---|-------------------|-----|--|-----------|
| Message Sequence Number | Indicates the Message Sequence Number per OE Session. (for messages sent by the Exchange) | Sequence | 4 | 0..2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric I ID | 8 | (See field description) | Mandatory |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |
| AFQ Reason | Reason why the AFQ (33) has been sent. | Enumerated | 1 | 1 = Quote cancelled by the Liquidity Provider 2 = Quote cancelled by Market Control 3 = No quote M minutes before an uncrossing 4 = No quote S seconds before an uncrossing 5 = Quote completely matched | Mandatory |

5.4.20 Request For Execution (34)

Client ◀ OEG

Available for: SP

5.4.20.1 Message Description

This message is used by the matching engine to offer the Liquidity Provider the opportunity to confirm or modify the quote of an instrument before completing any trade.

Upon reception of this message the Liquidity Provider can either send a new Quote to update the price or ignore the request (and thus trades within the timeframe). Please refer to the **Quotes** (08) message for further explanations.

5.4.20.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------|---|-----------------|-----|-------------------------|-----------|
| Message Sequence Number | Indicates the Message Sequence Number per OE Session. (for messages sent by the Exchange) | Sequence | 4 | 0..2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric ID | 8 | (See field description) | Mandatory |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |

5.4.21 RFQ Notification (35)

Client ◀ OEG

Available for: FND FXI

5.4.21.1 Message Description

The **RFQ Notification** (35) message is sent by the matching engine to inform Liquidity Providers about the new RFQ characteristics previously received from an RFQ issuer (Client who send the RFQ) through the **Quote Request** (10) message.

This message is sent to Liquidity Providers registered for the dedicated instrument.

5.4.21.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------|--|---------------------------|-----|-------------------------|-------------|
| Message Sequence Number | Indicates the Message Sequence Number per OE Session. (for messages sent by the Exchange) | Sequence | 4 | 0..2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric ID | 8 | (See field description) | Mandatory |
| Book IN Time | Matching Engine IN time (in ns), time at which the corresponding inbound message entered the Matching Engine. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| Book OUT Time | Matching Engine OUT time (in ns), when message leaves the Matching Engine (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|----------------------------|---|---------------------------|-----|---|-------------|
| OEG IN From ME | Gateway IN time from ME (in ns), measured when outbound message enters the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2^64-1 | Conditional |
| OEG OUT To Member | Order Entry Gateway OUT time to member (in ns), measured when outbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2^64-1 | Conditional |
| QuoteReqID | Numerical RFQ identifier assigned by the matching engine, unique per instrument and EMM. | Numerical ID | 8 | 0..2^64-2 | Mandatory |
| Order Quantity | Total order quantity, per quantity unit. (To be calculated with Quantity Decimals). | Quantity | 8 | 0..2^64-2 | Mandatory |
| Counterpart Firm ID | [N/A] ID of the clearing house in case of a CCP clearable transaction – also in the specific case of Internal Matching Service (IMS) with clearing : | Alphanumeric ID | 8 | (See field description) | Optional |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2^32-2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |
| RFQ Update Type | [N/A] Indicates the current status of the RFQ. | Enumerated | 1 | 1 = New 2 = Cancelled by the RFQ issuer 3 = Expired 4 = Partially or Fully Matched | Mandatory |
| Order Side | Indicates the side of the order. | Enumerated | 1 | 1 = Buy 2 = Sell | Optional |
| End Client | [N/A] Optional field the client may use to provide the BIC of the End Client of the RFQ. | Alphanumeric ID | 11 | (See field description) | Optional |
| Dark Execution Instruction | Field used as instruction for dark order handling. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | 0 = Dark Indicator 1 = Deferred Trade Indicator 2 = Displayed Order Interaction 3 = Sweep Order Indicator 4 = Minimum Quantity Type | Mandatory |
| Minimum Order Quantity | Minimum quantity to be executed upon order entry (else the order is rejected), (To be calculated with Quantity Decimals). | Quantity | 8 | 0..2^64-2 | Optional |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------|--|------------|-----|-------------------------|----------|
| Account Type | Indicates the account type for which the order is entered. For example, an order can be entered for a client account, a house account or a liquidity provider account. | Enumerated | 1 | (See field description) | Optional |

5.4.22 RFQ Matching Status (36)

Client ◀ OEG

Available for: FND FXI

5.4.22.1 Message Description

The **RFQMatchingStatus** (36) message is sent by the matching engine to inform RFQ issuer about the potential matching situation at the time the message is sent.

5.4.22.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------|--|---------------------------|-----|-------------------------|-------------|
| Message Sequence Number | Indicates the Message Sequence Number per OE Session. (for messages sent by the Exchange) | Sequence | 4 | 0..2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric ID | 8 | (See field description) | Mandatory |
| Book IN Time | Matching Engine IN time (in ns), time at which the corresponding inbound message entered the Matching Engine. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| Book OUT Time | Matching Engine OUT time (in ns), when message leaves the Matching Engine (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| OEG IN From ME | Gateway IN time from ME (in ns), measured when outbound message enters the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| OEG OUT To Member | Order Entry Gateway OUT time to member (in ns), measured when outbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| QuoteReqID | Numerical RFQ identifier assigned by the matching engine, unique per instrument and EMM. | Numerical ID | 8 | 0..2 ⁶⁴ -2 | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-----------------------------|--|--------------|-----|--|-------------|
| Potential Matching Price | The Potential Matching Price indicates to the RFQ issuer the matching price for the “Potential Matching Quantity”. | Price | 8 | -2^63..2^63-1 | Conditional |
| Potential Matching Quantity | The potential matching quantity indicates the maximum volume that would be matched in case of an RFQ validation. | Quantity | 8 | 0..2^64-2 | Mandatory |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2^32-2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |
| Order Side | Indicates the side of the order. | Enumerated | 1 | 1 = Buy 2 = Sell | Mandatory |
| Number Of LPs | Indicates the number of LP answers to the RFQ (whether they can be executed or not) | Numerical | 1 | 0..2^8-1 | Conditional |
| Recipient Type | [N/A] Indicates whether the message is sent to the RFQ issuer or the Liquidity Provider. | Enumerated | 1 | 1 = RFQ Issuer 2 = RFQ recipient (LP) | Mandatory |

5.4.23 RFQ LP Matching Status (37)

Client ◀ OEG

Available for: FND FXI

5.4.23.1 Message Description

The **RFQLPMatchingStatus** (37) message is sent by the matching engine to inform Liquidity Providers about their potential matching situation at the time the message is sent.

The field *Potential Matching Quantity* will contain the potential aggregated matching quantity for all the concerned LP's answers for the identified RFQ (provided by the *QuoteReqID*).

5.4.23.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------|--|---------------------------|-----|-------------------------|-----------|
| Message Sequence Number | Indicates the Message Sequence Number per OE Session. (for messages sent by the Exchange) | Sequence | 4 | 0..2^32-2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric ID | 8 | (See field description) | Mandatory |
| Book IN Time | Matching Engine IN time (in ns), time at which the corresponding inbound message entered the Matching Engine. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2^64-2 | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-----------------------------|---|---------------------------|-----|-------------------------|-------------|
| Book OUT Time | Matching Engine OUT time (in ns), when message leaves the Matching Engine (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2^64-1 | Conditional |
| OEG IN From ME | Gateway IN time from ME (in ns), measured when outbound message enters the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2^64-1 | Conditional |
| OEG OUT To Member | Order Entry Gateway OUT time to member (in ns), measured when outbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2^64-1 | Conditional |
| QuoteReqID | Numerical RFQ identifier assigned by the matching engine, unique per instrument and EMM. | Numerical ID | 8 | 0..2^64-2 | Mandatory |
| Potential Matching Quantity | The potential matching quantity indicates the maximum volume that would be matched in case of an RFQ validation. | Quantity | 8 | 0..2^64-2 | Mandatory |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2^32-2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |
| Order Side | Indicates the side of the order. | Enumerated | 1 | 1 = Buy 2 = Sell | Mandatory |

5.4.24 User Notification (39)

Client ◀ OEG

Available for: EQ FND FXI SP EOD IDD CMO BLK

5.4.24.1 Message Description

User Notification (39) is used to notify clients of actions taken on their connections by exchange's Kill Switch action, or by their risk manager using Euronext RiskGuard (ERG) service.

- For Kill Switch and RiskGuard the User Notifications sent to the clients might be triggered due to compliance with supplementing Directive 2014/65/EU of the European Parliament and of the Council with regard to regulatory technical standards specifying organisational requirements of trading venues, as well as for the services provided for such purposes for the investment firms engaged in algorithmic trading, Euronext Market operations, or authorized representatives of the investment firms, may suspend a member's or trader's access to the trading system or trigger the use of kill functionality in order to prevent disorderly trading conditions.
 - The message is sent if client's access has been Suspended / Killed, or if their suspension / kill status has been lifted.

In order to allow Sponsor Firms to monitor the Sponsored Firms activity, a new feature has been introduced within Drop Copy Members Gateway. The feature enables to automatically send a Kill Switch command targeting a Sponsored Firm when his Sponsor Firm loses connection with Drop Copy. Similarly, once the Sponsor Firm successfully (re)connects to Drop Copy, an Un suspension command is triggered which will lift the suspension. Both

of these commands lead to the standard sending of the User Notification (39) with the already known *User Status* values.⁷

After the sending of the notification for the suspension, and until this suspension is cleared, any following messages are rejected either with error code 2512 "Suspended by EMS" or 2582 "Suspended by Risk Manager".

■ For RiskGuard the User Notification is sent:

- if client's access has been Blocked or Unblocked on a given contract, and it includes the scope for which this action has been applied;
- if for Derivatives, Order Size Limit has been activated or deactivated on a given contract, and the scope on which this action has been applied.
- For Derivatives, for Maximum Exposure Position control if MEP has been activated or deactivated on a given Firm, and if a Breach Action has kicked in/kicked out;
 - ◆ when the action in place is Block (User Status MEP Threshold Action Activated: Incoming requests are blocked or MEP Threshold Action Activated: Book was purged and incoming requests are blocked) the Exposure Side field indicates, as for other actions, the side which was breached **BUT**, despite that, as the action is block, the block applies to all incoming requests and not only to the ones on the side of the breach.
 - ◆ Exposure Side **isn't** populated when the notification is sent to indicate MEP Activation/Deactivation
- For Cash markets, if the Order Amount Limit has been activated or deactivated on a given instrument or globally for all instrument in scope of the Risk Manager/ Firm ID monitoring authorizations, and the scope on which this action has been applied. In case of "Global OAL" the Symbol Index is set to SBE Null value.
 - ◆ Please Note that:
 - For Non-Sponsored Firms, where only "individual OAL" is allowed, a **User Notification** (39) is sent for each activation/deactivation;
 - For Sponsored Firms, where both "global and individual OAL" can be submitted and live in parallel:
 1. When a command is sent to activate "global OAL" then a single **User Notification** (39) is triggered to indicate it to the firm and NO message is sent to indicate the explicit removal of any "individual OAL" which was previously activated and got overridden by the sending of the "global OAL";
 2. When there is the activation of "global OAL" followed by the activation of the "individual OAL" on different instruments then the following happens:
 - One **User Notification** (39) is sent to indicate the activation of "global OAL" AND
 - Upon reception of "individual OAL", one **User Notification** (39) is sent, per Firm ID and Symbol index, to indicate the activation of it;

Overall, the Members notification, through the User Notification (39) message is managed as following:

- sent when MEP is activated or deactivated;
 - in case MEP is activated/deactivated, for a given firm, through multiple risk managers then User Notification (39) is sent per Risk Manager which sent the MEP command;
 - in case upon activation/deactivation there is an immediate triggering of a threshold breach or the removal of a threshold currently in use, respectively, then the User Notification (39) to indicate activation/deactivation and only after the notification of the threshold breach triggering or threshold breach removal;
- when the Risk Manager adjusts the initial submitted MEP command (threshold values, or breach actions or all – as described in section [Message Description](#) of ERGCommand (U68))
 - no notification is sent as the indication that MEP was activated had already been sent. In case the adjustment leads to a threshold breach then that is communicated;
- in case the Firm breaches thresholds set by different risk managers **which have different breach actions**
 - a single User Notification (39) is sent, with the most restrictive action (*as it is the one in place to validate the incoming requests from the trading member*)
 - in case the action is Block or Pull and Block then the different risk managers have to remove the block for the firm to be able to trade again;

⁷ Please note this mechanism is only triggered for the Drop Copy accesses which have been configured with "Automatic Kill Switch and Unsupension" set to Yes.

- in case the Firm breaches thresholds set by different risk managers **which have the same breach action**
 - a single User Notification (39) is sent
 - in case the action is Block or Pull and Block then the different risk managers have to remove the block for the firm to be able to trade again;
- in case the Firm breaches thresholds which may have been set by different risk managers (or by a single risk manager) and lead to the same action, meaning same action already triggered once the other threshold is breached
 - no User Notification (39) is sent,
 - in case the action is Block or Pull and Block then the different risk managers have to remove the block for the firm to be able to trade again;
- for the specific case created by block either because of action Block or action Pull and Block, where notifications are sent to the risk manager indicating that, in normal situations, another action would have been activated once the exposure moves, no notification is sent to the trading firm. In further details:
 - if there is no action in place or an action that is not Block or Pull and Block and there is a breach of the threshold that leads to Block or Pull and Block - **a User Notification (39) is sent** to indicate the new action in place;
 - if the trading firm is in Block state following a breach of a threshold which had the action "Block" associated and then there is a breach of the threshold that leads to Pull and Block - **a User Notification (39) is sent** to indicate the new action in place;
 - if the trading firm is breaching the threshold with the action "pull and block" associated and there is an exposure adjustment which leads to the breach of the threshold with action "block" - **no User Notification (39) is sent** to indicate the new action in place;
 - if the trading firm is breaching a threshold which has the action pull and block or Block and there is an exposure adjustment which leads to breach down, which would move to any of the other actions (going down means theoretically, because practically the block is persisted so the action doesn't change) - **no User Notification (39) is sent** to indicate the new action in place;
- **Once a limit is breached or multiple limits are breached simultaneously**, either the MEP 100% or one/multiple of the three individual thresholds, the following messages are triggered:
 - User Notification (39) is sent to the Firm in case the breach of the threshold has triggered a "breach action" ;
 - Please note that in case of successive breach of individual thresholds no message is sent to clear the previous breached threshold, only a message to indicate the new threshold in place is sent;
- Concerning the "Clearing" of previously breached thresholds (i.e, when the exposure is recomputed and it's no longer breaching the defined threshold):
 - In case the recomputation leads to a clear of the current threshold to a lower one:
 - User Notification (39) is sent to the Firm to indicate the new threshold and action which are activated;
 - In case the recomputation leads to "no threshold is longer being breached":
 - User Notification (39) is sent to the Firm to indicate no threshold neither action are activated;

After notification of one of the above events and until the restriction is lifted, any of the inbound messages (for derivatives: except for strategies creation, open order request, mass cancelations, ownership request, request for implied execution and quote request) are rejected with an appropriated error code.

Note: RiskGuard service allows Risk Managers to act on a given Firm, Logical Access, and one of the two short codes: ExecutionWithinFirmShortCode or ClientIdentificationShortCode. This granularity is provided via the flag in the inbound message, however user notification doesn't provide this granularity in the *User Status* field.

The field *User Status* in this message indicates the nature of action and the case of Kill functionality or Risk Guard the scope taken on the access and/or orders. In case of block or order size limit activation the scope is provided either in the field *Symbol Index or Family ID*.

The text in the field *User Status* associated to each value provides for the following possible actions and granularities.

Actions:

| SERVICE | ACTION | DESCRIPTION |
|----------------------------|---|--|
| Kill Switch and Risk Guard | Suspended | access to the trading system has been suspended |
| Kill Switch and Risk Guard | Suspension Cleared | access to the trading system has been restored after a Suspension |
| Kill Switch | Killed | access to the trading system has been suspended and all unexecuted orders submitted have been cancelled |
| Kill Switch | Kill Cleared | access to the trading system has been restored after a Kill functionality was initiated. Orders cancelled upon initiation of Kill functionality will NOT be restored |
| Risk Guard | Blocked | access to the trading system, on a given contract, has been blocked. All unexecuted orders previously submitted might have been cancelled |
| Risk Guard | Unblocked | access to the trading system, on a given contract, has been unblocked. Orders cancelled upon initiation of Block functionality will NOT be restored |
| Risk Guard | Order Size Limit (Derivatives Only) | orders submitted on a given contract cannot have a quantity higher than the Order Size Limit defined per contract. The limit is applied per individual order and not globally. |
| Risk Guard | Order Amount Limit (Cash Only) | orders submitted on a given instrument cannot have an amount higher than the Order Amount Limit defined per instrument or globally for all instruments, of an Optiq segment, on which the Risk Manager is authorized to monitor the Firm ID – only applicable to Sponsored Firms. The limit is applied per individual order and not cumulative cross orders. |
| Risk Guard | Maximum Exposure Limit (Derivatives only) | orders (excluding Wholesales, RFC)/quotes/trades (excluding TRF temporary trades) are taken into account to validate if the maximum allowed position for the contract is being respected or not. |

Scope:

For Kill Switch: *Firm ID* is always provided, and it represents the scope of the kill only in case the action has been taken when specified by *User Status* as Firm;

For RiskGuard: *Firm ID* is always provided, and it represents the scope of the action only in case the *User Status* references Firm, Trader – Algo, DEA or Order Size Limit;

Please note – All Risk Guard messages are submitted and replied on the Optiq segment level.

| SCOPE | DESCRIPTION | IDENTIFIER FIELD PROVIDED |
|-------------|---|-------------------------------------|
| Trader-Algo | <p>For Kill Switch: Scope of a trader or an algorithm, applied based on the value specified in the field <i>ExecutionWithinFirmShortCode</i>. In this case the field <i>ExecutionWithinFirmShortCode</i> in the message will be populated with the value set by Market Operations.</p> <p>For Risk Guard: Scope of a trader or an algorithm (identified by <i>ExecutionWithinFirmShortCode</i>), applied based on the value specified in the field used to provide the <i>ExecutionWithinFirmShortCode</i>. In this case the field <i>ExecutionWithinFirmShortCode</i> in the message will be populated with the value received on the inbound message from the Risk Manager.</p> | <i>ExecutionWithinFirmShortCode</i> |

| SCOPE | DESCRIPTION | IDENTIFIER FIELD PROVIDED |
|-------------------------------------|---|--------------------------------------|
| Firm | <p>For Kill Switch: Scope of member, including all of the physical connections and orders associated to the Firm ID. When submitted by Market operations, Kill switch applies to all Euronext Optiq segments, and client receives a message per Optiq segment.</p> <p>For Risk Guard: Scope of member, including all of the physical connections and orders associated to the Firm ID. Risk manager submits RiskGuard commands for each individual optiq segment, and client receives a message per Optiq segment, and only for the segment for which Risk manager has submitted the command.</p> | Firm ID |
| DEA / ClientIdentificationShortCode | <p>For Kill Switch: Scope is the sub-set of orders / messages flagged as being submitted via a Direct Electronic access (DEA) provided by members to their own clients either for Sponsored Access or Direct Market Access (DMA). In case of Kill command is being done for Sponsored access (usually applied to the wholes Logical Access), the Status will identify “DEA” and the field <i>ClientIdentificationShortCode</i> is not populated. In case the Kill command is done for the DMA, the command is applied based on the value specified in the field <i>ClientIdentificationShortCode</i>; then the field <i>ClientIdentificationShortCode</i> in the message will be populated with the value set by Market Operations.</p> <p>For Risk Guard: Scope is the sub-set of orders/messages submitted under the <i>TargetClientIdentificationShortCode</i> are killed or the access of the <i>TargetClientIdentificationShortCode</i> is suspended, blocked or checked against the order size limit, depending on the command submitted by the Risk Manager to the Exchange.</p> | <i>ClientIdentificationShortCode</i> |
| Logical Access | <p>For Risk Guard: Scope is the sub-set of orders/messages submitted under the <i>TargetLogicalAccessID</i> are killed or the access of the <i>TargetLogicalAccessID</i> is suspended or blocked, depending on the command submitted by the Risk Manager to the Exchange. In case the action is applied at Logical Access level, only the Firm that owns the connection receives the User Notification (39).</p> | Logical Access ID |

The message contains **one optional repeating section**:

- **SuspensionScope Repeating Section:** this repeating section is for future use and must not be used for now; the two fields of the header must be set to zero “0”.

5.4.24.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------|---|-----------------|-----|-------------------------|-----------|
| Message Sequence Number | Indicates the Message Sequence Number per OE Session. (for messages sent by the Exchange) | Sequence | 4 | 0..2^32-2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric ID | 8 | (See field description) | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------------|---|-----------------|-----|---|-------------|
| ExecutionWithinFirmShortCode | MiFID II short code, Execution within firm, identifier of the trader or algorithm responsible for the execution making. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Conditional |
| ClientIdentificationShortCode | MiFID II short code, Client identification code. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Conditional |
| Family ID | Identifier of the family. (For Future Use) | Alphanumeric ID | 8 | (See field description) | Conditional |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2 ³² -1 | Conditional |
| User Status | Status of the user. | Enumerated | 1 | (See field description) | Mandatory |
| Logical Access ID | Identifier of the Logical Access. | Numerical ID | 4 | 0..2 ³² -1 | Conditional |
| Order Size Limit | Indicates the Maximum Order Size above which all orders will be rejected by the Matching Engine. | Quantity | 8 | 0..2 ⁶⁴ -2 | Conditional |
| Order Amount Limit | Indicates the Maximum Order Amount above which all orders will be rejected by the Matching Engine. | Amount | 8 | 0..2 ⁶⁴ -2 | Conditional |
| Exposure Side | Indicates the side of the exposure. This field must always be populated for Derivatives and not be sent for Cash. | Enumerated | 1 | (See field description) | Conditional |
| SuspensionScope length | | Numerical | 1 | 0 | Mandatory |
| SuspensionScope occurrences | | Numerical | 1 | 0 | Mandatory |

5.4.25 Instrument Synchronization List (50)

Client ◀ OEG

Available for: EQ FND FXI SP EQD IDD CMO BLK

5.4.25.1 Message Description

The **InstrumentSynchronizationList** (50) message is sent in order to associate each instrument with a *ResynchronizationID*. This ID is used only in case of failover of the matching engine.

Please refer to message **SynchronizationTime** (51) for further details.

5.4.25.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------|---|---------------------------|-----|-----------------------|-----------|
| Message Sequence Number | Indicates the Message Sequence Number per OE Session. (for messages sent by the Exchange) | Sequence | 4 | 0..2 ³² -2 | Mandatory |
| OEG OUT To Member | Order Entry Gateway OUT time to member (in ns), measured when outbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Optional |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--|---|--------------|-----|-------------------------|-----------|
| Resynchronization ID | Each instrument is assigned to a Resynchronization ID, that is use in case of failover. | Numerical ID | 2 | 0..2 ¹⁶ -2 | Mandatory |
| InstrumentSynchronizationSection length | | Numerical | 1 | 5 | Mandatory |
| InstrumentSynchronizationSection occurrences | | Numerical | 1 | 1..254 | Mandatory |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |

5.4.26 Synchronization Time (51)

Client ◀ OEG

Available for: EQ FND FXI SP EOD IDD CMO BLK

5.4.26.1 Message Description

The **SynchronizationTime** (51) message is sent after a disruptive incident affecting the trading chain to help the clients assess whether the messages received immediately before the disruptive incident are valid and stored state or if they must be discarded.

This message provides a timestamp (*Last Book In Time*) of the last known valid and stored message, and is sent by the system for the associated resynchronization ID (*Resynchronization ID*).

Upon the reception of the message, clients must check the list of all instruments associated to the field *Resynchronization ID* and analyze all messages received before the **Synchronization Time** (51) message, related to these instruments. Messages having *Book In Time* or *Trade Time* higher than the associated *Last Book In Time* must be discarded.

For example, upon the reception of a **Synchronization Time** (51) message, if a client previously received a **Fill** (04) message with the *Trade Time* higher than the *Last Book In Time*, then this **Fill** (04) message must be ignored and the order fill must be reversed in client system; the trade is considered as if it has never happened (i.e. the quantity has not been traded, and the order may still be present in the order book for further execution).

Similarly, if a client previously received a **Kill** (05) message with a *Book In Time* higher than the *Last Book In Time*, then the Kill notification must be ignored (meaning that the order may still present in the order book for further execution).

All the messages received after the **SynchronizationTime** (51) messages must be processed normally.

5.4.26.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------|---|----------|-----|-----------------------|-----------|
| Message Sequence Number | Indicates the Message Sequence Number per OE Session. (for messages sent by the Exchange) | Sequence | 4 | 0..2 ³² -2 | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|----------------------|---|---------------------------|-----|-----------------------|-----------|
| OEG OUT To Member | Order Entry Gateway OUT time to member (in ns), measured when outbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Optional |
| Resynchronization ID | Each instrument is assigned to a Resynchronization ID, that is use in case of failover. | Numerical ID | 2 | 0..2 ¹⁶ -2 | Mandatory |
| Last Book IN Time | Last Matching Engine IN time (in ns) processed on the associated Resynchronization ID. | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Mandatory |

5.4.27 Security Definition Request (60)

Client ► OEG

Available for: EQD IDD CMO

5.4.27.1 Message Description

This message is used to create a user-defined strategy during the trading session. Any logical access of type Trading or Market Making can initiate strategy creation.

The strategy creation request is acknowledged or rejected by the system using a **Security Definition Ack (61)** message. In case of positive acknowledgement, message provides the *SymbolIndex* of the created (or existing) strategy.

The strategy to be created must respect the strategy definition corresponding to its code specified with the *Strategy Code* field. It must also be defined from the buy side perspective. For example, the strategy definition of a Future Calendar Spread must follow the following constraints:

- Two future legs within the same contract;
- Ratio 1 for the first leg L_1 as a buy;
- Ratio 1 for the second leg L_2 as a sell;
- Front leg expiry precedes second leg expiry.

This corresponds to the definition of the spread strategy L_1-L_2 .

If the strategy to be created does not fully respect its strategy definition, then the strategy creation request is rejected by the system through a **Reject (07)** message.

For the list of the recognised strategies and high level description of their structures client should refer to the *Annexe 2 to Notice n° 5-01 Trading Procedures: Recognised Strategies* document.

For COB, a strategy must be created before any orders or quotes for that strategy can be submitted.

Delta-Neutral Strategies:

For Delta-Neutral (DN) strategies, creation of the strategy using **Security Definition Request (60)** messages, is required prior to submission of the order. For creation of Stock contingent DN trades at least one leg of the created strategy the field Leg Security Type must be set to 'Cash', Leg Symbol Index is filled with the Symbol Index of the Cash instrument, Leg Price is populated with the Cash underlying price and the Leg Ratio specifies the Delta.

For Wholesale Facility prior creation of strategies is not required, except when submitting a Delta-neutral strategy, in which case this creation is mandatory.

5.4.27.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------------------------|--|---------------------------|-----|---|-------------|
| Client Message Sequence Number | The Client Message Sequence Number is mandatory for all inbound messages, but the consistency of the sequence is not checked by the Exchange. | Sequence | 4 | 0..2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric I ID | 8 | (See field description) | Mandatory |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| Security Request ID | ID of a strategy security definition request | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Mandatory |
| Contract Symbol Index | Exchange identification code of the Contract. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |
| Strategy Code | Exchange-recognized strategy code | Alphanumeric I ID | 1 | (See field description) | Mandatory |
| StrategyLegs length | | Numerical | 1 | 35 | Mandatory |
| StrategyLegs occurrences | | Numerical | 1 | 1..32 | Mandatory |
| Leg Symbol Index | MDG proprietary identification code of the instrument leg for the strategy. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |
| Leg Ratio | Ratio of lots for the leg. For contingent trades, the delta. | Numerical | 4 | 0..99999 | Mandatory |
| Leg Security Type | Defines the type of instrument of the Leg | Enumerated | 1 | 0 = Future 1 = Option 2 = Cash | Mandatory |
| Leg Put Or Call | Type of the option as leg. | Enumerated | 1 | 1 = Call 0 = Put | Optional |
| Leg Price | Price of corresponding strategy leg (to be calculated with the Price/Index Level Decimals). | Price | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Optional |
| Leg Strike Price | The strike price of an option/warrant is the specified price at which the underlying can be bought (in the case of a call/right to buy) or sold (in case of a put/right to sell) by the holder (buyer) of the option/warrant contract, at the moment he exercises his right against a writer (seller) of the option/warrant. | Price | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Optional |
| Leg Last Trading Date | Last Trading Date of the leg of the strategy (text formatted as YYYYMMDD). | Numerical ID | 8 | YYYYMMDD | Conditional |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|----------|--------------------------------------|------------|-----|---------------------|-----------|
| Leg Side | Indicates the side of the trade leg. | Enumerated | 1 | 1 = Buy 2 = Sell | Mandatory |

5.4.28 Security Definition Ack (61)

Client ◀ OEG

Available for: EQD IDD CMO

5.4.28.1 Message Description

This message is used to respond to the client's inbound **Security Definition Request** (60) message. It is an acknowledgement of strategy creation (if the request is rejected, the system sends a **Reject** (07) message).

If a client submits a creation for an already existing strategy, then the system acknowledges the request and returns the symbol index of the existing one.

In case of acknowledgement of a strategy creation, the strategy is created with the status 'Suspended New Listing' and the MDG **Strategy Standing Data** (1012) and **Market Status Change** (1005) messages are published to all market participants. Another **Market Status Change** (1005) message is published when the strategy changes its state to be available to trading after a predefined period of time (e.g. 30 seconds).

5.4.28.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------|---|---------------------------|-----|-------------------------|-------------|
| Message Sequence Number | Indicates the Message Sequence Number per OE Session. (for messages sent by the Exchange) | Sequence | 4 | 0..2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric I ID | 8 | (See field description) | Mandatory |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| OEG IN From Member | Order Entry Gateway IN time from member (in ns), measured when inbound message enters the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| OEG OUT To ME | Gateway OUT time to ME (in ns), measured when inbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| Book IN Time | Matching Engine IN time (in ns), time at which the corresponding inbound message entered the Matching Engine. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Conditional |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |

| OEG OUT To Member | Order Entry Gateway OUT time to member (in ns), measured when outbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| Security Request ID | ID of a strategy security definition request | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Mandatory |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |

5.4.29 New Wholesale Order (64)

Client ► OEG

Available for: EQD IDD CMO

5.4.29.1 Message Description

This message enables wholesale initiators to enter a new wholesale order, and in case of LIS transaction, reactors to respond to the initiated wholesale order. A wholesale order is made up of one pre-matched half trade, also called "intention" to trade. The matching of a buy intention and a sell intention satisfying the matching criteria leads to the generation of a wholesale trade.

The initiator must provide the wholesale type by populating the *WholesaleTradeType* field. Optiq supports the following wholesale trade types:

- Large In Scale (LIS)
- Against Actuals (AA) – always entered as Cross
- Exchange For Swaps (EFS) – always entered as Cross.

The available wholesale trade types are defined on the standing data and configurable on a per contract basis.

The wholesale trade facility is accessible via the Exchange Market Mechanism (EMM) '4'. This EMM provides the timetable and tick table used for wholesales on a per contract basis. The message doesn't contain the field for this and is always assumed to be for this EMM only. And for this EMM this is the only inbound message that can be received.

The initiator of a wholesale trade does not provide any *LIS Transaction ID* information. Optiq provides a Transaction ID upon validation of this first intention through the **Wholesale Order Ack** (65) message. The initiator then transmits the transaction ID to the (potentially multiple) counterpart(s). When counterparts submit their intention, they must populate the *LIS Transaction ID* with the transaction ID provided by the initiator. Counterparts can submit their intentions for an individual outright instrument, for one single leg of a strategy defined by the initiator or on the whole strategy.

For submission of a wholesale transaction on a strategy, Optiq relies on the strategy structure provided by the client, that must match the exchange-recognized strategy specified in the *Strategy Code* field. This field is not provided for transaction a single Outright instrument.

- For a wholesale transaction on a single instrument, the initiator provides either the buy or sell side, or both. In this case, no *Strategy Code* nor overall *Price* or *Quantity* are provided. The initiator populates a single order with either the buy side, sell side or both (self-reaction order).
- For a wholesale transaction on an exchange-recognized strategy, the initiator must provide the *Strategy Code*, as well as the overall *Price* and *Quantity*. The overall quantity must be the sum of the legs' quantities and the overall price must be consistent with the legs' price based on the strategy scheme.
- The same policy as per strategy creation is applied: strategy codes structure applies from the buy side perspective and the number and sequence of legs' Symbol Indexes as in the strategy must be respected.

The strategy structure must respect the strategy definition corresponding to its code specified with the *Strategy Code* field. It must also be defined from the buy side perspective.

| WHOLESALE SIDE | LEG SIDE | EFFECTIVE ORDER SIDE |
|----------------|----------|----------------------|
| Buy | Buy | Bid |
| Buy | Sell | Offer |
| Sell | Buy | Offer |
| Sell | Sell | Bid |

Effective Order Side reflects which field *Bid Quantity* or *Offer Quantity* is used.

For LIS transactions each individual strategy leg may be submitted within the message as Buy, Sell or Cross.

Side of the Wholesale and Large In Scale (LIS) threshold:

The field *Wholesale Side* in the block of the message identifies the side the initiator is choosing to submit the Wholesale Order for, and carries the following conditions:

- If submitted as Cross, the initiator must provide information for all sides of the order, that would match against each other. If identified, no reactor can submit messages to complete such wholesale order. If any information or quantity does not correspond between the submitted sides – it will be fully rejected.
- If submitted as Buy or Sell with the field *Wholesale Trade Type* set to 0 = Large In Scale Trade, then the submitted order for the identified side, either for individual Outright or the side of the Strategy, must meet the minimum LIS threshold, according to the conditions for the contract type and the type of liquidity of the strategy.
 - For Illiquid instruments, no checks of LIS threshold are done
 - For liquid Futures – each leg must meet the LIS threshold minimum volume
 - For liquid Options:
 - ◆ for liquid strategies, each leg must meet the LIS threshold minimum volume
 - ◆ for illiquid strategies, at least one leg must meet the LIS threshold minimum volume

Executions Wholesales and Strategies (for the Derivatives markets)

The executions for wholesale transactions done on strategies send individual **Fill** (04) messages for each leg of the strategy. This means that for Delta-Neutral with a Cash underlying, submitted as a wholesale transaction clients receive a private message for the Cash instrument that is part of the Delta-neutral strategy.

Use of Repeating groups:

Repeat group **WholesaleLegsRep** is used to define the structure of the Strategy submitted for the Large In Scale Trade type. Wholesales orders submitted with strategies, are allowed to be submitted only for strategies that contain up to 7 legs for each side of the transaction.

Repeat group **WholesaleClientRep** is used to provide the clearing data, short codes and non-execution client id for each leg of the strategy, for each submitted side. If this data is submitted, then the fields *Side* and *Leg Symbol Index* must be populated. If submitting data in this repeating group, it should be submitted as following:

- For a New Wholesale order message for a single side of an Outright, or as a response on a single leg of a strategy, a single repeating group for clearing data and short codes is to be submitted.
- For a Cross for an Outright then the clearing data and short codes can be submitted once for the Buy side, and once for the Sell side, as required. The field *Side* will allow to indicate the side for which data is submitted.

- For a message for the strategy – clearing and short code data repeating group may be provided for each leg of the strategy, and for each side of the associated trade, if required.

The WholesaleClientRep repeating group is provided with data only if required, and as such may not be provided for all the instruments / legs specified in the WholesaleLegsRep repeating group. In order to ensure that the clearing data is correctly linked between the provided repeating groups the value of symbol index in the WholesaleClientRep repeating group (in field *Symbol Index*) should match the symbol index of the instrument / leg (in field *Leg Symbol Index*) for which it is to be provided.

Delta-Neutral Strategies:

When submitting a Wholesale LIS transaction for Delta-Neutral (DN) strategies, this strategy must be created before submission of the New Wholes Order, using **Security Definition Request** (60) message. The symbol index that is provided by the system for this strategy creation must be provided in the field *Contract Symbol Index*. For more details on creation of delta-neutral strategies please see the **Security Definition Request** (60) message description.

For the creation of DN trades with a Future leg, the field *Contract Symbol Index* is populated with the symbol index of the Option contract. For the creation of Stock contingent DN trades at least one leg of the created strategy the field *Leg Security Type* must be set to 'Cash', *Leg Symbol Index* is filled with the Symbol Index of the Cash instrument, *Leg Price* is populated with the Cash underlying price and the *Leg Ratio* specifies the Delta.

Following additional rules apply for the DN strategy submission in wholesales:

- The Ratio and Price of the DN hedging leg (provided via fields *Leg Price* and *Leg Ratio*) must be identical to what is submitted in the definition of the strategy. The same applies to the Initiator and Reactor messages.
- Customer cannot submit volume for the hedging leg (Cash or Future). If submitted, the volume submitted for the hedging leg will be ignored.
- Aggregation of reactor messages is allowed, however only with reactions being done on all the legs of the DN strategy. Partial response per individual legs of the DN strategy will be rejected.

For Wholesale Facility prior creation of strategies is not required, except when submitting a Delta-neutral strategy, for which this creation is mandatory.

5.4.29.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------------------------|---|---------------------------|-----|---|-----------|
| Client Message Sequence Number | The Client Message Sequence Number is mandatory for all inbound messages, but the consistency of the sequence is not checked by the Exchange. | Sequence | 4 | 0..2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric ID | 8 | (See field description) | Mandatory |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| Client Order ID | An identifier of a message assigned by the Client when submitting an order to the Exchange. | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Mandatory |
| Contract Symbol Index | Exchange identification code of the Contract. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|------------------------------|--|-------------------|-----|--|-------------|
| Wholesale Trade Type | Type of the Wholesale trade. | Enumerated | 1 | 0 = Large in Scale Trade 1 = Against Actual 2 = Exchange For Swaps | Mandatory |
| LIS Transaction ID | ID that can be used to associated Executions belonging to the same LIS Transaction | Numerical ID | 4 | 0..2 ³² -2 | Conditional |
| Strategy Code | Exchange-recognized strategy code | Alphanumeric I ID | 1 | (See field description) | Conditional |
| Price | Price per unit of quantity (to be calculated with the Price/Index Level Decimals). | Price | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Mandatory |
| Quantity | Number of traded or ordered units (to be calculated with Quantity Decimals). | Quantity | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| ExecutionWithinFirmShortCode | MiFID II short code, Execution within firm, identifier of the trader or algorithm responsible for the execution making. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Mandatory |
| MiFID Indicators | Field used as instruction for order handling. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | (See field description) | Mandatory |
| Wholesale Side | Indicates the side of the Wholesale order. | Enumerated | 1 | 1 = Buy 2 = Sell 3 = Cross | Mandatory |
| ESCBMembership | Indicates if the trade is submitted by a member of the European System of Central Bank (ESCB) in performance of monetary, foreign exchange and financial stability policy. | Boolean | 1 | 0 = False 1 = True | Optional |
| Message Price Notation | This field provides the type of price notation used per message. For TRF and MOC products the value "Price" is used for TAM trading mode, the values "Spread in basis points" and "Spread" are used for TAIC trading mode. | Enumerated | 1 | 1 = Price 2 = Spread in basis points 3 = Spread | Conditional |
| WholesaleLegsRep length | | Numerical | 1 | 51 | Mandatory |
| WholesaleLegsRep occurrences | | Numerical | 1 | 1..32 | Mandatory |
| Leg Symbol Index | MDG proprietary identification code of the instrument leg for the strategy. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------------------------|--|-----------------|-----|---|-------------|
| Leg Price | Price of corresponding strategy leg (to be calculated with the Price/Index Level Decimals). | Price | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Mandatory |
| Bid Quantity | Quote bid quantity, (To be calculated with Quantity Decimals). | Quantity | 8 | 0..2 ⁶⁴ -2 | Conditional |
| Offer Quantity | Quote offer quantity, (To be calculated with Quantity Decimals). | Quantity | 8 | 0..2 ⁶⁴ -2 | Conditional |
| Leg Side | Indicates the side of the trade leg. | Enumerated | 1 | 1 = Buy 2 = Sell | Conditional |
| Leg Strike Price | The strike price of an option/warrant is the specified price at which the underlying can be bought (in the case of a call/right to buy) or sold (in case of a put/right to sell) by the holder (buyer) of the option/warrant contract, at the moment he exercises his right against a writer (seller) of the option/warrant. | Price | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Conditional |
| Leg Ratio | Ratio of lots for the leg. For contingent trades, the delta. | Numerical | 4 | 0..99999 | Conditional |
| Leg Put Or Call | Type of the option as leg. | Enumerated | 1 | 1 = Call 0 = Put | Conditional |
| Leg Security Type | Defines the type of instrument of the Leg | Enumerated | 1 | 0 = Future 1 = Option 2 = Cash | Mandatory |
| Leg Last Trading Date | Last Trading Date of the leg of the strategy (text formatted as YYYYMMDD). | Numerical ID | 8 | YYYYMMDD | Conditional |
| WholesaleClientRep length | | Numerical | 1 | 80 | Mandatory |
| WholesaleClientRep occurrences | | Numerical | 1 | 1..64 | Mandatory |
| Symbol Index | MDG proprietary identification code of the instrument leg for the strategy. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |
| Side | Indicates the Executing Side | Enumerated | 1 | 1 = Buy 2 = Sell | Mandatory |
| Account Type | Indicates the account type for which the order is entered. For example, an order can be entered for a client account, a house account or a liquidity provider account. | Enumerated | 1 | (See field description) | Mandatory |
| Clearing Firm ID | Clearing firm ID. | Alphanumeric ID | 8 | (See field description) | Optional |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-----------------------------------|--|----------------------|-----|--|-------------|
| Long Client ID | Field used to identify the Client (investor), or trader's reference / posting order number for a pre-posting, entered as a free text used for clearing purposes. This field is part of the clearing aggregate for Derivatives. For Cash Markets this field is ignored except for IPO where this field is used to provide the information of the tax code. | Alphanumeric I ID | 16 | (See field description) | Optional |
| Account Number | Account Number. Client's position account ID, identifying the investor's account. This field is part of the clearing aggregate. | Alphanumeric I ID | 12 | (See field description) | Optional |
| Technical Origin | Indicates the origin of the order; for example, manual entry, or an order coming from a Program Trading system. This field is part of the clearing aggregate. | Enumerated | 1 | 1 = Index trading arbitrage 2 = Portfolio strategy 3 = Unwind order 4 = Other orders (default) 5 = Cross margining | Optional |
| Open Close | Open Close Indicator, Posting action. This field is part of the clearing aggregate. | Bitmap | 2 | (See field description) | Optional |
| Clearing Instruction | Clearing Instruction. | Enumerated | 2 | (See field description) | Optional |
| Free Text | Free Text is manually entered by the trader issuing the order. This field is part of the clearing aggregate. | Text | 18 | (Free Text) | Optional |
| Non Executing Client ID | This field will be used as unique client Key. Field indicating the client ID of the participant in a commercial package. | Numerical ID | 2 | 0..2 ¹⁶ -1 | Optional |
| InvestmentDecisionWFFirmShortCode | MiFID II short code, Investment decision within firm, identifier of the trader or algorithm responsible for the investment decision. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Conditional |
| NonExecutingBrokerShortCode | MiFID II short code, Non-executing broker, identifier of the non-executing broker. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Optional |
| ClientIdentificationShortCode | MiFID II short code, Client identification code. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Conditional |
| Trading Capacity | Indicates whether the order submission results from trading as matched principal, on own account or as any other capacity. | Enumerated | 1 | 1 = Dealing on own account (DEAL) 2 = Matched principal (MTCH) 3 = Any other capacity (AOTC) | Conditional |

5.4.30 Wholesale Order Ack (65)

Client ◀ OEG

Available for: EQD IDD CMO

5.4.30.1 Message Description

This message is sent by Optiq to acknowledge or indicate rejection of a client's inbound wholesale order submitted via **New Wholesale Order** (64) message.

Acknowledgement message is not a validation of the trade execution, but only of the submission of the wholesale instruction. Execution of a wholesale trade is communicated to the clients using **Fill** (04) message.

If that wholesale order is sent by the initiator of the trade (i.e. without *LIS Transaction ID*), the system provides a *LIS Transaction ID* upon validation of this first intention through this message. It is up to the initiator to provide that *LIS Transaction ID* to counterparts for them to complete the trade (by providing the *LIS Transaction ID*), either by sending an order against a single leg, or by sending an order against the whole strategy.

The field *Response Type* indicates if the message is sent as an acknowledgement or rejection, and in case of a rejection the *Error Code* contains the specific reason for the rejection.

Pre-negotiated off-book on-exchange business is not published to the market data, until execution of the trade.

5.4.30.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------|---|---------------------------|-----|-------------------------|-------------|
| Message Sequence Number | Indicates the Message Sequence Number per OE Session. (for messages sent by the Exchange) | Sequence | 4 | 0..2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric I ID | 8 | (See field description) | Mandatory |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| OEG IN From Member | Order Entry Gateway IN time from member (in ns), measured when inbound message enters the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| OEG OUT To ME | Gateway OUT time to ME (in ns), measured when inbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| Book IN Time | Matching Engine IN time (in ns), time at which the corresponding inbound message entered the Matching Engine. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Conditional |

5.4.31 MM Sign-In (47)

Client ► OEG

Available for: EQD IDD CMO

5.4.31.1 Message Description

This message allows Market Makers to be identified as Market Makers with their Execution within firm short codes, and then to use the following Market Maker’s functionalities:

- Submission of Quotes by different Market Makers, from same firm, on the same instruments, with each Market Maker being identified with different short codes;
- Configuration of Market Maker Protections, on short code level.

In addition, the **MM Sign-In** (47) message allows Market Makers to submit clearing data before being able to trade on a contract and to specify in which logical access the member wants to receive unsolicited Market Maker Protection messages. It allows the member to send a lighter **Quotes** (08) message since it will not contain clearing data.

The member will not be able to send quotes or Market Maker protection messages without first submitting a **MM Sign-In** (47) message.

The member has to sign in once a day and can also override the sign in by sending again the message.

5.4.31.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------------------------|---|---------------------------|-----|---|-----------|
| Client Message Sequence Number | The Client Message Sequence Number is mandatory for all inbound messages, but the consistency of the sequence is not checked by the Exchange. | Sequence | 4 | 0..2 ³² -2 | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|------------------------------|--|-------------------|-----|--|-----------|
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |
| ExecutionWithinFirmShortCode | MiFID II short code, Execution within firm, identifier of the trader or algorithm responsible for the execution making. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Mandatory |
| Clearing Firm ID | Clearing firm ID. | Alphanumeric I ID | 8 | (See field description) | Optional |
| Account Number | Account Number. Client's position account ID, identifying the investor's account. This field is part of the clearing aggregate. | Alphanumeric I ID | 12 | (See field description) | Optional |
| Technical Origin | Indicates the origin of the order; for example, manual entry, or an order coming from a Program Trading system. This field is part of the clearing aggregate. | Enumerated | 1 | 1 = Index trading arbitrage 2 = Portfolio strategy 3 = Unwind order 4 = Other orders (default) 5 = Cross margining | Optional |
| Open Close | Open Close Indicator, Posting action. This field is part of the clearing aggregate. | Bitmap | 2 | (See field description) | Optional |
| Clearing Instruction | Clearing Instruction. | Enumerated | 2 | (See field description) | Optional |
| Free Text | Free Text is manually entered by the trader issuing the order. This field is part of the clearing aggregate. | Text | 18 | (Free Text) | Optional |
| Long Client ID | Field used to identify the Client (investor), or trader's reference / posting order number for a pre-posting, entered as a free text used for clearing purposes. This field is part of the clearing aggregate for Derivatives. For Cash Markets this field is ignored except for IPO where this field is used to provide the information of the tax code. | Alphanumeric I ID | 16 | (See field description) | Optional |

5.4.33 MM Protection Request (62)

Client ► OEG

Available for: EQD IDD CMO

5.4.33.1 Message Description

This message enables a Market Maker to set, adjust, reset or request the currently set configuration of a Market Maker protection against the execution of their quotes, and orders with account type set to Liquidity Provider, on a derivative contract.

Protection is defined by specifying a limit on:

- Volume;
- Delta.

When the protection limit is breached, the action specified when defining the protection is triggered.

5.4.33.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------------------------|--|---------------------------|-----|---|-----------|
| Client Message Sequence Number | The Client Message Sequence Number is mandatory for all inbound messages, but the consistency of the sequence is not checked by the Exchange. | Sequence | 4 | 0..2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric ID | 8 | (See field description) | Mandatory |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| Client Order ID | An identifier of a message assigned by the Client when submitting an order to the Exchange. | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Mandatory |
| ExecutionWithinFirmShortCode | MiFID II short code, Execution within firm, identifier of the trader or algorithm responsible for the execution making. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Mandatory |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |
| Request Type | This field gives the type of request made by the Market Maker for the Market Maker Protection. At the time of activation, the Market Maker (MM) is able to Set (1) Protection Limits and Limit Breach actions for each protection type activated on a contract. MM can also Get (2) the current reached value of the limits, and breach actions can be updated by submitting an Adjust (3) at any time while the facility is active. | Enumerated | 1 | 1 = Set 2 = Get 3 = Adjust | Mandatory |
| MMP Section length | | Numerical | 1 | 10 | Mandatory |
| MMP Section occurrences | | Numerical | 1 | 1..2 | Mandatory |
| Protection Type | Type of Market Maker protection. | Enumerated | 1 | 1 = Delta 2 = Volume | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|----------------------|---|------------|-----|------------------------|-------------|
| Protection Threshold | Limit of the MM protection. | Quantity | 8 | 0..2^64-2 | Conditional |
| Breach Action | Type of action to trigger when a MM protection limit is breached. | Enumerated | 1 | 0 = Ignore 1 = Pull | Conditional |

5.4.34 MM Protection Ack (63)

Client ◀ OEG

Available for: EQD IDD CMO

5.4.34.1 Message Description

This message is sent under different circumstances for Market Maker Protection:

- It can be provided as a solicited response to a **MM Protection Request** (62) message. Depending on the Request Type, it provides:
 - either an acknowledgement for Market Maker protection definition, adjustment or reset,
 - or the limits and current positions of the protections set by the Market Maker on the requested contract.
- It can also be sent as an unsolicited message when a Market Maker Protection position is breached; in that case, the *MMP Execution Type* provides the action triggered.

Note: If a trade occurs that goes above the MM Protection threshold, such a trade would still occur, and the **MM Protection Ack** (63) messages will be sent with the current position that is higher than the threshold. MM Protection action will be triggered after this based on the selection made by the client.

5.4.34.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------|---|---------------------------|-----|-------------------------|-----------|
| Message Sequence Number | Indicates the Message Sequence Number per OE Session. (for messages sent by the Exchange) | Sequence | 4 | 0..2^32-2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric I ID | 8 | (See field description) | Mandatory |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2^64-1 | Optional |
| OEG IN From Member | Order Entry Gateway IN time from member (in ns), measured when inbound message enters the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2^64-1 | Optional |
| OEG OUT To ME | Gateway OUT time to ME (in ns), measured when inbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2^64-1 | Optional |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|------------------------------|--|---------------------------|-----|---|-----------|
| Book IN Time | Matching Engine IN time (in ns), time at which the corresponding inbound message entered the Matching Engine. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Optional |
| Book OUT Time | Matching Engine OUT time (in ns), when message leaves the Matching Engine (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Optional |
| OEG IN From ME | Gateway IN time from ME (in ns), measured when outbound message enters the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Optional |
| OEG OUT To Member | Order Entry Gateway OUT time to member (in ns), measured when outbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Optional |
| Client Order ID | An identifier of a message assigned by the Client when submitting an order to the Exchange. | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Optional |
| ExecutionWithinFirmShortCode | MiFID II short code, Execution within firm, identifier of the trader or algorithm responsible for the execution making. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Mandatory |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |
| MMP Execution Type | Type of MM Protection Execution. | Bitmap | 1 | 0 = Notification 1 = Acknowledgement 2 = Pull | Mandatory |
| MMP Section 2 length | | Numerical | 1 | 19 | Mandatory |
| MMP Section 2 occurrences | | Numerical | 1 | 0..2 | Mandatory |
| Protection Type | Type of Market Maker protection. | Enumerated | 1 | 1 = Delta 2 = Volume | Optional |
| Protection Threshold | Limit of the MM protection. | Quantity | 8 | 0..2 ⁶⁴ -2 | Optional |
| Breach Action | Type of action to trigger when a MM protection limit is breached. | Enumerated | 1 | 0 = Ignore 1 = Pull | Optional |
| Current MMP Position | Current (Delta or Volume) position for MMP monitoring. | Quantity | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Optional |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|---------------|--|---------|-----|-----------------------|----------|
| Breach Status | Indicator of whether the MMP has been triggered due to limit breach (0: Not breached; 1: Breached) | Boolean | 1 | 0 = False 1 = True | Optional |

5.4.35 Request For Implied Execution (66)

Client ► OEG

Available for: EQD IDD CMO

5.4.35.1 Message Description

The **Request For Implied Execution** (66) message may be used by clients to trigger the generation of Implieds in a strategy book to increase matching opportunities for their order, for the contracts setup with the Event Driven Implied Matching (EDIM) model.

In order to be able to submit an RFIE in a strategy, client must have an active order in that Strategy order book at any price level, otherwise the request will be rejected by Optiq.

The *Order ID* field should be populated with the ID of this already existing order in the strategy order book.

Upon reception and processing of the RFIE message, Optiq will trigger generation of Implieds in the targeted Strategy book, which may result in a match of everything possible within the book, based only on the book's priority rules. This disregards which participant issued the request.

In addition to the condition of having an order in the book, the request will be accepted only if all of the following conditions are met:

- the effective state of the Strategy book is **Continuous**;
- the Implied model of the Derivative Contract is the EDIM Model (not "No Implieds" or "SIM - Spontaneous Implied Matching");
- even if EDIM is active on the contract, the strategy type must also have EDIM enabled which allows generation of Implieds in the Strategy book.

The RFIE message is acknowledged by an **Ack** (03) message with the *Ack type* set to "Request for Implied Execution Ack", and is rejected by **Reject** (07) message.

5.4.35.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------------------------|---|---------------------------|-----|-------------------------|-----------|
| Client Message Sequence Number | The Client Message Sequence Number is mandatory for all inbound messages, but the consistency of the sequence is not checked by the Exchange. | Sequence | 4 | 0..2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric I ID | 8 | (See field description) | Mandatory |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------------|--|--------------|-----|---|-------------|
| Client Order ID | An identifier of a message assigned by the Client when submitting an order to the Exchange. | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Mandatory |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |
| Order ID | Numerical order identifier assigned by the matching engine, unique per instrument and EMM. | Numerical ID | 8 | 0..2 ⁶⁴ -1 | Mandatory |
| ExecutionWithinFirmShortCode | MiFID II short code, Execution within firm, identifier of the trader or algorithm responsible for the execution making. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Mandatory |
| ClientIdentificationShortCode | MiFID II short code, Client identification code. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Conditional |
| MiFID Indicators | Field used as instruction for order handling. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | (See field description) | Mandatory |

5.4.36 Cross Order (67)

Client ► OEG

Available for: EQD IDD CMO

5.4.36.1 Message Description

The **Cross Order** (67) message is used to submit orders within the "Request for Cross" (RFC) trading facility, and available for designated products.

RFC Initiator submits a message that represents a committed cross trade against a client, and must contain both Buy and Sell sides of the RFC trade. The initiator submission starts a short auction period during which RFC Reactors may submit orders to price-improve the cross, and participate in the cross trade. For more details on the behaviour of the messages for the RFC trading facility clients should review the Derivatives Kinematics document.

The same message is used by the Initiators and Reactors, and account type information is always provided with clearing data repeating group, in field *Account Type Cross*.

The RFC facility is accessible via the Exchange Market Mechanism (EMM) '7', which is the only allowed value to be populated in this message in the field *EMM*. This EMM provides the timetable and tick table used for wholesales on a per contract basis.

The cross Order messages may be submitted only during Continuous and it is acknowledged by an **Ack** (03) message and rejected by **Reject** (07) message.

For the submission of Cross Order on strategies, the value of the created strategy's Symbol Index should be provided in the Symbol Index of Cross Order.

Repeating Section Usage

The message contains **four optional repeating sections**:

- **FreeText repeating section:** the first repeating section contains only the field *FreeText*. It can be populated once for Buy and Sell orders and twice for Cross orders, respectively for the buy side and the sell side. Please note that data in the *FreeText* is part of the Clearing Data section, which aggregates the clearing-related data (clearing aggregate) but it is set in a dedicated repeating section for performance purpose. Possible number of repeating groups: 0, 1, 2.
- **MiFID Shortcodes repeating section:** the second repeating section contains the MiFID shortcodes and can be populated once for Buy and Sell orders. It can be repeated twice by the Initiator, respectively for the buy side and then for the sell side. Possible number of repeating groups: 0, 1, 2.
- **Clearing Data X repeating section:** the third repeating section contains the clearing data fields. Possible number of repeating groups: 0, 1, 2.

If provided by the Initiator, two occurrences are mandatory; the first one for the buy side and the second one for the sell side.

If provided by the Reactor, the occurrence is optional and contains all the clearing data of the order.

- **Strategy Execution Data repeating section:** this repeating section is used to provide details on trades for legs of a strategy trade. Possible number of repeating groups: 0..32.

The field *Leg Last Traded Price* represents the price of the leg. It enables to check the consistency of the strategy sent by the RFC Initiator (For instance. In case of a Calendar Spread Strategy (A-B) a check is done to ensure that order price is equal to leg last traded price from outright A minus leg last traded price from outright B).

The field *Leg Last Traded Quantity* represents the quantity traded of the leg. No consistency checks are applied on this field.

5.4.36.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------------------------|---|---------------------------|-----|--|-----------|
| Client Message Sequence Number | The Client Message Sequence Number is mandatory for all inbound messages, but the consistency of the sequence is not checked by the Exchange. | Sequence | 4 | From 0 to 2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric I ID | 8 | (See field description) | Mandatory |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | From 0 to 2 ⁶⁴ -2 | Mandatory |
| Client Order ID | An identifier of a message assigned by the Client when submitting an order to the Exchange. | Numerical ID | 8 | From -2 ⁶³ -1 to 2 ⁶³ -1 | Mandatory |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | From 0 to 2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |
| Order Side | Indicates the side of the order. | Enumerated | 1 | 1 = Buy 2 = Sell 3 = Cross | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|------------------------------|--|--------------|-----|---|-----------|
| Order Type | Type of Order. | Enumerated | 1 | (See field description) | Mandatory |
| Order Price | Instrument price per quantity unit (To be calculated with Price/Index Level Decimals). | Price | 8 | From $-2^{63}-1$ to $2^{63}-1$ | Mandatory |
| Order Quantity | Total order quantity, per quantity unit (To be calculated with Quantity Decimals). | Quantity | 8 | From 0 to $2^{64}-2$ | Mandatory |
| ExecutionWithinFirmShortCode | MiFID II short code, Execution within firm, identifier of the trader or algorithm responsible for the execution making. | Numerical ID | 4 | From $-2^{31}-1$ to $2^{31}-1$ | Mandatory |
| MiFID Indicators | Field used as instruction for order handling. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | (See field description) | Mandatory |
| Non Executing Client ID | This field will be used as unique client Key. Field indicating the client ID of the participant in a commercial package. | Numerical ID | 2 | From 0 to $2^{16}-2$ | Optional |
| Order Actor Type | Member role for RFC. | Enumerated | 1 | 1 = Initiator 2 = Reactor | Mandatory |
| Message Price Notation | This field provides the type of price notation used per message. For TRF and MOC products the value "Price" is used for TAM trading mode, the values "Spread in basis points" and "Spread" are used for TAIC trading mode. | Enumerated | 1 | 1 = Price 2 = Spread in basis points 3 = Spread | Optional |
| Order Tolerable Price | Allows the RFC Initiator to provide an improving tolerable price on the non-client side of the cross. This tolerable price is intended to anticipate possible price improvements, generated by RFC Reactors. In case RFC Initiator does not want to match RFC Reactors improved prices, this field must be provided with the Null value. (to be calculated with Price/Index Level Decimals). | Price | 8 | $-2^{63}+1..2^{63}-1$ | Optional |
| FreeTextSection length | | Numerical | 1 | 18 | Mandatory |
| FreeTextSection occurrences | | Numerical | 1 | 0..2 | Mandatory |
| Free Text | Free Text is manually entered by the trader issuing the order. This field is part of the clearing aggregate. | Text | 18 | (Free Text) | Optional |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-----------------------------------|--|-------------------|-----|--|-------------|
| MiFIDShortcodes length | | Numerical | 1 | 12 | Mandatory |
| MiFIDShortcodes occurrences | | Numerical | 1 | 0..2 | Mandatory |
| InvestmentDecisionWFiirmShortCode | MiFID II short code, Investment decision within firm, identifier of the trader or algorithm responsible for the investment decision. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Conditional |
| NonExecutingBrokerShortCode | MiFID II short code, Non-executing broker, identifier of the non-executing broker. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Optional |
| ClientIdentificationShortCode | MiFID II short code, Client identification code. | Numerical ID | 4 | -2 ³¹ +1..2 ³¹ -1 | Conditional |
| ClearingFieldsX length | | Numerical | 1 | 43 | Mandatory |
| ClearingFieldsX occurrences | | Numerical | 1 | 0..2 | Mandatory |
| Clearing Firm ID | Clearing firm ID. | Alphanumeric I ID | 8 | (See field description) | Optional |
| Long Client ID | Field used to identify the Client (investor), or trader's reference / posting order number for a pre-posting, entered as a free text used for clearing purposes. This field is part of the clearing aggregate for Derivatives. For Cash Markets this field is ignored except for IPO where this field is used to provide the information of the tax code. | Alphanumeric I ID | 16 | (See field description) | Optional |
| Account Number | Account Number. Client's position account ID, identifying the investor's account. This field is part of the clearing aggregate. | Alphanumeric I ID | 12 | (See field description) | Optional |
| Technical Origin | Indicates the origin of the order; for example, manual entry, or an order coming from a Program Trading system. This field is part of the clearing aggregate. | Enumerated | 1 | 1 = Index trading arbitrage 2 = Portfolio strategy 3 = Unwind order 4 = Other orders (default) 5 = Cross margining | Optional |
| Open Close | Open Close Indicator, Posting action. This field is part of the clearing aggregate. | Bitmap | 2 | (See field description) | Optional |
| Clearing Instruction | Clearing Instruction. | Enumerated | 2 | (See field description) | Optional |
| Account Type | Indicates the account type for which the order is entered. For example, an order can be entered for a client account, a house account or a liquidity provider account. | Enumerated | 1 | (See field description) | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|----------------------------|--|--------------|-----|--|-------------|
| Trading Capacity | Indicates whether the order submission results from trading as matched principal, on own account or as any other capacity. | Enumerated | 1 | 1 = Dealing on own account (DEAL) 2 = Matched principal (MTCH) 3 = Any other capacity (AOTC) | Conditional |
| StrategyFields length | | Numerical | 1 | 20 | Mandatory |
| StrategyFields occurrences | | Numerical | 1 | 0..32 | |
| Leg Last Traded Price | Leg Last Traded Price | Price | 8 | From $-2^{63}-1$ to $2^{63}-1$ | Conditional |
| Leg Last Traded Quantity | Leg Last Traded Quantity | Quantity | 8 | From 0 to $2^{64}-2$ | Conditional |
| Leg Instrument ID | Numerical leg instrument identifier (SymbolIndex) valid for the life of the instrument. | Numerical ID | 4 | From 0 to $2^{32}-2$ | Conditional |

5.4.37 RFQ Audit (72)

Client ◀ OEG

Available for: FND FXI

5.4.37.1 Message Description

The **RFQ Audit** (72) message is sent by OEG to the RFQ issuer enabling him to have a summary about all orders and LP answers involved in the RFQ response.

This message is used only for the Cash Markets, it is sent only after the RFQ confirmation and all Fill message reception.

In case the RFQ is not confirmed; because it is expired or cancelled, the RFQAudit message is not sent.

The RFQAudit message generation do not lead to a specific market data publication.

For more details in behaviour and handling on the Cash market clients should review the associated Kinematics in kinematics specification document.

5.4.37.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------|---|-----------------|-----|-------------------------|-----------|
| Message Sequence Number | Indicates the Message Sequence Number per OE Session. (for messages sent by the Exchange) | Sequence | 4 | $0..2^{32}-2$ | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric ID | 8 | (See field description) | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|----------------------------|---|---------------------------|-----|---|-----------|
| Book IN Time | Matching Engine IN time (in ns), time at which the corresponding inbound message entered the Matching Engine. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| Book OUT Time | Matching Engine OUT time (in ns), when message leaves the Matching Engine (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Mandatory |
| OEG IN From ME | Gateway IN time from ME (in ns), measured when outbound message enters the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Mandatory |
| OEG OUT To Member | Order Entry Gateway OUT time to member (in ns), measured when outbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Mandatory |
| QuoteReqID | Numerical RFQ identifier assigned by the matching engine, unique per instrument and EMM. | Numerical ID | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |
| RFQ Counterparts | | Numerical | 1 | 1..50 | Mandatory |
| Order Origin | Indicates the origin of the order | Enumerated | 1 | (See field description) | Optional |
| Order Price | Instrument price per quantity unit (To be calculated with Price/Index Level Decimals). | Price | 8 | -2 ⁶³ +1..2 ⁶³ -1 | optional |
| Last Traded Quantity | The Last Traded Price indicates the price of last fill on an instrument (to be calculated with the Price/Index Decimals). | Price | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Optional |
| Dark Execution Instruction | Field used as instruction for dark order handling. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | 0 = Dark Indicator 1 = Deferred Trade Indicator 2 = Displayed Order Interaction 3 = Sweep Order Indicator 4 = Minimum Quantity Type | Optional |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|------------------------|---|----------|-----|-----------|----------|
| Minimum Order Quantity | Minimum quantity to be executed upon order entry (else the order is rejected), (To be calculated with Quantity Decimals). | Quantity | 8 | 0..2^64-1 | Optional |

5.4.38 Wave For Liquidity (73)

Client ► OEG

Available for: BLK

5.4.38.1 Message Description

Wave For Liquidity (73) message is used by Buy Side to trigger a search for liquidity, onto the Euronext Block MTF, by targeting a specific group of counterparties or several. OEG acknowledges or rejects it with Wave For Liquidity Notification (74).

This message is allowed on the Block segment only and might be sent as:

- An indication of interest – *IOI Transaction Type* set to “New”;
 - All Mandatory fields should be provided with a value different than SBE Null value as well as the conditional that became mandatory depending on what’s provided in other fields, e.g, IOI Qty and Order Quantity;
- Cancellation of a previous indication of interest - *IOI Transaction Type* set to “Cancel”;
 - All Mandatory fields should be provided with a value different than SBE Null value as well as the conditional that became mandatory depending on what’s provided in other fields **plus** the *Original IOI ID* – please note this message should be a reflection of the original request that was submitted (apart from the *IOI ID* and *IOI Transaction Type*) and is now being targeted to be cancelled;
 - Please note that the system identifies uniquely the indication of interest based on Firm ID, Original IOI ID, Symbol Index and EMM. All other fields are ignored (if populated with values that successfully pass the technical checks) for the purpose of cancelling the indication of interest and returned in the acknowledgement message exactly as received. Please note that the counterparties cancellation notifications will contain the information of the original indication of interest or of the indication of interest after the modification.
- Modification of a previous indication of interest - *IOI Transaction Type* set to “Replace”
 - All Mandatory fields should be provided with a value different than SBE Null value as well as the conditional that became mandatory depending on what’s provided in other fields **plus** the *Original IOI ID* – please note this message should be a reflection of the original request that was submitted (apart from the *IOI ID*, *IOI Transaction Type* and the fields being targeted for modification) and is now being targeted to be replaced;
 - Please note it’s possible to modify several fields at the same time, if they are part of the list of fields available for modification – below the list:
 - ◆ IOI Side;
 - ◆ Order Quantity;
 - ◆ IOI Quantity;
 - ◆ IOI Quality Indication;
 - ◆ Any attempt to modify any of the other parameters leads to the rejection of the modification and the original indication of interest remains active;
- **IOI ID Management**
 - Clients must provide an indication of interest id in every inbound application message (*Wave for Liquidity (73)*), otherwise the message will be immediately rejected by the OEG. Clients may provide any value that respects the IOI ID format, which is an 8-byte signed integer. The Exchange recommends setting a unique ID per Indication of Interest, Firm and Symbol Index. For Indication of interest submission, the indication of interest ID value is not checked by the Exchange, it is simply returned in the corresponding outbound message to allow clients to reconcile the response message with their original inbound request. For modification and cancellation using the Original IOI ID as unique identifier, the value is checked by the Exchange for possible duplicates, that would represent different live indications of interest originally

submitted with the same indication of interest id. In case of duplicates, the inbound request is rejected with the associated error code.

- Upon reception of an indication of interest Optiq assigns a unique ID, provided within *Exchange IOI ID* – valid for the lifetime of the indication of interest and used:
 - ◆ To notify counterparties;
 - ◆ As the unique identifier to link the orders submitted by the members (*as a reply to the indication of interest*) to the original indication of interest;

■ Notes

- While attempting to cancel or replace an existing indication of interest the Original IOI ID must be populated with the value provided within the Indication of interest id of the Wave For Liquidity (73) message – if the Original IOI ID specified in the message is not found in the active indication of interest list, the modification is rejected with "Unknown Indication of Interest";
- In case the member submitting the Wave For Liquidity (73) decides to cancel it or modify it:
 - In case no order has yet been submitted as an answer to the indication of interest: counterparties are notified of the indication of interest cancellation;
 - In case one or several orders had already been submitted as an answer to the indication of interest: counterparties are notified of the indication of interest cancellation or modification. Once counterparties receive the notification that the indication of interest was cancelled it's their responsibility to cancel or modify any order they might have previously submitted as a response to that same indication of interest;
- IOI ID: unique ID of the Wave for Liquidity (73), returned by the Exchange in the Wave For Liquidity Notification (74) – unicity of it's not checked by Optiq;
- Original IOI ID: ignored by the system in all cases where IOI Transaction Type is different than "Cancel" or "Replace" - must be filled with the IOI ID provided in the Wave for Liquidity (73) previously sent with IOI Transaction Type set to "New". If provided in other cases, will be ignored, as long as it respects the field technical format – otherwise a rejection will be triggered. In this case ignored means that the value will not be considered for the functional processing of the indication of interest but will be provided back to the member within the Wave For Liquidity Notification (74).
- Target Counterparties: used to identify which counterparties must be notified of the Wave for Liquidity (73) submission – in case all bits are set to zero no notification is sent;
- Side: used to indicate if the Wave for Liquidity submitter intends to Buy or Sell – in case the intention is not to disclose this information, the field must be set to "Undisclosed";
- IOI Quantity: used by the Wave for Liquidity submitter to give a qualitative indication of the "Size" of the Wave for Liquidity (73) – in case it's set to "Undisclosed Qty" then Order Quantity must not be provided. If provided, will be ignored, as long as it respects the field technical format – otherwise a rejection will be triggered. In this case ignored means that the value will not be considered for the functional processing of the indication of interest but will be provided back to the member within the Wave For Liquidity Notification (74).
- Order Quantity: used to specify the volume of the indication of interest – required only when IOI Quantity is different than "Undisclosed Qty". If provided, will be ignored meaning, the value will not be considered for the functional processing of the indication of interest, but will be provided back to the member within the Wave For Liquidity Notification (74).
- IOI Quality Indication: used to provide a qualitative indication of the quality of the indication of interest – No special processing or logic is attached to the field for now – *it's for future use*;
- There is a restriction on the number of indications of interest that can be submitted by a given Firm ID. The maximum number is controlled per Session for the combination of Optiq Segment/EMM/Symbol Index. When the maximum number is reached the Wave For Liquidity (73) is rejected with Wave For Liquidity Notification (74) and the error code "Maximum number of Indication of Interest for the session exceeded".

5.4.38.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------------------------|---|----------|-----|-----------|-----------|
| Client Message Sequence Number | The Client Message Sequence Number is mandatory for all inbound messages, but the consistency of the sequence is not checked by the Exchange. | Sequence | 4 | 0..2^32-2 | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-----------------------|---|---------------------------|-----|--|-------------|
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric I ID | 8 | (See field description) | Mandatory |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -2 | Mandatory |
| IOI ID | An identifier of a message assigned by the Client when submitting an indication of interest to the Exchange. | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Mandatory |
| IOI Transaction Type | Identifies IOI message transaction type | Enumerated | 1 | 1 = New 2 = Cancel 3 = Replace | Mandatory |
| Original IOI ID | Reference identifier used with CANCEL and REPLACE, transaction types. | Numerical ID | 8 | -2 ⁶³ +1..2 ⁶³ -1 | Conditional |
| Target Counterparties | Allows members to specify the targeted counterparties of the submitted indication of interest. | Bitmap | 2 | 0 = Euronext Data Driven 1 = Interest Lists 2 = Holdings 3 = Buy Side 4 = Sell Side 5 = Quality of Sell Side Counterparty 6 = Local Community of Specialist AMS 7 = Local Community of Specialist PAR 8 = Local Community of Specialist BRU 9 = Local Community of Specialist LIS | Mandatory |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | 0..2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |
| IOI Side | Indicates the side of the indication of interest. | Enumerated | 1 | 1 = Buy 2 = Sell 4 = Undisclosed | Mandatory |
| Order Quantity | Total order quantity, per quantity unit. (To be calculated with Quantity Decimals). | Quantity | 8 | 0..2 ⁶⁴ -2 | Conditional |
| IOI Quantity | Indication of the size of the indication of interest. | Enumerated | 1 | 1 = Small 2 = Medium 3 = Large 4 = Undisclosed Qty | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|------------------------|---|------------|-----|-----------------------------------|----------|
| IOI Quality Indication | Relative Quality of the indication of interest. | Enumerated | 1 | 1 = High 2 = Low 3 = Medium | Optional |

5.4.39 Wave For Liquidity Notification (74)

Client ◀ OEG

Available for: BLK

5.4.39.1 Message Description

Wave For Liquidity Notification (74) is issued by Optiq to:

- **Acknowledge** an incoming *Wave for Liquidity (73)* message;
 - ◆ Please note that, in this case, all fields will be provided with a value different than SBE Null Value, except for the *Error Code*;
- **Reject** an incoming *Wave for Liquidity (73)* message;
 - ◆ Please note that, in this case, all fields will be provided with a value different than SBE Null Value – in some specific cases its possible not all OEG timestamps are provided – it depends on the reason of the rejection;
- **Notify:**
 - Counterparties that a given *Wave for Liquidity (73)* message **was submitted** onto the Euronext Block MTF with a given set of characteristics and targeting one or several groups of counterparties to which those members belong;
 - ◆ Please note that, in this case, all fields will be provided with a value different than SBE Null Value except for the *Error Code*;
 - Counterparties that a given *Wave for Liquidity (73)* message, targeting one or several groups of counterparties to which those members belong and previously submitted, **was modified**;
 - ◆ Please note that, in this case, only the following fields will be provided with a value different than SBE Null Value:
 - OEG Timestamps;
 - *IOI ID*;
 - *Original IOI ID*;
 - *IOI Type*;
 - *Symbol Index*;
 - *EMM*;
 - Fields representing the parameters that were modified. Any of the parameters available for modification but not impacted will not be provided;
 - Counterparties that a given *Wave for Liquidity (73)* message, targeting one or several groups of counterparties to which those members belong and previously submitted, **was cancelled**;
 - ◆ Please note that, in this case, only the following fields will be provided with a value different than SBE Null Value:
 - OEG Timestamps;
 - *IOI ID*;
 - *Original IOI ID*: *in case the indication of interest being cancelled had been modified*;
 - *IOI Type*;
 - *Symbol Index*;
 - *EMM*;
 - *IOI Side*;
 - *Order Quantity*: *only for the cases where the indication of interest disclosed the quantity*;
 - Member submitting the indication of interest that a member just **placed an order** as response to his *Wave for Liquidity (73)* message;

- ◆ Please note that, in this case, all fields will be provided with a value different than SBE Null Value, except for the *Error Code*;
 - ◆ Please note the notification will be sent while receiving a conditional order and while receiving a firm order – so notification can be sent 2 times for the same broker;
- In case the message is sent as an acknowledgement the field *IOI Type* is set to '1' (Ack);
 - In case the message is sent to indicate functional rejection, the field *IOI Type* is set to '2' (Reject) and *Error Code* is filled with the reason for the rejection;
 - In case the message is sent to notify counterparties that a *Wave for Liquidity (73)* message was just submitted onto the Euronext Block MTF, *IOI Type* is set to '3' (New IOI Notification);
 - In case the message is sent to notify counterparties that a New Order (01), sent as an answer to a *Wave for Liquidity (73)*, was just successfully accepted by the Euronext Block MTF, *IOI Type* set to '4' (IOI Reply Notification); Please note no notification is issued when the order is modified or even cancelled;
 - In case the message is sent to notify counterparties that a *Wave for Liquidity (73)* message, previously submitted, was just cancelled, *IOI Type* set to '5' (IOI Cancellation Notification);
 - In case the message is sent to notify counterparties that a *Wave for Liquidity (73)* message, previously submitted, was just modified, *IOI Type* set to '6' (IOI Replacement Notification).

5.4.39.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------|--|---------------------------|-----|------------------------------|-------------|
| Message Sequence Number | Indicates the Message Sequence Number per OE Session. (for messages sent by the Exchange) | Sequence | 4 | From 0 to 2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric ID | 8 | (See Field Description) | Conditional |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) Epoch Time in Nanoseconds | Epoch Time in Nanoseconds | 8 | From 0 to 2 ⁶⁴ -1 | Conditional |
| OEG IN From Member | Order Entry Gateway IN time from member (in ns), measured when inbound message enters the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | From 0 to 2 ⁶⁴ -1 | Conditional |
| OEG OUT TO ME | Gateway OUT time to ME (in ns), measured when inbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | From 0 to 2 ⁶⁴ -1 | Conditional |
| Book In Time | Matching Engine IN time (in ns), time at which the corresponding inbound message entered the Matching Engine. (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | From 0 to 2 ⁶⁴ -1 | Conditional |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|------------------------|---|---------------------------|-----|--|-------------|
| Book Out Time | Matching Engine OUT time (in ns), when message leaves the Matching Engine (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | From 0 to 2 ⁶⁴ -1 | Conditional |
| OEG IN From ME | Gateway IN time from ME (in ns), measured when outbound message enters the gateway (Time in number of nanoseconds since 01/01/1970 UTC) | Epoch Time in Nanoseconds | 8 | From 0 to 2 ⁶⁴ -1 | Conditional |
| OEG OUT To Member | Order Entry Gateway OUT time to member (in ns), measured when outbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | From 0 to 2 ⁶⁴ -1 | Conditional |
| IOI ID | Unique identifier of IOI message. | Numerical ID | 8 | From -2 ⁶³ +1 to 2 ⁶³ -1 | Conditional |
| Exchange IOI ID | Unique identifier of IOI message. | Numerical ID | 8 | From -2 ⁶³ +1 to 2 ⁶³ -1 | Conditional |
| IOI Type | Identifies the reason why the Wave for Liquidity Notification (U74) is being sent. | Enumerated | 1 | 1 = Ack 2 = Reject 3 = New IOI Notification 4 = IOI Reply Notification 5 = IOI Cancellation Notification 6 = IOI Replacement Notification | Mandatory |
| Original IOI ID | Reference identifier used with CANCEL and REPLACE, transaction types. | Numerical ID | 8 | From -2 ⁶³ +1 to 2 ⁶³ -1 | Conditional |
| Symbol Index | Exchange identification code of the instrument/contract. | Numerical ID | 4 | From 0 to 2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Conditional |
| IOI Side | Indicates the side of the order. | Enumerated | 1 | 1 = Buy 2 = Sell | Mandatory |
| Order Quantity | Total order quantity, per quantity unit. (To be calculated with Quantity Decimals). | Quantity | 8 | From 0 to 2 ⁶⁴ -2 | Conditional |
| IOI Quantity | Indication of the size of the indication of interest. | Enumerated | 1 | 1 = Small 2 = Medium 3 = Large 4 = Undisclosed Qty | Mandatory |
| IOI Quality Indication | Relative Quality of indication | Enumerated | 1 | 1 = High 2 = Low 3 = Medium | Optional |
| Error Code | Error code in case of rejection. | Numerical ID | 2 | From 0 to 2 ¹⁶ -2 | Conditional |

5.4.40 Clear Book (75)

Client ◀ OEG

Available for: EQ

5.4.40.1 Message Description

Under certain circumstances (Trading Chain Failover for example), Market Operations team will trigger the sending of **Clear Book** (75) message. The **Clear Book** (75) message is sent for each impacted instrument regardless of the presence of orders.

5.4.40.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------|---|---------------------------|-----|------------------------------|-------------|
| Message Sequence Number | Indicates the Message Sequence Number per OE Session. (for messages sent by the Exchange) | Sequence | 4 | From 0 to 2 ³² -2 | Mandatory |
| OEG OUT To Member | Order Entry Gateway OUT time to member (in ns), measured when outbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). | Epoch Time in Nanoseconds | 8 | 0..2 ⁶⁴ -1 | Conditional |
| Symbol Index | Exchange identification code of the instrument. | Numerical ID | 4 | From 0 to 2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Conditional |

5.4.41 Declaration Entry (40)

Client ► OEG

Available for: TCS

5.4.41.1 Message Description

The **Declaration Entry** (40) message is used for the sending of a TCS Declaration.

For Cross orders two instances of fields listed below are provided, to identify the information for each side of the cross order. The description of each field identifies whether the field is to be used for identification of the buy or sell side, but as a general rule fields containing "Cross" in the name, are used for provision of the information for the sell side: *Account Number*, *Account Number Cross*, *Account Type*, *Account Type Cross*, *Free Text*, *Free Text Cross*, *Principal Code*, *Principal Code Cross*, *Trading Capacity*, *Trading Capacity Cross*.

For Cross Orders, Trading Capacity is filled by Members as follows:

- Either in the block of the message via the field *Trading Capacity* when the value of the Trading Capacity on the Buy side is equal to the value of the Trading Capacity on the Sell side.
- OR in the block of the message via the field *Trading Capacity* for the Buy Side and via the field *Trading Capacity Cross* in the second occurrence (the sell side occurrence) when the value of the Trading Capacity on the Buy side is different from the value of the Trading Capacity on the Sell side . As a consequence, the *Trading Capacity Cross* field of the first occurrence is never used and is thus ignored (or rejected in case content is invalid) by the OEG.

Note: The following combinations of Trading Capacity and Trading Capacity Cross values are rejected for Cross orders:

- ◆ DEAL vs. DEAL
- ◆ DEAL vs. MTCH
- ◆ MTCH vs. DEAL
- ◆ MTCH vs. MTCH

5.4.41.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------------------------|---|-----------------|-----|------------------------------|-----------|
| Client Message Sequence Number | The Client Message Sequence Number is mandatory for all inbound messages, but the consistency of the sequence is not checked by the Exchange. | Sequence | 4 | From 0 to 2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric ID | 8 | (See field description) | Mandatory |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | Timestamp | 8 | From 0 to 2 ⁶⁴ -2 | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------------|--|-----------------|-----|----------------------------------|-------------|
| Client Order ID | Clients must provide a Client Order ID in every inbound application message, otherwise the message will be immediately rejected by the OEG. | Numerical ID | 8 | From $-2^{63}+1$ to $2^{63}-1$ | Mandatory |
| Operation Type | Type of Operation. | Enumerated | 1 | (See field description) | Mandatory |
| Symbol Index | Exchange identification code of the instrument. | Numerical ID | 4 | From 0 to $2^{32}-2$ | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |
| Entering Counterparty | Identifies the counterpart of the transaction. | Alphanumeric ID | 8 | (See field description) | Optional |
| Side | Indicates the Executing Side. | Enumerated | 1 | 1 = Buy 2 = Sell 3 = Cross | Mandatory |
| Quantity | Number of traded or ordered units (to be calculated with Quantity Decimals). | Quantity | 8 | From 0 to $2^{64}-2$ | Conditional |
| Price | Price per unit of quantity (to be calculated with the Price/Index Level Decimals). | Price | 8 | From $-2^{63}+1$ to $2^{63}-1$ | Conditional |
| ExecutionWithinFirmShortCode | MiFID II short code, Execution within firm, identifier of the trader or algorithm responsible for the execution making. | Numerical ID | 4 | From $-2^{31}+1$ to $2^{31}-1$ | Mandatory |
| ClientIdentificationShortCode | MiFID II short code, Client identification code. | Numerical ID | 4 | From $-2^{31}+1$ to $2^{31}-1$ | Conditional |
| MIC of Secondary Listing | Identifies the secondary listing place to which an instrument belongs by its MIC (Market Identification Code.), segment MIC according to ISO 10383. | Alphanumeric ID | 4 | (See field description) | Conditional |
| Centralisation Date | Centralisation Date. | Alphanumeric ID | 10 | (See field description) | Optional |
| Clearing Firm ID | Clearing firm ID. | Alphanumeric ID | 8 | (See field description) | Optional |
| Account Type | Indicates the account type for which the order is entered. For example, an order can be entered for a client account, a house account or a liquidity provider account. | Enumerated | 1 | (See field description) | Mandatory |
| Account Type Cross | Indicates the account type for which the sell side of a cross order is entered. | Enumerated | 1 | (See field description) | Conditional |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------------------|--|-----------------|-----|---|-------------|
| Trading Capacity | Indicates whether the order submission results from trading as matched principal, on own account or as any other capacity. | Enumerated | 1 | 1 = Dealing on own account (DEAL) 2 = Matched principal (MTCH) 3 = Any other capacity (AOTC) | Mandatory |
| Trading Capacity Cross | Indicates for the sell side of a cross order whether the order submission results from trading as matched principal, on own account or as any other capacity. | Enumerated | 1 | 1 = Dealing on own account (DEAL) 2 = Matched principal (MTCH) 3 = Any other capacity (AOTC) | Conditional |
| <i>Settlement Period</i> | [N/A] Indicates the settlement delay in trading days, from 0 to 30 days. (TCS is using the Settlement Period defined in the referential at instrument level) | Numerical | 1 | From 0 to 30 | Mandatory |
| Settlement Flag | Indicates whether the declaration must be settled or not. (0: [indicated as False] means "Not Settled" ; 1: [indicated as True] means "Settled") | Boolean | 1 | 0 = False 1 = True | Mandatory |
| Guarantee Flag | Indicates if the trade is guaranteed or not (for clearing purposes). | Enumerated | 1 | 1 = Cleared but not Guaranteed 2 = Cleared and Guaranteed | Mandatory |
| MiFID Indicators | Field used as instruction for order handling. Values indicated (in list of possible values) indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | (See field description) | Mandatory |
| Transaction Price Type | Contribution to price formation or the price discovery process. | Enumerated | 1 | 1 = Plain Vanilla Trade 2 = Non Price Forming Trade (NPFT) 3 = Trade Not Contributing to Price Discovery Process 4 = Dark Trade (For Future Use) | Optional |
| Principal Code | Identifies the beneficiary of the transaction when trading on behalf of another establishment. | Alphanumeric ID | 8 | (See field description) | Optional |
| Principal Code Cross | Identifies the beneficiary of the transaction when trading on behalf of another establishment, for the sell side of a cross order. | Alphanumeric ID | 8 | (See field description) | Optional |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|------------------------------------|--|--------------------------|-----|--|-------------|
| Start Time Vwap | Start time for the Volume Weight Average price computation period (Number of seconds since the beginning of the day – UTC Time). | Intraday Time in Seconds | 4 | From 0 to 2 ³² -2 | Conditional |
| End Time Vwap | End time for the Volume Weight Average price computation period (Number of seconds since the beginning of the day – UTC Time). | Intraday Time in Seconds | 4 | From 0 to 2 ³² -2 | Conditional |
| Gross Trade Amount | Total amount of a Declaration. | Amount | 8 | From -2 ⁶³ +1 to 2 ⁶³ -1 | Conditional |
| Account Number | Account Number. Client account number identifying the investor's account. This field is part of the clearing aggregate. | Alphanumeric ID | 12 | (See field description) | Optional |
| Account Number Cross | Account Number Cross. Client account number identifying the investor's account for the sell side of a cross order. This field is part of the clearing aggregate. | Alphanumeric ID | 12 | (See field description) | Optional |
| Free Text | Free Text is manually entered by the trader issuing the order. This field is part of the clearing aggregate. | Text | 18 | (See field description) | Optional |
| Free Text Cross | Free Text Cross is manually entered by the trader issuing the order in case of a cross order and concerns the sell side. This field is part of the clearing aggregate. | Text | 18 | (See field description) | Optional |
| InvestmentDecisionWFFirmShortCode | MiFID II short code, Investment decision within firm, identifier of the trader or algorithm responsible for the investment decision. | Numerical ID | 4 | From -2 ³¹ to 2 ³¹ -1 | Conditional |
| ClientIdentificationShortCodeCross | MiFID II short code, Client identification code. | Numerical ID | 4 | From -2 ³¹ +1 to 2 ³¹ -1 | Conditional |
| CommercialDeclaration length | Defines the length in bytes of the repeating section 1. | Header | 1 | 0 | Mandatory |
| CommercialDeclaration occurrences | Defines how many times the repeating section 1 is repeated. | Header | 1 | 0 | Mandatory |

5.4.42 Declaration Entry Ack (41)

Client ◀ OEG

Available for: TCS

5.4.42.1 Message Description

The **DeclarationEntryAck** (41) message is sent in response to the **DeclarationEntry** (40) message. This message informs clients of the acknowledgement of positive status of their submission.

5.4.42.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|---------------------------|--|-----------------|-----|--|-------------|
| Message Sequence Number | Indicates the Message Sequence Number per OE Session. (for messages sent by the Exchange) | Sequence | 4 | From 0 to 2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric ID | 8 | (See field description) | Mandatory |
| Declaration ID | Numerical declaration identifier assigned by the Exchange. | Numerical ID | 8 | From 0 to 2 ⁶⁴ -2 | Conditional |
| Client Order ID | Clients must provide a Client Order ID in every inbound application message, otherwise the message will be immediately rejected by the OEG. | Numerical ID | 8 | From -2 ⁶³ +1 to 2 ⁶³ -1 | Mandatory |
| Symbol Index | Exchange identification code of the instrument. | Numerical ID | 4 | From 0 to 2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Conditional |
| MIC of Secondary Listing | Identifies the secondary listing place to which an instrument belongs by its MIC (Market Identification Code.), segment MIC according to ISO 10383. | Alphanumeric ID | 4 | (See field description) | Conditional |
| Operation Type | Type of Operation. | Enumerated | 1 | (See field description) | Mandatory |
| Pre Matching Type | Pre-matching delay indicator for a TCS Declaration. | Enumerated | 1 | (See field description) | Conditional |
| Waiver Indicator | Waiver Indicator. Values indicated (in list of possible values) indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | (See field description) | Conditional |
| OEGTimestamps length | Defines the length in bytes of the repeating section 1. | Header | 1 | 0 | Mandatory |
| OEGTimestamps occurrences | Defines how many times the repeating section 1 is repeated. | Header | 1 | 0 | Mandatory |

5.4.43 Declaration Notice (42)

Client ◀ OEG

Available for: TCS

5.4.43.1 Message Description

The **DeclarationNotice** (42) message is sent to provide the status of a previously submitted declaration to counterparties.

The message is sent as:

- Declaration notification to the counterparty;
- Declaration refusal notice;
- Pre-match Notice;

- Matching Notice;
- Expiration Notice;
- Trade Cancellation Notice.

Please note that the following fields are provided only in case the notice is issued for a Fill or a Pre-Match (*Declaration Status* = '7' or '13') and only to the concerned member if the corresponding necessary values were submitted in the original declaration: *Trade Time, Clearing Firm ID, Account Type, Account Type Cross, Trading Capacity, Trading Capacity Cross, Principal Code, Principal Code Cross, Account Number, Account Number Cross, Free Text, Free Text Cross, Waiver Indicator*.

Trading Venue Transaction Identification Code (TVTIC)

The Trading Venue Transaction Identification Code (TVTIC) is the unique identifier of a trade in the MiFID II framework. Each individual trade has a corresponding TVTIC.

For TCS trades

The different ways to get a TCS trade TVTIC are:

- ◆ Using the public Market Data feed, getting the *Trade Unique Identifier* in the **Full Trade Information** (1004) message;
- ◆ Using the private Order Entry feed, getting the *Trade Unique Identifier* in the SBE **Declaration Notice** (42) message.

5.4.43.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------|---|-----------------|-----|--|-------------|
| Message Sequence Number | Indicates the Message Sequence Number per OE Session. (for messages sent by the Exchange) | Sequence | 4 | From 0 to 2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric ID | 8 | (See field description) | Mandatory |
| Client Order ID | Clients must provide a Client Order ID in every inbound application message, otherwise the message will be immediately rejected by the OEG. | Numerical ID | 8 | From -2 ⁶³ +1 to 2 ⁶³ -1 | Conditional |
| Declaration ID | Numerical declaration identifier assigned by the Exchange. | Numerical ID | 8 | From 0 to 2 ⁶⁴ -2 | Mandatory |
| Declaration Status | Provides status of the Declaration. | Enumerated | 1 | (See field description) | Mandatory |
| Operation Type | Type of Operation. | Enumerated | 1 | (See field description) | Mandatory |
| Symbol Index | Exchange identification code of the instrument. | Numerical ID | 4 | From 0 to 2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |
| Entering Counterparty | Identifies the counterpart of the transaction. | Alphanumeric ID | 8 | (See field description) | Conditional |
| Side | Indicates the Executing Side. | Enumerated | 1 | 1 = Buy 2 = Sell 3 = Cross | Conditional |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------------------|--|-----------------|-----|--|-------------|
| Quantity | Number of traded or ordered units (to be calculated with Quantity Decimals). | Quantity | 8 | From 0 to 2 ⁶⁴ -2 | Conditional |
| Price | Price per unit of quantity (to be calculated with the Price/Index Level Decimals). | Price | 8 | From -2 ⁶³ +1 to 2 ⁶³ -1 | Conditional |
| Pre Matching Type | Pre-matching delay indicator for a TCS Declaration. | Enumerated | 1 | (See field description) | Conditional |
| Trade Time | Time of the trade. | Timestamp | 8 | From 0 to 2 ⁶⁴ -2 | Conditional |
| MIC of Secondary Listing | Identifies the secondary listing place to which an instrument belongs by its MIC (Market Identification Code.), segment MIC according to ISO 10383. | Alphanumeric ID | 4 | (See field description) | Conditional |
| Centralisation Date | Centralisation Date. | Alphanumeric ID | 10 | (See field description) | Optional |
| Clearing Firm ID | Clearing firm ID. | Alphanumeric ID | 8 | (See field description) | Conditional |
| Account Type | Indicates the account type for which the order is entered. For example, an order can be entered for a client account, a house account or a liquidity provider account. | Enumerated | 1 | (See field description) | Conditional |
| Account Type Cross | Indicates the account type for which the sell side of a cross order is entered. | Enumerated | 1 | (See field description) | Conditional |
| Trading Capacity | Indicates whether the order submission results from trading as matched principal, on own account or as any other capacity. | Enumerated | 1 | 1 = Dealing on own account (DEAL) 2 = Matched principal (MTCH) 3 = Any other capacity (AOTC) | Conditional |
| Trading Capacity Cross | Indicates for the sell side of a cross order whether the order submission results from trading as matched principal, on own account or as any other capacity. | Enumerated | 1 | 1 = Dealing on own account (DEAL) 2 = Matched principal (MTCH) 3 = Any other capacity (AOTC) | Conditional |
| Settlement Flag | Indicates whether the declaration must be settled or not. (0: [indicated as False] means "Not Settled" ; 1: [indicated as True] means "Settled") | Boolean | 1 | 0 = False 1 = True | Conditional |
| Settlement Period | [N/A] Indicates the settlement delay in trading days, from 0 to 30 days. (Not relevant anymore, TCS is using the Settlement Period defined in the referential at instrument level) | Numerical | 1 | From 0 to 30 | Conditional |
| Guarantee Flag | Indicates if the trade is guaranteed or not (for clearing purposes). | Enumerated | 1 | 1 = Cleared but not Guaranteed 2 = Cleared and Guaranteed | Conditional |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|------------------------|--|--------------------------|-----|---|-------------|
| Transaction Price Type | Contribution to price formation or the price discovery process. | Enumerated | 1 | 1 = Plain Vanilla Trade 2 = Non Price Forming Trade (NPFT) 3 = Trade Not Contributing to Price Discovery Process 4 = Dark Trade (For Future Use) | Conditional |
| Principal Code | Identifies the beneficiary of the transaction when trading on behalf of another establishment. | Alphanumeric ID | 8 | (See field description) | Conditional |
| Principal Code Cross | Identifies the beneficiary of the transaction when trading on behalf of another establishment, for the sell side of a cross order. | Alphanumeric ID | 8 | (See field description) | Conditional |
| Start Time Vwap | Start time for the Volume Weight Average price computation period (Number of seconds since the beginning of the day – UTC Time). | Intraday Time in Seconds | 4 | From 0 to 2 ³² -2 | Conditional |
| End Time Vwap | End time for the Volume Weight Average price computation period (Number of seconds since the beginning of the day – UTC Time). | Intraday Time in Seconds | 4 | From 0 to 2 ³² -2 | Conditional |
| Gross Trade Amount | Total amount of a Declaration. | Amount | 8 | From -2 ⁶³ +1 to 2 ⁶³ -1 | Conditional |
| Account Number | Account Number. Client account number identifying the investor's account. This field is part of the clearing aggregate. | Alphanumeric ID | 12 | (See field description) | Conditional |
| Account Number Cross | Account Number Cross. Client account number identifying the investor's account for the sell side of a cross order. This field is part of the clearing aggregate. | Alphanumeric ID | 12 | (See field description) | Conditional |
| Free Text | Free Text is manually entered by the trader issuing the order. This field is part of the clearing aggregate. | Text | 18 | (See field description) | Conditional |
| Free Text Cross | Free Text Cross is manually entered by the trader issuing the order in case of a cross order and concerns the sell side. This field is part of the clearing aggregate. | Text | 18 | (See field description) | Conditional |
| Waiver Indicator | Waiver Indicator. Values indicated (in list of possible values) indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. | Bitmap | 1 | (See field description) | Conditional |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-----------------------------------|--|-----------------|-----|--|-------------|
| Previous Day Indicator | Flag indicator whether declaration matched at D or D-1. (0: [indicated as False] means "matched at D" ; 1: [indicated as True] means "matched at D-1") | Boolean | 1 | 0 = False 1 = True | Conditional |
| Miscellaneous Fee Amount | Miscellaneous Fee Value. Total order fees related to the funds share creation or redemption applied by the Asset Manager per order. | Amount | 8 | From -2 ⁶³ +1 to 2 ⁶³ -1 | Conditional |
| CCP ID | ID of the clearing house in case of a CCP clearable transaction | Enumerated | 1 | (See field description) | Conditional |
| Trade Unique Identifier | Alphanumeric code unique, consistent and persistent per ISO10383 segment MIC and per trading day assigned by the trading venue to a transaction. Trade Unique Identifier (TUI) is a field aimed at identifying an individual transaction and used as Trading Venue Transaction Identification Code (TVTIC). This is a unique transaction identification code generated by trading venues and disseminated to both the buying and the selling parties, in accordance with Article 12 of the Commission Delegated Regulation (EU) 2017/580 Regulatory Technical Standards (RTS). | Alphanumeric ID | 16 | (see field description) | Conditional |
| OEGTimestamps length | Defines the length in bytes of the repeating section 1. | Header | 1 | 0 | Mandatory |
| OEGTimestamps occurrences | Defines how many times the repeating section 1 is repeated. | Header | 1 | 0 | Mandatory |
| CommercialDeclaration length | Defines the length in bytes of the repeating section 1. | Header | 1 | 0 | Mandatory |
| CommercialDeclaration occurrences | Defines how many times the repeating section 1 is repeated. | Header | 1 | 0 | Mandatory |

5.4.44 Declaration Cancel and Refusal (43)

Client ► OEG

Available for: TCS

5.4.44.1 Message Description

The **DeclarationCancelandRefusal** (43) message is used to request cancellation of a previously matched declaration, or to refuse a declaration upon declaration notification submitted by the counterparty.

Cancellation of a Declaration previously matched can be sent by either sending the *DeclarationID* with the Declaration ID or either by sending the *TradeUniqueIdentifier* with the Trade Unique Identifier.

Note: Cancellation by Trade Unique Identifier will require *DeclarationID* field to be sent (mandatory field) but in this case the content of the field *DeclarationID* is ignored by Optiq.

5.4.44.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------------------------|--|-----------------|-----|---|-----------|
| Client Message Sequence Number | The Client Message Sequence Number is mandatory for all inbound messages, but the consistency of the sequence is not checked by the Exchange. | Sequence | 4 | From 0 to 2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric ID | 8 | (See field description) | Mandatory |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | Timestamp | 8 | From 0 to 2 ⁶⁴ -2 | Mandatory |
| Client Order ID | Clients must provide a Client Order ID in every inbound application message, otherwise the message will be immediately rejected by the OEG. | Numerical ID | 8 | From -2 ⁶³ +1 to 2 ⁶³ -1 | Mandatory |
| Symbol Index | Exchange identification code of the instrument. | Numerical ID | 4 | From 0 to 2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |
| Declaration ID | Numerical declaration identifier assigned by the Exchange. | Numerical ID | 8 | From 0 to 2 ⁶⁴ -2 | Mandatory |
| Action Type | Provides the request to be performed on an existing declaration, which is identified by its Declaration ID. | Enumerated | 1 | 1 = Declaration Cancellation Request 2 = Declaration Refusal 3 = Trade Cancellation Request | Mandatory |
| Trade Unique Identifier | Alphanumeric code unique, consistent and persistent per ISO10383 segment MIC and per trading day assigned by the trading venue to a transaction. Trade Unique Identifier (TUI) is a field aimed at identifying an individual transaction and used as Trading Venue Transaction Identification Code (TVTIC). This is a unique transaction identification code generated by trading venues and disseminated to both the buying and the selling parties, in accordance with Article 12 of the Commission Delegated Regulation (EU) 2017/580 Regulatory Technical Standards (RTS). | Alphanumeric ID | 16 | (see field description) | Optional |

5.4.45 Fund Price Input (44)

Client ► OEG

Available for: TCS

5.4.45.1 Message Description

The **FundPriceInput** (44) message is used by the Fund Manager to send a price to TCS matching engine used for Fixing and in order to match declaration, when *Operation Type* = '4' or '6'.

5.4.45.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|--------------------------------|--|-------------------|-----|--|-------------|
| Client Message Sequence Number | The Client Message Sequence Number is mandatory for all inbound messages, but the consistency of the sequence is not checked by the Exchange. | Sequence | 4 | From 0 to 2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumerical ID | 8 | (See field description) | Mandatory |
| Message Sending Time | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) | Timestamp | 8 | From 0 to 2 ⁶⁴ -2 | Mandatory |
| Client Order ID | Clients must provide a Client Order ID in every inbound application message, otherwise the message will be immediately rejected by the OEG. | Numerical ID | 8 | From -2 ⁶³ +1 to 2 ⁶³ -1 | Mandatory |
| Symbol Index | Exchange identification code of the instrument. | Numerical ID | 4 | From 0 to 2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |
| Price | Price per unit of quantity (to be calculated with the Price/Index Level Decimals). | Price | 8 | From -2 ⁶³ +1 to 2 ⁶³ -1 | Mandatory |
| Bypass Indicator | Control indicator of the price and quantity. Indicates whether it should bypass the price and quantity controls or not. (0: [indicated as False] means "Control" ; 1:[indicated as True] means "No Control") | Boolean | 1 | 0 = False 1 = True | Conditional |

5.4.46 Fund Price Input Ack (45)

Client ◀ OEG

Available for: TCS

5.4.46.1 Message Description

The **FundPriceInputAck** (45) message is sent to provide the positive acknowledgement of a previously submitted **FundPriceInput** (44) message.

5.4.46.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------|--|-----------------|-----|--|-------------|
| Message Sequence Number | Indicates the Message Sequence Number per OE Session. (for messages sent by the Exchange) | Sequence | 4 | From 0 to 2 ³² -2 | Mandatory |
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric ID | 8 | (See field description) | Mandatory |
| Client Order ID | Clients must provide a Client Order ID in every inbound application message, otherwise the message will be immediately rejected by the OEG. | Numerical ID | 8 | From -2 ⁶³ +1 to 2 ⁶³ -1 | Mandatory |
| Symbol Index | Exchange identification code of the instrument. | Numerical ID | 4 | From 0 to 2 ³² -2 | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Mandatory |
| Price | Price per unit of quantity (to be calculated with the Price/Index Level Decimals). | Price | 8 | From -2 ⁶³ +1 to 2 ⁶³ -1 | Mandatory |
| Bypass Indicator | Control indicator of the price and quantity. Indicates whether it should bypass the price and quantity controls or not. (0: [indicated as False] means "Control" ; 1:[indicated as True] means "No Control") | Boolean | 1 | 0 = False 1 = True | Conditional |

5.4.47 Declaration Entry Reject (46)

Client ◀ OEG

Available for: TCS

5.4.47.1 Message Description

The **DeclarationEntryReject** (46) message is sent in response to the **DeclarationEntry** (40), **DeclarationCancelandRefusal** (43) and **FundPriceInput** (44) messages. This message informs clients if the status of their submission is negative. If message was rejected due to inconsistency of data / presence of multiple fields or conditions checked, the field *Error Code* will indicate only the first instance of inconsistency encountered in the inbound message.

5.4.47.2 Message Structure

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|-------------------------|---|----------|-----|------------------------------|-----------|
| Message Sequence Number | Indicates the Message Sequence Number per OE Session. (for messages sent by the Exchange) | Sequence | 4 | From 0 to 2 ³² -2 | Mandatory |

| FIELD | SHORT DESCRIPTION | FORMAT | LEN | VALUES | PRESENCE |
|---------------------------|---|-----------------|-----|--------------------------------|-------------|
| Firm ID | Identifier of the member firm that sends the message. | Alphanumeric ID | 8 | (See field description) | Mandatory |
| Client Order ID | Clients must provide a Client Order ID in every inbound application message, otherwise the message will be immediately rejected by the OEG. | Numerical ID | 8 | From $-2^{63}+1$ to $2^{63}-1$ | Mandatory |
| Symbol Index | Exchange identification code of the instrument. | Numerical ID | 4 | From 0 to $2^{32}-2$ | Mandatory |
| EMM | Defines the Exchange Market Mechanism applied on each platform. | Enumerated | 1 | (See field description) | Conditional |
| MIC of Secondary Listing | Identifies the secondary listing place to which an instrument belongs by its MIC (Market Identification Code.), segment MIC according to ISO 10383. | Alphanumeric ID | 4 | (See field description) | Conditional |
| Operation Type | Type of Operation. | Enumerated | 1 | (See field description) | Mandatory |
| Error Code | Error code in case of rejection. | Numerical ID | 2 | From 0 to $2^{16}-2$ | Mandatory |
| Rejected Message | [N/A] Deprecated field | Numerical ID | 1 | $0..2^8-1$ | Conditional |
| Rejected Message ID | Provides the ID (Template ID) of the rejected message. | Numerical ID | 2 | $0..2^{16}-1$ | Conditional |
| OEGTimestamps length | Defines the length in bytes of the repeating section 1. | Header | 1 | 0 | Mandatory |
| OEGTimestamps occurrences | Defines how many times the repeating section 1 is repeated. | Header | 1 | 0 | Mandatory |

6. FIELD DESCRIPTION

A

Account Number

| FIELD NAME | ACCOUNT NUMBER |
|-------------|--|
| Description | Account Number. Client's position account ID, identifying the investor's account. This field is part of the clearing aggregate. |
| Format | Alphanumerical ID (character) |
| Length | 12 |
| Used In | New Order (01) Cancel Replace (06) Quotes (08) MM Sign-In (47) New Wholesale Order (64) Cross Order (67) Declaration Entry (40) Declaration Notice (42) |
| Used For | Cash and Derivatives |

Account Number Cross

| FIELD NAME | ACCOUNT NUMBER CROSS |
|-------------|--|
| Description | Account Number Cross. Client account number identifying the investor's account for the sell side of a cross order. This field is part of the clearing aggregate. |
| Format | Alphanumerical ID (character) |
| Length | 12 |
| Used In | Declaration Entry (40) Declaration Notice (42) |
| Used For | TCS (Cash and Derivatives) |

Account Type

| FIELD NAME | ACCOUNT TYPE |
|-----------------|--|
| Description | <p>Indicates the account type for which the order is entered. For example, an order can be entered for a client account, a house account or a liquidity provider account.</p> <p>For Cross orders it specifies the account type for which the buy side of a cross order is entered.</p> <ul style="list-style-type: none"> - Non-LP clients are not allowed to use the type '6' (Liquidity Provider). - Only members acting as Retail Member Organizations (RMO) can send '4' (RO) orders on behalf of their retail clients. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Client 2 = House 4 = RO 5 = Assigned Broker 6 = Liquidity Provider |

| FIELD NAME | ACCOUNT TYPE |
|------------|--|
| | 7 = Related Party 8 = Structured Product Market Maker 14 = Omega Client - Deprecated 15 = Ceres Client - Deprecated |
| Conditions | It is mandatory for every NewOrder (01) messages. In CancelReplace (06) message, if provided the value is ignored. For ETF Access platform, the field is mandatory in Quote Request (10). |
| Used In | New Order (01) Cancel Replace (06) Quotes (08) Quote Ack (09) Mass Cancel (13) Mass Cancel Ack (14) New Wholesale Order (64) Quote Request (10) RFQ Notification (35) Declaration Entry (40) Declaration Notice (42) Cross Order (67) |
| Used For | Cash and Derivatives |

Account Type Cross

| FIELD NAME | ACCOUNT TYPE CROSS |
|-----------------|--|
| Description | Indicates the account type for which the sell side of a cross order is entered. Only for Cross orders. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Client 2 = House 4 = RO 5 = Assigned Broker - Not Applicable 6 = Liquidity Provider 7 = Related Party 8 = Structured Product Market Maker 14 = Omega Client - Deprecated 15 = Ceres Client - Deprecated |
| Conditions | For NewOrder (01) message it is mandatory for Cross orders and it qualifies the Sell side. It must be populated in the second occurrence of this repeating section. For Declaration Entry (40) message it is mandatory when Side is equal to Cross. |
| Used In | New Order (01) Declaration Entry (40) Declaration Notice (42) |
| Used For | Cash |

Ack Phase

| FIELD NAME | ACK PHASE |
|-----------------|---|
| Description | Indicates the trading phase during which the Matching Engine has processed the event that has triggered this Ack (03) message. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Continuous Trading Phase 2 = Call Phase 3 = Halt Phase 4 = Closed Phase 5 = Trading At Last Phase 6 = Reserved 7 = Suspended 8 = Random Uncrossing Phase |
| Used In | Ack (03) |
| Used For | Cash and Derivatives |

Ack Qualifiers

| FIELD NAME | ACK QUALIFIERS |
|-----------------|---|
| Description | <p>Field used to provide additional information on the corresponding order. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions.</p> <ul style="list-style-type: none"> - Dark Indicator: Indicates whether the corresponding order was entered as a dark order or not. (0: LIT ; 1: Dark). For Iceberg Order it indicates whether its undisclosed part is eligible to the Dark pool of liquidity or not. - Queue Indicator: Indicates whether the corresponding inbound message was queued because of throttling or not. (0: No ; 1: Yes) - Request with Client Order ID: Indicates whether the order entry is applied with Client Order ID or not. (0: No; 1: Yes) - Use of Cross Partition: Indicates whether the corresponding message routing is applied in different partition or not. (0: No ; 1: Yes) - Executed Upon Entry: Indicates whether the corresponding entered order generates trade or not. This indicator is on 2 bitmaps: number 6 and 7. (00: Information not provided; 10: No trade generated; 11: Trade generated) |
| Format | Bitmap (unsigned integer 8) |
| Length | 1 |
| Possible Values | 0 = Dark Indicator 1 = Queue Indicator 2 = Request with Client Order ID 3 = Use of Cross Partition 4 = Internal1 5 = Internal2 6 = Execution Upon Entry flag Enabled 7 = Executed Upon Entry flag |
| Used In | Ack (03) Kill (05) Reject (07) Quote Ack (09) |

| FIELD NAME | ACK QUALIFIERS |
|------------|--|
| | Mass Cancel Ack (14) Wholesale Order Ack (65) |
| Used For | Cash and Derivatives |

Ack Type

| FIELD NAME | ACK TYPE |
|-----------------|--|
| Description | Indicates the type of the Ack message |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 0 = New Order Ack 1 = Replace Ack 2 = Order Creation By Market Operations 3 = Stop Triggered Ack 4 = Collar Confirmation Ack (Not used anymore) 5 = Refilled Iceberg Ack 6 = MTL Second Ack 7 = Knock-In By Issuer (KIBI) Ack 8 = Knock-Out By Issuer (KOBI) Ack 9 = Payment After Knock-Out (PAKO) Ack 10 = Price Input Ack 11 = RFQ Ack 12 = Bid Only Ack 13 = Offer Only Ack 14 = Iceberg Transformed to Limit due to Minimum size 15 = Ownership Request Ack 16 = VFU/VFC Triggered Ack 17 = Open Order Request Ack 21 = RFIE Ack 22 = Cross Order Ack 23 = Move Dark to COB – Limit Ack 24 = Move Dark to COB – Market Ack |
| Used In | Ack (03) |
| Used For | Cash and Derivatives |

AFQ Reason

| FIELD NAME | AFQ REASON |
|-----------------|--|
| Description | Reason why the AFQ (33) has been sent. Indicates the reason why the AFQ (33) message has been sent to the Liquidity Provider. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Quote cancelled by the Liquidity Provider 2 = Quote cancelled by Market Control 3 = No quote M minutes before an uncrossing 4 = No quote S seconds before an uncrossing 5 = Quote completely matched |
| Used In | Ask For Quote (33) |

| FIELD NAME | AFQ REASON |
|------------|------------|
| Used For | Cash |

Action Type

| FIELD NAME | ACTION TYPE |
|-----------------|---|
| Description | Provides the request to be performed on an existing declaration, which is identified by its Declaration ID. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Declaration Cancellation Request 2 = Declaration Refusal 3 = Trade Cancellation Request |
| Used In | Declaration Cancel and Refusal (43) |
| Used For | TCS (Cash and Derivatives) |

B

Bid Error Code

| FIELD NAME | BID ERROR CODE |
|-----------------|--|
| Description | Error code returned when quote contains an invalid bid. See Error List for details of error codes |
| Format | Numerical ID (unsigned integer 16) |
| Length | 2 |
| Possible Values | 0..2 ¹⁶ -1 |
| Used In | Quote Ack (09) |
| Used For | Cash and Derivatives |

Bid Order ID

| FIELD NAME | BID ORDER ID |
|-----------------|---|
| Description | Numerical order identifier assigned by the matching engine, unique per instrument and EMM. |
| Format | Numerical ID (unsigned integer 64) |
| Length | 8 |
| Possible Values | 0..2 ⁶⁴ -2 |
| Conditions | Provided only if the Quotes (08) message contains a bid quote. The field Order ID in Fill (04) message sent in case of trade resulting from a matching against a (bulk) Quote is filled with value in Bid Order ID field corresponding to the Bid quote that participated in the trade. |
| Used In | Quote Ack (09) Wholesale Order Ack (65) |
| Used For | Cash and Derivatives |

Bid Price

| FIELD NAME | BID PRICE |
|-------------|--|
| Description | Quote bid price, (To be calculated with Price/Index Level Decimals). |
| Format | Price (signed integer 64) |
| Length | 8 |

| FIELD NAME | BID PRICE |
|-----------------|--|
| Possible Values | $-2^{63}+1..2^{63}-1$ |
| Conditions | In Quotes (08) either Bid Price or Offer Price, or both, must be populated |
| Used In | Quotes (08) |
| Used For | Cash and Derivatives |

Bid Quantity

| FIELD NAME | BID QUANTITY |
|-----------------|---|
| Description | Quote bid quantity, (To be calculated with Quantity Decimals). Cancels a quote if set to zero "0". |
| Format | Quantity (unsigned integer 64) |
| Length | 8 |
| Possible Values | $0..2^{64}-1$ |
| Conditions | In the New Wholesale Order (64) messages submitted by the Initiator the Bid Quantity must be the maximum volume to match in the transaction, and must be provided when the leading side is Buy. |
| Used In | Quotes (08) New Wholesale Order (64) Wholesale Order Ack (65) |
| Used For | Cash and Derivatives |

Book IN Time

| FIELD NAME | BOOK IN TIME |
|-----------------|---|
| Description | Matching Engine IN time (in ns), time at which the corresponding inbound message entered the Matching Engine. (Time in number of nanoseconds since 01/01/1970 UTC) |
| Format | Epoch Time in Nanoseconds (unsigned integer 64) |
| Length | 8 |
| Possible Values | $0..2^{64}-2$ |
| Conditions | In the Ack (03) message it corresponds to the time at which the event generating the Ack (03) entered the matching engine. In the Kill (05) message it corresponds to the time at which the corresponding order has been killed. In the Reject (07) it is provided only in case of a functional rejection, not in case of a technical rejection. In the Trade Bust Notification (19) it corresponds to the trade cancellation time. |
| Used In | Ack (03) Kill (05) Reject (07) Quote Ack (09) Mass Cancel Ack (14) Trade Bust Notification (19) RFQ Notification (35) RFQ Matching Status (36) RFQ LP Matching Status (37) MM Sign-In Ack (48) Security Definition Ack (61) MM Protection Ack (63) Wholesale Order Ack (65) Wave For Liquidity Notification (74) |

| FIELD NAME | BOOK IN TIME |
|------------|----------------------|
| Used For | Cash and Derivatives |

Book OUT Time

| FIELD NAME | BOOK OUT TIME |
|-----------------|---|
| Description | Matching Engine OUT time (in ns), when message leaves the Matching Engine (Time in number of nanoseconds since 01/01/1970 UTC). |
| Format | Epoch Time in Nanoseconds (unsigned integer 64) |
| Length | 8 |
| Possible Values | 0..2 ⁶⁴ -2 |
| Used In | Ack (03) Fill (04) Kill (05) Quote Ack (09) Mass Cancel Ack (14) Trade Bust Notification (19) RFQ Notification (35) RFQ Matching Status (36) RFQ LP Matching Status (37) MM Sign-In Ack (48) Security Definition Ack (61) MM Protection Ack (63) Wholesale Order Ack (65) Wave For Liquidity Notification (74) |
| Used For | Cash and Derivatives |

Breach Action

| FIELD NAME | BREACH ACTION |
|-----------------|--|
| Description | Type of action to trigger when a MM protection limit is breached. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 0 = Ignore 1 = Pull |
| Conditions | In message MM Protection Request (62) must be populated if Request Type is Set or Adjust |
| Used In | MM Protection Request (62) MM Protection Ack (63) |
| Used For | Derivatives |

Breach Status

| FIELD NAME | BREACH STATUS |
|-----------------|---|
| Description | Indicator of whether the MMP has been triggered due to limit breach (0 : Not breached ; 1: Breached) |
| Format | Boolean (unsigned integer 8) |
| Length | 1 |
| Possible Values | 0 = False 1 = True |

| FIELD NAME | BREACH STATUS |
|------------|--|
| Used In | MM Protection Ack (63) |
| Used For | Derivatives |

Breached Collar Price

| FIELD NAME | BREACHED COLLAR PRICE |
|-----------------|--|
| Description | Breached collar price in case of collar rejection. |
| Format | Price (signed integer 64) |
| Length | 8 |
| Possible Values | $-2^{63}+1..2^{63}-1$ |
| Used In | Reject (07) |
| Used For | Derivatives |

Buy Revision Indicator

| FIELD NAME | BUY REVISION INDICATOR |
|-----------------|--|
| Description | Indicates whether the bid quote is a new quote, a replacement of a previous quote or a cancellation. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 0 = New 1 = Replacement 2 = Cancellation |
| Used In | Quote Ack (09) |
| Used For | Cash and Derivatives |

Bypass Indicator

| FIELD NAME | BYPASS INDICATOR |
|-----------------|--|
| Description | Control indicator of the price and quantity. Indicates whether it should bypass the price and quantity controls or not. (0: [indicated as False] means "Control" ; 1:[indicated as True] means "No Control") |
| Format | Boolean |
| Length | 1 |
| Possible Values | 0 = False 1 = True |
| Conditions | For Fund Price Input (44) message, it indicates whether a NAV+/- should be checked against a percentage deviation from the last known NAV+/-. |
| Used In | Fund Price Input (44) Fund Price Input Ack (45) |
| Used For | TCS (Cash and Derivatives) |

C

CCP ID

| FIELD NAME | CCP ID |
|-------------|---------------------|
| Description | Clearing House code |

| FIELD NAME | CCP ID |
|-----------------|--|
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = LCH SA 2 = Bilateral Settlement Traditional Model 3 = LCH Limited 5 = SIX X Clear 6 = EuroCCP 7 = Bilateral Settlement Italian Model 9 = Euronext Clearing |
| Conditions | This field is mandatory when a transaction is cleared by a CCP. |
| Used In | Declaration Notice (42) |
| Used For | TCS (Cash) |

Centralisation Data

| FIELD NAME | CENTRALISATION DATA |
|-------------|--|
| Description | <p>Cut-off for the trading cycle / session on the Euronext Funds Service: Paris is not identified by the fund agent; as such there is no technical cut-off of a trading session set for such funds.</p> <p>Centralisation date may be used by the client to inform the fund agent for which session the declaration should be eligible for, and may be used as a criteria by the fund agent to accept, or not, a declaration.</p> <p>When used, the declaration should be automatically accepted for the following order collection cycle / session if:</p> <ul style="list-style-type: none"> - centralisation date is not specified by the client AND the session has passed its cut-off, OR - centralisation date is specified, and fund agent elects not to acknowledge the declaration during the session identified in the broker's message AND doesn't reject the declaration. <p>Should be provided in binary equivalent of YYYY-MM-DD, where YYYY = 0000-9999, MM = 01-12, DD = 01-31</p> <p>Should be provided for Euronext Funds Service: Paris instruments only.</p> |
| Format | Alphanumerical ID (character) |
| Length | 10 |
| Conditions | In outbound DeclarationNotice (42) message, it is always provided to Null value. |
| Used In | Declaration Entry (40) Declaration Notice (42) |
| Used For | TCS (Cash and Derivatives) |

Clearing Firm ID

| FIELD NAME | CLEARING FIRM ID |
|-------------|--|
| Description | <p>Clearing firm ID.</p> <p>Identifier of the give-up firm when a give-up is executed (a give-up is a trade executed by a firm for the client of another firm, the latter being referred to as the give-up firm).</p> |
| Format | Alphanumerical ID (character) |
| Length | 8 |
| Used In | New Order (01) Cancel Replace (06) Quotes (08) New Wholesale Order (64) Cross Order (67) Declaration Entry (40) |

| FIELD NAME | CLEARING FIRM ID |
|------------|---|
| | Declaration Notice (42) |
| Used For | Cash and Derivatives |

Clearing Instruction

| FIELD NAME | CLEARING INSTRUCTION |
|-----------------|--|
| Description | <p>Clearing Instruction.</p> <p>Indicates the pre-posting and give-up action to be taken by the clearing system when a trade has occurred.</p> <ul style="list-style-type: none"> ■ Process normally ■ Manual mode (pre-posting and/or pre-give up) ■ Automatic posting mode (trade posting to the position account number specified) ■ Automatic give-up mode (trade give-up to the give-up destination number specified) [C] |
| Format | Enumerated (unsigned integer 16) |
| Length | 2 |
| Possible Values | <p>0 Process normally (formerly Systematic posting)</p> <p>8 Manual mode</p> <p>9 Automatic posting mode</p> <p>10 Automatic give-up mode</p> <p>4008 Automatic and account authorization- Deprecated</p> <p>4009 Manual and account authorization- Deprecated</p> <p>4010 Give-up to single firm- Deprecated</p> |
| Used In | <p>New Order (01)</p> <p>Cancel Replace (06)</p> <p>Quotes (08)</p> <p>New Wholesale Order (64)</p> <p>Cross Order (67)</p> |
| Used For | Cash and Derivatives |

Client ID

| FIELD NAME | CLIENT ID |
|-------------|---|
| Description | Field used to identify the client (investor). This field is part of the clearing aggregate |
| Format | Alphanumerical ID (character) |
| Length | 8 |
| Used In | <p>New Order (01)</p> <p>Cancel Replace (06)</p> <p>Quotes (08)</p> <p>New Wholesale Order (64)</p> <p>Cross Order (67)</p> |
| Conditions | If the field Client ID is provided in the NewOrder (01) or Cancel Replace (06) message for the Derivatives markets the message will be rejected. |
| Used For | Cash and Derivatives |

Client Message Sequence Number

| FIELD NAME | CLIENT MESSAGE SEQUENCE NUMBER |
|-------------|---|
| Description | The Client Message Sequence Number is mandatory for all inbound messages, but the consistency of the sequence is not checked by the Exchange. |

| FIELD NAME | CLIENT MESSAGE SEQUENCE NUMBER |
|-----------------|--|
| Format | Sequence (unsigned integer 32) |
| Length | 4 |
| Possible Values | 0..2 ³² -2 |
| Used In | New Order (01) Quotes (08) Request For Implied Execution (66) Cross Order (67) Wave For Liquidity (73) Declaration Entry (40) Declaration Cancel and Refusal (43) Fund Price Input (44) |
| Used For | Cash and Derivatives |

Client Order ID

| FIELD NAME | CLIENT ORDER ID |
|-----------------|---|
| Description | <p>An identifier of a message assigned by the Client when submitting an order to the Exchange. Clients must provide a Client Order ID in every inbound application message, otherwise the message will be immediately rejected by the OEG.</p> <p>Clients may provide any value that respects the Client Order ID format, which is an 8-byte signed integer, and the ranges as defined according to their access. The Exchange recommends setting a unique ID per order, Firm and Symbol Index.</p> <p>For order entry, the Client Order ID value is not checked by the Exchange, it is simply returned in the corresponding outbound message to allow clients to reconcile the response message with their original inbound request.</p> <p>For modification and cancellation using the Original Client Order ID as unique identifier, the value is checked by the Exchange for possible duplicates, i.e. different orders submitted with the same Client Order ID. In case of duplication, the inbound request is rejected with the according error code.</p> |
| Format | Numerical ID (signed integer 64) |
| Length | 8 |
| Possible Values | -2 ⁶³ +1..2 ⁶³ -1 |
| Conditions | <p>In inbound application messages, this field is always mandatory.</p> <p>In outbound application messages, this field is provided for solicited messages and not provided (null value) for unsolicited messages.</p> <p>For the Fill (04) message, it is always set to the null value.</p> <p>For Reject (07) message:</p> <ul style="list-style-type: none"> - If message is sent due to breach of collars, as in that case there is an Ack (03) message before, the Client Order ID is set to null in the Reject (07); - In all other cases the Client Order ID is populated in the Reject (07). |
| Used In | New Order (01) Ack (03) Fill (04) Kill (05) Cancel Replace (06) Reject (07) Quotes (08) Quote Ack (09) Quote Request (10) Cancel Request (12) |

| FIELD NAME | CLIENT ORDER ID |
|------------|---|
| | Mass Cancel (13) Mass Cancel Ack (14) Open Order Request (15) Ownership Request Ack (17) Ownership Request (18) Price Input (28) Liquidity Provider Command (32) MM Sign-In (47) MM Sign-In Ack (48) MM Protection Request (62) MM Protection Ack (63) New Wholesale Order (64) Wholesale Order Ack (65) Request For Implied Execution (66) Cross Order (67) Declaration Entry (40) Declaration Entry Ack (41) Declaration Notice (42) Declaration Cancel and Refusal (43) Fund Price Input (44) Fund Price Input Ack (45) Declaration Entry Reject (46) |
| Used For | Cash and Derivatives |

ClientIdentificationShortCode

| FIELD NAME | CLIENTIDENTIFICATIONSHORTCODE |
|-----------------|--|
| Description | <p>MiFID II short code, Client identification code.</p> <p>ESMA description of the field:</p> <p>Code used to identify the client of the member or participant of the trading venue. In case of DEA, the code of the DEA user should be provided.</p> <p>Where the client is a legal entity, the LEI code of the client shall be used.</p> <p>Where the client is not a legal entity, the {NATIONAL_ID} shall be used.</p> <p>In the case of aggregated orders, the flag AGGR shall be used.</p> <p>In case of pending allocations, the flag PNAL shall be used.</p> <p>This field shall be left blank only if the member or participant of the trading venue has no client.</p> |
| Format | Numerical ID (signed integer 32) |
| Length | 4 |
| Possible Values | $-2^{31}+1..2^{31}-1$ |
| Conditions | <p>This field is required for DEA User in every inbound message, and when Account Type = Client.</p> <p>Provided in the User Notification (39) message, if User Status concerns a DEA to identify it.</p> <p>To indicate value of AGGR, "1" shall be used.</p> <p>To indicate value of PNAL, "2" shall be used.</p> |
| Used In | New Order (01) Ack (03) Fill (04) Kill (05) Cancel Replace (06) |

| FIELD NAME | CLIENTIDENTIFICATIONSHORTCODE |
|------------|---|
| | Reject (07) Quotes (08) Quote Request (10) Cancel Request (12) Mass Cancel (13) Mass Cancel Ack (14) Open Order Request (15) Ownership Request (18) Price Input (28) Liquidity Provider Command (32) User Notification (39) New Wholesale Order (64) Wholesale Order Ack (65) Request For Implied Execution (66) Cross Order (67) Declaration Entry (40) |
| Used For | Cash and Derivatives |

ClientIdentificationShortCodeCross

| FIELD NAME | CLIENTIDENTIFICATIONSHORTCODECROSS |
|-----------------|--|
| Description | <p>MiFID II short code, Client identification code.</p> <p>ESMA description of the field:</p> <p>Code used to identify the client of the member or participant of the trading venue. In case of DEA, the code of the DEA user should be provided.</p> <p>Where the client is a legal entity, the LEI code of the client shall be used.</p> <p>Where the client is not a legal entity, the {NATIONAL_ID} shall be used.</p> <p>In the case of aggregated orders, the flag AGGR shall be used.</p> <p>In case of pending allocations, the flag PNAL shall be used.</p> |
| Format | Numerical ID (signed integer 32) |
| Length | 4 |
| Possible Values | $-2^{31}+1..2^{31}-1$ |
| Conditions | <p>This field is required for DEA User in every inbound message.</p> <p>To indicate value of AGGR, "1" shall be used.</p> <p>To indicate value of PNAL, "2" shall be used.</p> <p>For the inbound Declaration Entry (40) message it is to be provided when Side is equal to Cross and if the cross order is being submitted to cover orders of two different clients.</p> |
| Used In | Declaration Entry (40) |
| Used For | TCS (Cash and Derivatives) |

Collar Rejection Type

| FIELD NAME | COLLAR REJECTION TYPE |
|-----------------|--|
| Description | Hit collar type (high or low) in case of order rejection due to collar breach. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Low dynamic collar 2 = High dynamic collar |

| FIELD NAME | COLLAR REJECTION TYPE |
|------------|---|
| Conditions | This field is not populated when Reject (07) message is sent in cases of rejection that do not involve collars (e.g. for rejection of creation of strategies) |
| Used In | Reject (07) |
| Used For | Derivatives |

Contract ID

| FIELD NAME | CONTRACT ID |
|-----------------|--|
| Description | Identifier of a derivatives contract (Symbol Index). |
| Format | Alphanumerical ID (unsigned integer 32) |
| Length | 4 |
| Possible Values | 0..2 ³² -2 |
| Used In | Mass Cancel (13) Mass Cancel Ack (14) |
| Used For | Derivatives |

Contract Symbol Index

| FIELD NAME | CONTRACT SYMBOL INDEX |
|-----------------|--|
| Description | Exchange identification code of the Contract. The correspondence of the Contract Symbol Index and its characteristics is provided in the standing data messages and associated files. Symbol Index is valid for the life of the Contract. |
| Format | Numerical ID (unsigned integer 32) |
| Length | 4 |
| Possible Values | 0..2 ³² -2 |
| Used In | Security Definition Request (60) New Wholesale Order (64) Wholesale Order Ack (65) |
| Used For | Derivatives |

Counterpart Firm ID

| FIELD NAME | COUNTERPART FIRM ID |
|-------------|---|
| Description | <p>ID of the clearing house in case of a CCP clearable transaction – also in the specific case of Internal Matching Service (IMS) with clearing :</p> <ul style="list-style-type: none"> '1 ' : LCH SA '2 ' : Bilateral Settlement '3 ' : LCH Limited '5 ' : SIX x-clear '6 ' : EuroCCP '9 ' : Euronext Clearing <p>ID of the Counterpart Firm in specific cases described below.</p> <p>The counterpart identifier is provided in the Fill (04) message in case the notified trade is the result of:</p> <ul style="list-style-type: none"> ■ the Internal Matching Service (IMS) without clearing, ■ a transaction performed on the Public Auctions Market (VPU), ■ a transaction performed on a non-clearable instrument, ■ a transaction performed under a Bilateral Settlement agreement. ■ This field is left aligned blank padded and not null padded (as the other alphanumerical fields). |

| FIELD NAME | COUNTERPART FIRM ID |
|------------|---|
| Format | Alphanumerical ID (character) |
| Length | 8 |
| Conditions | Provided in the Fill (04) message in case the trade is the result of one of the cases listed above. Else not provided. |
| Used In | Fill (04) RFQ Notification (35) |
| Used For | Cash |

Current MMP Position

| FIELD NAME | CURRENT MMP POSITION |
|-----------------|--|
| Description | Current (Delta or Volume) position for MMP monitoring. |
| Format | Quantity (signed integer 64) |
| Length | 8 |
| Possible Values | $-2^{63}+1..2^{63}-1$ |
| Used In | MM Protection Ack (63) |
| Used For | Derivatives |

D

Dark Execution Instruction

| FIELD NAME | DARK EXECUTION INSTRUCTION |
|-----------------|--|
| Description | Field used as instruction for dark order handling. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions. <ul style="list-style-type: none"> - Dark Indicator: indicates whether the client requests its order to benefit from LIS Pre-Transparency waiver to match in the Dark. (0: No ; 1: Yes) - Sweep Order Indicator: indicates whether the client requests his order to sweep between both lit and the hidden pool of liquidity (Dark). (0: No ; 1: Yes) - Minimum Quantity Type: indicates whether the Minimum Quantity for a dark order is MES or MAQ. (0: MAQ ; 1: MES) - Dark STP Indicator: indicates whether the STP mechanism is enabled on Dark Book or not. (0: Dark STP disabled; 1: Dark STP enabled). |
| Format | Bitmap (unsigned integer 8) |
| Length | 1 |
| Possible Values | <ul style="list-style-type: none"> 0 = Dark Indicator 1 = Deferred Trade Indicator - Deprecated 2 = Displayed Order Interaction - Deprecated 3 = Sweep Order Indicator 4 = Minimum Quantity Type 5 = Dark STP Indicator |
| Conditions | On ETF MTF: Value 0: No is mandatory for the position 3 (Sweep Order Indicator) for any type of LIT order sent by the client. |
| Used In | New Order (01) Cancel Replace (06) Quote Request (10) |

| FIELD NAME | DARK EXECUTION INSTRUCTION |
|------------|---|
| | RFQ Audit (72) RFQ Notification (35) |
| Used For | Cash |

Declaration ID

| FIELD NAME | DECLARATION ID |
|-----------------|--|
| Description | Numerical declaration identifier assigned by the Exchange. |
| Format | Numerical ID (unsigned integer 64) |
| Length | 8 |
| Possible Values | From 0 to 2 ⁶⁴ -2 |
| Conditions | In the Declaration Entry Ack (42) message it provides the identifier of the declaration. In the Declaration Notice (41) message it provides the identifier of the declaration. In Declaration Cancel Refusal (43) it provides the ID of the declaration refused/to be cancelled. |
| Used In | Declaration Entry Ack (41) Declaration Notice (42) Declaration Cancel and Refusal (43) |
| Used For | TCS (Cash and Derivatives) |

Declaration Status

| FIELD NAME | DECLARATION STATUS |
|-----------------|--|
| Description | Provides status of the Declaration. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = New Waiting for Counterparty Confirmation 2 = Confirmed by Counterparty 3 = Refused by Counterparty 4 = Pending Cancellation 5 = Cancelled 6 = Time Out 7 = Filled 8 = Restated 9 = Expiration of a pending declaration 10 = Elimination of a pending declaration 11 = Elimination of a pre-matched declaration following a CE 12 = Elimination of a pre-matched declaration by MOC 13 = Pre-Matched |
| Used In | Declaration Notice (42) |
| Used For | TCS (Cash and Derivatives) |

Disclosed Quantity

| FIELD NAME | DISCLOSED QUANTITY |
|-------------|--|
| Description | Maximum number of quantity units to be shown to market participants (Iceberg Order). (To be calculated with Quantity Decimals) |

| FIELD NAME | DISCLOSED QUANTITY |
|-----------------|---|
| Format | Quantity (unsigned integer 64) |
| Length | 8 |
| Possible Values | 0..2 ⁶⁴ -2 |
| Conditions | The Disclosed Quantity is mandatory for Iceberg orders. Disclosed quantity should be multiple of the instrument's lot size; otherwise the order will be rejected. |
| Used In | New Order (01) Cancel Replace (06) |
| Used For | Cash |

E

EMM

| FIELD NAME | EMM |
|-----------------|--|
| Description | <p>Defines the Exchange Market Mechanism applied on each platform.</p> <p>On Optiq Derivatives, one Symbol Index (ISIN/MIC/Currency) may have several order books (i.e. COB, Wholesale, Derivatives On Exchange Off Book), each one identified by a dedicated <i>Exchange Market Mechanism</i>. The EMM represents an order book for a Symbol Index. It is specified in the order entry message in addition to the Symbol Index to route the message to the right order book.</p> <p>In the Reject (07) message:</p> <ul style="list-style-type: none"> ■ Populated only if provided as a valid value in the corresponding Inbound request AND the corresponding Inbound request was technically correctly formatted; otherwise it is provided at the Null value. ■ Not populated for rejection of strategy creation on derivative markets. <p>In the Mass Cancel (13) message, it is mandatory when Symbol Index is provided and optional when Instrument Group Code is provided.</p> |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | <p>1 = Cash and Derivative Central Order Book (COB)</p> <p>2 = NAV Trading Facility</p> <p>4 = Derivative Wholesales</p> <p>5 = Cash On Exchange Off book</p> <p>6 = Euronext off-exchange trade reports</p> <p>7 = Derivative On Exchange Off book</p> <p>8 = ETF MTF - NAV Central Order Book</p> <p>9 = Listed-not traded</p> <p>15 = Delta Neutral Contingency leg</p> <p>99 = Not Applicable (For indices and iNAV)</p> |
| Conditions | <p>In TCS messages only possible values are '2' = NAV Trading Facility and '5' = Cash On Exchange Off book. Field not populated in Reject (07) messages for rejection of strategy creation on derivatives markets.</p> <p>In the Reject (07) message, it is populated only if provided as a valid value in the corresponding Inbound request AND the corresponding Inbound request was technically correctly formatted; otherwise it is provided at the Null value.</p> <p>In the Mass Cancel (13) message, it is mandatory when Symbol Index is provided and optional when Instrument Group Code is provided.</p> <p>In the Quotes (08), MM Sign-in (47) and MM Protection Request (62) messages the only possible value is '1' = Cash and Derivative Central Order Book (COB).</p> |
| Used In | New Order (01) Ack (03) |

| FIELD NAME | EMM |
|------------|---|
| | Fill (04) Kill (05) Cancel Replace (06) Reject (07) Quotes (08) Quote Ack (09) Quote Request (10) Cancel Request (12) Mass Cancel (13) Mass Cancel Ack (14) Open Order Request (15) Ownership Request (18) Trade Bust Notification (19) Price Input (28) Liquidity Provider Command (32) Ask For Quote (33) Request For Execution (34) RFQ Notification (35) RFQ Matching Status (36) RFQ LP Matching Status (37) MM Sign-In (47) MM Sign-In Ack (48) Instrument Synchronization List (50) MM Protection Request (62) MM Protection Ack (63) Request For Implied Execution (66) Cross Order (67) Wave For Liquidity (73) Wave For Liquidity Notification (74) Clear Book (75) Declaration Entry (40) Declaration Entry Ack (41) Declaration Notice (42) Declaration Cancel and Refusal (43) Fund Price Input (44) Fund Price Input Ack (45) Declaration Entry Reject (46) |
| Used For | Cash and Derivatives |

End Client

| FIELD NAME | END CLIENT |
|-------------|--|
| Description | [N/A] Optional field the client may use to provide the BIC of the End Client of the RFQ. |
| Format | Alphanumerical ID (character) |
| Length | 11 |
| Used In | Quote Request (10) RFQ Notification (35) |
| Used For | Cash |

End Time Vwap

| FIELD NAME | END TIME VWAP |
|-------------|---|
| Description | End time for the Volume Weight Average price computation period (Number of seconds since the beginning of the day – UTC Time). |
| Format | Intraday Time in Seconds (unsigned integer 32) |
| Length | 4 |
| Conditions | For Declaration Entry (40) message, it is mandatory for declarations when Operation Type = '5' ; and if not provided it is assumed that the VWAP calculation period lasts until the end of the trading session. |
| Used In | Declaration Entry (40) Declaration Notice (42) |
| Used For | TCS (Cash) |

Entering Counterparty

| FIELD NAME | ENTERING COUNTERPARTY |
|-------------|---|
| Description | Identifies the counterpart of the transaction. Clients may provide a Member ID or an Euronext Member ID. |
| Format | Alphanumerical ID (character) |
| Length | 8 |
| Used In | Declaration Entry (40) Declaration Notice (42) |
| Used For | TCS |

Error Code

| FIELD NAME | ERROR CODE |
|-----------------|--|
| Description | Error code in case of rejection. Provides the return error code when a request is rejected for a functional or a technical reason. |
| Format | Numerical ID (unsigned integer 16) |
| Length | 2 |
| Possible Values | 0..2 ¹⁶ -2 |
| Used In | Reject (07) Technical Reject (108) Wholesale Order Ack (65) Wave For Liquidity Notification (74) Declaration Entry Reject (46) |
| Used For | Cash and Derivatives |

ESCBMembership

| FIELD NAME | ESCBMEMBERSHIP |
|-----------------|--|
| Description | Indicates if the trade is submitted by a member of the European System of Central Bank (ESCB) in performance of monetary, foreign exchange and financial stability policy. |
| Format | Boolean (unsigned integer 8) |
| Length | 1 |
| Possible Values | 0 = False 1 = True |

| FIELD NAME | ESCBMEMBERSHIP |
|------------|---|
| Used In | Fill (04) New Wholesale Order (64) Wholesale Order Ack (65) |
| Used For | Derivatives |

Evaluated Price

| FIELD NAME | EVALUATED PRICE |
|-----------------|--|
| Description | This field is used for the Total Return Future (TRF) and Market On Close (MOC) contracts to provide the trade price calculated against provisional (a.k.a. preliminary) or final price of the underlying index or stock, while Last Traded Price provides price in Spread (in basis or index points). The value in field Trade Type allows to identify if the trade message contains provisional or final price. |
| Format | Price (signed integer 64) |
| Length | 8 |
| Possible Values | From $-2^{63}-1$ to $2^{63}-1$ |
| Conditions | Used only for Total Return Future and Market On Close Future trading |
| Used In | Fill (04) |
| User For | Derivatives |

Exchange ID

| FIELD NAME | EXCHANGE ID |
|-------------|---|
| Description | Identifies the exchange in the Logon process |
| Format | Text (character) |
| Length | 8 |
| Conditions | The field “Exchange ID” should be populated by the client with value “EURONEXT” in all environments. This value is also provided back to the client in this field in the outbound messages. |
| Used In | Logon Ack (101) Logon Reject (102) |
| Used For | Cash and Derivatives |

Execution ID

| FIELD NAME | EXECUTION ID |
|-----------------|---|
| Description | The Execution ID is unique per instrument and per day. It is the unique identifier of a trade per instrument. This field is provided in case of fill, partial fill or trade cancellation. For example, let x be the reference identifier of a given trade, x is reported in the two Fill (2) messages generated for the both sides of the trade. x will also be used as reference for this trade in the Drop Copy feed. And if this trade is cancelled, x is again reported in the Trade Bust Notification (19) messages sent for the 2 sides of the trade. |
| Format | Numerical ID (unsigned integer 32) |
| Length | 4 |
| Possible Values | $0..2^{32}-2$ |
| Conditions | For trades on a strategy, in Fill (04) messages, the Execution ID field in the Block of the message contains the execution for the Strategy, and in the repeating group this field contains the Execution ID of the individual strategy leg (i.e. the outright). |

| FIELD NAME | EXECUTION ID |
|------------|---|
| Used In | Fill (04) Trade Bust Notification (19) |
| Used For | Cash and Derivatives |

Execution Instruction

| FIELD NAME | EXECUTION INSTRUCTION |
|-----------------|---|
| Description | <p>Field used as instruction for order handling. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions.</p> <ul style="list-style-type: none"> - STP resting order: indicates whether the STP mechanism is “Cancel resting order” or not. (0: STP Resting Order mechanism deactivated ; 1: STP Resting Order mechanism activated) - STP incoming order: indicates whether the STP mechanism is “Cancel incoming order” or not. (0: STP Incoming Order mechanism deactivated ; 1: STP Incoming Order mechanism activated) - Disclosed Quantity Randomization: indicates whether the client requests or not a randomization for the disclosed quantity of his iceberg order. (0: No ; 1: Yes). To be set to ‘0’ on RFQ Market Model. - Disabled Cancel On Disconnect Indicator: indicates whether the client sets his order to be persisted (is not in scope of the Cancel On Disconnect mechanism) or not. (0: Cancel on Disconnect enabled ; 1: Cancel on Disconnect disabled) - RFQ answer: indicates whether the message is an answer to a Quote Request (10) message or not. (0: No ; 1: Yes) - RFQ confirmation: indicates whether the message is a confirmation of a Quote Request (10) message or not. (0: No ; 1: Yes) - Conditional order: indicates for Block segment whether the order is conditional or not. (0: Firm Order ; 1: Conditional Order) - STP both orders: indicates whether the STP mechanism is “cancel both orders” or not. (0: STP Both Orders mechanism deactivated ; 1: STP Both Orders mechanism activated) |
| Format | Bitmap (unsigned integer 8) |
| Length | 1 |
| Possible Values | <p>0 = STP resting order</p> <p>1 = STP incoming order</p> <p>2 = Disclosed Quantity Randomization</p> <p>3 = Disabled Cancel On Disconnect Indicator</p> <p>4 = RFQ Answer</p> <p>5 = RFQ Confirmation</p> <p>6 = Conditional Order</p> <p>7 = STP both orders</p> |
| Conditions | For the Quotes (08) message on the Derivatives markets, only bits 0, 1, 3 and 7 are applicable. All other bits should be set to zero in all cases. |
| Used In | New Order (01) Cancel Replace (06) Quotes (08) |
| Used For | Cash and Derivatives |

Execution Phase

| FIELD NAME | EXECUTION PHASE |
|-------------|--|
| Description | Indicates the trading phase during which the trade has occurred. |
| Format | Enumerated (unsigned integer 8) |

| FIELD NAME | EXECUTION PHASE |
|-----------------|---|
| Length | 1 |
| Possible Values | 1 = Continuous Trading Phase 2 = Uncrossing Phase 3 = Trading At Last Phase 4 = Continuous Uncrossing Phase 5 = IPO |
| Used In | Fill (04) |
| Used For | Cash and Derivatives |

ExecutionWithinFirmShortCode

| FIELD NAME | EXECUTIONWITHINFIRMSHORTCODE |
|-----------------|--|
| Description | <p>MiFID II short code, Execution within firm, identifier of the trader or algorithm responsible for the execution making.</p> <p>ESMA description of the field:</p> <p>Code used to identify the person (trader) or algorithm within the member or participant of the trading venue who is responsible for the execution of the transaction resulting from the order.</p> <p>Where a natural person is responsible for the execution of the transaction, the person shall be identified by {NATIONAL_ID}</p> <p>Where an algorithm is responsible for the execution of the transaction, this field shall be populated in accordance with Article 9 of [RTS 22 on transaction reporting under Article 26 of Regulation (EU) No 600/2014]</p> <p>Where more than one person or a combination of persons and algorithms are involved in the execution of the transaction, the member or participant or client of the trading venue shall determine the trader or algorithm primarily responsible as specified in Article 9(4) of [RTS on trading obligations under Article 26 of Regulation (EU) No 600/2014] and populate this field with the identity of that trader or algorithm.</p> <p>To indicate 'NORE', value "3" shall be used.</p> |
| Format | Numerical ID (signed integer 32) |
| Length | 4 |
| Possible Values | $-2^{31}+1..2^{31}-1$ |
| Conditions | <p>This field is mandatory for every application inbound messages.</p> <p>Always provided in outbound messages Ack (03), Fill (04), Kill (05), MassCancelAck (14) and Reject (07) for the Derivatives segments.</p> <p>Provided in the User Notification (39) message, if User Status concerns a Trader or an Algo to identify it.</p> <p>Guideline for algorithm associated values: When an order message is flagged with the ExecutionAlgoIndicator (position 2) in the MiFID Indicators field set to value "0: No algorithm" involved then all positive values (from 0 to $2^{63}-1$) would represent a human trader.</p> <p>If the indicator is set to "1: Algorithm involved" clients are requested to populate this field with the ranges of values identified below. No technical checks would be performed to validate correctness of the ranges used</p> <ul style="list-style-type: none"> - In-house algorithms with positive range of values between 0 to $2^{31}-1$ - ISV algorithms : negative range of values between $-2^{31}+1$ to -1 |
| Used In | New Order (01) Ack (03) Fill (04) Kill (05) Cancel Replace (06) Reject (07) Quotes (08) Quote Ack (09) |

Exchange IOI ID

| FIELD NAME | EXCHANGE IOI ID |
|-----------------|---|
| Description | Unique identifier of Wave For Liquidity message, assigned by the Exchange. |
| Format | Numerical ID (signed integer 64) |
| Length | 8 |
| Possible Values | $-2^{63}+1..2^{63}-1$ |
| Conditions | Populated with a value different than SBE Null Value when Wave For Liquidity Notification (74) is sent: <ul style="list-style-type: none"> - to acknowledge the Wave For Liquidity (73); - to reject, due to functional reasons, the Wave For Liquidity (73); - to notify counterparties that a new indication of interest was submitted; - to notify the submitter of the indication of interest that an order was placed as an answer to his indication of interest; - to notify counterparties that an existing indication of interest was cancelled; - to notify counterparties that an existing indication of interest was modified; |
| Used In | Wave For Liquidity Notification (74) |
| Used For | Cash |

Exposure Side

| FIELD NAME | EXPOSURE SIDE |
|-----------------|---|
| Description | Indicates the side of the exposure. This field must always be populated for Derivatives and not be sent for Cash. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Buy 2 = Sell |

| FIELD NAME | EXPOSURE SIDE |
|------------|---|
| Conditions | For User status related to MEP: when value is “35 = MEP Activated by Risk Manager, 36 = MEP Deactivated by Risk Manager” Exposure Side field is never populated with a value different than SBE Null Value. For User status not related to MEP: Exposure Side field is never populated with a value different than SBE Null Value. |
| Used In | User Notification (39) |
| Used For | Derivatives |

F

Family ID

| FIELD NAME | FAMILY ID |
|-------------|---|
| Description | Identifier of the family. (For Future Use) |
| Format | Alphanumerical ID (character) |
| Length | 8 |
| Conditions | If provided in the User Notification (39) message, it specifies the scope of the action specified in User Status. |
| Used In | User Notification (39) |
| Used For | Cash and Derivatives |

Final Execution ID

| FIELD NAME | FINAL EXECUTION ID |
|-----------------|---|
| Description | This field is used for the Market On Close (MOC) contracts to provide the exec ID of the original trade on the final future instrument. |
| Format | Numerical ID (unsigned integer 32) |
| Length | 4 |
| Possible Values | 0..2 ³² -2 |
| Conditions | Used only for Market On Close Future trading. |
| Used In | Fill (04) |
| Used For | Derivatives |

Final Symbol Index

| FIELD NAME | FINAL SYMBOL INDEX |
|-----------------|--|
| Description | This field is used for the Market On Close (MOC) contracts to provide the symbol index of the final future instrument. |
| Format | Numerical ID (unsigned integer 32) |
| Length | 4 |
| Possible Values | 0..2 ³² -1 |
| Conditions | Used only for Market On Close Future trading. |
| Used In | Fill (04) |
| Used For | Derivatives |

Firm ID

| FIELD NAME | FIRM ID |
|-------------|---|
| Description | Identifier of the member firm that sends the message. It is provided by the Exchange upon the registration of the Firm by the Membership department. |
| Format | Alphanumerical ID (character) |
| Length | 8 |
| Conditions | In inbound messages it is the ID of the firm that sent the message. In outbound messages it is the ID of the firm to which the message is sent. In User Notification (39): <ul style="list-style-type: none"> • For Kill Switch: Firm ID is always provided but it represents the scope of the kill only in case the action has been taken when specified by User Status as Firm; • For Risk Guard: Firm ID is always provided but it represents the scope of the action only in case the User Status references Firm, Trader – Algo, DEA or Order Size Limit; |
| Used In | New Order (01) Ack (03) Fill (04) Kill (05) Cancel Replace (06) Reject (07) Quotes (08) Quote Ack (09) Quote Request (10) Cancel Request (12) Mass Cancel (13) Mass Cancel Ack (14) Open Order Request (15) Ownership Request Ack (17) Ownership Request (18) Trade Bust Notification (19) Price Input (28) Liquidity Provider Command (32) Ask For Quote (33) Request For Execution (34) RFQ Notification (35) RFQ Matching Status (36) RFQ LP Matching Status (37) User Notification (39) MM Sign-In (47) MM Sign-In Ack (48) Security Definition Request (60) Security Definition Ack (61) MM Protection Request (62) MM Protection Ack (63) New Wholesale Order (64) Wholesale Order Ack (65) Request For Implied Execution (66) Cross Order (67) Wave For Liquidity (73) Wave For Liquidity Notification (74) |

| FIELD NAME | FIRM ID |
|------------|---|
| | Declaration Entry (40) Declaration Entry Ack (41) Declaration Notice (42) Declaration Cancel and Refusal (43) Fund Price Input (44) Fund Price Input Ack (45) Declaration Entry Reject (46) |
| Used For | Cash and Derivatives |

Firm ID Publication

| FIELD NAME | FIRM ID PUBLICATION |
|-----------------|--|
| Description | [N/A] Indicates whether the client accept or not to provide its Firm ID to the RFQ recipients. (0:No ; 1:Yes) In case of “Yes”, the Firm ID will be provided to Liquidity Providers through the field Counterpart Firm ID in the RFQ Notification (35) message. |
| Format | Boolean (unsigned integer 8) |
| Length | 1 |
| Possible Values | 0 = False 1 = True |
| Used In | Quote Request (10) |
| Used For | Cash |

Free Text

| FIELD NAME | FREE TEXT |
|-----------------|---|
| Description | Free Text is manually entered by the trader issuing the order. This field is part of the clearing aggregate. |
| Format | Text (character) |
| Length | 18 |
| Possible Values | (Free Text) |
| Used In | New Order (01) Cancel Replace (06) Quotes (08) MM Sign-In (47) MM Sign-In Ack (48) New Wholesale Order (64) Cross Order (67) Declaration Entry (40) Declaration Notice (42) |
| Used For | Cash and Derivatives |

Free Text Cross

| FIELD NAME | FREE TEXT CROSS |
|-------------|--|
| Description | Free Text Cross is manually entered by the trader issuing the order in case of a cross order and concerns the sell side. This field is part of the clearing aggregate. |
| Format | Text (character) |
| Length | 18 |

| FIELD NAME | FREE TEXT CROSS |
|-----------------|---|
| Possible Values | (Free Text) |
| Used In | Declaration Entry (40) Declaration Notice (42) |
| Used For | TCS (Cash and Derivatives) |

G

Gross Trade Amount

| FIELD NAME | GROSS TRADE AMOUNT |
|-----------------|--|
| Description | Total amount of a Declaration. Indicates the global amount of a declaration when it is expressed as an amount. |
| Format | Amount |
| Length | 8 |
| Possible Values | From $-2^{63}+1$ to $2^{63}-1$ |
| Conditions | For inbound Declaration Entry (40) message (TCS), it is applicable only when Operation Type = '6' for a trade/declaration on Funds if expressed as an amount. If expressed as a quantity, this field should not be provided. In outbound Declaration Notice (42) messages (from TCS) field Gross Trade Amount is provided only for message with the Operation Type = '6' AND Declaration Status set to 7 = Filled, 13 = Pre-Matched OR 5 = Cancelled. |
| Used In | Declaration Entry (40) Declaration Notice (42) |
| Used For | TCS (Cash and Derivatives) |

Guarantee Flag

| FIELD NAME | GUARANTEE FLAG |
|-----------------|---|
| Description | Indicates if the trade is guaranteed or not (for clearing purposes). |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Cleared but not Guaranteed 2 = Cleared and Guaranteed |
| Conditions | In outbound Declaration Notice (42) messages (from TCS) field Guarantee flag is provided if the field Settlement Flag is set to 1 = True. |
| Used In | Declaration Entry (40) Declaration Notice (42) |
| Used For | TCS (Cash and Derivatives) |

I

Input Price Type

| FIELD NAME | INPUT PRICE TYPE |
|-------------|---------------------------------|
| Description | Type of input price. |
| Format | Enumerated (unsigned integer 8) |

| FIELD NAME | INPUT PRICE TYPE |
|-----------------|---|
| Length | 1 |
| Possible Values | 1 = Valuation Price 2 = Alternative Indicative Price (AIP) |
| Used In | Price Input (28) |
| Used For | Cash |

Instrument Group Code

| FIELD NAME | INSTRUMENT GROUP CODE |
|-------------|--|
| Description | Instrument Group / Class Identifier. |
| Format | Alphanumerical ID (character) |
| Length | 2 |
| Used In | Mass Cancel (13) Mass Cancel Ack (14) |
| Used For | Cash |

InvestmentDecisionWFirmShortCode

| FIELD NAME | INVESTMENTDECISIONWFIRMSHORTCODE |
|-----------------|---|
| Description | <p>MiFID II short code, Investment decision within firm, identifier of the trader or algorithm responsible for the investment decision.</p> <p>ESMA description of the field:</p> <p>Code used to identify the person or the algorithm within the member or participant of the trading venue who is responsible for the investment decision.</p> <p>Where a natural person(s) within the member or participant of the trading venue is responsible for the investment decision the person who is responsible or has primary responsibility for the investment decision shall be identified with the {NATIONAL_ID}</p> <p>Where an algorithm is responsible for the investment decision the field shall be populated in accordance with Article 8 of [RTS 22 on transaction reporting under Article 26 of Regulation (EU) No 600/2014.]</p> |
| Format | Numerical ID (signed integer 32) |
| Length | 4 |
| Possible Values | $-2^{31}+1..2^{31}-1$ |
| Conditions | <p>This field is mandatory when Account Type = Liquidity Provider, Related Party, House or Structured Product Market Maker; and only when DEA Indicator = 0. Also mandatory in in case in the field MIFID Indicators position 1 (InvestmentAlgoIndicator) is set to “1: Algorithm involved”.</p> <p>Guideline for algorithm associated values: When an order message is flagged with the associated InvestmentAlgoIndicator (position 1) in the MiFID Indicators field set to value “0: No algorithm” involved then all positive values (from 0 to $2^{63}-1$) would represent a human trader.</p> <p>If the indicator is set to “1: Algorithm involved” clients are requested to populate this field with the ranges of values identified below. No technical checks would be performed to validate correctness of the ranges used.</p> <ul style="list-style-type: none"> - In –house algorithms with positive range of values between 0 to $2^{31}-1$ - ISV algorithms : negative range of values between $-2^{31}+1$ to -1 |
| Used In | New Order (01) New Wholesale Order (64) Wholesale Order Ack (65) Cross Order (67) Declaration Entry (40) |
| Used For | Cash and Derivatives |

IOI ID

| FIELD NAME | IOI ID |
|-----------------|---|
| Description | Unique identifier of Wave For Liquidity message. |
| Format | Numerical ID (signed integer 64) |
| Length | 8 |
| Possible Values | $-2^{63}+1..2^{63}-1$ |
| Conditions | In the New Order (01), when populated with a value different than SBE Null Value, must be set to the value of the Exchange IOI ID provided by the Exchange in the Wave For Liquidity Notification (74) sent to acknowledge the Wave For Liquidity (73). |
| Used In | New Order (01) Wave For Liquidity (73) Wave For Liquidity Notification (74) |
| Used For | Cash |

IOI Quality Indication

| FIELD NAME | IOI QUALITY INDICATION |
|-----------------|---|
| Description | Relative Quality of the indication of interest. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = High 2 = Low 3 = Medium |
| Used In | Wave For Liquidity (73) Wave For Liquidity Notification (74) |
| Used For | Cash |

IOI Quantity

| FIELD NAME | IOI QUANTITY |
|-----------------|---|
| Description | Indicates the size of the indication of interest. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Small 2 = Medium 3 = Large 4 = Undisclosed Qty |
| Used In | Wave For Liquidity (73) Wave For Liquidity Notification (74) |
| Used For | Cash |

IOI Side

| FIELD NAME | IOI SIDE |
|-------------|---|
| Description | Indicates the side of the indication of interest. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |

| FIELD NAME | IOI SIDE |
|-----------------|---|
| Possible Values | 1 = Buy 2 = Sell 4 = Undisclosed |
| Used In | Wave For Liquidity (73) Wave For Liquidity Notification (74) |
| Used For | Cash |

IOI Transaction Type

| FIELD NAME | IOI TRANSACTION TYPE |
|-----------------|--|
| Description | Identifies the reason why the Wave For Liquidity message is being sent towards the Exchange. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = New 2 = Cancel 3 = Replace |
| Used In | Wave For Liquidity (73) |
| Used For | Cash |

IOI Type

| FIELD NAME | IOI TYPE |
|-----------------|--|
| Description | Identifies the reason why the Wave For Liquidity Notification (74) message is being sent by the Exchange. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Ack 2 = Reject 3 = New IOI Notification 4 = IOI Reply Notification 5 = IOI Cancellation Notification 6 = IOI Replacement Notification |
| Used In | Wave For Liquidity Notification (74) |
| Used For | Cash |

K

Kill Reason

| FIELD NAME | KILL REASON |
|-----------------|--|
| Description | Order Kill Reason |
| Format | Enumerated (unsigned integer 16) |
| Length | 2 |
| Possible Values | 1 = Order Cancelled by Client 2 = Order Expired 3 = Order Cancelled by Market Operations |

| FIELD NAME | KILL REASON |
|------------|--|
| | 4 = Order Eliminated due to Corporate Event |
| | 5 = Done for day |
| | 6 = Cancelled MTL in an empty Order Book |
| | 7 = Cancelled by STP |
| | 8 = Remaining quantity killed (IOC) |
| | 9 = Beginning of PAKO Period |
| | 11 = Order Cancelled due to Cancel On Disconnect Mechanism |
| | 12 = RFQ expired |
| | 13 = RFQ partially or fully matched with other counterparts |
| | 14 = RFQ cancelled by the issuer |
| | 15 = RFQ Not matched due to issuer order's features |
| | 16 = Quote cancelled due to Knock-Out |
| | 17 = Order cancelled due to a Kill command |
| | 18 = Order cancelled due to Static Collars |
| | 19 = LP Order cancelled due to RFQ expiration |
| | 20 = LP Order cancelled due to RFQ cancellation |
| | 21 = RFQ Remaining quantity killed |
| | 22 = LP Order cancelled due to RFQ confirmation |
| | 23 = Order cancelled due to Market Maker Protection |
| | 24 = Order cancelled by clearing risk manager |
| | 25 = Order cancelled by member risk manager |
| | 26 = Order cancelled due to Trade Price Validation |
| | 30 = Conditional Order cancelled due to Potential Matching |
| | 36 = Order Cancelled due to a potential trade outside FSP limits |
| | 37 = Remaining RFC Quantity Cancelled |
| | 38 = Order Cancelled due to an incorrect Reactor response |
| | 41 = Order Cancelled due to Order Price Control Collar breach |
| | 42 = Order Cancelled due to Execution Prevention Across All Firms |
| | 43 = Cancelled due to Breach of MEP set by a clearing risk manager |
| | 44 = Cancelled due to Breach of MEP set by a member risk manager |
| Conditions | Values 12; 13; 14; 15 will be used only on ETF Access platform. Value 12 is used when an order is cancelled due to RFQ expiration. It happens when the RFQ issuer does not validate the RFQ after a predefine period of time. |
| Used In | Kill (05) |
| Used For | Cash and Derivatives |

L

Last Book IN Time

| FIELD NAME | LAST BOOK IN TIME |
|-----------------|--|
| Description | Last Matching Engine IN time (in ns) processed on the associated Resynchronization ID. |
| Format | Epoch Time in Nanoseconds (unsigned integer 64) |
| Length | 8 |
| Possible Values | 0..2 ⁶⁴ -2 |
| Used In | Synchronization Time (51) |
| Used For | Cash and Derivatives |

Last Client Message Sequence Number

| FIELD NAME | LAST CLIENT MESSAGE SEQUENCE NUMBER |
|-----------------|---|
| Description | Indicates the sequence number of the last message received by the Exchange from the Client on the OE Session. |
| Format | Sequence (unsigned integer 32) |
| Length | 4 |
| Possible Values | 0..2 ³² -2 |
| Used In | Logon Ack (101) Logon Reject (102) |
| Used For | Cash and Derivatives |

Last Message Sequence Number

| FIELD NAME | LAST MESSAGE SEQUENCE NUMBER |
|-----------------|---|
| Description | Indicates the sequence number of the last message received by the Client from the Exchange on the OE Session. |
| Format | Sequence (unsigned integer 32) |
| Length | 4 |
| Possible Values | 0..2 ³² -2 |
| Used In | Logon (100) Logon Reject (102) |
| Used For | Cash and Derivatives |

Last Traded Price

| FIELD NAME | LAST TRADED PRICE |
|-----------------|--|
| Description | The Last Traded Price indicates the price of last fill on an instrument (to be calculated with the Price/Index Decimals). |
| Format | Price (signed integer 64) |
| Length | 8 |
| Possible Values | -2 ⁶³ +1..2 ⁶³ -1 |
| Conditions | In the Trade Bust Notification (19) message the Last Traded Price refers to Price of the cancelled trade. Negative values authorized on ETF Access when the order is sent on the NAV trading Order Book (EMM = 8). |
| Used In | Fill (04) Trade Bust Notification (19) |
| Used For | Cash and Derivatives |

Last Traded Quantity

| FIELD NAME | LAST TRADED QUANTITY |
|-----------------|--|
| Description | The Last Traded Quantity indicates the quantity of last fill on an instrument (to be calculated with the Quantity Decimals). |
| Format | Quantity (unsigned integer 64) |
| Length | 8 |
| Possible Values | 0..2 ⁶⁴ -2 |

| FIELD NAME | LAST TRADED QUANTITY |
|------------|---|
| Conditions | In the Trade Bust Notification (19) message the Last Traded Quantity refers to Quantity of the cancelled trade. |
| Used In | Fill (04) Trade Bust Notification (19) |
| Used For | Cash and Derivatives |

Leaves Quantity

| FIELD NAME | LEAVES QUANTITY |
|-----------------|---|
| Description | Indicates the remaining quantity of an order, i.e. the quantity open for further execution. |
| Format | Quantity (unsigned integer 64) |
| Length | 8 |
| Possible Values | $0..2^{64}-2$ |
| Used In | Fill (04) |
| Used For | Cash and Derivatives |

Leg Error Code

| FIELD NAME | LEG ERROR CODE |
|-----------------|---|
| Description | Error code in case of rejection for the Leg. Provides the return error code when a request is rejected for a functional or a technical reason. |
| Format | Numerical ID (unsigned integer 16) |
| Length | 2 |
| Possible Values | $0..2^{16}-2$ |
| Used In | Wholesale Order Ack (65) |
| Used For | Derivatives |

Leg Instrument ID

| FIELD NAME | LEG INSTRUMENT ID |
|-----------------|---|
| Description | Numerical leg instrument identifier (SymbolIndex) valid for the life of the instrument. |
| Format | Numerical ID (unsigned integer 32) |
| Length | 4 |
| Possible Values | $0..2^{32}-2$ |
| Used In | Fill (04) Cross Order (67) |
| Used For | Derivatives |

Leg Last Traded Price

| FIELD NAME | LEG LAST TRADED PRICE |
|-----------------|---|
| Description | Leg Last Traded Price |
| Format | Price (signed integer 64) |
| Length | 8 |
| Possible Values | $-2^{63}+1..2^{63}-1$ |
| Used In | Fill (04) Cross Order (67) |

| FIELD NAME | LEG LAST TRADED PRICE |
|------------|-----------------------|
| Used For | Derivatives |

Leg Last Traded Quantity

| FIELD NAME | LEG LAST TRADED QUANTITY |
|-----------------|---|
| Description | Leg Last Traded Quantity |
| Format | Quantity (unsigned integer 64) |
| Length | 8 |
| Possible Values | 0..2 ⁶⁴ -2 |
| Used In | Fill (04) Cross Order (67) |
| Used For | Derivatives |

Leg Last Trading Date

| FIELD NAME | LEG MATURITY DATE |
|-----------------|--|
| Description | Last Trading Date of the leg of the strategy (text formatted as YYYYMMDD). |
| Format | Numerical ID (unsigned integer 64) |
| Length | 8 |
| Possible Values | YYYYMMDD |
| Conditions | In Security Definition Request (60) and New Wholesale Order (64) messages this field should be populated when required to identify a Derivative outright as a leg of the strategy. |
| Used In | Security Definition Request (60) New Wholesale Order (64) |
| Used For | Derivatives |

Leg Price

| FIELD NAME | LEG PRICE |
|-----------------|--|
| Description | Price of corresponding strategy leg (to be calculated with the Price/Index Level Decimals). |
| Format | Price (signed integer 64) |
| Length | 8 |
| Possible Values | -2 ⁶³ +1..2 ⁶³ -1 |
| Conditions | The field is used to provide the price of the Underlying leg in a submission of a Delta-neutral strategy using the Security Definition Request (60) message. In all other cases of submission of the Security Definition Request (60) messages this field should be populated with the Null value. |
| Used In | Security Definition Request (60) New Wholesale Order (64) |
| Used For | Derivatives |

Leg Put Or Call

| FIELD NAME | LEG PUT OR CALL |
|-------------|---------------------------------|
| Description | Type of the option as leg. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |

| FIELD NAME | LEG PUT OR CALL |
|-----------------|--|
| Possible Values | 1 = Call 0 = Put |
| Conditions | Only for Derivative Markets and Mandatory in message Security Definition Request (60) and New Wholesale Order (64) only populated for strategies when leg is an Option |
| Used In | Security Definition Request (60) New Wholesale Order (64) |
| Used For | Derivatives |

Leg Ratio

| FIELD NAME | LEG RATIO |
|-----------------|---|
| Description | Ratio of lots for the leg. For contingent trades, the delta. <ul style="list-style-type: none"> ■ For Contracts (Future or Option), it is the leg ratio, with the maximum value being 99999. If the value submitted by a customer is higher, it will be changed by the system to the maximum value (99999). ■ For Underlyings (Cash or Future), the delta is used with special rules: For the Underlying leg of volatility strategies, this should be the delta represented directly as an integer value of the percentage, without division or decimals (e.g.: a delta of 65% should be represented by 65), with the maximum value being 9999 (9999%). If the value submitted by a customer is higher, it will be changed by the system to the maximum value (9999). For Conversion Reversal Strategies (Type = 'R'), the delta is always set to 100. |
| Format | Numerical (unsigned integer 32) |
| Length | 4 |
| Possible Values | 0..99999 |
| Conditions | For New Wholesale Order (64) only populated for strategies |
| Used In | Security Definition Request (60) New Wholesale Order (64) |
| Used For | Derivatives |

Leg Security Type

| FIELD NAME | LEG SECURITY TYPE |
|-----------------|--|
| Description | Defines the type of instrument of the Leg |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 0 = Future 1 = Option 2 = Cash |
| Used In | Security Definition Request (60) New Wholesale Order (64) |
| Used For | Derivatives |

Leg Side

| FIELD NAME | LEG SIDE |
|-----------------|--------------------------------------|
| Description | Indicates the side of the trade leg. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Buy |

| FIELD NAME | LEG SIDE |
|------------|---|
| | 2 = Sell |
| Conditions | For New Wholesale Order (64) only populated for strategies |
| Used In | Fill (04) Security Definition Request (60) New Wholesale Order (64) Wholesale Order Ack (65) |
| Used For | Derivatives |

Leg Strike Price

| FIELD NAME | LEG STRIKE PRICE |
|-----------------|--|
| Description | The strike price of an option/warrant is the specified price at which the underlying can be bought (in the case of a call/right to buy) or sold (in case of a put/right to sell) by the holder (buyer) of the option/warrant contract, at the moment he exercises his right against a writer (seller) of the option/warrant. |
| Format | Price (signed integer 64) |
| Length | 8 |
| Possible Values | $-2^{63}+1..2^{63}-1$ |
| Conditions | In Security Definition Request (60) message this field should be populated with the Null value |
| Used In | Security Definition Request (60) New Wholesale Order (64) |
| Used For | Derivatives |

Leg Symbol Index

| FIELD NAME | LEG SYMBOL INDEX |
|-----------------|---|
| Description | MDG proprietary identification code of the instrument leg for the strategy. This identifier is unique per triplet: MIC, ISIN and currency. Once the instrument is expired its number can be used for a new instrument. |
| Format | Numerical ID (unsigned integer 32) |
| Length | 4 |
| Possible Values | $0..2^{32}-2$ |
| Used In | Security Definition Request (60) New Wholesale Order (64) Wholesale Order Ack (65) |
| Used For | Derivatives |

LIS Transaction ID

| FIELD NAME | LIS TRANSACTION ID |
|-----------------|---|
| Description | ID that can be used to associate Executions belonging to the same LIS Transaction |
| Format | Numerical ID (unsigned integer 32) |
| Length | 4 |
| Possible Values | $0..2^{32}-2$ |
| Used In | Fill (04) Trade Bust Notification (19) New Wholesale Order (64) |

| FIELD NAME | LIS TRANSACTION ID |
|------------|--|
| | Wholesale Order Ack (65) |
| Used For | Derivatives |

Log Out Reason Code

| FIELD NAME | LOG OUT REASON CODE |
|-----------------|---|
| Description | Log Out Reason Code. Value 0 is provided by the client, all other possible values are provided by the Exchange. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 0 = Regular Logout By Client 1 = End Of Day 2 = Too many unknown messages 3 = Excessive Number of Messages 4 = Excessive Amount of Data in Bytes 5 = Excessive Number of Messages and Amount of Data in Bytes 6 = Logout By Market Operations |
| Used In | Logout (103) |
| Used For | Cash and Derivatives |

Logical Access ID

| FIELD NAME | LOGICAL ACCESS ID |
|-----------------|---|
| Description | Identifier of the Logical Access. |
| Format | Numerical ID (unsigned integer 32) |
| Length | 4 |
| Possible Values | 0..2 ³² -2 |
| Conditions | It is required in both Logon (100) and Logout (103) messages. It is required in the OwnershipRequest (18) message when the Order ID is not provided. In the Mass Cancel (13) message it can be used as filter to cancel orders belonging to this Logical Access. In User Notification (39), for Derivatives and concerning Risk Guard functionality, if populated with a value different from SBE Null value identifies the scope of the value provided in the User Status – linked with Suspension/Unsuspendation or Block/Unblock contols. |
| Used In | Logon (100) Mass Cancel (13) Mass Cancel Ack (14) Ownership Request Ack (17) Ownership Request (18) MM Sign-In (47) MM Sign-In Ack (48) User Notification (39) |
| Used For | Cash and Derivatives |

Logon Reject Code

| FIELD NAME | LOGON REJECT CODE |
|-------------|--------------------------------------|
| Description | Provides the logon rejection reason. |
| Format | Enumerated (unsigned integer 8) |

| FIELD NAME | LOGON REJECT CODE |
|-----------------|---|
| Length | 1 |
| Possible Values | 1 = Unknown Connection Identifier 2 = System unavailable 3 = Invalid sequence number 4 = Client session already logged on 5 = Client session disabled 6 = Invalid Queueing Indicator 7 = Invalid Logon format |
| Used In | Logon Reject (102) |
| Used For | Cash and Derivatives |

Long Client ID

| FIELD NAME | CLIENT ID |
|-------------|---|
| Description | Field used to identify the Client (investor), or trader's reference / posting order number for a pre-posting, entered as a free text used for clearing purposes. This field is part of the clearing aggregate for Derivatives. For Cash Markets this field is ignored except for IPO where this field is used to provide the information of the tax code. |
| Format | Alphanumerical ID (character) |
| Length | 16 |
| Used In | New Order (01) Cancel Replace (06) MM Sign In (47) MM Sign In Ack (48) New Wholesale Order (64) Cross Order (67) |
| Conditions | For Cash Markets this field is ignored except for IPO where this field is used to provide the information of the tax code. |
| Used For | Derivatives |

LP Action Code

| FIELD NAME | LP ACTION CODE |
|-----------------|--|
| Description | Action the LP wants to apply on the specified instrument of warrant type. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Knock-In By Issuer (KIBI) 2 = Knock-Out By Issuer (KOB I) 3 = Payment After Knock-Out (PAKO) 4 = Bid Only 5 = Offer Only |
| Used In | Liquidity Provider Command (32) |
| Used For | Cash |

LP Role

| FIELD NAME | LP ROLE |
|-----------------|---|
| Description | Liquidity Provider Role identifies the type of the Liquidity Provider when Account Type is equal to "Liquidity Provider". |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Liquidity Provider or Market Maker 3 = Retail Liquidity Provider 12 = RFQ Liquidity Provider |
| Conditions | Liquidity Provider Role is mandatory when Account Type is equal to "Liquidity Provider". In CancelReplace (06) message, if provided the value is ignored. This field is not populated in message Security Definition Request (60) only for the leg that is an Option. For derivative markets, it should be set to the default value of '1' (Liquidity Provider). |
| Used In | New Order (01) Cancel Replace (06) Quotes (08) Quote Ack (09) |
| Used For | Cash and Derivatives |

M

Maturity

| FIELD NAME | MATURITY |
|-------------|---|
| Description | [N/A] Scope of active orders to be cancelled according the selected maturity, expressed in YYYYMMDD format. For monthly DD must be set to 00. To identify weeklies and dailies DD must be set to the last trading day. (For Future Use) |
| Format | Alphanumerical ID (character) |
| Length | 8 |
| Used In | Mass Cancel (13) Mass Cancel Ack (14) |
| Used For | Derivatives |

Message Price Notation

| FIELD NAME | MESSAGE PRICE NOTATION |
|-----------------|--|
| Description | This field provides the type of price notation used per message. For TRF and MOC products the value "Price" is used for TAM trading mode, the values "Spread in basis points" and "Spread" are used for TAIC trading mode. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Price 2 = Spread in basis points 3 = Spread |
| Conditions | Currently this functionality is used only for TRF and MOC products. Note that for the TRF products the value "Spread" means "Spread in index point" |

| FIELD NAME | MESSAGE PRICE NOTATION |
|------------|---|
| Used In | Cross Order (67) New Wholesale Order (64) Fill (04) |
| User For | Derivatives |

Message Sending Time

| FIELD NAME | MESSAGE SENDING TIME |
|-----------------|--|
| Description | Indicates the time of message transmission, the consistency of the time provided is not checked by the Exchange. (Time in number of nanoseconds since 01/01/1970 UTC) |
| Format | Epoch Time in Nanoseconds (unsigned integer 64) |
| Length | 8 |
| Possible Values | 0..2 ⁶⁴ -2 |
| Used In | New Order (01) Ack (03) Kill (05) Cancel Replace (06) Quote Ack (09) Quote Request (10) Cancel Request (12) Mass Cancel (13) Mass Cancel Ack (14) Open Order Request (15) Ownership Request (18) Price Input (28) Liquidity Provider Command (32) MM Sign-In (47) MM Sign-In Ack (48) Security Definition Request (60) Security Definition Ack (61) MM Protection Request (62) MM Protection Ack (63) New Wholesale Order (64) Wholesale Order Ack (65) Request For Implied Execution (66) Cross Order (67) Wave For Liquidity (73) Wave For Liquidity Notification (74) Declaration Entry (40) Declaration Cancel and Refusal (43) Fund Price Input (44) |
| Used For | Cash and Derivatives |

Message Sequence Number

| FIELD NAME | MESSAGE SEQUENCE NUMBER |
|-------------|---|
| Description | Indicates the Message Sequence Number per OE Session. (for messages sent by the Exchange) |
| Format | Sequence (unsigned integer 32) |

| FIELD NAME | MESSAGE SEQUENCE NUMBER |
|-----------------|---|
| Length | 4 |
| Possible Values | 0..2^32-2 |
| Used In | Ack (03) Fill (04) Kill (05) Reject (07) Quote Ack (09) Mass Cancel Ack (14) Ownership Request Ack (17) Trade Bust Notification (19) Ask For Quote (33) Request For Execution (34) RFQ Notification (35) RFQ Matching Status (36) RFQ LP Matching Status (37) User Notification (39) MM Sign-In Ack (48) Instrument Synchronization List (50) Synchronization Time (51) Security Definition Ack (61) MM Protection Ack (63) Wholesale Order Ack (65) Wave For Liquidity Notification (74) Clear Book (75) Declaration Entry Ack (41) Declaration Notice (42) Fund Price Input Ack (45) Declaration Entry Reject (46) |
| Used For | Cash and Derivatives |

MIC of Secondary Listing

| FIELD NAME | MIC OF SECONDARY LISTING |
|-------------|--|
| Description | Identifies the secondary listing place to which an instrument belongs by its MIC (Market Identification Code.), segment MIC according to ISO 10383. |
| Format | Alphanumerical ID (character) |
| Length | 4 |
| Conditions | In inbound DeclarationEntry (40) messages for declaration on the secondary listing place (Operation Type = '7'), the field Symbol Index and MIC of Secondary Listing must be provided. In associated outbound messages, provided only to acknowledge receipt of the original declaration. |
| Used In | Declaration Entry (40) Declaration Entry Ack (41) Declaration Notice (42) Declaration Entry Reject (46) |
| Used For | TCS (Cash and Derivatives) |

MiFID Indicators

| FIELD NAME | MIFID INDICATORS |
|-----------------|---|
| Description | <p>Field used as instruction for order handling. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions.</p> <ul style="list-style-type: none"> - DEA Indicator: indicates whether the order was submitted via a Direct Electronic Access (DEA) connection or not. It must be set to 1 for DEA access. (0: No ; 1: Yes) If set to 1, then field ClientIdentificationShortCode must be populated. - InvestmentAlgoIndicator: indicates whether the investment decision was submitted by a trading algorithm or not. (0: No algorithm involved ; 1: Algorithm involved) This value must be set to 1 for cases where Algorithm has made the Investment decision. If set to 1, then field InvestmentDecisionWFirmShortCode must be filled. - ExecutionAlgoIndicator: indicates whether the order execution was submitted by a trading algorithm or not. (0: No algorithm involved ; 1: Algorithm involved) - CommodityDerivativeIndicator: indicates for a commodity derivative or a warrant with a commodity underlying, if the trade reduces the risk. (0: Order not associated with reduction of risk for Commodity Derivatives or Warrants with Commodity underlyings ; 1: Risk Reduction flag for orders associated with Commodity Derivatives or Warrants with Commodity underlyings) - Deferral Indicator: Indicates whether the order is candidate for a deferred publication of the resulting trade(s) or not. (0: Not Candidate ; 1: Candidate) - FR MAR AMP LP: Indicates whether the order is subject to French Market Abuse Regulation Accepted Market Practice Liquidity provision or not (0: Not subject to FR MAR AMP LP ; 1: Subject to FR MAR AMP LP). This is related to the AMAFI (Association française des marchés financiers) market abuse prevention. <p>Example: If an order is subject to FR MAR AMP LP (French Market Abuse Regulation Accepted Market Practice Liquidity provision), the sixth position from the right to the left is set to '1': MiFID Indicators = '00100000'</p> |
| Format | Bitmap (unsigned integer 8) |
| Length | 1 |
| Possible Values | <p>0 = DEA Indicator</p> <p>1 = InvestmentAlgoIndicator</p> <p>2 = ExecutionAlgoIndicator</p> <p>3 = CommodityDerivativeIndicator</p> <p>4 = Deferral Indicator</p> <p>5 = FR MAR AMP LP (AMAFI)</p> |
| Conditions | <p>Always provided in outbound messages Ack (03), Fill (04), Kill (05), MassCancelAck (14) and Reject (07) for the Derivatives segments.</p> <p>On the Derivatives segments, for the New Wholesale Order (65) inbound messages</p> <ul style="list-style-type: none"> • positions 0 and 3 may apply on the message level (not individual leg level) • positions 1, 2, 4 and 5 do not apply, and should always be filled with zero (0) |
| Used In | <p>New Order (01)</p> <p>Ack (03)</p> <p>Fill (04)</p> <p>Kill (05)</p> <p>Cancel Replace (06)</p> <p>Reject (07)</p> <p>Quotes (08)</p> <p>Mass Cancel Ack (14)</p> <p>New Wholesale Order (64)</p> <p>Wholesale Order Ack (65)</p> <p>Request For Implied Execution (66)</p> |

| FIELD NAME | MIFID INDICATORS |
|------------|--|
| | Cross Order (67) Declaration Entry (40) |
| Used For | Cash and Derivatives |

Minimum Order Quantity

| FIELD NAME | MINIMUM ORDER QUANTITY |
|-----------------|---|
| Description | Minimum quantity to be executed upon order entry (else the order is rejected), (To be calculated with Quantity Decimals). |
| Format | Quantity (unsigned integer 64) |
| Length | 8 |
| Possible Values | 0..2 ⁶⁴ -2 |
| Used In | New Order (01) Quote Request (10) RFQ Notification (35) |
| Conditions | Minimum Order Quantity must be provided when Dark Execution Instruction, bit in position 5 from the left (corresponding to Minimum Quantity Type) is equal to 1 (MES), else the order could never be executed during the RFQ matching mechanism |
| Used For | Cash and Derivatives |

Miscellaneous Free Amount

| FIELD NAME | MISCELLANEOUS FREE AMOUNT |
|-----------------|---|
| Description | Miscellaneous Fee Value. Total order fees related to the funds share creation or redemption applied by the Asset Manager per order. |
| Format | Amount (signed integer 64) |
| Length | 8 |
| Possible Values | From -2 ⁶³ +1 to 2 ⁶³ -1 |
| Used In | Declaration Notice (42) |
| Used For | TCS (Cash and Derivatives) |

MMP Execution Type

| FIELD NAME | MMP EXECUTION TYPE |
|-----------------|---|
| Description | Type of MM Protection Execution. - bit in position 0 - Notification (0: No ; 1: Yes) - bit in position 1 - Acknowledgment (0: No ; 1: Yes) - bit in position 2 - Pull (0: No ; 1: Yes) |
| Format | Bitmap (unsigned integer 8) |
| Length | 1 |
| Possible Values | 0 = Notification 1 = Acknowledgement 2 = Pull |
| Used In | MM Protection Ack (63) |
| Used For | Derivatives |

N

Non Executing Client ID

| FIELD NAME | NON EXECUTING CLIENT ID |
|-----------------|--|
| Description | This field will be used as unique client Key. Field indicating the client ID of the participant in a commercial package. |
| Format | Numerical ID (unsigned integer 64) |
| Length | 2 |
| Possible Values | 0..2 ¹⁶ -1 |
| Used In | New Order (01) New Wholesale Order (64) Wholesale Order Ack (65) Cross Order (67) |
| Used For | Derivatives |

NonExecutingBrokerShortCode

| FIELD NAME | NONEXECUTINGBROKERSHORTCODE |
|-----------------|---|
| Description | MiFID II short code, Non-executing broker, identifier of the non-executing broker. ESMA description of the field: In accordance with Article 2(d). This field shall be left blank when not relevant. |
| Format | Numerical ID (signed integer 32) |
| Length | 4 |
| Possible Values | -2 ³¹ +1..2 ³¹ -1 |
| Used In | New Order (01) New Wholesale Order (64) Wholesale Order Ack (65) Cross Order (67) |
| Used For | Cash and Derivatives |

Number Of LPs

| FIELD NAME | NUMBER OF LPS |
|-----------------|---|
| Description | Indicates the number of LP answers to the RFQ (whether they can be executed or not) |
| Format | Numerical (unsigned integer 8) |
| Length | 1 |
| Possible Values | 0..2 ⁸ -2 |
| Used In | RFQ Matching Status (36) |
| Used For | Cash |

OE Partition ID

| FIELD NAME | OE PARTITION ID |
|-----------------|---|
| Description | Identifies uniquely an OE Optiq partition by which the engine is reached. |
| Format | Numerical ID (unsigned integer 16) |
| Length | 2 |
| Possible Values | 0..2 ¹⁶ -2 |
| Conditions | In Logon (100) message it must be set according to the partition to which the messages are sent. In the Ownership Request (18) message it is optional, if populated it used to restrict the request of ownership to the orders belonging to the specified Logical Access ID and entered through this partition. In the Mass Cancel (13) message it is optional but cannot be populated if Logical Access ID is not populated ; if populated it used as filter to cancel orders entered through this partition (it can be combined with other criteria). |
| Used In | Logon (100) Mass Cancel (13) Mass Cancel Ack (14) Ownership Request Ack (17) Ownership Request (18) MM Sign-In (47) MM Sign-In Ack (48) |
| Used For | Cash and Derivatives |

OEG IN From ME

| FIELD NAME | OEG IN FROM ME |
|-----------------|--|
| Description | Gateway IN time from ME (in ns), measured when outbound message enters the gateway (Time in number of nanoseconds since 01/01/1970 UTC). |
| Format | Epoch Time in Nanoseconds (unsigned integer 64) |
| Length | 8 |
| Possible Values | 0..2 ⁶⁴ -2 |
| Used In | Ack (03) Fill (04) Kill (05) Reject (07) Quote Ack (09) Mass Cancel Ack (14) Trade Bust Notification (19) RFQ Notification (35) RFQ Matching Status (36) RFQ LP Matching Status (37) MM Sign-In Ack (48) Security Definition Ack (61) MM Protection Ack (63) Wholesale Order Ack (65) Wave For Liquidity Notification (74) |
| Used For | Cash and Derivatives |

OEG IN From Member

| FIELD NAME | OEG IN FROM MEMBER |
|-----------------|---|
| Description | Order Entry Gateway IN time from member (in ns), measured when inbound message enters the gateway (Time in number of nanoseconds since 01/01/1970 UTC). |
| Format | Epoch Time in Nanoseconds (unsigned integer 64) |
| Length | 8 |
| Possible Values | 0..2 ⁶⁴ -2 |
| Used In | Ack (03) Kill (05) Reject (07) Quote Ack (09) Mass Cancel Ack (14) MM Sign-In Ack (48) Security Definition Ack (61) MM Protection Ack (63) Wholesale Order Ack (65) Wave For Liquidity Notification (74) |
| Used For | Cash and Derivatives |

OEG OUT To ME

| FIELD NAME | OEG OUT TO ME |
|-----------------|---|
| Description | Gateway OUT time to ME (in ns), measured when inbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). |
| Format | Epoch Time in Nanoseconds (unsigned integer 64) |
| Length | 8 |
| Possible Values | 0..2 ⁶⁴ -2 |
| Used In | Ack (03) Kill (05) Reject (07) Quote Ack (09) Mass Cancel Ack (14) MM Sign-In Ack (48) Security Definition Ack (61) MM Protection Ack (63) Wholesale Order Ack (65) Wave For Liquidity Notification (74) |
| Used For | Cash and Derivatives |

OEG OUT To Member

| FIELD NAME | OEG OUT TO MEMBER |
|-----------------|---|
| Description | Order Entry Gateway OUT time to member (in ns), measured when outbound message leaves the gateway (Time in number of nanoseconds since 01/01/1970 UTC). |
| Format | Epoch Time in Nanoseconds (unsigned integer 64) |
| Length | 8 |
| Possible Values | 0..2 ⁶⁴ -2 |

| FIELD NAME | OEG OUT TO MEMBER |
|------------|--|
| Used In | Ack (03) Fill (04) Kill (05) Reject (07) Quote Ack (09) Mass Cancel Ack (14) Trade Bust Notification (19) RFQ Notification (35) RFQ Matching Status (36) RFQ LP Matching Status (37) MM Sign-In Ack (48) Instrument Synchronization List (50) Synchronization Time (51) Security Definition Ack (61) MM Protection Ack (63) Wholesale Order Ack (65) Technical Reject (108) Wave For Liquidity Notification (74) Clear Book (75) |
| Used For | Cash and Derivatives |

Offer Error Code

| FIELD NAME | OFFER ERROR CODE |
|-----------------|--|
| Description | Error code returned when a quote contains an invalid offer. See Error List for details of error codes. |
| Format | Numerical ID (unsigned integer 16) |
| Length | 2 |
| Possible Values | 0..2 ¹⁶ -2 |
| Used In | Quote Ack (09) |
| Used For | Cash and Derivatives |

Offer Order ID

| FIELD NAME | OFFER ORDER ID |
|-----------------|--|
| Description | Numerical order identifier assigned by the matching engine, unique per instrument and EMM. |
| Format | Numerical ID (unsigned integer 64) |
| Length | 8 |
| Possible Values | 0..2 ⁶⁴ -2 |
| Conditions | The field Order ID in Fill (04) message sent in case of trade resulting from a matching against a (bulk) Quote is filled with value in Offer Order ID field corresponding to the Offer quote that participated in the trade. |
| Used In | Quote Ack (09) Wholesale Order Ack (65) |
| Used For | Cash and Derivatives |

Offer Price

| FIELD NAME | OFFER PRICE |
|-----------------|--|
| Description | Quote offer price, (To be calculated with Price/Index Level Decimals). |
| Format | Price (signed integer 64) |
| Length | 8 |
| Possible Values | $-2^{63}+1..2^{63}-1$ |
| Conditions | In Quotes (08) either Bid Price or Offer Price, or both, must be populated |
| Used In | Quotes (08) |
| Used For | Cash and Derivatives |

Offer Quantity

| FIELD NAME | OFFER QUANTITY |
|-----------------|--|
| Description | Quote offer quantity, (To be calculated with Quantity Decimals). Cancels a quote if set to zero "0". |
| Format | Quantity (unsigned integer 64) |
| Length | 8 |
| Possible Values | $0..2^{64}-2$ |
| Conditions | In the New Wholesale Order (64) messages submitted by the Initiator the Offer Quantity must be the maximum volume to match in the transaction when the leading side is Sell. |
| Used In | Quotes (08) New Wholesale Order (64) Wholesale Order Ack (65) |
| Used For | Cash and Derivatives |

Open Close

| FIELD NAME | OPEN CLOSE |
|-----------------|--|
| Description | Open Close Indicator, Posting action. This field is part of the clearing aggregate. The first bit will be used to indicate whether this field is being actively used or not (1 = Actively Used ; 0 = Field Not Used). For each Leg 0 means Open and 1 means Close. Leg 2 to Leg 9 are applicable for Derivatives strategy instruments (not for cash instruments). |
| Format | Bitmap (unsigned integer 16) |
| Length | 2 |
| Possible Values | 0 = Field Actively Used 1 = Leg 1 2 = Leg 2 3 = Leg 3 4 = Leg 4 5 = Leg 5 6 = Leg 6 7 = Leg 7 8 = Leg 8 9 = Leg 9 |
| Used In | New Order (01) Cancel Replace (06) |

| FIELD NAME | OPEN CLOSE |
|------------|---|
| | Quotes (08) New Wholesale Order (64) Cross Order (67) |
| Used For | Cash and Derivatives |

Option Type

| FIELD NAME | OPTION TYPE |
|-----------------|--|
| Description | [N/A] Type of the option. (For Future Use) |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Call 2 = Put 3 = Other |
| Used In | Mass Cancel (13) Mass Cancel Ack (14) |
| Used For | Derivatives |

Operation Type

| FIELD NAME | OPERATION TYPE |
|-----------------|--|
| Description | Type of Operation. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Declaration of a trade outside the book 4 = Fund order (quantity) 5 = Declaration of a VWAP transaction 6 = Fund order (cash amount) 7 = Declaration of a trade on a Secondary listing place |
| Used In | Declaration Entry (40) Declaration Entry Ack (41) Declaration Notice (42) Declaration Entry Reject (46) |
| User For | TCS |

Order Actor Type

| FIELD NAME | ORDER ACTOR TYPE |
|-----------------|---|
| Description | Member role sending the Cross Order (67). |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Initiator 2 = Reactor |
| Used In | Cross Order (67) |
| User For | Derivatives |

Order Amount Limit

| FIELD NAME | ORDER AMOUNT LIMIT |
|-----------------|---|
| Description | Indicates the Maximum Order Amount above which all orders will be rejected by Matching Engine. (To be calculated with Amount Decimals). |
| Format | Amount (unsigned integer 64) |
| Length | 8 |
| Possible Values | 0..2 ⁶⁴ -2 |
| Used In | User Notification (39) |
| Used For | Cash |

Order Category

| FIELD NAME | ORDER CATEGORY |
|-----------------|---|
| Description | Field used as instruction for order handling. When not provided or provided at the Null Value, it is assumed to be set at value 1 "Lit Order". <ul style="list-style-type: none"> - Lit Order: indicates whether the client requests to cancel a Lit order. - LIS Order: indicates whether the client requests to cancel a LIS order. - Quote Request: indicates whether the client requests to cancel a Quote Request. - RFQ LP Answer: indicates whether the client requests to cancel an LP Answer to a Quote Request. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Lit Order 2 = LIS Order 3 = Quote Request 4 = RFQ LP Answer |
| Conditions | When not provided or provided at the Null Value, it is assumed to be set at value 1 "Lit Order". On Block Segment, in CancelRequest (12) message, Order Category should be set at value 2 (LIS Order) |
| Used In | Cancel Request (12) Mass Cancel (13) Mass Cancel Ack (14) Open Order Request (15) Ownership Request Ack (17) Ownership Request (18) |
| Used For | Cash |

Order Expiration Date

| FIELD NAME | ORDER EXPIRATION DATE |
|-------------|---|
| Description | Field used as date of order expiration for GTD orders. <ul style="list-style-type: none"> - Format : MMDD - Minimum Value : 0101 (Jan 1st) - Maximum Value : 1231 (Dec 31st) - If the day provided is greater or equal to the current trading date, the year to be applied will be the current year - If the day provided is lower than current trading date, the year to be applied will be the current year plus one |
| Format | Date (unsigned integer 16) |
| Length | 2 |

| FIELD NAME | ORDER EXPIRATION DATE |
|-----------------|---|
| Possible Values | 0..2 ¹⁶ -2 |
| Conditions | Order Expiration Date is mandatory for GTD orders. |
| Used In | New Order (01) Cancel Replace (06) |
| Used For | Cash and Derivatives |

Order Expiration Time

| FIELD NAME | ORDER EXPIRATION TIME |
|-----------------|--|
| Description | [N/A] Field used as time of order expiration for GTT orders. - Format : HHMMSS - Minimum Value : 0 (00:00:00) - Maximum Value : 235959 (23:59:59) |
| Format | Numerical ID (unsigned integer 32) |
| Length | 4 |
| Possible Values | 0..2 ³² -2 |
| Conditions | Order Expiration Time is mandatory for GTT orders. |
| Used In | New Order (01) Cancel Replace (06) |
| Used For | Cash |

Order ID

| FIELD NAME | ORDER ID |
|-----------------|--|
| Description | Numerical order identifier assigned by the matching engine, unique per instrument and EMM. |
| Format | Numerical ID (unsigned integer 64) |
| Length | 8 |
| Possible Values | 0..2 ⁶⁴ -2 |
| Conditions | The field Order ID in Fill (04) message sent in case of trade resulting from a matching against a (bulk) Quote is filled with value of either Bid Order ID or Offer Order ID, corresponding to the side of the quote that participated in the trade. On ETF Access platform: - In case of an Ack (03) or a Reject (07) message sent as a response to a Quote Request (10) or a Cancel Request (12), the Order ID field will broadcast the "RFQ Identifier" information (field QuoteReqID). - In case the client uses Cancel Request (12) to cancel an RFQ sent through the Quote Request (10), the Order ID field should contain the "RFQ Identifier" information previously received in the Ack (03) message. Field not populated in Reject (07) messages for rejection of strategy creation on derivatives markets. |
| Used In | Ack (03) Fill (04) Kill (05) Cancel Replace (06) Reject (07) Cancel Request (12) Open Order Request (15) Ownership Request Ack (17) Ownership Request (18) Request For Implied Execution (66) |

| FIELD NAME | ORDER ID |
|------------|----------------------|
| Used For | Cash and Derivatives |

Order Price

| FIELD NAME | ORDER PRICE |
|-----------------|--|
| Description | Instrument price per quantity unit (To be calculated with Price/Index Level Decimals). For the Market Data feed: -Set to Null Value for priceless orders. For the Order Entry -It is mandatory for priced orders (Limit, Stop-limit, Average Price) and must be set to Null Value where the price is irrelevant (Market, Stop-market, Peg, MTL). |
| Format | Price (signed integer 64) |
| Length | 8 |
| Possible Values | $-2^{63}+1..2^{63}-1$ |
| Conditions | Negative values authorized on ETF Access when the order is sent on the NAV trading Order Book (EMM = 8). Mandatory in NewOrder (01) for RFQ Confirmation. |
| Used In | New Order (01) Ack (03) Cancel Replace (06) Cross Order (67) |
| Used For | Cash and Derivatives |

Order Priority

| FIELD NAME | ORDER PRIORITY |
|-----------------|--|
| Description | Rank giving the priority of the order. The order with the lowest value of Order Priority has the highest priority. Order Priority is unique per Symbol Index and EMM, therefore, it is also used as the unique order identifier in the market data feed. Order Priority should then allow clients to reconcile their orders between private order entry and market data feed. Used in conjunction with Previous Priority, for market data only. |
| Format | Numerical ID (unsigned integer 64) |
| Length | 8 |
| Possible Values | $0..2^{64}-2$ |
| Used In | Ack (03) |
| Used For | Cash and Derivatives |

Order Quantity

| FIELD NAME | ORDER QUANTITY |
|-----------------|---|
| Description | Total order quantity, per quantity unit. (To be calculated with Quantity Decimals). |
| Format | Quantity (unsigned integer 64) |
| Length | 8 |
| Possible Values | $0..2^{64}-2$ |
| Conditions | In Wave For Liquidity (73) message: |

| FIELD NAME | ORDER QUANTITY |
|------------|---|
| | - required to be provided with a value different than Null Value only when IOI Quantity is different than "Undisclosed Qty" – ignored in all other cases; |
| Used In | New Order (01) Ack (03) Cancel Replace (06) Quote Request (10) RFQ Notification (35) Cross Order (67) Wave For Liquidity (73) Wave For Liquidity Notification (74) |
| Used For | Cash and Derivatives |

Order Side

| FIELD NAME | ORDER SIDE |
|-----------------|---|
| Description | Indicates the side of the order. Please note that the value Cross is used only for the Order Entry, it will never be populated in the Market Data feed. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Buy 2 = Sell 3 = Cross [i] |
| Conditions | [i]The value Cross is only used in the NewOrder (01) message. For Cancel Replace (06) and Cancel Request (10) messages if the Order Side different than the Order Side of the targeted order, the request will be rejected with the reason "Unknown Order". For RFQ Notification (35) message Order Side may not be provided if the RFQ issuer did not specified the side in its request. |
| Used In | New Order (01) Ack (03) Fill (04) Cancel Replace (06) Cancel Request (12) Mass Cancel (13) Mass Cancel Ack (14) Quote Request (10) RFQ Notification (35) RFQ Matching Status (36) RFQ LP Matching Status (37) Cross Order (67) |
| Used For | Cash and Derivatives |

Order Size Limit

| FIELD NAME | ORDER SIZE LIMIT |
|-------------|---|
| Description | Indicates the Maximum Order Size above which all orders will be rejected by Matching Engine. (To be calculated with Quantity Decimals). |
| Format | Quantity (unsigned integer 64) |
| Length | 8 |

| FIELD NAME | ORDER SIZE LIMIT |
|-----------------|--|
| Possible Values | 0..2 ⁶⁴ -2 |
| Used In | User Notification (39) |
| Used For | Derivatives |

Order Type

| FIELD NAME | ORDER TYPE |
|-----------------|---|
| Description | Type of Order. Please note that the values Stop-market/Stop-market-on-Quote, Stop limit/Stop-limit-on-quote, Average Price, Iceberg and Mid-Point Peg are used only for the Order Entry, they will never be populated in the Market Data feed. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Market 2 = Limit 3 = Stop-market or Stop-market-on-quote 4 = Stop-limit or Stop-limit-on-quote 5 = Primary Peg 6 = Market to limit 7 = Market Peg 8 = Mid-Point Peg 9 = Average Price 10 = Iceberg |
| Conditions | Value '9' is used only for RFQ validation on ETF Access platform. The only possible value in case of Cross Order (67) is value '2'. For Cancel Replace (06) and Cancel Request (10) messages if the Order Type different than the Order Type of the targeted order, the request will be rejected with the reason "Unknown Order". |
| Used In | New Order (01) Cancel Replace (06) Cancel Request (12) Cross Order (67) |
| Used For | Cash and Derivatives |

Original Client Order ID

| FIELD NAME | ORIGINAL CLIENT ORDER ID |
|-----------------|---|
| Description | Client order ID of the original order. |
| Format | Numerical ID (signed integer 64) |
| Length | 8 |
| Possible Values | -2 ⁶³ ..2 ⁶³ -1 |
| Conditions | Original Client Order ID is provided in outbound messages only as response of a modification or cancellation, which is done with the Original Client Order ID specified by the client as the criteria for the modification or cancellation. |
| Used In | Ack (03) Kill (05) Cancel Replace (06) Cancel Request (12) Open Order Request (15) |

| FIELD NAME | ORIGINAL CLIENT ORDER ID |
|------------|--|
| | Ownership Request (18) |
| Used For | Cash and Derivatives |

Original IOI ID

| FIELD NAME | ORIGINAL IOI ID |
|-----------------|---|
| Description | Reference identifier used with CANCEL and REPLACE transaction types. |
| Format | Numerical ID (signed integer 64) |
| Length | 8 |
| Possible Values | $-2^{63}+1..2^{63}-1$ |
| Conditions | In Wave For Liquidity (73) required to be populated with a value different than SBE Null Value when: - attempting to cancel or modify a previously submitted indication of interest; In Wave For Liquidity Notification (74) provided with a value different than SBE Null Value when: - the message is being sent to acknowledge the cancellation or modification of a previously submitted indication of interest; |
| Used In | Wave For Liquidity (73) Wave For Liquidity Notification (74) |
| Used For | Cash |

Order Origin

| FIELD NAME | ORDER ORIGIN |
|-----------------|-----------------------------------|
| Description | Indicates the origin of the order |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 =COB 2 =LP Answer |
| Used In | RFQ Audit (72) |
| Used For | Cash |

Order Tolerable Price

| FIELD NAME | ORDER TOLERABLE PRICE |
|-----------------|--|
| Description | Allows the RFC Initiator to provide an improving tolerable price on the non-client side of the cross. This tolerable price is intended to anticipate possible price improvements, generated by RFC Reactors. In case RFC Initiator does not want to match RFC Reactors improved prices, this field must be provided with the Null value. (to be calculated with Price/Index Level Decimals). |
| Format | Price (signed integer 64) |
| Length | 8 |
| Possible Values | $-2^{63}+1..2^{63}-1$ |
| Conditions | In Ack (03) message for the Derivative markets, only sent with a value different than SBE Null value when the Ack Type is set 22 (Cross Order Ack), for the House leg of the RFC and only when clients have provided it in the inbound message. |
| Used In | Cross Order (67) Ack (03) |
| Used For | Derivatives |

P

Package ID

| FIELD NAME | PACKAGE ID |
|-----------------|-------------------------------|
| Description | [N/A] Deprecated field |
| Format | Alphanumerical ID (character) |
| Length | 12 |
| Possible Values | (See field description) |
| Used In | Fill (04) |
| Used For | Derivatives |

Parent Execution ID

| FIELD NAME | PARENT EXECUTION ID |
|-----------------|---|
| Description | Unique identifier of a parent trade executed on the strategy |
| Format | Numerical ID (unsigned integer 32) |
| Length | 4 |
| Possible Values | 0..2 ³² -2 |
| Conditions | For the Derivatives markets Trade Bust Notification (19) messages for a strategy are sent on the individual leg level. When provided the field Parent Execution ID identified the Execution ID provided in the Block of the Fill (04) messages and allows to map all legs to the Fill (04) message done for the strategy. |
| Used In | Trade Bust Notification (19) |
| Used For | Derivatives |

Parent Symbol Index

| FIELD NAME | PARENT SYMBOL INDEX |
|-----------------|---|
| Description | Exchange identification code used to point to the strategy in the leg specific messages |
| Format | Numerical ID (unsigned integer 32) |
| Length | 4 |
| Possible Values | 0..2 ³² -2 |
| Conditions | For the Derivatives markets Trade Bust Notification (19) messages for a strategy are sent on the individual leg level. When provided the field Parent Symbol Index, together with field Parent Execution ID identify the original trade communicated via Fill (04) message. |
| Used In | Trade Bust Notification (19) |
| Used For | Derivatives |

Parent Trade Unique Identifier

| FIELD NAME | PARENT TRADE UNIQUE IDENTIFIER |
|-------------|--|
| Description | The Parent Trade Unique Identifier is the Trade Unique Identifier of the strategy trade. |
| Format | Alphanumerical ID (character) |
| Length | 16 |
| Conditions | Filled in case of a leg trade cancelled, this field refers to the Trade Unique Identifier of the strategy. |
| Used In | Trade Bust Notification (19) |
| Used For | Derivatives |

Peg Offset

| FIELD NAME | PEG OFFSET |
|-----------------|--|
| Description | Tick offset for a pegged order. Used to indicate the signed tick added to the peg reference for a pegged order. |
| Format | Numerical ID (signed integer 8) |
| Length | 1 |
| Possible Values | -128..127 |
| Used In | New Order (01) Cancel Replace (06) |
| Used For | Cash |

Potential Matching Price

| FIELD NAME | POTENTIAL MATCHING PRICE |
|-----------------|---|
| Description | The Potential Matching Price indicates to the RFQ issuer the matching price for the "Potential Matching Quantity". The Potential Matching Price is recalculated and resend to the RFQ issuer through the RFQ Matching Status (36) message each time the order book is updated. |
| Format | Price (signed integer 64) |
| Length | 8 |
| Possible Values | $-2^{63}..2^{63}-1$ |
| Conditions | Can be a negative when the price is expressed in bps. Available only for EMM = 8 (ETF MTF - NAV) |
| Used In | RFQ Matching Status (36) |
| Used For | Cash |

Potential Matching Quantity

| FIELD NAME | POTENTIAL MATCHING QUANTITY |
|-----------------|---|
| Description | The potential matching quantity indicates the maximum volume that would be matched in case of an RFQ validation. When this message is sent to the RFQ issuer, it indicates the maximum volume that would be matched in case of an RFQ validation sent with an average limit price equal to the Potential Matching Price. When this message is sent to a Liquidity Provider, it indicates the total order quantity that would be matched in case of a validation sent by the RFQ Issuer. |
| Format | Quantity (unsigned integer 64) |
| Length | 8 |
| Possible Values | $0..2^{64}-2$ |
| Used In | RFQ Matching Status (36) RFQ LP Matching Status (37) |
| Used For | Cash |

Pre Matching Type

| FIELD NAME | PRE MATCHING TYPE |
|-------------|---|
| Description | Pre-matching delay indicator for a TCS Declaration. |
| Format | Enumerated (unsigned integer 8) |

| FIELD NAME | PRE MATCHING TYPE |
|-----------------|--|
| Length | 1 |
| Possible Values | 1 = Not pre-matched 2 = Pre-matched for the next fixing 3 = Pre-matched for the second next fixing 4 = Pre-matched for the third next fixing 5 = Pre-matched for the fourth next fixing 6 = Pre-matched for the fifth next fixing |
| Conditions | In inbound Declaration Entry (40) message (TCS), it is applicable only when Operation Type is '4' or '6'. In outbound Declaration Notice (42) messages (TCS) provided only for message with the Operation Type '4' or '6'. |
| Used In | Declaration Entry Ack (41) Declaration Notice (42) |
| Used For | TCS (Cash and Derivatives) |

Previous Day Indicator

| FIELD NAME | PREVIOUS DAY INDICATOR |
|-----------------|---|
| Description | Flag indicator whether declaration matched at D or D-1. (0: [indicated as False] means "matched at D" ; 1: [indicated as True] means "matched at D-1"). |
| Format | Boolean |
| Length | 1 |
| Possible Values | 0 = False 1 = True |
| Used In | Declaration Notice (42) |
| Used For | TCS (Cash and Derivatives) |

Price

| FIELD NAME | PRICE |
|-----------------|---|
| Description | Price per unit of quantity (to be calculated with the Price/Index Level Decimals). |
| Format | Price (signed integer 64) |
| Length | 8 |
| Possible Values | $-2^{63}+1..2^{63}-1$ |
| Conditions | In New Wholesale Order (64) message for the Derivative markets, when price is not applicable, the field Price should be populated with value of zero (0). For DeclarationEntry (40), it must always be provided when Operation Type = '1', '5' or '7'. For DeclarationNotice (42), it is provided when Operation Type = '1', '5' or '7'. For a trade/declaration on Funds if expressed as an amount (Operation Type = '6'), this field should not be provided. |
| Used In | Price Input (28) New Wholesale Order (64) Wholesale Order Ack (65) Declaration Entry (40) Declaration Notice (42) Fund Price Input (44) Fund Price Input Ack (45) |
| Used For | Cash and Derivatives |

Principal Code

| FIELD NAME | PRINCIPAL CODE |
|-------------|---|
| Description | Identifies the beneficiary of the transaction when trading on behalf of another establishment. Clients may provide a TCS Member ID or an Euronext Member ID. |
| Format | Alphanumerical ID (character 8) |
| Length | 8 |
| Used In | Declaration Entry (40) Declaration Notice (42) |
| Used For | TCS (Cash and Derivatives) |

Principal Code Cross

| FIELD NAME | PRINCIPAL CODE CROSS |
|-------------|---|
| Description | Identifies the beneficiary of the transaction when trading on behalf of another establishment, for the sell side of a cross order. Clients may provide a TCS Member ID or an Euronext Member ID. |
| Format | Alphanumerical ID (character 8) |
| Length | 8 |
| Used In | Declaration Entry (40) Declaration Notice (42) |
| Used For | TCS (Cash and Derivatives) |

Protection Threshold

| FIELD NAME | PROTECTION THRESHOLD |
|-----------------|--|
| Description | Limit of the MM protection. |
| Format | Quantity (unsigned integer 64) |
| Length | 8 |
| Possible Values | 0..2 ⁶⁴ -2 |
| Conditions | In message MM Protection Request (62) must be populated if Request Type is Set or Adjust |
| Used In | MM Protection Request (62) MM Protection Ack (63) |
| Used For | Derivatives |

Protection Type

| FIELD NAME | PROTECTION TYPE |
|-----------------|--|
| Description | Type of Market Maker protection. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Delta 2 = Volume |
| Used In | MM Protection Request (62) MM Protection Ack (63) |
| Used For | Derivatives |

Quantity

| FIELD NAME | QUANTITY |
|-----------------|---|
| Description | Number of traded or ordered units (to be calculated with Quantity Decimals). |
| Format | Quantity (unsigned integer 64) |
| Length | 8 |
| Possible Values | $0..2^{64}-2$ |
| Conditions | For Declaration Entry (40) message, it must always be provided when Operation Type = '1', '4', '5' or '7'. For a trade/declaration on Funds if expressed as an amount (Operation Type = '6'), this field should not be provided. |
| Used In | New Wholesale Order (64) Wholesale Order Ack (65) Declaration Entry (40) Declaration Notice (42) |
| Used For | Cash and Derivatives |

Queueing Indicator

| FIELD NAME | QUEUEING INDICATOR |
|-----------------|---|
| Description | Indicates whether the client requests its orders to be queued or rejected in case of throttling. (0: False - Reject ; 1: True - Queue). |
| Format | Boolean (unsigned integer 8) |
| Length | 1 |
| Possible Values | 0 = False 1 = True |
| Used In | Logon (100) |
| Used For | Cash and Derivatives |

QuoteReqID

| FIELD NAME | QUOTEREQID |
|-----------------|--|
| Description | Numerical RFQ identifier assigned by the matching engine, unique per instrument and EMM. |
| Format | Numerical ID (unsigned integer 64) |
| Length | 8 |
| Possible Values | $0..2^{64}-2$ |
| Conditions | Mandatory if 'RFQ Answer' or 'RFQ Confirmation' (field Execution Instruction) = Yes |
| Used In | New Order (01) RFQ Notification (35) RFQ Matching Status (36) RFQ LP Matching Status (37) |
| Used For | Cash |

R

Recipient Type

| FIELD NAME | RECIPIENT TYPE |
|-----------------|--|
| Description | [N/A] Indicates whether the message is sent to the RFQ issuer or the Liquidity Provider. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = RFQ Issuer 2 = RFQ recipient (LP) |
| Used In | RFQ Matching Status (36) |
| Used For | Cash |

Rejected Client Message Sequence Number

| FIELD NAME | REJECTED CLIENT MESSAGE SEQUENCE NUMBER |
|-----------------|---|
| Description | Indicates the Client Message Sequence Number of the rejected message. |
| Format | Sequence (unsigned integer 32) |
| Length | 4 |
| Possible Values | 0..2 ³² -2 |
| Used In | Technical Reject (108) |
| Used For | Cash and Derivatives |

Rejected Message

| FIELD NAME | REJECTED MESSAGE |
|-----------------|---|
| Description | [N/A] <i>Deprecated field</i> |
| Format | Numerical ID (unsigned integer 8) |
| Length | 1 |
| Possible Values | 0..2 ⁸ -2 |
| Used In | Reject (07) Technical Reject (108) |
| Used For | Cash and Derivatives |

Rejected Message ID

| FIELD NAME | REJECTED MESSAGE ID |
|-----------------|--|
| Description | Provides the ID (Template ID) of the rejected message. E.g. 01 for NewOrder, 06 for CancelReplace... |
| Format | Numerical ID (unsigned integer 16) |
| Length | 2 |
| Possible Values | 0..2 ¹⁶ -2 |
| Used In | Reject (07) Technical Reject (108) Declaration Entry Reject (46) |
| Used For | Cash and Derivatives |

Request Type

| FIELD NAME | REQUEST TYPE |
|-----------------|--|
| Description | This field gives the type of request made by the Market Maker for the Market Maker Protection. At the time of activation, the Market Maker (MM) is able to Set (1) Protection Limits and Limit Breach actions for each protection type activated on a contract. MM can also Get (2) the current reached value of the limits, and breach actions can be updated by submitting an Adjust (3) at any time while the facility is active. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Set 2 = Get 3 = Adjust |
| Used In | MM Protection Request (62) |
| Used For | Derivatives |

Response Type

| FIELD NAME | RESPONSE TYPE |
|-----------------|--|
| Description | Indicates if incoming message is accepted or rejected. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 0 = Accept 1 = Reject |
| Used In | Wholesale Order Ack (65) |
| Used For | Derivatives |

Resynchronization ID

| FIELD NAME | RESYNCHRONIZATION ID |
|-----------------|---|
| Description | Each instrument is assigned to a Resynchronization ID, that is use in case of failover. |
| Format | Numerical ID (unsigned integer 16) |
| Length | 2 |
| Possible Values | 0..2 ¹⁶ -2 |
| Used In | Instrument Synchronization List (50) Synchronization Time (51) |
| Used For | Cash and Derivatives |

RFE Answer

| FIELD NAME | RFE ANSWER |
|-----------------|--|
| Description | Indicate whether the Quotes message is an answer to a RequestForExecution (34) message or not. (0: No [False] ; 1: Yes [True]) |
| Format | Boolean (unsigned integer 8) |
| Length | 1 |
| Possible Values | 0 = False 1 = True |
| Conditions | For the Derivatives segments this field is ignored by Optiq. |
| Used In | Quotes (08) |

| FIELD NAME | RFE ANSWER |
|------------|----------------------|
| Used For | Cash and Derivatives |

RFQ Update Type

| FIELD NAME | RFQ UPDATE TYPE |
|-----------------|---|
| Description | [N/A] Indicates the current status of the RFQ. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = New 2 = Cancelled by the RFQ issuer 3 = Expired 4 = Partially or Fully Matched |
| Conditions | Value 1 is used to notify to LPs a new RFQ is available. Value 2 is used to notify to LPs the concerned RFQ (identified through the field QuoteReqID) is no more available as it has been cancelled by the RFQ Issuer. Value 3 is used to notify to LPs the concerned RFQ (identified through the field QuoteReqID) has expired after the predefine period of time without any confirmation order from the RFQ issuer. Value 4 is used to notify to LPs the concerned RFQ (identified through the field QuoteReqID) is no more available as it has been matched. |
| Used In | RFQ Notification (35) |
| Used For | Cash |

S

Security Request ID

| FIELD NAME | SECURITY REQUEST ID |
|-----------------|--|
| Description | ID of a strategy security definition request. Clients must provide a Security Request ID in every Security Definition Request (60) message, otherwise the message will be immediately rejected by the OEG. Clients should provide any numerical value. The Exchange recommends setting an unique ID per request and Firm. The Security Request ID value is not checked by the Exchange (besides the format), it is simply returned in the corresponding Security Definition Ack (61) message to allow clients reconciling the response message with their original security definition request. |
| Format | Numerical ID (signed integer 64) |
| Length | 8 |
| Possible Values | $-2^{63}+1..2^{63}-1$ |
| Used In | Security Definition Request (60) Security Definition Ack (61) |
| Used For | Derivatives |

Sell Revision Indicator

| FIELD NAME | SELL REVISION INDICATOR |
|-------------|--|
| Description | Indicates whether the offer quote is a new quote, a replacement of a previous quote or a cancellation. |
| Format | Enumerated (unsigned integer 8) |

| FIELD NAME | SELL REVISION INDICATOR |
|-----------------|--|
| Length | 1 |
| Possible Values | 0 = New 1 = Replacement 2 = Cancellation |
| Used In | Quote Ack (09) |
| Used For | Cash and Derivatives |

Settlement Flag

| FIELD NAME | SETTLEMENT FLAG |
|-----------------|---|
| Description | Indicates whether the declaration must be settled or not. (0: [indicated as False] means "Not Settled" ; 1: [indicated as True] means "Settled"). |
| Format | Boolean |
| Length | 1 |
| Possible Values | 0 = False 1 = True |
| Conditions | In outbound Declaration Notice (42) messages (from TCS) field Settlement Flag is always provided. |
| Used In | Declaration Entry (40) Declaration Notice (42) |
| Used For | TCS (Cash and Derivatives) |

Settlement Period

| FIELD NAME | SETTLEMENT PERIOD |
|-----------------|--|
| Description | [N/A] Indicates the settlement delay in trading days, from 0 to 30 days. (TCS is using the Settlement Period defined in the referential at instrument) |
| Format | Numerical |
| Length | 1 |
| Possible Values | From 0 to 30 |
| Conditions | In outbound Declaration Notice (42) messages (from TCS) field Settlement Period is provided if the field Settlement Flag is set to 1 = True but is ignored by TCS. |
| Used In | Declaration Entry (40) Declaration Notice (42) |
| Used For | TCS (Cash and Derivatives) |

Side

| FIELD NAME | SIDE |
|-----------------|--|
| Description | Indicates the Executing Side |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Buy 2 = Sell |
| Used In | New Wholesale Order (64) Declaration Entry (40) |
| Used For | Cash and Derivatives |

Software Provider

| FIELD NAME | SOFTWARE PROVIDER |
|-----------------|--|
| Description | Free text field entered by the client in the Logon (100) message, identifying the provider of the software used for exchange of messages for trading purposes. |
| Format | Text (character) |
| Length | 8 |
| Possible Values | (Free Text) |
| Used In | Logon (100) |
| Used For | Cash and Derivatives |

Start Time Vwap

| FIELD NAME | START TIME VWAP |
|-----------------|--|
| Description | Start time for the Volume Weight Average price computation period (Number of seconds since the beginning of the day – UTC Time). |
| Format | Intraday Time in Seconds |
| Length | 4 |
| Possible Values | From 0 to 2 ³² -2 |
| Conditions | For Declaration Entry (40) message, it is used for declarations when Operation Type = '5' ; and if not provided it is assumed that the VWAP calculation period lasts until the end of the trading session. |
| Used In | Declaration Entry (40) Declaration Notice (42) |
| Used For | TCS (Cash) |

Stop Trigger Price

| FIELD NAME | STOP TRIGGER PRICE |
|-----------------|---|
| Description | Stop Trigger Price is mandatory for stop orders. |
| Format | Price (signed integer 64) |
| Length | 8 |
| Possible Values | -2 ⁶³ +1..2 ⁶³ -1 |
| Used In | New Order (01) Cancel Replace (06) |
| Used For | Cash |

STP ID

| FIELD NAME | STP ID |
|-----------------|--|
| Description | Identifier of a group of Users or Traders sharing the same business activity at the same Firm. |
| Format | Numerical ID (unsigned integer 16) |
| Length | 2 |
| Possible Values | 0..2 ¹⁶ -1 |
| Used In | New Order (01) Cancel Replace (06) Quotes (08) |
| Used For | Cash and Derivatives |

Strategy Code

| FIELD NAME | STRATEGY CODE |
|-----------------|--|
| Description | Exchange-recognized strategy code |
| Format | Alphanumerical ID (character) |
| Length | 1 |
| Possible Values | <p>A = Jelly Roll</p> <p>B = Butterfly</p> <p>C = Call or Put Cabinet - Deprecated</p> <p>D = Spread</p> <p>E = Calendar Spread</p> <p>F = Diagonal Calendar Spread</p> <p>G = Guts</p> <p>H = Two by One Ratio Spread</p> <p>I = Iron Butterfly</p> <p>J = Combo</p> <p>K = Strangle</p> <p>L = Ladder</p> <p>M = Strip</p> <p>N = Straddle Calendar Spread</p> <p>O = Pack</p> <p>P = Diagonal Straddle Calendar Spread</p> <p>Q = Simple Inter Commodity Spread</p> <p>R = Conversion / Reversal</p> <p>S = Straddle</p> <p>T = ICS one sided combination same expiry</p> <p>U = ICS two sided combination same expiry</p> <p>V = Volatility Trade</p> <p>W = Condor</p> <p>X = Box</p> <p>Y = Bundle</p> <p>Z = Reduced Tick Spread - Deprecated</p> <p>a = Ladder versus Underlying</p> <p>b = Butterfly versus Underlying</p> <p>c = Call Spread versus Put versus Underlying</p> <p>d = Call or Put Spread versus Underlying</p> <p>e = Call or Put Calendar Spread versus Underlying</p> <p>f = Call/Put Diagonal Calendar Spread versus Underlying</p> <p>g = Guts versus Underlying</p> <p>h = Two by One Call or Put Ratio Spread versus Underlying</p> <p>i = Iron Butterfly versus Underlying</p> <p>j = Combo versus Underlying</p> <p>k = Strangle versus Underlying</p> <p>m = Exchange for Physical</p> <p>n = Straddle Calendar Spread versus Underlying</p> <p>p = Put Spread versus Call versus Underlying</p> <p>q = Diagonal Straddle Calendar Spread versus Underlying</p> <p>r = Synthetic</p> <p>s = Straddle versus Underlying</p> <p>t = Condor versus Underlying</p> |

| FIELD NAME | STRATEGY CODE |
|------------|--|
| | u = Buy Write - Deprecated v = Iron Condor versus Underlying w = Iron Condor x = Call Spread versus Sell a Put y = Put Spread versus Sell a Call z = Put Straddle versus Sell a Call or a Put |
| Used In | Security Definition Request (60) New Wholesale Order (64) Wholesale Order Ack (65) |
| Used For | Derivatives |

Symbol Index

| FIELD NAME | SYMBOL INDEX |
|-----------------|---|
| Description | Exchange identification code of the instrument/contract. This identifier is unique per triplet: MIC, ISIN and currency. The correspondence of the Symbol Index and with the instrument characteristics is provided in the standing data messages and associated files. Symbol Index is valid for the life of the instrument. |
| Format | Numerical ID (unsigned integer 32) |
| Length | 4 |
| Possible Values | 0..2 ³² -1 |
| Conditions | For inbound messages, the Symbol Index must be specified. For second listing place trade, the Symbol Index and the MIC of secondary listing must be specified. If provided in the User Notification (39) message, it specifies the scope of the action specified in User Status. For Derivatives and for Risk Guard functionality it's filled each time the User status is linked with Block / Unblock or Order Size Limit and identifies the contract upon which the specified action was applied. In the Reject (07) message, it is populated only if provided as a valid value in the corresponding Inbound request AND the corresponding Inbound request was technically correctly formatted; otherwise it is provided at the Null value. Field not populated in Reject (07) messages for rejection of strategy creation on derivatives markets. For all messages, with exception of MM Sign-in and MM Protection Request, this field represent the Symbol Index of the Instrument. For the MM Sign-in and MM Protection Request this field represents the Symbol Index of the Contract. For New Wholesale Order this represents numerical leg instrument identifier (Security ID). |
| Used In | New Order (01) Ack (03) Fill (04) Kill (05) Cancel Replace (06) Reject (07) Quotes (08) Quote Ack (09) Quote Request (10) Cancel Request (12) Mass Cancel (13) Mass Cancel Ack (14) Open Order Request (15) Ownership Request Ack (17) |

T

Target Counterparties

| FIELD NAME | TARGET COUNTERPARTIES |
|-------------|---|
| Description | <p>Allows members to specify the targeted counterparties of the submitted indication of interest. Values specified, in the list of possible values, indicate the bit positions that should be used to set as zero (0) or one (1). A single field contains multiple values provided in different positions.</p> <ul style="list-style-type: none"> - Euronext data Driven: indicates whether the submitter of the indication of interest aims to notify the counterparties which belong to the Euronext Data Driven group or not. (0: No ; 1: Yes) - Interest Lists: indicates whether the submitter of the indication of interest aims to notify the counterparties which belong to the Interest Lists group or not. (0: No ; 1: Yes) - Holdings: indicates whether the submitter of the indication of interest aims to notify the counterparties which belong to the Holdings group or not. (0: No ; 1: Yes) - Buy Side: indicates whether the submitter of the indication of interest aims to notify the counterparties which belong to the Buy Side group or not. (0: No ; 1: Yes) |

| FIELD NAME | TARGET COUNTERPARTIES |
|-----------------|---|
| | <ul style="list-style-type: none"> - Sell Side: indicates whether the submitter of the indication of interest aims to notify the counterparties which belong to the Sell Side group or not. (0: No ; 1: Yes) - Quality of Sell Side: indicates whether the submitter of the indication of interest aims to notify the counterparties which belong to the Quality Sell Side group or not. (0: No ; 1: Yes) - Local Community of Specialists AMS: indicates whether the submitter of the indication of interest aims to notify the counterparties which belong to the Local Community of Specialists of Amsterdam market or not. (0: No ; 1: Yes) - Local Community of Specialists PAR: indicates whether the submitter of the indication of interest aims to notify the counterparties which belong to the Local Community of Specialists of Paris market or not. (0: No ; 1: Yes) |
| Format | Bitmap (unsigned integer 16) |
| Length | 1 |
| Possible Values | 0 = Euronext Data Driven 1 = Interest Lists 2 = Holdings 3 = Buy Side 4 = Sell Side 5 = Quality of Sell Side Counterparty 6 = Local Community of Specialist AMS 7 = Local Community of Specialist PAR 8 = Local Community of Specialist BRU 9 = Local Community of Specialist LIS |
| Used In | Wave For Liquidity (73) |
| Used For | Cash |

TargetExecutionWithinFirmShortCode

| FIELD NAME | TARGETEXECUTIONWITHINFIRMSHORTCODE |
|-----------------|--|
| Description | Value of the target Execution Within Firm Short Code used as a filter to reduce scope of the Mass Cancel request |
| Format | Numerical ID (signed integer 32) |
| Length | 4 |
| Possible Values | $-2^{31}+1..2^{31}-1$ |
| Conditions | If provided in the MassCancel (13) message, the field acts as a filter to reduce the scope of the orders and quotes submitted by the Firm and specified Short code. Value provided in this field may differ from the value specified in the field ExecutionWithinFirmShortCode within the MassCancel (13) message. |
| Used In | Mass Cancel (13) Mass Cancel Ack (14) |
| Used For | Cash and Derivatives |

Technical Origin

| FIELD NAME | TECHNICAL ORIGIN |
|-------------|---|
| Description | Indicates the origin of the order; for example, manual entry, or an order coming from a Program Trading system. This field is part of the clearing aggregate. |

| FIELD NAME | TECHNICAL ORIGIN |
|-----------------|--|
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Index trading arbitrage 2 = Portfolio strategy 3 = Unwind order 4 = Other orders (default) 5 = Cross margining |
| Used In | New Order (01) Cancel Replace (06) Quotes (08) New Wholesale Order (64) Cross Order (67) |
| Used For | Cash and Derivatives |

Time In Force

| FIELD NAME | TIME IN FORCE |
|-----------------|---|
| Description | Specifies the maximum validity of an order. For Stop orders it provides the maximum validity when not triggered. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 0 = Day 1 = Good Till Cancel 2 = Valid for Uncrossing 3 = Immediate or Cancel 4 = Fill or Kill 5 = Good till Time 6 = Good till Date 7 = Valid for Closing Uncrossing 8 = Valid for Session |
| Conditions | Modifying order from or to one validity type to any other, will result in loss of priority. |
| Used In | New Order (01) Cancel Replace (06) |
| Used For | Cash and Derivatives |

Total Affected Orders

| FIELD NAME | TOTAL AFFECTED ORDERS |
|-----------------|--|
| Description | Number of orders affected following a global request. It is set to -1 to indicate that the request is processed. |
| Format | Numerical ID (signed integer 32) |
| Length | 4 |
| Possible Values | $-2^{31}+1..2^{31}-1$ |
| Used In | Mass Cancel Ack (14) Ownership Request Ack (17) |
| Used For | Cash and Derivatives |

Trade Qualifier

| FIELD NAME | TRADE QUALIFIER |
|-----------------|---|
| Description | <p>Trade Qualifier. Values specified, in the list of possible values, indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions.</p> <ul style="list-style-type: none"> ■ bit in position 0 - Uncrossing Trade: indicates whether the trade occurred during an Uncrossing, or not. (0: No; 1: Yes) ■ bit in position 1 - First Trade Price: indicates whether the price of the trade is the first trade price of the day, or not. (0: No; 1: Yes) Please note that there can be multiple Trades with the “First Trade Price” flag set to Yes. ■ bit in position 2 - Passive Order: indicates whether the corresponding order was passive, or not. (0: No; 1: Yes) ■ bit in position 3 - Aggressive Order: indicates whether the corresponding order was aggressive, or not. (0: No; 1: Yes) ■ bit in position 4 - Trade Creation by Market Operations: indicates whether the trade results from a creation by Market Operations, or not. (0: No; 1: Yes) - For future use ■ bit in position 5 - NAV Trade expressed in bps: indicates whether the trade results from a NAV trade expressed in basis point on the ETF Access platform. (0: No; 1: Yes) ■ bit in position 6 - NAV Trade expressed in price currency: indicates whether the trade is a NAV trade expressed in price currency. This trade is always an update from a previous NAV trade expressed in basis point on the ETF Access platform. (0: No; 1: Yes) ■ bit in position 7 - Deferred Publication: indicates whether the trade publication is deferred or immediate. (0: Immediate Publication; 1: Deferred Publication) <p>If all bits are set to 0, then it means that no Trade Qualifier applies.</p> <p>For the Market Data feed: The values Passive Order and Aggressive Order always qualify the Buy order.</p> |
| Format | Bitmap (unsigned integer 8) |
| Length | 1 |
| Possible Values | <p>0 = Uncrossing Trade</p> <p>1 = First Trade Price</p> <p>2 = Passive Order</p> <p>3 = Aggressive Order</p> <p>4 = Trade Creation by Market Operations</p> <p>5 = NAV Trade expressed in bps</p> <p>6 = NAV Trade expressed in price currency</p> <p>7 = Deferred Publication</p> |
| Conditions | Values 5 and 6 will be used only for the NAV trading on the ETF Access platform. |
| Used In | Fill (04) |
| Used For | Cash and Derivatives |

Trade Time

| FIELD NAME | TRADE TIME |
|-----------------|--|
| Description | <p>Time of the trade.</p> <p>Equals to the Matching Engine IN time (in ns), when the aggressor enters the matching engine.</p> |
| Format | Epoch Time in Nanoseconds (unsigned integer 64) |
| Length | 8 |
| Possible Values | 0..2 ⁶⁴ -1 |
| Used In | Fill (04) Declaration Notice (42) |

| Conditions | In OEG, for the Fill (04) message, the following values are NOT used: '4', '7', '10', '14', '16', '19', '22', '24', '25', '36', '37', and '38'; for consistency purposes other values are also listed here, however they are deprecated, or are only used in other messages and market data |
| Used In | Fill (04) |
| Used For | Cash and Derivatives |

Trade Unique Identifier

| FIELD NAME | TRADE UNIQUE IDENTIFIER |
|-------------|--|
| Description | Alphanumerical code unique, consistent and persistent per ISO10383 segment MIC and per trading day assigned by the trading venue to a transaction. Trade Unique Identifier (TUI) is a field aimed at identifying an individual transaction and used as Trading Venue Transaction Identification Code (TVTIC). This is a unique transaction identification code generated by trading venues and disseminated to both the buying and the selling parties, in accordance with Article 12 of the Commission Delegated Regulation (EU) 2017/580 Regulatory Technical Standards (RTS). |
| Format | Alphanumerical ID (character) |
| Length | 16 |
| Conditions | Filled when message is related to New Trade or Cancel Trade. In StrategyFields of Fill (07) message, <i>Trade Unique Identifier</i> is filled with the trade unique identifier of the corresponding leg. In Declaration Notice (42) : Provided when notifying of Trade Creation or a Trade Cancellation. |
| Used In | Declaration Cancel and Refusal (43) Declaration Notice (42) Fill (04) Trade Bust Notification (19) |
| Used For | Cash and Derivatives TCS (Cash and Derivatives) |

Trading Capacity

| FIELD NAME | TRADING CAPACITY |
|-----------------|---|
| Description | Indicates whether the order submission results from trading as matched principal, on own account or as any other capacity. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Dealing on own account (DEAL) 2 = Matched principal (MTCH) 3 = Any other capacity (AOTC) |
| Conditions | In case the Membership Authorizations Control is activated, the trading capacity is mandatory in the New Wholesale Order and the Cross Order messages. If not populated, the order is rejected. |

| FIELD NAME | TRADING CAPACITY |
|------------|--|
| Used In | New Order (01) Quotes (08) New Wholesale Order (64) Cross Order (67) Declaration Entry (40) Declaration Notice (42) |
| Used For | Cash and Derivatives |

Trading Capacity Cross

| FIELD NAME | TRADING CAPACITY CROSS |
|-----------------|---|
| Description | Indicates for the sell side of a cross order whether the order submission results from trading as matched principal, on own account or as any other capacity. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Dealing on own account (DEAL) 2 = Matched principal (MTCH) 3 = Any other capacity (AOTC) |
| Conditions | For DeclarationEntry (40) message, it is mandatory for Cross order and indicates the trading capacity of the sell side. |
| Used In | New Order (01) Declaration Entry (40) Declaration Notice (42) |
| Used For | Cash and Derivatives TCS (Cash and Derivatives) |

Trading Session Validity

| FIELD NAME | TRADING SESSION VALIDITY |
|-----------------|--|
| Description | Trading Session Validity. Sessions represent the following: <ul style="list-style-type: none"> - Session 1 – Normal Trading Hours (Cash) - Session 2 – Normal Trading Hours (Derivatives for future use) - Session 3 – Extended Trading Hours (for Index Derivatives segment, correspond to the extension 17.30 CET - 22.00 CET for future use – for legacy Structured Products, corresponds to the first extension 18.30 CET - 20.00 CET – for Borsa Italiana Structured Products, corresponds to the extension 17.30 CET – 20.30 CET) - Session 4 – Second Extended Trading Hours (for legacy Structured Products, corresponds to the second extension 20.00 CET - 22.00 CET – for Borsa Italiana Structured Products, corresponds to the extension 20.30 CET – 22.00 CET) |
| Format | Bitmap (unsigned integer 8) |
| Length | 1 |
| Possible Values | Bit 1 = Session 1 Bit 2 = Session 2 Bit 3 = Session 3 Bit 4 = Session 4 |
| Conditions | For the Derivatives markets we accept all bits deactivated (0) only. For Cash Markets: |

| FIELD NAME | TRADING SESSION VALIDITY |
|------------|--|
| | <p>Scenario 1: to send an order valid only during the Normal Trading Hours (no ETH): Trading Session Validity populated with Session 1 OR 0 (all bits deactivated) OR 255 (Null value).</p> <p>Scenario 2: to send an order valid until 20:30 (for eligible instruments): Trading Session Validity populated with Session 1 + Session 3</p> <p>Scenario 3: to send an order valid until 22:00 (for eligible instruments): Trading Session Validity populated with Session 1 + Session 3 + Session 4</p> <p>Scenario 4: to send an order valid until the closing time of that instrument, regardless it is normal or extended trading hours: Trading Session Validity populated with Session 1 + Session 3 + Session 4 (applicable for Borsa Italiana Structured Products without condition, but for legacy Structured Products is applicable only for members eligible to Bilateral Settlement).</p> |
| Used In | New Order (01) Cancel Replace (06) |
| Used For | Cash and Derivatives |

Transaction Price Type

| FIELD NAME | TRANSACTION PRICE TYPE |
|-----------------|--|
| Description | Contribution to price formation or the price discovery process. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Plain Vanilla Trade 2 = Non Price Forming Trade (NPFT) 3 = <i>Trade Not Contributing to Price Discovery Process</i> 4 = Dark Trade (For Future Use) |
| Conditions | For Declaration Entry (42) message, it is provided only if previously set in the corresponding inbound Declaration Entry (40). |
| Used In | Declaration Entry (40) Declaration Notice (42) |
| Used For | TCS (Cash) |

Triggered Stop Time In Force

| FIELD NAME | TRIGGERED STOP TIME IN FORCE |
|-----------------|---|
| Description | <p>Specifies the maximum validity of an triggered stop order.</p> <p>If both Time In Force and Triggered Stop Time In Force are Good till Date they will both refer to the same Order Expiration Date (or Order Expiration Time) provided in the order. If Order Expiration Date is modified it will be for both untriggered stop and triggered stop, or only for the triggered stop if the order was previously triggered.</p> |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 0 = Day 1 = Good Till Cancel 3 = Immediate or Cancel 6 = Good till Date |
| Conditions | It is mandatory for stop orders. |
| Used In | New Order (01) Cancel Replace (06) |
| Used For | Cash and Derivatives |

U

Underlying Instrument ID

| FIELD NAME | UNDERLYING INSTRUMENT ID |
|-----------------|------------------------------------|
| Description | [N/A] Deprecated |
| Format | Numerical ID (unsigned integer 32) |
| Length | 4 |
| Possible Values | Deprecated |
| Used In | Fill (04) |
| Used For | Derivatives |

Underlying Last Traded Price

| FIELD NAME | UNDISCLOSED ICEBERG TYPE |
|-----------------|---------------------------|
| Description | [N/A] Deprecated |
| Format | Price (signed integer 64) |
| Length | 8 |
| Possible Values | Deprecated |
| Used In | Fill (04) |
| Used For | Derivatives |

Undisclosed Iceberg Type

| FIELD NAME | UNDISCLOSED ICEBERG TYPE |
|-----------------|--|
| Description | [N/A] Order handling related to the undisclosed part of an Iceberg order eligible to a matching in the Dark pool of liquidity. (For Future Use, Pending Regulatory Approval) |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Limit 2 = Peg Mid-Point 3 = Peg Primary 4 = Peg Market |
| Used In | New Order (01) Cancel Replace (06) |
| Used For | Cash |

Undisclosed Price

| FIELD NAME | UNDISCLOSED PRICE |
|-----------------|---|
| Description | [N/A] Optional price for the hidden part of an Iceberg order. (For Future Use, Pending Regulatory Approval) |
| Format | Price (signed integer 64) |
| Length | 8 |
| Possible Values | $-2^{63}+1..2^{63}-1$ |
| Used In | New Order (01) Cancel Replace (06) |
| Used For | Cash |

User Status

| FIELD NAME | USER STATUS |
|-----------------|--|
| Description | Status of the user. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Trader-Algo Suspended 2 = Trader-Algo Suspension Cleared 3 = Trader-Algo Killed 4 = Trader-Algo Kill Cleared 5 = Firm Suspended 6 = Firm Suspension Cleared 7 = Firm Killed 8 = Firm Kill Cleared 9 = DEA Suspended 10 = DEA Suspension Cleared 11 = DEA Killed 12 = DEA Kill Cleared 13 = Trader-Algo Suspended by Risk Manager 14 = Trader-Algo Unsuspended by Risk Manager 15 = Firm Suspended by Risk Manager 16 = Firm Unsuspended by Risk Manager 17 = DEA Suspended by Risk Manager 18 = DEA Unsuspended by Risk Manager 19 = Logical Access Suspended by Risk Manager 20 = Logical Access Unsuspended by Risk Manager 21 = Trader-Algo Blocked by Risk Manager 22 = Trader-Algo Unblocked by Risk Manager 23 = Firm Blocked by Risk Manager 24 = Firm Unblocked by Risk Manager 25 = DEA Blocked by Risk Manager 26 = DEA Unblocked by Risk Manager 27 = Logical Access Blocked by Risk Manager 28 = Logical Access Unblocked by Risk Manager 29 = Order Size Limit Activated by Risk Manager 30 = Order Size Limit Deactivated by Risk Manager 31 = OAL Activated for a Firm by Risk Manager 32 = OAL Deactivated for a Firm by Risk Manager 33 = OAL Activated for a Firm on a Logical Access by Risk Manager 34 = OAL Deactivated for a Firm on a Logical Access by Risk Manager 35 = MEP Activated by Risk Manager 36 = MEP Deactivated by Risk Manager 37 = MEP Action Activated: Accept only actions that decrease the position 38 = MEP Action Activated: Incoming requests are blocked 39 = MEP Action Activated: Book was purged and incoming requests are blocked 40 = MEP Action Activated: No Action, Alert Only 41 = No Action in place |
| Conditions | Value “30 = Order Size Limit Deactivated by Risk Manager”, “32 = OAL Deactivated for a Firm by Risk Manager” and “34 = OAL Deactivated for a Firm on a Logical Access by Risk Manager” |

| FIELD NAME | USER STATUS |
|------------|---|
| | are used to indicate that Order Size Limit/Order Amount Limit have been deactivated and, in this case, field Order Size Limit/ Order Amount Limit are populated with SBE Null value |
| Used In | User Notification (39) |
| Used For | Cash and Derivatives |

W

Waiver Indicator

| FIELD NAME | WAIVER INDICATOR |
|-----------------|--|
| Description | <p>Waiver Indicator. Values indicated (in list of possible values) indicate the bit positions that should be used to set zero (0) or one (1) values. A single field contains multiple values provided in different positions.</p> <p>ESMA description of the field:</p> <p>Indication as to whether the transaction was executed under a pre-trade waiver in accordance with Articles 4 and 9 of Regulation (EU) 600/2014. For all instruments: 'LRGS' = Large in scale For equity instruments: 'RFPT' = Reference price transaction 'NLIQ' = Negotiated transactions in liquid financial instruments 'OILQ' = Negotiated transactions in illiquid financial instruments 'PRIC' = Negotiated transactions subject to conditions other than the current market price of that equity financial instrument. For non-equity instruments: 'SIZE' = Above specific size transaction 'ILQD' = Illiquid instrument transaction This field shall only be populated for the market side of a transaction executed under a waiver on a trading venue.</p> |
| Format | Bitmap |
| Length | 1 |
| Possible Values | 0 = LRGS (for future use) 1 = RFPT 2 = NLIQ 3 = OILQ 4 = PRIC 5 = SIZE 6 = ILQD 7 = OMF (for future use) |
| Conditions | In outbound Declaration Notice (42) messages (from TCS) field Waiver Indicator is filled with one of the possible values if Declaration Status is set to 7 = Filled AND the transaction meets the conditions required for a waiver. |
| Used In | Declaration Entry Ack (41) Declaration Notice (42) |
| Used For | TCS (Cash and Derivatives) |

Wholesale Side

| FIELD NAME | WHOLESALE SIDE |
|-----------------|--|
| Description | Indicates the side of the Wholesale order. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 1 = Buy 2 = Sell 3 = Cross |
| Used In | New Wholesale Order (64) Wholesale Order Ack (65) |

| FIELD NAME | WHOLESALE SIDE |
|------------|----------------|
| Used For | Derivatives |

Wholesale Trade Type

| FIELD NAME | WHOLESALE TRADE TYPE |
|-----------------|--|
| Description | Type of the Wholesale trade being submitted. |
| Format | Enumerated (unsigned integer 8) |
| Length | 1 |
| Possible Values | 0 = Large in Scale Trade 1 = Against Actual 2 = Exchange For Swaps |
| Used In | New Wholesale Order (64) Wholesale Order Ack (65) |
| Used For | Derivatives |
